PARSONS' PILLS
Keep the bowels in condition

Evidence That Chicago Packers Met To Fix Prices.

CHICAGO, Feb. 27.—Evidence that nine of the ten defendants met every Tuesday afternoon between 1907 and 1910 behind closed doors in the directors room of the National Packing Company was given by two witnesses in the packers trial today.

The defendants charged with attending these secret meetings are: J. Ogden Armour, Arthur Meeker, Thomas J. Connors, Edward Morris, Louis H. Heyman, Louis F. Swift, and Edward F. Swift, Charles H. Swift, and Edward Tilden.

Francis A. Fowler was the only defendant the witnesses were unable to identify as having attended the Tuesday afternoon sessions. The government contends that it was at these meetings that the indicted packers or their representatives exchanged information in regard to their business and agreed upon shipments, selling prices, margins and a division of territory in violation of the criminal section of the Sherman law.

FLORENCEVILLE

(Crowded out last week)

The Missionary meeting which was held on Thursday at the home of Mrs. Beecher McCain, was well attended.

Rev. M. H. Manuel and Mrs. Manuel have left for a short vacation. While away they will be guests of Mr. Mannel's parents, Hawkshaw, York County.

The Sunday School will meet on Sunday as usual, but there will be no service on Sunday the 10th.

Mr. and Mrs. H. D. Thompson and Family have moved from the McCain house into the Foresters Hall above George Wheeler's store.

Hedley Jewett returned home from Montreal on Friday, where he went in charge of a number of potato cars.

The question of church union between the Presbyterian, Congregational and Methodist churches, passed among the presbyterians of Greenfield and the other sections of the congregation, with a majority of three.

Dr. Ernest Kirpatrick, of Cuba, delivered an address in the assembly hall of the F. C. School on Monday evening 26th. inst., on behalf of the Agricultural Society on the trade relations between Canada and Cuba. He strongly advised organization among the farmers, and asked them to buy shares in the Company.

Bearing Down Pains

What woman at sometime or other does not experience these dreadful bearing down pains. Mrs. E. Griffith, of Main street, Hepworth, Ont., says: "A heavy bearing-down pain had settled across my back and sides. I was often unable to stoop or straighten myself up. Many times each night I would have to leave my bed with the irregular and frequent secretions of the kidneys and just as done out in the morning as on retiring. I was languid and would have to let my house-work stand. Nothing I had tried would benefit me. I learned of Booth's Kidney Pills and concluded I would try them, which I did and soon found the long sought relief. My back strengthened and I began to feel better and stronger. I now enjoy my sleep without being disturbed and feel grateful to Booth's Kidney Pills for what they did for me."

Booth's Kidney Pills are a boon to women. She would know less of backaches if she took more of these wonderful pills. They are nature's greatest specific for all diseases of the kidneys and bladder. All druggists, 50c. box, or postpaid from The R. T. Booth Co., Ltd., Fort Erie, Ont. Sold and guaranteed by E. W. Mair.

FARM AND FIELD

THE MAN AND THE FARM

Application of Scientific Investigation in Soil, Plant, and Insect, Dignifies the Farmer's Work.

If, to the skill of the agriculturist, the farmer adds the taste of an artist, he may find a joy in so directing the forces of nature along the lines of beauty as to make of his farmstead and fields a series of pictures more alluring than can be found in any gallery. Not a few men have found in this indulgence of the art instinct an enjoyment which the millionaire might covet. Broad fields are better nurseries for high thought than contracted city offices, says C. R. Barnes, of the Minn. College of Agriculture. Nature-study uplifts them as can no other study save that of Divinity. Opportunities for scientific investigation offer themselves in every soil, plant, insect and type of animal life to be found on the land. The application of the results of such investigation to the practical work of the farm — yoking Science with Labor — dignifies the work, while multiplying its rewards.

The size of the farm does not limit the growth of the man.

It isn't the size of the farm, but the quality of the farmer's manhood, which determines his place in the community.

York County Farmer & Manufacturer

HARD WOODS IN CANADA

Canada is dependent for its lumber supply on the soft woods of the forest much more than is the United States, as seen from the 1910 Forest Products Report by the Dominion Forestry Branch. Of the 1910 Canadian lumber cut, amounting to nearly five billion feet, only one-twentieth consisted of hard woods or broad-leaved trees, worth barely five million dollars; on the other hand almost one-quarter of the lumber cut in the United States consists of hard woods, which country had far greater hard wood forests than ever did Canada. Canada is already feeling a shortage of the hard wood supply and makes up the national deficiency by importing annually from the United States hard wood lumber to the value of seven and a half million dollars. Thus the value of the hard woods imported into Canada during 1910 exceeded by 50 per cent. the value of the hard woods manufactured into lumber. Nearly all of these imports are from the United States, and consist of the most valuable species such as oak, hickory, tulip or yellow poplar, chestnut, gum, walnut, cherry and a large amount of hard pine which is so frequently used as a hard wood. From the above figures it is seen that we are becoming more and more dependent upon the United States, whose available supply for export is surely and rapidly decreasing.

MARE WITH WORMS

A very effectual drench, to expel worms from a mare is composed of from two to three ounces of the oil of turpentine, and from one to one and a half pints of raw linseed oil (the dose varies according to the size and weight of the mare). Shake well and administer slowly, as a drench after the mare has been fasted for twelve hours. Feed bran mash only until nursing commences; then give

half her usual allowance or reed, gradually increasing to full allowance as the purging ceases. If the parasites are of the pin or thread worm variety, injections into the rectum of mild salt solutions, or a dram of powdered aloes dissolved in a quart of lukewarm water, may be given every evening for two weeks.

In-Bred Chicks Delicate

The male bird should not on any account be related to the hens with which he is mated, as in-bred chickens are generally delicate, involving great difficulty in rearing, and they are almost invariably stunted in growth. Not only has in-breeding these disadvantages, but it makes the birds much more liable to disease. It is of course sometimes necessary to in-bred, but when possible it should be avoided, because as far as vitality qualities are concerned it has a very injurious effect. In the formation of a new breed, or in establishing a new colour or variety, it may be necessary to use closely related birds, but the greatest care must be exercised, and it should only be done by some one who knows what he is doing. Unless in-breeding is carried out with utmost care it has a very injurious effect upon the system.

Care for the Apple!

It may be all right under some conditions to have the apples picked and placed in piles in the orchard, there to be gone over later by "the gang" and packed into barrels. It is much better, however, to have the apples placed into barrels tree run as they are picked and carted to a shed or barn, there to be packed as meets the convenience of those who are mutually concerned. The culls have a real value. They are often allowed to go to waste when sorted out in the orchard. When in the barn they are surer of some profitable disposition. Then, too, we must not forget that apples placed in the barrels while heated, as they will be in a pile out of doors on a hot day, will not keep well. They are surprisingly short-lived compared with apples packed while cool, unbruised and dry. The advantage is all on the side of getting the apples under cover as speedily as possible after they are picked.

The Useful Mole

Moles are usually considered to be beneficial to the farmer, because they feed almost entirely upon the larvae of insects, grubs, etc., which they find in the ground. The injuries to garden plants, often laid at their door, may usually be traced to mice which use the runways of the mole. It is only when they work in flower beds, lawns, cold frames and hotbeds that moles cause serious annoyance. From the latter structures they can easily be excluded by the use of one-half inch mesh galvanized wire cloth.

Feed Value of Hay

One of the most important substances in any foodstuff is protein. All nutritive substances which contain nitrogen are classed under the general term of protein. Protein is composed of nitrogen, carbon, hydrogen, oxygen, sulphur and phosphorus. Protein is the substance which builds up the body. The muscles, tendons, ligaments, connective tissues, skin, hair, hoofs, part of the bone, and, in fact, every part of the body but fat, are made up of protein, together with mineral matter and water.

HER ULTIMATUM

(Harper's Pazar)

Mrs. Merrill had married a second time and her husband was anxious to have the children call him "Father." Margaret, aged five, was still undecided. One day the new member of the family punished the little girl by making her stand half an hour in the corner. When her time was up she announced, sadly, though firmly, "Well I guess you're going to be Mr. Chase all right."

INDIGESTION

Dyspepsia Means Slow Starvation.

By the testimony of actual cures—by the words of those who have proved the merit of Dr. Hamilton's Pills, you can satisfy yourself that indigestion and dyspepsia are curable.

"Four years ago I got into a condition of low health—suffered all possible torture with acute indigestion, wind on the stomach, and dizzy headaches. The very smell of food often was sufficient to make me violently ill. Energy was gradually fading away. I no longer had any desire for work or for the company of other people, and was in the depths of despair. Worse martyrdom brain and body could not suffer, and live. I used so many remedies without success that I was in poor hopes of getting relief when I started on Dr. Hamilton's Pills. In a month I noticed a slight improvement, and kept right on using one pill every second night. In a month I was another man, looked ruddy, strong, hearty, and I felt as if I had been made anew. Four years have gone by, and I still rely on Dr. Hamilton's Pills and attribute to their power my present condition of robust health."

(Signed) H. P. ECKFORD.

LAKEVILLE

(Crowded out last week)

March 4, 1912.

Clarence Williams, returned to Fredericton, on Thursday to resume his studies.

Howard Fowler, St. John, is spending a few weeks with his parents, Mr. and Mrs. J. R. Fowler.

Master Archie Campbell met with a painful accident on Feb. 23rd while playing with some of his school-mates in a barn he fell, dislocating his right ankle. He will be compelled to lose school for at least three weeks.

The surveyors for the Valley Railway have reached Lakeville, and taken up quarters north of the village.

Mrs. Robert Smith and son, Master Ripley, are on a visit to Chatham, Mrs. Smith former home.

Mr. and Mrs. Kyle, Woodstock, and Mrs. Barter, were recent callers at Mr. Colin King's.

Miss Kate Reynolds, Glassville, has been a guest recently of her aunt, Miss Louise King.

The last week of February was marked by a heavy snow-fall the heaviest of the season. The roads are pretty well filled, but early in the week the snow ploughing will be done, no doubt, as previously, making a fine smooth road.

The many friends of Mrs. M. I. F. Carvell, are pleased to learn of her daily improvement. Her mother, who has been at Perth with her for the week is expected home soon.

Many of the relatives of the late Leo Scholey, who reside here attended his funeral, Sunday afternoon, in Centreville.

How's This?

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure.

F. J. CHENEY & Co., Toledo, O. We the undersigned have known F. J. Cheney for the last 15 years, and believe him perfectly honorable in all business transactions and financially able to carry out any obligations made by him.

WALDING, KINNAN & MARVIN, Wholesale Druggists Toledo, O. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system. Testimonials sent free. Price 75 cents per bottle. Sold by all Druggists. Take Hall's Family Pills for constipation.

New Bridges Will Be Built In Queens County.

Fredericton, Mar. 6.—H. M. Blair, secretary of the Provincial Board of works, announced this morning that Chief Commissioner Morrissey had awarded the contracts for the construction of several important bridges. The largest and most important contract awarded was that for the construction of Hunter's Ferry Bridge, parish of Canning, Queens county, which was awarded to Frank L. Boone of St. Mary's, the contract price being in the vicinity of \$23,000. The contract for the Cole's Island bridge, also in Queens county, was awarded to Messrs. Robert and Charles Forbes of Gibson, the contract prices being in the vicinity of \$10,000. Messrs. Forbes will also construct the Burpee bridge in Queens county, the contract price being in the vicinity of \$7,000; while Mr. Boone has been awarded the contract for the construction of the Chase bridge, also in Queens county, the contract price being about \$3,500.

Disastrous Hurricane in South Pacific

Victoria, B. C., March 6.—News was brought by the steamer Makura of disastrous hurricanes in the Fiji and New Caledonia groups. A number of lives and many vessels were lost.

At Noukuolof a launch in the harbor was wrecked and half the town was destroyed, many persons being drowned by tidal waves which followed the blow. The steamer Honrelen, from Columbia

River for Auckland, encountered the hurricane in the Tonga group. Her masts were carried away, bulwarks and boats smashed, and the deckload swept away.

Advertising Campaign For Religion

New York, March 6.—Broadway has seen almost everything, from corset strings to grand pianos, advertised in electric signs, but people gasped yesterday as they passed near the Metropolitan Tower and saw an entirely new sign advertising religion. Last night the fiery message read:

"Welcome for everybody in the churches of New York."

At one end was a large cross and the words, "Religion for men," at the other end another large cross and the words, "Men for religion." Along the bottom ran the flaming line, "Men and religion forward movement."

It is the beginning of a great advertising campaign for religion. Two more signs will be placed on Broadway and large and small posters will be placed on bill boards in every part of Manhattan, all advertising the "men and religion forward movement."

Bought Lands At Meductic, York Co.

Fredericton, March 5.—Announcement was made to-day that the New Brunswick and British Colonization Company has purchased a large block of property at Meductic and purposes to townsite it and put the lots on the market. This company recently purchased 1,500 acres of fruit lands at Springhill from the Springhill Fruit Lands Co., and will eventually carry on extensive operations along the St. John river valley. The property now purchased consists of 640 acres owned by Mr. William S. Tompkins, and consists of the farm which he has operated at Meductic with a certain portion reserved under option to be purchased later, including the residence and a plot of ground also. The price paid was somewhere between \$5,000 and \$10,000, probably nearer the latter than the first named figures.

It is Mr. Tompkins' intention to build a new residence at Meductic and he has already contracted with Mr. Frank Grant of Grantville, to start the work as early as possible in the spring. Mr. Tompkins still owns and has options on upwards of 2,500 acres of property in the Meductic district.

A DAILY THOUGHT

And having thus chosen your course, let us renew our trust in God and go forward without fear and with manly hearts.—Abraham Lincoln.

Earache, Toothache!

To Cure the Pain in Ten Seconds and Get Instant Relief, Nothing Equals

NERVILINE

Fifty years ago Nerviline was used from coast to coast and in thousands of houses this trusty liniment served the entire family, cured all their minor ills, and kept the doctor's bills small. To-day Nerviline still holds first rank in Canada among pain-relieving remedies—scarcely a home you can find that doesn't use it.

From Port Hope, Ont., Mr. W. T. Greenaway of the Guide newspaper staff writes: "For 20 years we have used Nerviline in our home, and not for the world would we be without it. As a remedy for all pain, earache, toothache, cramps, headache, and disordered stomach, I know of no preparation so useful and quick to relieve as Nerviline."

Let every mother give Nerviline a trial; it's good for children, good for old folks—you can rub it on as a liniment or take it internally.

Wherever there is pain, Nerviline will cure it. Refuse anything but Nerviline. 25c per bottle, five for \$1.00, all dealers, or The Catarrhzone Co., Kingston, Ont.
