Taft Against Buying Telegraph And Telephone Lines

Washington, Feb. 22.—President Taft today informed congress that he did not approve of Postmaster General Hitchcock's suggestion that the government buy and operate all telegraph lines as an adjunct of the postal system. Mr. Taft said that if it could be shown that the public would benefit by receiving a service at less price than is now paid, he might think differently of the plan, but that he was not convinced such would be the effect.

Ontario Alarmed Over Smallpox In Lumber Camps

Ottawa, Feb. 22.—It is probable that at an early date a strong petition representing the concrete opinion of all the towns of eastern Ontario and the Ottawa valley will be sent to Premier James Whitney, demanding that the provincial board of health take immediate action to afford adequate protection against smallpox from the lumber camps. The disease is prevalent in many sections throughout this end of the province, a condition which prevails every winter and in the opinion of medical men it is brought in primarily by men returning from the shanties.

Several cases have been detected in Ottawa and on trains coming down from the north woods, thus menacing not only the towns, but the traveling public. On Monday next the city council of Ottawa will consider a resolution asking the provincial board of health to establish efficient inspection of the lumber camps, with a quarantine station at some central point near the lumbering regions.

French Dialects Are Disappearing

Paris Feb. 27.—The University of Paris is concerned over the rapidity with which other French dialects are disappearing. It has been discussing the advisability of collecting phonographic dialect records. Prof. Ferdinand and Brunet of the faculty of letters, have proposed tours of the province with a phonograph recorder to take two or more records at every village where a dialect is spoken, or when some peculiarity of speech prevails.

LUNG TROUBLE

Promptly Relieved and Permanently Cured by Inhaling Catarrhzone.

Mrs. Biny Brown, of Tenessee, N.S., Was Cured by Catarrhzone of Lung Trouble and Catarrh, After Hundreds of Other Remedies Failed.

If your lungs are weak; if there is consumption in your family; if Colds, Catarrh, and Bronchitis bother you, be sure to use Catarrhzone. It is especially adapted for these diseases and cures every time.

Mrs. Brown took cough mixtures, but they made her sick. Then she used an atomizer, but, after resorting without benefit to poultices and numerous other remedies, she tried Catarrhzone.

"I used Catarrhzone Inhaler," writes Mrs. Brown, "five minutes every hour, and soon recognized that it was going to cure me. I could feel the soothing medicated air spreading through the air passages of the throat, and it touched the sore spots in the lungs that other remedies failed to reach. Catarrhzone seemed to go just where it was needed most, and soon put a stop to my cough. It restored me to perfect health, and I am convinced that no cough, cold, or catarrh can exist if Catarrhzone is used."

No treatment is so clean, so pleasant, so certain to cure as Catarrhzone. By means of the Inhaler, the local symptoms, such as coughing, inflammation, and congestion, are speedily corrected. Ferrozene tablets, which are taken after each meal, purify and cleanse the blood of all poisons, and build up and strengthen the system.

This local and constitutional treatment is always effective, and cures cases that have been given up as hopeless. Money can't buy or produce anything better, and to get cured it is absolutely necessary to use Catarrhzone.

FARM AND FIELD

THE TIMOTHY RUST DANGER

This Danger Threatens to Spread Across and Farmers Should Stand on Guard.

Timothy rust is not much known in the Canadian West, but its appearance is known in nearly all states of the American Union, and is reported in Ontario. It is known to be spreading at an alarming rate, so farmers of the West should be prepared to meet its first appearance. Timothy rust is similar in general appearance and morphological characteristics to Puccinia Graminis, or the common rust on wheat and inoculation experiments at Washington, D.C., show that it can be transferred easily to various grasses. Similar results have been obtained by Eriksson in Europe. This demonstrates that the rust in the United States and the rust in Europe are identical. That it is not a well-fixed species is substantiated. By using bridging hosts timothy rust can be made to transfer to various cereals which it will not attack directly. That such transfers take place in nature to some extent is probable. The rapid distribution of timothy rust in recent years is undoubtedly due to the dissemination of the uredospores by the usual agencies, namely, insects, birds, animals, man, surface winds, and upper air currents. Its ultimate distribution over all timothy-growing sections favorable to it is to be expected, and methods of preventing any considerable damage to the timothy crop become necessary.

As there are wide differences in timothy strains with regard to rust resistance, the problem in timothy rust prevention becomes one of breeding.

Best Horses are Best

The widening demand for pure-bred mares is the strongest feature of the Percheron trade at present. Whenever the farmers in any community become successful enough horsemen to replace their grade mares with good Percheron matrons, the demand is for a distinctly better class of stallions. The effects are already manifest in this year's importations. Importers are unanimous in declaring that during last season the best horses sold most readily. The inferior ones were hard to dispose of at any price. Buyers who are looking for sires, are after real draft horses. Size, massiveness, soundness, and good feet and legs are being emphasized, and it is immaterial whether the horse is imported or Canadian-bred, if he has the necessary qualifications.

The importation of fewer horses, of higher class, is in direct response to this well-defined feeling among buyers. Everything considered the trade promises to be strong, with slightly higher prices for first-class, sound stock, with more animals going directly into the hands of good farmers than ever before.

Selecting Laying Hens.

Hens require to be very carefully chosen indeed as they assert great influence upon the internal characteristics. As a general rule it is more difficult to determine whether a pullet possesses good or poor qualities than it is with a male bird, and particularly is this the case with cross-breds. Large development in the posterior region of the body denotes good laying qualities. It should always be remembered in selecting birds for breeding that like produces like, and if the parents possess any faults they are almost certain to be reproduced in the offspring, perhaps in an exaggerated form. If the cock possesses certain faults he should be mated with hens strong in this particular respect, in this manner counteracting the weak features in the cock's constitution or in his economic characteristics.

Improve the Ewes

Flushing the Ewes is a practice followed out by the best English shepherds. This practice is also followed by some American farmers. As high a percentage of lambs as possible is desired. Flushing tends to make the ewes more sure as breeders and also results in more twins. The breeding ewes usually run on pasture after their lambs are weaned, and thus do not maintain a high condition. Two or three weeks before breeding time an extra allowance of feed is given. This feed is such that it will rapidly increase the weight of the ewes. Alfalfa or clover hay, together with corn silage, and some of the concentrates, such as oats, barley, dried brewers' grains and the

like, are usually fed. This extra feeding to improve the condition of the ewes just before breeding is known as flushing.

Values Steadily Grow

There has been a very great advance in the value of farm lands in both Canada and the United States during the last decade. The report of the experts appointed by President Taft to investigate conditions in the two countries in connection with the Reciprocity Compact showed that there had been a greater advance in the Eastern Provinces of Canada than in the adjoining States of the American Union.

The general rise in the value of farm lands is largely due to the increased prices realized for all kinds of farm products. There is money in farming now on lands that a few years ago yielded very little more than enough to pay the interest on the mortgages.

It is interesting to note that Canada heads the list of all nations with regard to imports through the port of Manzanillo, Mexico. This is due to the heavy importation of wheat. This trade promises to be an important one every year.

WHEN LINCOLN WAS SHOT.

Booth, Taking Advantage of Guard's Temporary Neglect, Rushed Through the Box Entrance and Accomplished His Deed.

When Mr. and Mrs. Lincoln and their party sat down in their box at Ford's Theatre the fateful night the President was shot, the guard who was acting as substitute for Col. McCook, took his position at the rear of the box, close to an entrance leading into the box from the dress circle of the theatre. His orders were to stand there, fully armed, and to permit no unauthorized person to pass into the box. His orders were to stand there and protect the President at all hazards. From the spot where he was thus stationed, this guard could not see the stage or the actors; but he could hear the words the actors spoke, and he became so interested in them that, incredible as it may seem, he quietly deserted his post of duty, and, walking down the dimly lighted aisle, deliberately took a seat in the last row of the dress circle. It was while the President was thus absolutely unprotected through this guard's amazing recklessness—to use no stronger words—that Booth rushed through the entrance to the box, just deserted by the guard, and accomplished his foul deed. Realization of his part in the assassination so preyed upon the mind of the guard that he finally died as a result of it.

CHINAMAN'S CURIOUS MISTAKE

In Chinese visiting etiquette the rank of the caller is denoted by the size of his card. Thus the visiting-card of a high mandarin would be an immense roll of paper, neatly tied up.

A gentleman who has travelled in China brought home a Chinese servant, and his wife soon after held a "reception." John Chinaman attended the door, and received with great disgust the small paste-boards of the visitors. Evidently with an opinion of his own of the low condition of his mistress's friends, he pitched the cards into a basket and with scant ceremony showed their owners into the drawing-room.

But presently the gas-man called with a bill—a big piece of cream-colored paper. The "card" satisfied John. With deep reverence he received it. With low salaams he ushered the bearer not only into the drawing-room, but with profound bowings, to the dismay of the gas-man and horror of the hostess, right up to the centre of the room, where the lady was receiving her distinguished guests; and then John, with another humble reverence, meekly retired, doubtless supposing that the owner of the card was a person of very high distinction.

GREW THINNER EVERY DAY

Appetite was Poor, Dizzy, Faint, Weak, Continuous, Cruel Backache.

Another Case in which Dr. Hamilton's Pills Saved a Life that Physicians Despaired Of.

What a pitiful sight it is to see a handsome, able man being gradually robbed of good looks, health, and ability to work. Such cases are frequent—the one here described being that of E. P. Lascelles, a well-known printer's supply man, residing in Hamilton. "About six months ago I began to notice a worn, tired feeling coming over me. I was unable to shake it off. It was not the fatigue that follows hard work—it was sort of an unaccountable laziness that assailed me. I was anxious to work, but didn't have the energy. Something was dragging me down, robbing me of my health and spirits. I got tired of taking prescriptions that did me no good and used Dr. Hamilton's Pills. Their action soon proved to me that I was suffering from a terribly congested liver and acute indigestion. Dr. Hamilton's Pills brought back my appetite, cured the heavy pain in my side and back, gave me a new grip on life. I gained in weight and now I am stronger, look better, work better than ever before I was taken sick."

If you want to get back the vigor and spirit of youth, if you want the sparkle of robust health on your cheeks—use Dr. Hamilton's Pills regularly. They cleanse, purify, tone, strengthen—make the sick well. Give this grand medicine a faithful trial, 25c per box, or five boxes for \$1.00, at all dealers, or The Catarrhzone Company, Kingston, Ont.

Don't TRY TO SAVE MONEY BY
buying low grade coffee. An extra half cent or cent a day will buy

Largest Salmon Catch In Maine

ROCKLAND, Me., Feb. 24.—Statistics concerning the catch of sea salmon, made public by Commissioner James Donahue of the Maine sea and shore fisheries department, show that the season of 1911 was the most prolific in the past twenty years, 147,799 lbs. being taken. The next largest catch was in 1909, when 96,891 lbs. were taken.

The gratifying increase was contributed by Commissioner Donahue to the work of artificial propagation conducted by the federal government at East Oronington, where the eggs of several mature fish caught in Penobscot weirs are hatched each year.

The young are liberated in the upper waters of the Penobscot, where they thrive above all dams and obstructions, eventually working their way to the ocean and returning at producing age to Penobscot waters.

How's This?

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure.

F. J. CHENEY & Co., Toledo, O. We the undersigned have known F. J. Cheney for the last 15 years, and believe him perfectly honorable in all business transactions and financially able to carry out any obligations made by him.

WALDING, KINNAN & MARVIN, Wholesale Druggists Toledo, O. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system. Testimonials sent free. Price 75 cents per bottle. Sold by all Druggists. Take Hall's Family Pills for constipation.

ANDOVER

(Crowded out last week.)

Feb. 26, 1912.

Mrs. William Keswick, Harcourt, is spending several weeks with her daughter, Mrs. Geo. Davis.

Perry Anderson, of the Barony, spent Sunday at the home of William Curry.

Miss Bessie Curry has returned home after a pleasant visit at Calais; at present she is teaching at Perth for Mrs. Carvell, who is ill with pneumonia.

Miss Bessie Lawson, of Caribou, has been spending a few days with Miss Grace Porter.

Mr. Record, who has been visiting at the home of Mr. and Mrs. Jarvis, has returned home to Boston.

Miss Pearl Waite is still confined to bed. Her friends hope for a speedy recovery.

Mr. and Mrs. J. F. Johnston, of Lower Perth, entertained several young people Friday evening; a most enjoyable evening was spent at bridge and music. Dainty refreshments were served during the evening.

Miss Emma Kelly is home from Caribou.

The Book Club met with Mrs. William Curry last Tuesday and spent a very pleasant afternoon. Several new members joined and new books were chosen, after which a delicious lunch was served.

The Connaughts Come In August

Ottawa, Feb. 28.—The Duke and Duchess of Connaught, according to plans which have been announced today, will see a great deal of the Dominion during the course of the next six months. After attending the Montreal Horse Show in May, they will attend the Ottawa and Toronto Horse Shows. A week will be spent in Toronto, after which they go to London and Guelph.

August will find their Royal Highnesses in the Maritime Provinces, where St. John, Halifax and Charlottetown will be visited. Some of the travelling will be done in the east by the government steamers. A few days will be spent at Lord Strathcona's lodge, on the Tobique River, N. B., noted for its fine fishing.

The western trip will open early in September, or immediately after the

Duke opens the Toronto Exhibition. The first stop will be made at Winnipeg. The Royal party will then proceed to Prince Rupert, with stops at Vancouver, Victoria, and, either going or coming, stops will be made at Calgary, Edmonton, Saskatoon, Regina and other important prairie points.

Woman To Be Tried For Policeman's Murder

Chicago, Feb. 27.—Mrs. Louis Vermilyea, accused of the murder of policeman Arthur Bisonette, whose trial has been set for next Thursday, will have to be wheeled daily to the court room in an invalid chair. Mrs. Vermilyea has not fully recovered from the effects from poison, which she took in an attempt at suicide after her arrest.

Snowstorm Causes Havoc in Montreal

Montreal, Feb. 27.—By 7 o'clock tonight fifteen inches of snow had fallen since 7 o'clock yesterday morning, and besides seriously delaying trains on all lines the storm was responsible for the collapse of several structures in the city, owing to the tremendous weight of snow on the roofs.

Eighty feet of the wooden roof of the Forum skating rink collapsed this afternoon, while seven men were busy trying to clear away the snow. The accident was preceded by an ominous creaking and splintering of the beams and the men had time to escape, while the forty people skating inside also managed to stand from under before the roof came down.

In a recent libel case the proprietors of the Forum were granted judgment for \$6,000 against the Montreal Star for a series of articles opposing the erection of the structure and criticizing it as architecturally unsound.

The roof of one of the C. P. R. freight sheds also collapsed at noon today, but fortunately all the men were away at lunch at the time. Several engines were damaged, and the total loss will be some \$50,000.

The city streets have been kept fairly passable and the street car service, except in the outlying wards, has not been disorganized.

The storm will cost the city nearly \$50,000 for snow removal and has given employment to hundreds of men who up till this week had suffered from the unusual lack of work, resulting from the light snow fall of the early winter.

Cold on the Chest

Had Suffered for Weeks—Used Fourteen Different Remedies Without Effect.

CURED QUICKLY BY "NERVILINE"

No stronger proof of the wonderful merit of Nerviline could be produced than the letter of Miss Lucy Mosher, who for years has been a well-known resident of Windsor, N.S.

"I want to add my unsolicited testimonial to the efficacy of your wonderful liniment, 'Nerviline.' I consider it the best remedy for a cold, sore throat, wheezing, tightness in the chest, etc., and can state that for years our home has never been without Nerviline. I had a dreadful attack of cold, that settled on my chest, that fourteen different remedies couldn't break up. I rubbed on Nerviline three times a day, and was completely restored, have induced dozens of my friends to use Nerviline, and they are all delighted with its wonderful power over pain and sickness. You are at liberty to publish this signed letter, which I hope will show the way to health to many that need to use Nerviline."

(Signed) "LUCY MOSHER."

All sorts of aches, pains, and sufferings—internal and external—yield to Nerviline. Accept no substitute; 25c per bottle, or five for \$1.00.
