Parsons' Pills Best laxative. Tone the System.

**Plenty Of Coal In Queens Co., He Thinks**

T. P. Birchell, of Montreal, accompanied by two mining engineers, passed through the city last evening enroute to Montreal, after having made an investigation of the coal areas in Queens county with a view to acquiring large tracts for immediate development. Mr. Birchell, is heavily interested in the Cape Breton coal business and in various financial schemes in Montreal, and his testimony as to the commercial value of the coal deposits is of value.

"There is plenty of coal there," he said, in answer to a question, "even if there are no lower seams or deposits as so many seem to think. My engineers were unable to discover any trace of these thicker veins, but I should think that it would be the policy of the provincial government to have borings made during next summer to a depth of 1,000 feet, using a diamond drill in order to make absolutely certain whether or not these lower seams exist."

"The greatest difficulty in the way of any progress in the development of the areas," continued Mr. Birchell, "is the system of long term licenses and the high prices asked by the holders of such licenses. Nova Scotia areas which have been tried and proved can be obtained more cheaply than many of the lands in Queens county. Those in control appear to have been carried away by the prospect of a railway entering the areas, but at present there is no certainty that this railway will be built, the federal subsidy not having been given. It seems to me that the first thing the government should do is to revise the system of granting licenses and tying up too much property for which there may be competition."

Mr. Birchell said in case of development of the areas, transportation of the coal by barges from Grand Lake would be the cheapest method of bringing the product to the natural market at St. John. The coal might be used for generating electric power, he said, if it were not brought into competition with an accessible water power which should be a great deal cheaper.

Asked if what he had said concerning too high prices being asked for the coal properties applied as well to the real estate now being sold in St. John, Mr. Birchell said he did not think so. There were substantial reasons for St. John's progress, and he thought the city was just beginning to take advantage of its opportunities, every one he had met from St. John recently appearing to be very much alive.

**FOR FAMILY USE**

**An Ideal Remedy for Coughs, Sore Throat, Catarrh, Weak Chest.**

After having made a special study of the treatment of the throat and lungs for twenty years, Prof. D. Jackson states that in his opinion no preparation for general family use is so efficient, so healing, so certain to cure as Catarrhazone.

As his reasons for making this claim for Catarrhazone, Dr. Jackson says: "Catarrhazone is free from opium. The patient can breathe its rich, balsamic fumes direct to the diseased spot."

"It is a remedy that treats and cures causes—prevents disease spreading. Reaches the innermost recesses of the throat, nose, bronchial tubes, and lungs."

"Alleviates chest soreness. Stops coughing instantly. Prevents bronchial irritations. Relieves clogged nostrils. Cures sniffles and nasal catarrh. Prevents La Grippe."

"Has proven itself a cure for weak lungs, loss of voice, speakers' sore throat, asthma, bronchitis, catarrh, coughs, colds, and winter ills."

Catarrhazone is unquestionably the world's greatest breathable cold, cough, and catarrh medicine, and being free from all drowsy drugs, entirely safe for children and old folks; it makes an ideal family remedy. Recommended by the medical profession, and sold by all reliable dealers. Beware of imitations, get "Catarrhazone" only; large size lasts two months, and is guaranteed, price \$1; smaller sizes 25c and 50c. By mail from the Catarrhazone Company, Kingston, Ont.

**WHAT CANADIANS ARE DOING**

**MARJORY MACMURCHY, Toronto.**

There may be much discussion as to whether journalists are born or made in these days of mechanical productions — editorially mechanical — but there can only be one opinion of Marjory MacMurphy — for she is born and made. With an individuality all her own she infuses into her work that indefinability called life and her experience has given her an insight into humanity that has already made her a power in the Press. A series of articles from her pen on the Coronation, when she represented the Publishers Press, brought out

MISS MARJORY MACMURPHY

these qualities well, particularly her descriptive work.

Marjory MacMurphy is fortunate in having a clever father and a clever elder sister and there is no doubt her early training, artistic and scholarly environments, had much in the making of the writer we know. Born in Toronto, Miss MacMurphy was educated at Jarvis St. College and Toronto University. Entered journalism early in life. Now literary editor of a Toronto daily, and contributes to many of the Magazines.

**Mr. JUSTICE BRODEUR**

The Hon. Louis Philippe Brodeur, K.C., LL.D., late Minister of Marine and Fisheries, comes of one of the best known French-Canadian families. A comparatively young man as politicians go — his nativity only dates from 1862 — he has made rapid strides in offices of state since his first election to Parliament in 1891. When the Laurier Government went into power five years later, Mr. Brodeur was made Deputy Speaker of the House of Commons and Chairman of Committees. After the election of

HON. L. P. BRODEUR, Justice of the Supreme Court of Canada.

1900 he became Speaker of the House, and in 1904 entered the Cabinet with the portfolio of Minister of Inland Revenue. Two years later he became Minister of Marine and Fisheries and held that office till August 1911, when he resigned to become a Supreme Court Judge. Hon. Mr. Brodeur accompanied Sir Wilfrid Laurier to England as a delegate to the Imperial Conference of 1907 and was a delegate to the Imperial Defence Conference of 1909. By profession he is a lawyer, having been called to the Bar in 1884 after graduating from Laval University, Beloeil, P.Q., is his birth place

and his early education was received at St. Hyacinthe College.

**Schoolboy "Howlers."**

Some amusing schoolboy "howlers" were recounted by Mr. W. Elwyn Fiske, headmaster of the Elm House School, Surbiton, at the Christmas prize distribution. In the general papers worked by the students one boy described "coup d'etat" as a French dish played in musichalls as a voluntary.

Credit, said another boy, signifies "a person who gets nice things said behind his back." A third boy illustrated the meaning of gender by explaining that a camel is masculine and a dromedary feminine.

Asked to quote some exceptions to the rule "Ladies first," a boy wrote, "When you are going to be hung," "Ladies first except for votes" and "Ladies always first except when the door is too small" were other replies. The boys were also asked what they would wish for if they were granted five wishes. Among the replies were "To be able to eat anything" and "To be a porcupine, because I could prick people."

**NOTHING NEW**

**Flying Machine Patented in 1851**

In the year 1854, the Earl of Aldborough, one of the most enthusiastic promoters of aviation of his time, patented in Great Britain a flying machine embodying a multitude of ideas more or less practical, and among his many suggestions, describes an aeronautical anchor of peculiar form, evidently the result of an investigation of the anatomy of a bird's foot, and which he describes in the following terms: "I prefer forming the grappels with flukes, attached to the stem by joints, and pressed downward by springs in such manner that the flukes shall strike downward when liberated, in a manner bearing a certain resemblance to the talons of a bird, separate cords being attached to each of the flukes, and all these being collected in a small sheath, and so arranged that the flukes can be raised, or permitted to spring downward by either fixing these cords in any convenient way, or letting them go when it is desired that the flukes shall act so as to enter the ground or seize any object." Apparently not satisfied with this device, he further perfected it in a patent of somewhat later date, wherein he describes a steel-sheathed cable for supporting the anchor, the cable being provided with a device for lessening the effect of sudden shocks, this latter feature being of very common use in marine navigation, being known in that art under the name of "shock-absorbers."

**Experiments in Wireless Telephony**

Successful experiments have been made lately in wireless telephony, which may have far-reaching developments in aviation, particularly in war service. Conversation was freely carried on with an aviator while he was flying 750 feet in the air at a speed estimated to be 55 miles an hour. The aviator was E. C. Huck, of Leeds, who was using a Blackburn monoplane. He wore on his head an ordinary telephone receiving helmet, and on his chest the ordinary mouthpiece. Strapped on the machine was the "aerophone" apparatus invented by H. Grindell Matthews, the youngest man ever elected a member of the Royal Institution. This was the first time wireless telephony has been tried on an aeroplane. Huck's voice was clear and distinct.

**Method of Finding an Aeronaut's Position.**

When terrestrial objects are invisible, an aeronaut is compelled to employ indirect methods of finding his position. Several such methods have been invented during recent years. Berlingmaier and Marcuse have employed magnetic measurements for this purpose and successful methods of informing an aeronaut of his position by means of wireless telegraphy have been devised. Finally, astronomical methods have been proposed, in which the tedious reduction of the observations is effected by means of special apparatus.

**ACHING IN THE STOMACH**

**Bilious Headache, Sluggish Liver, Indigestion and Stomach Disorders.**

**"Dr. Hamilton's Pills Cured."**

"From using a cheap remedy recommended by an unscrupulous druggist, my condition was made much worse," writes Miss Minerva E. Michie, daughter of a well-known citizen of Portland. "I suffered so terribly with indigestion and biliousness that the very sight of food made me shudder. It was two years ago my health began to fail. At first I had constipation, liver sluggishness, and occasional headaches. My appetite was variable—I wanted too many sweets—then I lost all desire to eat and had constant aching in the stomach, attacks of dizziness, pains between the shoulders, stifling feeling after meals, and felt I wasn't going to recover."

"The moment I used Dr. Hamilton's Pills I felt better. After I had taken a few pills my chest and back were relieved of pain, and my head felt clear and no longer was full of blood and rushing noises. I kept on using Dr. Hamilton's Pills and slowly but surely my appetite returned and I gradually regained strength, color, and spirits. To-day I am as well as ever and attribute my present splendid condition entirely to Dr. Hamilton's Pills." If you are troubled like Miss Michie was (and most people occasionally are) no medicine will do you so much lasting good as Dr. Hamilton's Pills.

**AP** POUND OF GOOD COFFEE IS NOT only more economical than the ordinary cheap grades, but is an added pleasure to every meal.

**Seal Brand** is the best that can be produced.

**CHASE & SANBORN MONTREAL**

PACKED IN ONE AND TWO POUND CANS ONLY

**The March Rod And Gun**

"An Experience Off the Coast of Newfoundland; Hunting the Hair Seal" opens the March issue of Rod and Gun in Canada, published by W. J. Taylor Limited, Woodstock, Ont., and the interest of this article is a criterion of the interest of those that follow, which include articles descriptive of outdoor life from the Atlantic to the Pacific. Among these is the first of a series of articles on the Culture of Black and Silver Foxes, which should prove of value to the many seeking practical information on this subject. A new feature this month is the creation of a Game Conservation Department edited by Mr. Frank Hyde, wherein matters pertaining to the subject of game conservation will be freely discussed. As this subject is a live one at the present time and is likely to be for some time to come, or until the improved laws for which good sportsmen are agitating have been enacted, this department should prove of exceptional interest.

**How's This?**

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure. F. J. CHENEY & Co., Toledo, O.

We the undersigned have known F. J. Cheney for the last 15 years, and believe him perfectly honorable in all business transactions and financially able to carry out any obligations made by his firm.

WALDING, KINANN & MARVIN, Wholesale Druggist Toledo, O. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system. Testimonials sent free. Price 75 cents per bottle. Sold by all Druggists. Take Hall's Family Pills for constipation.

**UPPER KINTORE.**

Plenty of snow and weather in March. Any one coming to Upper Kintore had better bring a snow shovel, a raincoat and umbrella.

Mrs. R. F. Porter, of Bairdsville, was visiting her daughter, Mrs. John Farquhar for a few days last week.

Our government still talks emigration and still our young men go west. A number of young men in the employ of Walter Gendall went from Curries Siding March 12. Your correspondent was talking with Mr. Gendall and was informed that he was paying from \$3.50 to \$5.00 per day.

Correspondent was also talking with several of the men who went with Gendall and they all seemed to agree in saying that they did not go for love of the west but for the big wages. If any of the farmers in this locality should require a hired man for a few days this coming summer, they will have to get one imported.

Miss Annie Sullivan, of Sussex Corner, is visiting some of her friends in Upper Kintore.

Alex. Patterson, Sloyd Patterson, and Miss R. W. Barclay are sick with Grippe.

Wm. Christie left Upper Kintore for Fredericton as a delegate for the Kincardine Agriculture Society.

**CENTREVILLE**

The Survey Party have finished their work here for the present, and have gone back to Woodstock. The Citizens of Centreville had a meeting last Friday evening and decided to recommend to the contractors that the Station be built on the north side of the Presque Isle stream; but the proposals made by those on the south side of the stream will not in all probability be set aside.

Charles Crone has bought the Thos. Nicholson farm and is putting lumber on the ground, preparing to build in the early spring. G. Hamilton Reid had bought the Robert Reid farm from E. M. Hawkins, and will move on the farm as soon as convenient.

Orlando Graves has sold his farm to Mr. Gartley, from Aroostook County,

and a number of others are changing their situations.

There is a great deal of sickness among them Miss Mary Reid, John Gregg, and G. W. White, Miss Long is improving slowly.

Rev. Mr. Daggett is putting in a stock of Hardware and Farm Machinery, and expects to do a rushing business this spring.

The Centreville Hotel that has been closed for some time is about to be reopened with a St. John man as proprietor.

It is proving most difficult to get wood for fuel here, and the citizens will gladly welcome the day when coal by rail can be obtained in the village.

It is said that an effort will be made to get the Provincial Legislation to enforce the law regulating the width of Team Sleds, many maintaining that the present make of team sleds are from six to ten inches too narrow for good roads.

It was a shock to his friends here to hear of the sudden death of Sankey Rogers, of Bristol, and also that of Hal, son of G. E. McClintock, now in the West.

**Miners' President Looks For Hard Coal Strike**

New York, March 14.—"The United Mine Workers of America will not compromise a single demand that they have made of the anthracite coal operators," declared John P. White, president of the mine workers, this afternoon. "I look for a general suspension of work in the anthracite fields on April 1," he added.

**Hidden Telephone Used To Hear Darrow's Secrets**

Los Angeles, Cal., March 14—Probably a dozen conversations between Clarence S. Darrow chief counsel of the McNamarras, and John R. Harrington, a Chicago attorney associated with him, were taken down through the aid of a telephone device, according to District Attorney John D. Fredericks.

The conversations, which took place in Harrington's room in a local hotel, all occurred since the indictment of Darrow on a charge of bribery, said the district attorney.

Several days ago it was announced by the district-attorney's office, that Harrington would be a witness for the state when the trial of Darrow is called. District Attorney Fredericks said that Harrington had secured a room in the hotel a month ago under an assumed name. The instrument was hidden behind a picture in the room according to the prosecutor, and stenographers in an adjoining room recorded the conversation.

**Prepare for Lumbago!**

**If You Have "Nerviline" Handy One Rubbing Will Cure the Pain.**

**THOUSANDS USE "NERVILINE"**

The "strike" of lumbago is like a bolt of lightning—you never know when it is coming or where it is going to strike. Probably the one certain thing about lumbago is the fact that it can be cured by Nerviline—the only liniment that penetrates deeply enough to reach the congested cords and muscles.

"Years ago I strained my back, and suffered considerably with weakness over the spine," writes Darius P. Millan, a well-known farmer residing near Kingsville. "Then lumbago attacked the weak spot, and for days at a time I would have to lie up in bed, unable to move or turn. Liniments, poultices, and hot applications failed to bring the desired relief, and I was in despair of ever getting really well again. I at last decided to test 'Nerviline.' I got five bottles from the drug store, and had it rubbed on three times a day. The stiffness and pain left my back quickly, and by continuing Nerviline I was completely cured of Lumbago."

Refuse any substitute. Large 25c bottles of Nerviline, or five for \$1.00, at all dealers, or The Catarrhazone Co., Kingston, Ont.

**LETTER NO. 4875**
