DOCTORS FAILED. RESTORED BY PERUNA

Catarrh of the Lungs Threatened Her Life

Miss Ninette Porter, Braintree, Vermont, writes: "I have been cured by Peruna. I had several hemorrhages of the lungs. The doctors did not help me much and would never have cured me. I saw a testimonial in a Peruna almanac of a case similar to mine, and I commenced using it. I was not able to wait on myself when I began using it. I gained very slowly at first, but I could see that it was helping me. After I had taken it a while I commenced to raise up a stringy, sticky substance from my lungs. This grew less and less in quantity as I continued the treatment. I grew more fleshy than I had been for a long time, and now I call myself well."

Sermon From Shakespeare

Copr. 1909 by Bradley-Garretson, Co Ltd. They say, best men are moulded out of faults,

And, for the most, become much more the better, For being a little bad.

—Measure for Measure, Act. V., Sc. I. This is dangerous teaching. The qualifying "they say" saves it. Many hold the opinion that the sowing of wild oats is necessary in the life of every man who is to attain prominence. The difficulty is that the weeds sown will not stay in their own field. The wild oats and thistles of the life spread if a man's field is foul his neighbors' fields are in danger. The careless farmer has often been driven in despair from his farm so rank have the weeds become, so the careless liver not infrequently ends his existence to escape from the spiritual weeds he cannot pluck out of his life.

Much harm has been done by the belief that it is good for a man to learn the nature of evil from experience. The majority hold it, but the majority has ever been given to superstitions, and this is one. The passage does not necessarily give Shakespeare's opinion. It is the opinion of a woman who would try to excuse an erring husband, and even then she qualifies her words with a timid "they say." There are, it is true, striking examples of men who have plunged into sin, turning from their evil ways, crushing down the flesh and living splendid spiritual lives. Henry V., the hero king of England, is an illustration of this; John Bunyan, a profane, drunken tinker, is another, but there is a long line of kings and tinkers, who acquired vicious habits in their youth, who have come to absolute shipwreck themselves and helped others on the way to ruin.

Every man has evil tendencies; and the sins of one are not the sins of another. Here it is the lusts of the flesh; there, depravity of the spirit. But there is no righteous man, no not one! But there are thousands of men who have never given way to gross sin. They have been tempted, but they have put temptation under foot, and these men are the real guides of humanity. However, there is never a thought epigrammatically stated in Shakespeare's plays but has in it an element of truth. It is true that some very excellent men have had their early years crowded with faults. Some indeed like Bunyan have sunk to the lowest depths of degradation and yet have risen to spiritual heights seldom attained by mortals. But it is not necessary that the child should be burned in order to make it understand the nature of fire, that poisonous fruit should be given it in small doses so that it may know what to avoid.

The weakness of the statement, "best men are moulded out of faults" is that it is too sweeping. It is a case of generalising on exceptional instances. Frequently good swimmers are drowned. It is surprising that they should be and is remarked on, and not a few maintain that good swimmers, through the risks they take, are more frequently drowned than those unable to swim. This is very faulty generalisation. The death of a good swimmer receives undue prominence, whereas the death by drowning of one unable to swim is taken as a matter of course. So it is with one who has led a vicious life; when he has got control of his evil tendencies, the world wonders. The very strength that enables a man to pluck the foul weeds out of his heart gives him prominence among the workers for good, and the unthinking say that he is "much more the better" for having been "a little bad."

Men who have sinned and suffered for their sins strongly realise the nature of evil; having found light they are impelled to help others. Bunyan deplored the darkness in which he had lived. He knew that he had been the means of dragging others down. The tares he had sown had spread to other lives, it was his duty to undo the harm he had done. On his dead self he rose to higher things, but he was not content to stand there alone. He reached out a helping hand to every falterer. Standing on the rock of Christian endeavor he, through his own past, felt the need of helping others out of the slough of Despond. It is with such rare exceptions as Bunyan in mind that the world says, "Best men are moulded out of faults."

In the passage under study there is a timid "they say," a doubtful "for the most," but there is no timidity or uncertainty about St. Paul's words: "Be not deceived; God is not mocked; for whatsoever a man soweth that shall he also reap." If a man live viciously, abusing his body, he may expect to reap physical suffering. If he harbor hate and avarice and cruelty his soul becomes depraved, his will diseased. Make no mistake, grapes do not grow on thistles! Even with these shining examples of unrighteous men who have become righteous, it will be found that the heart was never evil. King Hal had ever noble aspirations. It only required responsibility to make him find himself; but down the ages the wild oats he sowed have been spreading. A thousand youths have been mimics of his early life, and have made his boyish pranks an excuse for their faults.

Men who have sinned and suffered for their sins strongly realise the nature of evil; having found light they are impelled to help others. Bunyan deplored the darkness in which he had lived. He knew that he had been the means of dragging others down. The tares he had sown had spread to other lives, it was his duty to undo the harm he had done. On his dead self he rose to higher things, but he was not content to stand there alone. He reached out a helping hand to every falterer. Standing on the rock of Christian endeavor he, through his own past, felt the need of helping others out of the slough of Despond. It is with such rare exceptions as Bunyan in mind that the world says, "Best men are moulded out of faults."

\$100 Reward, \$100

The reader of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials. Address F. J. CHENEY & Co., Toledo, O. Sold by all Druggists 75c. Take Hall's Family Pills for constipation.

Bangor Open to Navigation.

Bangor, Me., April 2—Bangor was opened to navigation as a port today for the first time since Dec. 28. The last ice jam in the Penobscot river tidewater passed down this afternoon.

Lumbermen Gather For Meeting To-Day

FREDERICTON, April 3.—The annual meeting of the St. John River Log Driving Company, which was to have been held this morning at the Queen Hotel, was postponed until this afternoon at 3 o'clock. It is not expected that there will be any surprising developments at this afternoon's meeting, in fact, it was said this morning that the same board of directors would be elected, the same contractors would do the driving, and that Mr. Arthur V. Rowan, who has been acting as secretary and treasurer and manager since the resignation of Mr. Lewis H Bliss to become postmaster of Fredericton, would be elected secretary-treasurer of the company. Between ninety and one hundred million feet of lumber will probably be handled by the company during the coming season, including from twenty to twenty-five million feet of lumber cut last year and held up at the head-waters of the river. Last year the total amount rafted by the St. John River Log Driving Company was about seventy-eight million feet.

The personnel of the board of directors to be re-elected this afternoon follows: Messrs. J. Fraser Gregory, G. A. Hilyard, F. C. Beateay, John A. Morrison and A. H. F. Randolph. The directors will afterwards meet and Mr. Gregory will probably be re-elected president and Mr. Rowan will be secretary-treasurer. The Messrs. Aitken of this city are the log driving contractors.

The Tobique River Log Driving Company will also hold their annual meeting this afternoon at the Queen Hotel.

"A young man should not believe everything a flirt doesn't say."

A Revelation in Tea Goodness

is a delicious and fragrant blend of the finest Ceylon Tea. Get a package from your grocer and enjoy its excellent qualities.

ARTIFICIAL RUBBER.

Said to be Quite as Good as the Grown Article.

About forty years ago two young chemists announced that they had succeeded in manufacturing indigo. The method used by them was entirely independent of the indigo plants. The yield was extremely small, and there seemed to be no promise in the method of future commercial success. A quarter of a century later or thereabout the manufacturer was supplying the world with artificial indigo, and the occupation of the indigo planter, if not gone, was going. And now the chemical world is all agog about rubber. This substance obtained mainly from South and Central America, though, of late years, owing to a great increase in the demand for it, plantations have been started, especially in Ceylon and the Malay Peninsula and Archipelago, and these are now contributing to the world's supply. Deep incisions are made near the base of the tree. The liquid flowing from these incisions is heated to drive off most of the water, and the residue is the impure rubber of the market. The valuable constituent is caoutchouc, a colourless, elastic, amorphous substance. This has long been known, but little has been learned in regard to its chemical nature until recently. Last year a specimen of artificial rubber was exhibited at Berlin identical in all its properties with the natural substance. At present there appears, to be sure, to be little prospect of early commercial success along the line suggested, but the results already reached are of such interest as to incite to many efforts to solve the problem.

Sterilizing Earth Around Posts.

Patent post holes have long been humorously referred to in connection with machines for grinding smoke, left-hand wheel barrows, and other imaginary inventions. It has remained, however, for a Budapest inventor to make what is probably an important improvement relating particularly to post holes, seeking to thus preserve the wood of the posts. Instead of applying preservatives to the wooden posts, railroad ties, sleepers or other wood exposed to the action of the earth, he treats the earth which surrounds the wooden post in such manner as to destroy all insect, germ and fungus life by soaking the earth with a suitable sterilizing liquid. The process is termed "Peristerilization," and is claimed to be especially useful in rural and other remote districts in which it is inconvenient to obtain wood which has been treated with creosote or similar preservative.

The Work of the Human Heart.

The average human heart is a suction and force pump of remarkable capacity and durability. Each of its two chambers contains, on an average, 75 cubic centimeters or 4.575 cubic inches; the total contents of 150 cubic centimeters or 9.15 cubic inches being discharged 81 times a minute, corresponding to a delivery of 12.150 cubic centimeters (12.15 liters) or 741 cubic inches per minute, 729 liters or 25.73 cubic feet per hour. Expressed in U. S. gallons, the average human heart pumps through it each hour 192.8 gallons; each day, 4,624 gallons; and in the adult life time of a man living to the age sung by the Psalmist 8,435,880 gallons. The pressure against which this fluid is pumped is equivalent to that of a water-column 2½ meters or say 8 feet 2.42 inches high; otherwise expressed, about 0.242 atmospheres or 3.55 pounds avoirdupois per square inch.

Contracts Awarded.

Coun. W. R. Fawcett has been awarded the contracts for building three bridges by the Provincial Department of Public Works. The bridges are as follows: Beaguimic Bridge, Hartland, \$3,500; Murchie Bridge, Edmundston, \$5,500; Smith Creek Bridge, King's County, \$6,500.

Church Union

No vote against the union of the Methodist, Presbyterian and Congregational bodies was recorded among the members of the Gibson Methodist congregation. The members of the official quarterly board numbering 8 and the members and adherents of the church numbering 97 all voted for union.

Jews Observe Passover.

NEW YORK, April 2.—The one million Jews of Greater New York, in common with their brethren the world over, to-day celebrated the Feast of the Passover, or Pasch. It is the spring festival of the Jews, and in ancient times was the first of the three great pilgrim feasts, when the people of Israel gathered from the remotest sections of the Holy Land and went up to Jerusalem to offer their thanks in the Temple. The festival was ordained to commemorate the redemption of the children of Israel from their bondage in the land of Egypt, where they had been held as slaves more than 400 years. During the eight days of the celebration the place of bread in every Jewish household is taken by a special prepared and baked cake known as "Matsos," consisting of flour and water only, without any leavening ingredient. It is estimated that more than 100,000 barrels of flour are used in New York alone making the "Matsos" for the annual festival.

Does Your Stomach Work Properly?

There is no complaint so humiliating and tiresome as stomach complaint. The reason so many people suffer with their stomach is because they overwork it and do not give it a tonic. Mi-o-na Tablets will tone the stomach and speedily remove the disagreeable belching (gas on the stomach) sour taste and foul breath. Dizziness, biliousness and headache all disappear when you begin to take Mi-o-na. Mi-o-na is guaranteed by E. W. Mair who will refund your money if they fail to cure or do what we claim. Postpaid from The R. T. Booth Co., Limited, Fort Erie, Ont., on receipt of price, 50c.

A DAILY THOUGHT

"Do all the good you can, By all the means you can, In all the ways you can, In all the places you can, To all the people you can, As long as ever you can."

SMOKE SHAMROCK PLUG
Finest Quality.

Shiloh's Cure
quickly stops coughs, cures colds, heals the throat and lungs. 25 cents.
