## PRINCE OF WALES SCORES GOAL.

New York, Jan. 25.—A London cable to the Herald says the Prince of Wales kicked the winning goal in the association football match for the Magdalen College eleven against Keble College second, at Oxford yesterday. The prince's shot was the only score of the game.

## What A Real

## Tonic will Do

## Strikes at the Root of Disease and Gives New Health

If you look in your dictionary you will find the word "tonic" defined as "a medicine that increases the strength and vigor of the system." That tells why Dr. Williams' Pink Pills are a real tonic. Thousands of men and women are ailing to-day, not sick in bed, but without strength and ambition, utterly tired out after a day's work. No one organ seems to be at fault, yet the whole system is lacking in health. They do not sleep well and are always tired and nervous, many have headaches, backaches and stomach trouble. All these people need the tonic help of Dr. Williams' Pink Pills. The beneficial influence of this medicine reaches the whole system. Dr. Williams' Pink Pills do more than relieve the symptoms, they actually remove the cause of the trouble. The case of Mrs. J. H. Sharpe, London, Ont., is one in proof of the above statements. Mrs. Sharpe says:—"I was so run-down and weak that life was a burden. The least exertion would exhaust me so greatly that I could hardly breathe. If going up stairs, I would have to rest several minutes when I reached the top. My heart would palpitate until I felt as if it would choke me. I was extremely nervous, in fact a complete wreck, and would sometimes have to remain in bed for a couple of days or more at a time. I found no help from medicine until I began using Dr. Williams' Pink Pills, and my experience with them was that they made a complete cure. I gained in weight and my friends tell me I look younger than I did ten years ago—I know I certainly feel younger. I feel sure that what Dr. Williams' Pink Pills have done for me, they will do to other women if given a fair chance."

## For Sale

## GETTING KILLED IN THE ALPS.

Advice on How to Die Spectacularly Given By An Englishman.

In 1910, 100 tourists were killed in the Alps. Last season the number was increased to 133. As to plain, simple accidents, not necessarily fatal, last year 400 experienced broken arms, legs and ribs. Once only the elite climbers. To-day "everybody's doing it" and mountain climbing has developed into a mad scramble of thousands to reach some snow-capped summit. As most of these know but little of the technique of getting killed, an English writer who spends much of his time in Switzerland has taken it upon himself to offer various rules and suggestions.

"A fascinating way," he says, "is to go and pick edelweiss. This beautiful Alpine flower contrives to bloom overhanging the most perilous abysses. To pluck it one must approach from above. Descend slowly, therefore, clinging to some small shrub. If a passing guide chances to call warning, reply that you know what you are about, and that tourists, as well as guides, have a right to pick Alpine flowers. Lean slightly over the precipice, and as one hand grasps the alluring bloom, with the other hand pull on the shrub, which will come loose, roots and all! There will be a grating sound of loose, moving rock, the overhanging ledge will cave in, and one may soar, edelweiss in hand, into the void below. There will be three lines in the newspapers about it, and a caravan of expert guides will find the body.

"Sitting down in avalanche paths is sometimes effective. A friend of mine, dispensing with guides, climbed up above Pierre Pointe on the route up Mont Blanc, and deliberately sat down quietly to lunch in a gully where avalanches come down off the Aiguille du Midi every 15 minutes. Suddenly the air was filled with singing, flying stones and ice, the velocity making the smaller stones invisible. He failed to get hit, however, and dismounted, leaving everything behind, fled to Pierre Pointe, where he recommenced with alpine cocktails.

"Climbing without heavily nailed boots, too, has its advantages. An American, who considers it commonplace to ascend Mont Blanc like everybody else, tried it with patent leather shoes. At the 'Jondion' of the glaciers des Bossons and de Tacconnaz he slipped into a crevasse, dragging with him an English friend. Guides had great difficulty in getting them out. Hot words followed, the cool crevasse, and the two Anglo-Saxons, each blaming the other for what had happened, indulged in a warm pugilistic encounter in the snow.

"Nothing is easier than falling over a precipice. To get killed, therefore, the Alpinist with vertigo should tackle the Matterhorn, Schreckhorn, or the Aiguille Verte. While it lasts, the sensation of falling several thousand feet must be extraordinary.

## THERE ARE ALWAYS PLENTY OF GOOD POSITIONS OPEN.

for the young man or woman who will properly qualify for them through the

Houlton, Me.

## Not Only In Canada.

That outrageous bugaboo, "the cost of living," is evidently not confining its attentions to Canada alone, if one is to judge from some of the recent reports, which show that it is impossible to escape the monster by fleeing to other lands.

Take it in India, for example. There, in 1909, the wages of a staff of servants employed by a couple, consisting usually of a butler, second boy, coolie, cook, sweeper and possibly a gardener, amounted to a little more than \$23 a month. In 1911 the wages of the same staff amount to \$32 a month.

From Australia comes a wail that prices in living commodities have advanced about 10 per cent. during the last year. Of all the foodstuffs cited as having advanced in price the once humble onion holds the proudest position, its price having gone up 34.44 per cent. beyond that of a year ago. Beef has advanced from four to seven cents a pound.

## Costermongers In Morocco.

In Morocco the costermonger recommends his wares by pledging the credit of a saint. "In the name of Mulai Idress! Roast chestnuts!" "In the name of our Lord Mohammed Ali Hadji! Popcorn! Popcorn!" "In the name of Sidna Ali-bu-Rhaleh! Melons! Nice, sweet melons!" "Allah is gracious! Beans! Fried beans!" "There be no might nor majesty save in Allah! Water! Cool Water!" These and the like are heard at every turn. Even the auctioneer who is calling out the price of a slave or the bids for a Rabat carpet is careful to interlard his professional talk freely with allusions to his Maker and the pithoric roll of Moorish saints.

## Vacuum Street Sweeper.

Arthur Scymanski, an Austrian civil engineer, has invented a street cleaning machine which does not raise any dust. It consists of a motorcar with a revolving brush which not only sweeps up the dust, but throws it into a large funnel, from which it is sucked up and deposited in a metal box. The dust is not left on the street to be collected later or scattered again by the wind. The box can be removed when full and be replaced by an empty one. The wagon is driven by a twenty-eight-horsepower motor and can sweep eleven miles of street an hour.

## Heard of Him.

"Man wants but little here below," quoted Blank.  
"I've heard of that man," said Tank, cutting him off. "But did you ever know anybody that has ever seen him?"

## Tart Reply.

Mrs. Hutton (maliciously) — You were such a charming debutante, my dear, fifteen years ago. Mrs. Inglefe — Was I? I only remember you made such a lovely chaperon for me when I came out.—London Tit-Bits.

## Those Dear Girls.

Maud—My dressmaker says it's such a pleasure to fit a gown to me.  
Marie—Considers it a sort of triumph, I suppose. They say the true artist delights in difficulties.

## Brickmaking.

Eighteen thousand bricks can be manufactured by steam in a ten-hour day.

## Father Fixed It.

Her Father—My boy, I like you, and I want you to marry my girl, but have you spoken to her mother about it?

Suitor—No, sir.

Her Father—Then to make it a sure thing for you I'll oppose the match.

## AN ANCIENT DISCOVERER.

Gold Came Before Silver In the Early Use of Metals.

It is not known just when gold was first used by man as ornament and coin, but 4,400 years ago the people of the far east and in the countries of northern Africa made most exquisite jewelry out of gold and precious stones. In fact, the art of their hand wrought ornaments has never been excelled, and modern man has learned from them in technical skill. Gold as used in the early times was probably found in the form of nuggets, as the ancients would hardly have noticed it in any other form. They hammered it by hand and gave it a most beautiful polish.

Silver was not discovered for a long time after gold was in use in many countries, and when at last some one did discover it he thought it a form of gold, and it became known as "white gold." The discovery of copper soon followed that of silver, and then in succession came tin, zinc and lead. An ingenious savage who lived in upper Egypt succeeded in making brass by fusing copper and zinc, and later he manufactured bronze by a mixture of copper and tin. This occurred about 4500 B.C., and the inventor's name was Anubis.

And Anubis made the first metallic axe, knife and chisel, and also he gave us the original saw, taking for his model, so we are told, the chin bone of a snake. Like the teeth of a snake, the first saw's teeth inclined backward.

Anubis also invented the first musical instrument of which we have knowledge. He used for a sounding board the empty shell of a tortoise across which were strung four tortoise sinews as strings. Afterward this instrument was enlarged and a goat's horns used for posts. It still had four strings and a bridge and brace. This crude musical instrument became known as the lyre, and from it developed all known stringed instruments. Of this instrument a historian says:

"Horus afterward enlarged and improved the lyre by increasing the number of strings to seven, though two of them had the same pitch. He also provided a strap to support the increased weight of the instrument. It was then called by the Greeks a cithara or kithara, and in central Africa it is yet called a kassar. The Greek Terpander added an eighth string, called octachord, from which comes our word octave.

"Anubis seems to have composed a song and sung it to the accompaniment of the harp. He was also the first songster and poet of whom we have any knowledge."

Thus it will be seen that metals are very old in the uses to which man has put them and musical instruments also of very ancient date, though for countless generations there was no written music and the player composed his own melodies as he went along, which were exceedingly simple.

## Important African Discoveries.

That powerful negro empires of great size and some culture existed in the Sudan before the white races entered Africa is the conviction of a French scientist, M. Zeitner, who reports in La Nature on the results of his archaeological investigations in the basins of the rivers Niger and Senegal.

Within a triangle formed by the towns of Timbuktu, Kayes and Bamako he located fifty-two archaeological deposits consisting of ruins of unknown cities. M. Zeitner's most interesting finds were made in caves on the upper Senegal. Here an abundance of ruin signs and drawings were found traced on rocks. They were similar in character to those discovered in South African caverns. The writings have some resemblance to those signs found on ancient ruins farther eastward in the Sahara desert and are believed by M. Zeitner to be related to the present Tuareg alphabet.

The discoveries made have yet to be thoroughly studied. M. Zeitner thinks that the archaeological exploration of the African continent is yet in its infancy and will doubtless yield surprising results in establishing the advanced state of development attained by the black race in early times.

## Poison of Wood Alcohol.

Many experiments have been made to determine the toxic power of ordinary or ethyl alcohol, but no systematic experiments have hitherto been made with methyl or wood alcohol, says The Scientific American. The German physiologist Mueller has recently found that methyl alcohol is no more poisonous than ethyl alcohol to dogs. To man methyl alcohol is somewhat more poisonous than ethyl alcohol, but pure methyl alcohol is not sufficiently poisonous to cause danger of injury from the vapor of the methyl alcohol used in various industries. The accidents which occur in such cases are caused not by the methyl alcohol itself, but by the impurities which it contains.

## Not to Be Cheated.

"They tell me Tinkleton is at work on a big canvas which he calls 'The Retreat of the Ten Thousand.'"

"What does he expect to do with it?"

"Sell it to old Bordelipper."

"Any chance of that?"

"No. Tinkleton has only 933 figures in the painting, and Bordelipper will insist upon the full 10,000."

## INFLAMMATORY RHEUMATISM

## Completely Cured by GIN PILLS

Mr. W. G. Reid, of Hamilton, Ont., one of the best known and most highly respected commercial travellers in Canada, was a cripple from Rheumatism and suffered terribly. GIN PILLS cured him. Mr. Reid writes as follows:

"I have been for the last two years a cripple with Muscular and Inflammatory Rheumatism. I tried almost everything known to medical science to relieve me of the intense pain and inflammation. I sought change of climate in Kentucky and other Southern points without relief. Your manager in this city recommended GIN PILLS and I have since taken eight boxes and am now cured. I consider GIN PILLS the conqueror of Rheumatism and Kidney Diseases."

GIN PILLS is sold with a positive guarantee to cure or money promptly refunded. 50c. a box, 6 for \$2.50. Sample free if you write National Drug and Chemical Co. of Canada, Limited, Toronto.

## He Got It From Pa And Ma.

Little Jack was struggling through his home lessons, and there were many signs of woe and perplexity written on his impenetrable young face.

"Ma," he began in rather a quavering voice, "what does here-edity mean?"

Mother wasn't quite sure herself, but she was sufficiently artful not to say so outright, so she answered vaguely:

"Well, John, it's—er—it's something to do with what you get from your father or me."

Little Jack pondered deeply for a few moments. Suddenly a look of knowledge, the outcome of past unhappy experiences, appeared on his countenance.

"Then is whipping heredity, ma?" he asked.

## Keeping an Eye on the Fee.

The prisoner was charged with so trivial an offence that the judge told him that if he would plead guilty he would let him off with a fine.

"Before we plead guilty," replied the man's lawyer, "we'd like to know what the fine will be."

"Isn't it rather unusual to attempt to bargain with the court?" asked the judge.

"Perhaps it is, your honor," replied the lawyer, "but in this case it is important. You see, the prisoner has only \$12, and as my fee is \$10 we can't afford to plead guilty if you intend to fine him more than \$2."

## The Great Jenner.

An Englishman had occasion to go often to an eminent physician and said to James, "You will be tired of opening the door for me." "Not at all, sir," was the gracious reply. "You are but a hunk in the hockan."

Another James was accustomed to say during his master's occasional absences: "You had better try hoppelite. There's a very respectable man hoppelite as we often sends to when Sir William is absent. His name is Jenner."—London Mail.

## A Reforming Influence.

"That automobile I bought has been doing wonders for me," said Mr. Chuggins.

"Fresh air and all that sort of thing?"

"It has benefited me morally as well as physically. It has led me to avoid intoxicants and to lead a life that will insure me as beautiful an obituary as possible."

## It Grows Hair.

Here are Facts We Want You to Prove at Once.

In all our experience with hair tonics there is one that has done more toward gaining our confidence than any other. We really believe this remedy, known as Rexall "93" Hair Tonic is so superior to other preparations that we offer it to you with our personal and unqualified promise that if you use it and it doesn't prove in every way satisfactory to you, we will upon your mere request at our store, return to you the money you paid us for it.

Rexall "93" Hair Tonic acts scientifically, destroying the germs which are usually responsible for baldness. It acts to penetrate to the roots of the hair, stimulating and nourishing them. It is a most pleasant toilet necessity, is delicately perfumed, and will not gum nor permanently stain the hair.

We want you to get a bottle of Rexall "93" Hair Tonic and use it as directed. If it does not relieve scalp irritation, remove dandruff prevent the hair from falling out and promote an increased growth of hair and in every way give entire satisfaction, come back and tell us, and get your money back. Two sizes 50c. and \$1.00. Sold only at our store—the
