**Drives On St. John Are Coming Out,**

Word received from VanBuren, Me., to-day is to the effect that it is raining on the headwaters of the St. John river and that the stranded lumber will likely all be brought out.

The water at VanBuren has raised 1 1/4 inches since Friday morning, and the men commenced to sluice the logs at Long Lake dam yesterday with 13 feet head of water. Mr. Rainnie, the St. John Lumber Company's foreman, is expected to reach Big Black river tomorrow. The logs seem to be moving on the upper St. John, indications are very bright for getting them all out.

Mr. John Kilburn, who has returned home, corroborates the Gleaner's previous information that there was only six million feet of logs in the lot hung up at Priestley Rapids, and W. J. Nobles, who is in charge, had a big crew of men join him there yesterday.

The planting in this section is pretty well advanced, and there are several farmers who have oats, above ground as well as potatoes.

The Wood-boat, "Flying Yankee" lately owned by Capt. T. A. The tug-boat "Flushing" ran aground in the Salmon River a few days ago, but was pulled off without much damage.
