**MOLASSES TRUST THE LAT-  
EST MONOPOLY.**

New Orleans, Oct. 6.—Complete monopoly of the American molasses output is aimed at in a \$1,000,000 combine effected here.

The would-be trust starts with pledges of one fourth of the New Orleans product, with as much more promised tentatively.

The promoters of the enterprise are Don Caffery, of New Orleans; J. Wilbert's Sons, of Plaquemine; L. M. Soniat, of Dorseyville, and J. Suppie's Sons, of Bayou Goula. Secrecy is being maintained until the organization has been perfected.

It has been suggested that the wetness of the Scottish climate is responsible for the dryness of Scottish humor. Illustration—In a town noted for its rain fall a Scottish gentleman of the old school made his daily call at the shop of a silversmith on a day of heavy rain. "A fine day," said the jeweller cheerfully, "looking at the Fitroy barometer, 'the glass is raising.'" "Ay but the rain's fallin'," was the conclusive reply, which reminds one of the Skye game-keeper in whose house three English sportsmen had been imprisoned by a six weeks' downpour during which the barometer pointed fixedly at "Set Fair". "What sort of glass is that?" said one of the visitors jestingly to the owner. "Ah, she's a coot coot cless an' she's a powerfu' cless," he replied, indignantly; "she's no moved wi' trifles."

**PRINCE ARTHUR PICKED FOR  
CANADIAN POST.**

London, Oct. 9.—The Daily Sketch to day says: "I can confirm on very high authority statements made lately that Prince Arthur will ultimately succeed his father as Governor-General of Canada. This is one of the reasons for the marriage being hurried forward, since it was made a condition when the appointment was first offered him that he must be married before he took it over."

**The Tortures of Rheumatism**

Driven From the System by Dr Williams' Pink Pills

The sufferer from rheumatism who has not gone about curing himself in the right way must expect a return of the torture with every change to cold or damp weather. It is not the change in the weather that causes the rheumatism, but it does start the aches and pains. Rheumatism is a deep-seated disorder of the blood. You cannot possibly cure it with outward applications or hot formentations as so many people in their ignorance of the real cause of the trouble try to do.

Rheumatism can only be driven out of the system by driving out the poisonous acid in the blood. This can only be done by making the blood supply rich, red and pure. It is in this way that Dr. Williams' Pink Pills cure rheumatism, even after other remedies have failed. These Pills make rich, red blood; they go right to the root of the trouble, and the pains and aches are driven from the system and will not return if the blood supply is kept pure. That is the whole secret of curing rheumatism, and if you are a sufferer begin to cure yourself today by taking Dr. Williams' Pink Pills. Among the many sufferers from rheumatism who have been cured by this medicine is Miss Mary D. Kelly, South Dummer, Ont, Miss Kelly says: "Some time ago I had a very bad attack of rheumatism. At times I would be confined to bed for a couple of days and would seem almost paralysed with the intense pain in my back and legs. At such times I could not walk, and my joints were stiff and swollen. I consulted different doctors and took their medicine, but did not get more than temporary relief. At this time a neighbor advised me to try Dr. Williams' Pink Pills, and I got a supply. After taking a few boxes I found they were greatly helping me, and I continued their use until the trouble completely disappeared. I can strongly recommend this medicine to others who suffer as I did from the aches and tortures of rheumatism."

You can get Dr. Williams' Pink Pills through any dealer in medicine or by mail, post paid, at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

**At 60 Years Of Age THE KIDNEYS NEED HELP**

Gin Pills give them the strength of youth.

50 Broad Street House, London. I bought some of your GIN PILLS at Victoria, B.C. last September. I made inquiries in New York on my arrival there but was unable to obtain any information about them. Your remedy, I find at 60 years of age, to give me perfect relief and I regret very much that you have not made arrangements to have GIN PILLS on sale in New York and London, as I urgently recommend GIN PILLS to friends of my age as being the one thing that does me good.

**Brazil, Giant Of The South.**

It is to be noted that Brazil lately gave a Filipino artist honorable mention at its international art exposition and that it was at the request of the Emperor of Brazil, a good many years ago, that Wagner began to work out his great opera—some people think it his greatest—"Tristan and Isolde," says The Christian Science Monitor. To be sure, Wagner never sent the opera to the royal patron who had asked for it, but it is exceedingly to the point that this early bent of the Brazilians toward what was great in music should be set beside their patronage of art to-day.

Brazil, next to the United States is the largest of American republics, and its area is a quarter of a million square miles greater than that of the United States, exclusive of Alaska and the islands. The Atlantic coast line is 3,700 miles long, twice the distance from Portland, Me., to Key West, Fla. The population is not quite one-fourth as large as that of the United States.

The principal industry of Brazil is agriculture, though the mines are of great value. Balem is the first port touched from the north, and it is of special interest to tourists for its situation on the Paris River, the southern mouth of the Amazon. Here is a river 3,400 miles long, draining an area two thirds the size of the United States. This is the region where Von Humboldt prophesied would one day centre the civilization of the globe.

The Amazon is a mile and a half wide at Tabatinga, the last Brazilian port to the west, and it gradually broadens until it attains a breadth of 150 miles at the northern mouth alone, where it discharges a volume of water four times the size of the Mississippi. This river is already being navigated by ocean liners for two thousand miles.

Though the stream was discovered by Europeans in the sixteenth century and amazing tales of it were told, it was not until 1867 that it was opened to free navigation. It was probably through the work of an American, William Lewis Herndon, and of Louis Agassiz, then a Harvard professor, that attention was roused to bring this about. Don Pedro, the Emperor, offered Professor Agassiz all the aid he could, and it was he who decreed that the river should be open to international trade.
