

MASTER WORKMAN

SMOKING TOBACCO

It is a continuous strain for a builder to watch his buildings go up.

A pipe-full of MASTER WORKMAN tobacco is a great soother when some deep thinking has to be done. This world-famous brand may now be had at all tobacconists for 15c. per cut.

Rage For Armaments on The Continent is Increasing

Washington, Aug. 15—Chancellor Lloyd George's speech in the British Parliament predicting a revolutionary protest from the people against the increasing armaments, was the subject of an interesting discussion here yesterday. Senator Tillman, of North Carolina, chairman of the Committee on Naval Affairs, and Senator Chamberlain, of Oregon, chairman of the Committee on Military Affairs, agreed that the Chancellor of the Exchequer had touched a very grave tendency of modern government.

"Mr. Lloyd George had certainly touched on a very important subject, one of vital interest to all European nations," said Mr Tillman. "The question over there seems to be which one of them will break down financially first.

We have a slight form of the disease over here, for some men are always conjuring up a war with Japan, especially those who are interested in a big navy. I have suspected that the ship-building and armor-making people have employed some men to get up these periodical scares, for they always come when the naval appropriation bill is being prepared.

"At this stage the United States cannot permit herself to drop behind Japan, Great Britain and the other powers in the race for preparedness, but it seems to me that all the countries might relax their present standard, if they could arrange to do it at the same time."

Memorial Unveiled at Southampton today.

Southampton, England, Aug. 15.—A memorial in celebration of the centenary of the departure of the pilgrims from Southampton for America was unveiled here to-day by Walter Hines Page, the United States Ambassador. It is in the form of a column erected on the site of the pier from which they embarked. The ceremonies opened with a luncheon.

QUININE INDUSTRY OF JAVA

Java produces about two-thirds of the world's supply of cinchona, and it has for years been regularly shipped to Holland. The large quinine manufacturing, mostly situated in Germany, supply themselves in the Dutch market and of late years the manufacturers have combined to keep the prices at such low level as to render the cinchona cultivation unprofitable, although earning large dividends. To meet this combination it was resolved to establish a quinine factory in Java, says the British consul at Batavia, where the first Java quinine was produced. This is described as of excellent quality and equal in all respects to the best European brands. Last year the total production of cinchona in the island was over 8,500,000 avoirdupois.—London Globe.

BURGLAR-PROOF GLASS IN PARIS

Great strides have been made in France these last few months in the use of burglar-proof glass. Its discovery was due to its tremendous need, for Paris, of all cities in the world, seemed to be most at the mercy of that particular form of highwayman who frequents the boulevards at night, breaks the windows of jewelry stores and makes away promptly with the valuables.

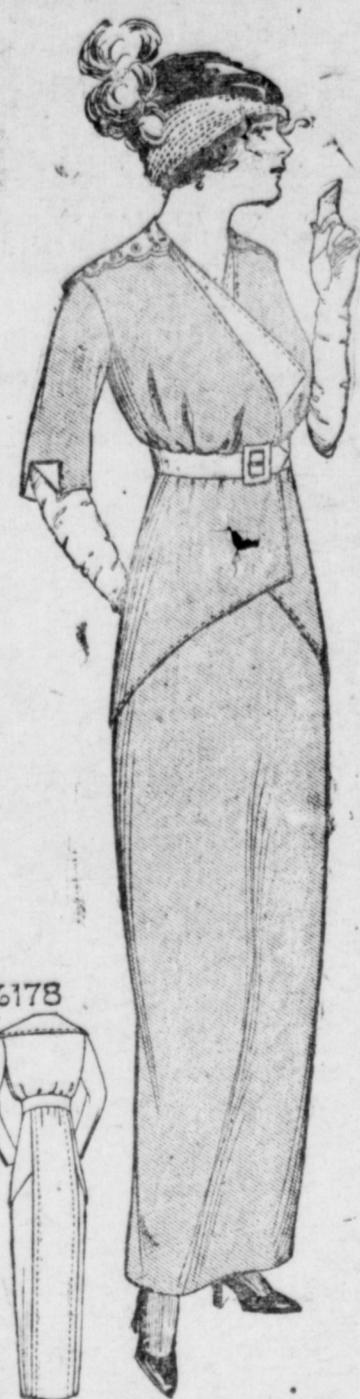

It is claimed that this burglar-proof glass is made by a secret process, though of course, it is admitted that its thickness is one of its first essentials. It is from one-half to an inch thick and is able to resist a hard blow, aimed by a strong man, from a 15 pound iron handle. Ordinary glass would have been shattered by a blow less than one-tenth as heavy.

Much is expected from this invention in the near future.

Goats as Milkers.

Most of us associate goat's milk with a strong, peculiar, almost offensive odor. Now it seems that is an altogether erroneous and prejudiced idea. Goats are now being bred for milk production, whose milk is said to quite equal the finest Jersey milk in flavor. A writer in the American Agriculturist says that goat's milk is not only the best possible and richest milk but the easiest digestible and the longest keeping. It is virtually tuberculosis proof and can be produced very cheaply. While the goat will never rival the cow as a producer of commercial milk, yet it is more than likely they will find increased favor with people living near towns and cities who produce their own family milk.

DAILY FASHION HINT.

6178

Lady's Novel Tailored Suit.
The demi-tailored suit is now the style, and prevails to a much larger extent than the severe models of a couple of years ago. The illustration shows an ideal design for one of these street dresses. It has a coat blouse, made quite plain in both front and back. The closing is slightly on the bias, and the overlapping side is outlined by a single sharp revers, which may be omitted if desired. The neck is finished with a large, handsome collar. The skirt is a two piece model, and the closing may be placed at either of the seams. The dress pattern, No. 6178, is cut in size 34 to 42 inches bust measure. Medium size requires 4 1/2 yards of 44 inch material. The pattern can be obtained by sending 10 cents to the office of this paper.

A DAILY BATH.

After a hard day's work in the field, how refreshing an evening bath seems, and how well a person sleeps after it. Has it ever occurred to you that the rest and comfort of a horse during the night may be promoted in a similar manner. When water that has stood in the sun all day is available, it is a good plan to wash off the entire body of the horse. If done after he has cooled off, there will be no danger of colic, and the time consumed will be more than saved when doing the currying next morning.

When conditions do not permit the horse being washed, by all means wash off his neck and shoulders every evening after removing the harness. A pail of cold water will be enough for several teams. The water can be thrown on with the hand, which is better than using a sponge. This treatment will prevent many sore necks and shoulders, and is enjoyed by the horse as much as his driver enjoys washing his face before eating his dinner.

Chief Crawford Advised yomei For atarrh

J. Wilfred Brown of Water St., Campbellton, N. B., says: "Hyomei cured me of a severe case of catarrh and asthma after four years of suffering. I was constantly hawking and spitting and the catarrhal droppings that came from the head into my throat affected my stomach and I could not enjoy my meals. Chief Crawford having the same trouble advised me to try Hyomei. I did so and soon I was without a sign of the health-racking disease that had troubled me for so long. I now recommend Hyomei to all catarrh sufferers.

Hyomei (pronounced High-o-me) is guaranteed to cure asthma, bronchitis, croup, coughs and colds. A complete outfit consists of a hard rubber inhaler, a bottle of Hyomei and unique dropper for filling the inhaler. Your druggists will supply you the outfit for \$1.00 (two bottles 50c.) or postpaid from The R. Booth Co., Ltd., Fort Erie, Ont. Money refunded. Sold and guaranteed by E. Mair.

Before some people cast their bread upon the waters they hunt up a reporter.

Cotton waists are trimmed with contrasting materials instead of laces or embroideries.

Serge will come to the front for practical streets dresses.

He gave advice and never quit. He tossed it round both far and nigh, and was annoyed when some of it flew back and hit him in the eye.

Scarcity of Money slows up Building

(Toronto Mail)

That "tight money" is a very real bugbear in Canada at present, particularly in the Western Provinces, is attested by the slowing up in building revealed by statistics of the past few months compiled by the Financial Post.

During July the decline in building was more accentuated than during any month to date this year. The aggregate permits show for the month a decrease of 26 per cent, while for the first seven months the figures show a decrease of 8 per cent, from the corresponding period last year.

In fact, for the last three months the decline has been quite marked. In May the decrease was 12 per cent., in June 25 per cent., and in July 26 per cent. The aggregate decrease for five months was 1 per cent., for six months 7 per cent., and for the eight months 8 per cent.

This decrease is due principally to Quebec and the Western Provinces. Only the Maritime and Ontario cities showed an aggregate increase during July. An advance of 88 per cent., was made by the two chief cities of the Maritime Provinces and a 38 per cent. increase by nineteen cities of Ontario. This bespeaks a substantial development in these provinces, while the remainder exhibit a marked tendency to ease up.

In British Columbia the decrease for the month was 77 per cent., that for Alberta 23 per cent., for Saskatchewan 63 per cent., and for Manitoba 51 per cent., while in Quebec a decline of 4 per cent., is registered. No reports have been received from Regina or Calgary, although all the other large cities are represented in the compilation but it is probable that both the cities mentioned fell far short of last year's record, and that their figures would still further lower the percentages in their respective provinces.

Toronto's permits for July were twice as large as those of any other individual city, and over 20 per cent. of the total shown by the whole forty-three. Medicine Hat also showed a creditable increase of 27 per cent., for July and of 33 per cent., for the seven months. Both Vancouver and Winnipeg were over \$1,500,000 below the level of July, 1912.

For the seven months Toronto also leads in total by a good margin. The largest percentage increase was made by St. John, with an advance to date of 263 per cent., or in actual figures, almost one million dollars. With only three exceptions, North Battleford, Medicine Hat and Nelson, the Western cities are very much behind their respective records in 1912.

Wheat Disappears

A really extraordinary disappearance of wheat has taken place, the world over, since last harvest. Primary receipts in the United States from July 1 to April 16 exceeded any previous records, aggregating 346,233,000 bushels, or 132,000,000 bushels more than last year; yet the visible supply at the end of the period was only 7,000,000 bushels more than last year.

The world's shipments in the same time aggregated 573,000,000 bushels—this also being the largest on record, and an increase of 108,000,000 bushels over the previous season, also 10,000,000 bushels more than the record exports of two years ago—yet the European visible supply at the end of the movement was 1,500,000 bushels less than a year ago. This shows a greater disappearance of wheat in proportion to the movement than has ever been known. It indicates an enormous consumption; also the necessity of continued large crops to keep supplies anywhere near a normal basis.

Lively Scenes At Nanaimo On Thursday Night

VANCOUVER, B. C., Aug. 15.—Though matters were quite quiet during yesterday, in the Nanaimo strike scenes towards evening there was a recurrence of the previous day's disturbances, though not on quite such an extensive scale. The arrival of the militia had the effect of bringing the strikers to their senses, but when the regulars had left Nanaimo the crowd again got out of hand, and an exciting scene was witnessed when a strike-breaker was sighted. His taking refuge in the police station was the means of saving his life probably.

Part of Nanaimo is in ruins, Extension is in a worse plight and many of the strike-breakers are in the hills seeking refuge. Last night between three and four hundred militia left Vancouver, the majority of the men going to the strike region, while a small number proceeded to Victoria to replace regulars, who are at Extension.

No definite steps have been taken towards a settlement, though there are rumors to the effect that efforts are being made in that direction.

From almost every Chinese city come reports that the discontinuance of the opium habit by the natives has brought about a demand for other forms of amusement and pleasure, and that the sale of American cigarettes and cigars has been greatly increased. The natives also patronize motion picture theatres, and they are beginning to have a liking for cheap foreign wines.

Self Righting Flying Apparatus a Success.

Villa Coubla, France, Aug. 15.—The new self-righting flying apparatus, invented by Lieut. J. W. Dunne, a retired British Army officer, underwent most successful trials on the aerodrome here yesterday in the presence of Brigadier-General Auguste Hirschauer commander of the aerial corps of the French army, Major Julien Felix a French army aviator was the pilot. He ascended in a high gusty wind considered too strong to face by the other aviators present. The apparatus displayed a degree of stability which drew expressions of amazement from all the expert witnesses. From time to time Major Felix removed his hands from the levers and held them above his head to show the automatic equilibrium of the machine, which retained a perfect level, even when it encountered eddies, air-pockets or squalls.

Mamoru Kisi of Tokio is returning home after having made a study of American hotels and will, according to statements made by him in New York, build a million-dollar American hotel in Tokio, opposite the Imperial Palace. He goes home with American-made plans in his pocket and the establishment will be "American in every respect, architecture, cuisine, service, equipment." He will call it the Astor.

WHEAT AND EGGS ON U S FREE LIST

Washington, Aug. 15.—The Democratic amendment putting wheat on the freelist and striking out the ten cents a bushel tariff rate fixed by the House Democrats was adopted by the Senate yesterday by a vote of 37 to 32. A subsequent motion by Senator Gronna to fix a duty of six cents per bushel on wheat and one-eighth of a cent per pound on wheat flour was defeated 37 to 31. Senators Ransdell and Thornton of Louisiana, voted with the Republicans.

The democrats also defeated an amendment proposed by Senator Gronna to restore the three cents duty on eggs contained in the House bill. The vote was 35 to 28 in favor of the Senate committee proposal for free eggs.

The first definite effort of the Democrats to an agreement for an early vote on the tariff bill failed in the Senate today, when Republicans served notice that consideration of the measure would be continued indefinitely.

Leading Senators of both parties as a result of the day's developments last night, predicted a session of Congress that would run until late in October or November.
