

Premier McBride has refused to introduce a suffrage bill.

The authorities have been ordered to examine the body of one landing at the United States, and the United States authorities have been notified.

Several were killed and two injured in an explosion of the dynamite at Cabbagetown, N. J., on the Delaware River, sixteen miles below Philadelphia. The dead men were employed in the gelatine mixing house, which was levelled by the explosion.

Alaska has forty-two schools attended by more than three thousand white children.

These are degenerate days at Harvard, if the views of Mr. Jones, the aged bell-ringer, or rather the views attributed to him in a newspaper, are to be accepted. In the old days the students were fun-loving fellows, who were forever chiding up capers. With the coming of Eliot, manners decayed (in Jones's quoted opinion), and a reign of effete and effeminate dignity set in. Everything now is studious (one is not so sure about that) and proper.

Broom bags of canton flannel or old underwear should be made with draw strings to tie securely about the broom handle.

Did you ever meet a self-made man who was ashamed of his job?

Under the guard of two detectives, what is claimed to be the original Mona Lisa of Da Vinci was exhibited for an evening recently in New York city. The owner, Mrs. W. B. Vernon, of Montclair, N. J., says that the painting has been in the possession of her family for 150 years.

It is the fashion of the present century to divide the Victorian age as dull and self-complacent. But the truth is that, intellectually, the Victorian age was much more intensely alive than the present. And there was plenty of excitement. The theories of Lyell and Darwin revolutionized religious thinking, and the revolution was one that mattered; it was seriously regarded by men on both sides, and something seemed to be at stake. Still there was some wit expended upon the situation. One of the best examples of this was the epitaph composed for Lord Westbury, when the judicial committee of the Privy Council refused to sustain the judgment of suspension against two of the authors of the famous "Essays and Reviews." The words of the epitaph were these: "Toward the end of his earthly career he dismissed Hell with costs and took away the orthodox members of the Church of England their last hope of everlasting damnation."

'Some Cows from Glengarry'

Among the records collected by the dairy division, Ottawa, this season are some from Glengarry that show the average yield of 155 cows to be 4,540 pounds of milk, 3.5 test, 159 pounds of fat. Included in that is the yield of one herd of 9 cows including one three-year-old that averaged 6,209 pounds of milk, 3.3 test, 205 pounds of fat.

It will be noticed that this herd produced 1,659 pounds of milk and 46 pounds fat above the average of the 155 cows. Another herd averaged 220 pounds of fat, or 61 pounds per cow above the average; with fat reckoned at thirty cents per pound, this is equivalent to over eighteen dollars per cow, indicative of the thousands of dollars extra that might be coming into a district if the cows were keyed up to a higher producing level.

One noticeable feature of this section is the large number of poor yields from two and three year olds. But it is not only the heifers that are responsible for lowering the average yield. There are cows from six to ten years old that gave only 2,800 pounds of milk and 102 pounds of fat as compared with that average of 4,540 pounds of milk and 159 pounds of fat.

So that instead of a contrast of only eighteen dollars, it is found that there is an actual difference of over forty one dollars in the cash received from mature cows in the same period. This is surely a statement strong enough to cause every dairyman to examine close-

ly into the performance of each cow he keeps. Milk records are easily kept and a composite sample from each tenth day's milk can be tested once a month. Is not this worth doing?

GRADATION.

Heaven is not reached at a single bound, But we build the ladder by which we rise

From the lowly earth to the vaulted skies, And we mount to its summit round by round.

I count this thing to be grandly true: That a noble deed is a step toward God

Lifting the soul from the common clod To a purer air and a broader view.

We rise by the things that are under our feet.

But what we have mastered of good and gain; By the pride deposited and the passion slain.

And the vanished ills that we hourly meet.

Wings for the angel, but feet for men! We may borrow the wings to find the way;

We may hope, and resolve, and aspire, and pray, But our feet must rise or we fall again.

J. G. Holland.

If you have a slight burn, wet it instantly with vinegar and powder with baking powder or flour.

The Car Ferry For Prince Edward Island.

SHEDEAC, Dec. 6.—The contractors for the terminals at Culeton Head, P. E. I., have arrived at Shediac with their plant and will procure all the stone required for this immense contract from the Smith quarry at that place.

Messrs. Bager Miller & Sons of Toronto, who have the contract, are one of the largest contracting firms in the Dominion of Canada in this work. The plant already on the ground consists of engines, both stationary and locomotive; cars for conveying the stones from the quarry to the wharf at Point du Chene, quarrying machinery, hoisting gear, etc., in fact a first class plant for the work in view. Several buildings have already been built at the quarry, and every available house that could be secured in the town or vicinity has been rented for the use of the employees. In fact, the absence of houses is a serious drawback to the proper accommodation of such an addition to the Shediac population, but it is hoped by spring to remedy this want by building a number of houses on the Gallagher property, about forty in all, being sold already.

At the quarry there is also under construction a Marconi tower, which will keep the firm in constant communication with the work at Culeton Head, where a similar tower is being constructed, and also with their large towboats between the two points, the boats being equipped with wireless apparatus. Large sidings are being built from the quarry to the main line, and at Point du Chene, where the stone is to be shipped, several new sidings are being built to facilitate the loading of the large scows from the cars. Three tug boats and a large number of crews will comprise the fleet, and it is expected the work will take upwards of three years to complete. At the present time it is estimated the firm will use about 300,000 yards of stone, which figures may be increased as the stone for making the concrete work will all be crushed at the quarry, and some changes may be made in the concrete work, which will increase the quantity.

When the work is in full swing, upwards of four hundred men will be employed, and the effect of such an addition to the working population of a small town can be easily estimated.

The girls at the State Industrial school in Lancaster, Pa., are busy digging the foundation for a new building which is to be erected soon. The girls volunteered to do the work, and seem to enjoy it.

A Bad Stomach

Mrs. S. Keast, of Clarkburg, Ont., says "A bad stomach trouble that had bothered me for years, baffled and puzzled skilled physicians, was nicely relieved by Mi-o-na. My food would not digest but fermented in my stomach, forming a gas that gave me untold suffering and pain, and also made me weak, nervous, irritable and unable to rest. Since using Mi-o-na I can go to bed at night and sleep and wake up in the morning refreshed. I cannot speak too highly of Mi-o-na."

The dyspeptic nervous or otherwise, who does not give Mi-o-na a trial is losing an opportunity to regain health, for Mi-o-na tablets are guaranteed to cure dyspepsia and all stomach disturbances, such as vomiting of pregnancy, sea or car sickness and the stomach sickness after excessive indulgence. All druggists, 50c., or from The R. T. Booth Co., Ltd., Fort Erie, Ont. Sold and guaranteed by E. W. Maie.

This Beautiful Hair

Is like what you want your hair to be—

Lustrous, bright and glossy; soft, silky and wavy.

To have beautiful hair like this, use

HARMONY HAIR BEAUTIFIER

It's just what its name implies—just to make the hair glossy, and lustrous, and more beautiful—just to make it easier to dress, and more natural to fall easily and gracefully into the wavy lines and folds of the coiffure, just to give that delightful fresh and cool effect, and leave a lingering, delicate, elusive perfume.

Will not change or darken the color of the hair. Contains no oil; therefore, cannot leave the hair sticky or stringy.

Very pleasant to use, very easy to apply—simply sprinkle a little on your hair each time before brushing it.

To thoroughly clean your hair and scalp, use

Harmony Shampoo

A liquid shampoo to keep the hair clean, soft, smooth and beautiful. It gives an instantaneous rich, foaming lather, penetrating to every part of the hair and scalp. It is washed off just as quickly, the entire operation taking only a few moments.

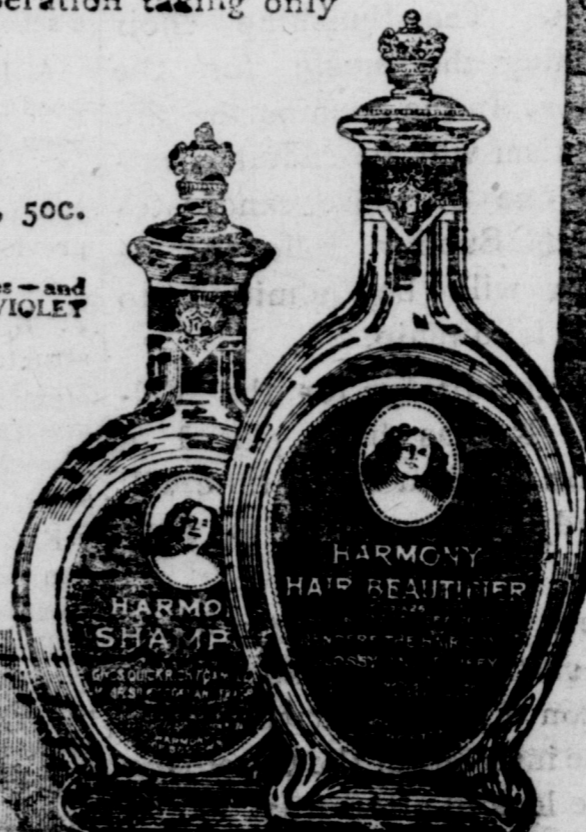

- It leaves no lumps or stickiness.
- Just a refreshing sense of cool, sweet cleanliness.
- Just a dainty, pleasant and clean fragrance.

Both in odd-shaped ornamental bottles, with sprinkler tops. Harmony Hair Beautifier, \$1.00; Harmony Shampoo, 50c. Both guaranteed to please you, or your money back.

Sold only by the more than 7000 Rexall Stores—The World's Greatest Drug Stores—and made in our own big Toronto Laboratories, where all the delightful HARMONY, VIOLET DULCE and BOUQUET JEANICE Perfumes and Toilet Preparations are made.

Sold in this community only at

Edgar W. Maie's
