

DAILY FASHION HINT.

Stylish for Bordered Materials.
The use of embroideries and of bordered fabrics is a feature of the present season. Our model shows how one of these popular gowns may be made. Like nearly all the best models of this season, the dress closes in front at the side of the little vest and skirt panel. The tucks at the shoulders provide a little fullness and the wide, epaulette collar is in the latest mode. The skirt is in two pieces and fits the figure neatly.

In using a bordered fabric our design can be followed exactly and the same effect can be obtained with plain materials and band trimmings, which are very much in vogue.

The dress pattern, No. 6192, is cut in sizes 34 to 40 inches bust measure. Medium size requires 4 1/4 yards of 46 inch bordered material or 5 yards of 36 inch fabric without border.

The pattern can be obtained by sending 10 cents to the office of this paper.

Fredericton Man Has Disappeared

Florenceville, N. B., Sept. 2.—Considerable excitement has been caused here by the sudden and mysterious disappearance of Mr. Ernest Coy, who has been residing here for the past couple of years.

About two years ago Mr. Coy came here with his father, Mr. Havelock Coy of Fredericton, and they purchased one of the finest farms in Carleton County, which the young man has since operated. Recently he went to Fredericton to see his parents and since then has not returned.

No reason can be given for his strange disappearance and his father, who was here for the week-end was unable to find any trace of his son. Young Mr. Coy was well liked by the people of the district and had many friends here. He left the farm in good shape with 16 acres of potatoes and 36 acres of grain ready to be harvested. Arrangements have been made with Mr. E. Frank Smith, ex-M. L. A., to take charge of the farm and handle the harvesting of the crop.

Apparently the Woolworth building, New York, is not to have the distinction of being the tallest building in the world for any great length of time. Plans have been announced by the Pan-American States Association for an office building whose topmost point will be 901 feet above the sidewalk. If the plans do not miscarry, this building will be constructed wholly of materials brought from the Central and South American republics, and expectations are that it will be completed by the time the Panama Pacific Exposition opens in 1915.

With the exception of a man of 72, a whole Russian village of 1,100 inhabitants on the Island of Saghalien has been blotted out by smallpox.

Twelve per cent of all deaths in Switzerland, which is supposed to be a paradise for people afflicted with consumption, are caused by that disease.

MASTER WORKMAN

SMOKING TOBACCO

It is a continuous strain for a builder to watch his buildings go up.

A pipe-full of MASTER WORKMAN tobacco is a great soother when some deep thinking has to be done. This world-famous brand may now be had at all tobacconists for 15c. per cut.

Smallest Season's Work On St. John

Fredericton, N. B., Sept. 4.—The St. John River Log Driving Company's rafting operations closed last night for the season. The amount of lumber rafted this year is said to have been fifty-three million superficial feet, said to be the smallest season's work in the history of the river.

Mr. Flavien Chouinard, of St. Pamphile, Que., one of the leading lumber operators on the Upper St. John River, is at the Barker House. As to next season's operations on the headwater of the St. John River he says that nothing can be settled until definite action is taken regarding the millmen's strike at St. John. I see that Premier Fleming has about succeeded in arranging a settlement of the strike at St. John," said Mr. Chouinard. "If the strike is settled and the mills start running without much more delay, there should be a fair-sized output of lumber on the St. John River this year. If the mills at St. John remain closed, the mill owners won't want to cut any more logs than they have now."

Labor Troubles in British Columbia.

Vancouver B. C., Sept. 5.—Matters have quieted down on Vancouver Island in the coal areas, but that there is more trouble brewing is the opinion of some of the labor leaders. The statement is made by one who has taken an active part in these affairs that within the next ninety days events may be looked for that may eclipse anything that has yet taken place. The militia, however, have received orders to be ready to sail again for the trouble zone at a moment's notice.

Nanaimo, B. C., Sept. 5.—"I shall dream of this," cried out Magistrate Simpson, at the conclusion of the preliminary hearing of the charges against the twenty-four Extension men accused of the destruction of property August 13, 14 and 15. Witness after witness took the stand and recounted blood-curdling tales of the three days' rioting. Aged women and children, mothers with babes in their arms, old men and young men, told of having to flee for their lives from the frenzied mob that sacked and burned their comfortable homes, stroyed their life savings, the next morning they were on the ridge by the sea, and the next day they were down the coast.

of the Union Mine Workers, who was one of the first men arrested after the arrival of the militia. Arthur Jordan, a prominent union man, and secretary of the local union, was also cleared on this charge, but remained in custody, having been identified as taking part in several disturbances in Nanaimo.

Severe Storm On The Carolina Coast

Washington, N. C., Sept. 5. Property valued at more than \$3,000,000 is reported to have been destroyed and rumors are current of a heavy loss of life, as the result of the destructive storm which swept the North Carolina coast yesterday. Wire communication with the stricken district was meagre early this morning.

Efforts to verify by wireless reports of many casualties on Ocracoke Island, in Pamlico Sound, have been fruitless. All wireless stations in that vicinity are believed to have been wrecked by the storm.

The greatest damage to property occurred in Beaufort County, and havoc was wrought among the fishing craft in the Pamlico River. In Washington business houses and manufacturing plants along the water front were partially destroyed. The total damage in this country alone is estimated at \$2,000,000.

A DAILY THUGHT.

He that holds fast the golden mean,
And lives contentedly between
The little and the great,
Feels not the wants that pinch the poor,
Nor plagues that haunt the rich man's door.

—Cowper.

Indigestion

If you are suffering from indigestion and the attendant distressed stomach, you should give Mi-o-na, the guaranteed remedy a trial. Mr. William Shafer of 230 Queen's St. S., Berlin, Ont., says: "For years I have been a sufferer from acute indigestion, which caused the most distressing pains in my stomach. I decided to try Booth's Mi-o-na Tablets and they have done me more good than anything I have ever used. I am now free from this trouble than I have been for years. I am pleased to endorse this remedy to all who are afflicted with this trouble."

Booth's Mi-o-na Tablets are guaranteed to cure chronic indigestion, flatulency, and all stomach troubles into a new and healthy condition. All druggists 50c. Sold and

The Danger of Rest.

Veterinarians have to deal quite extensively with a disease in horses called azoturia, which is largely induced by a day or more of idleness with the full feed kept up, following a period of steady and, perhaps, severe labour. This disease is very apt to prove fatal. The prevention is to reduce the feed as soon as the work is reduced and, in addition, if possible, give a certain amount of light exercise. While the horse is working steadily every day, tain a king large amount of food. The exercise enables him to throw off any toxic poisons contained in that food through the activity of the bowels and kidneys, and particularly the skin, consequent upon such exercise. He stops work on Sunday, but the appetite keeps up. He stands still in the stable on a full ration of hay and grain. Monday morning comes, and he is put to work, again to fall a victim to azoturia. The practical conclusion is that, if the farmer would turn his horse to a paddock pasture, and take away most of their grain over Sunday, he would, in many cases, be saved the loss of a valuable animal.

A correspondent of the Pall Mall Gazette earnestly inquires: "What is the cause of the revival in popularity of ale and beer as palatable beverages?" The situation referred to is to be found in the restaurants of London. The change has been from whiskey and water. It may be left to the social philosopher to determine whether this change spells progress.

The Prussian government has bought a grain of radium for \$87,500 for hospital and scientific work. Prof Hys is making an appeal to the nation to subscribe to the fund for the purchase of radium, which has already reached \$200,000.

The people of the West are not entirely devoted to money-making. Moose Jaw has just opened a public library into which the city authorities have put \$100,000 of public money. The intellectual and spiritual life of the West keeps pace with material development.

For Colds, Sore Throat, Croup. For Aches, Pains and Wounds.

JOHNSON'S ANODYNE LINIMENT

is the never-failing remedy. Keep it in your home and be ready for both internal and external ills.

Parsons' Pills relieve constipation and headache

BAD BAY RUM AND FLORIDA WATER.

OTTAWA, Sept. 3.—Canada is getting some bad bay rum and Florida water served it, according to Chief Dominion Analyst McGill. These two articles should contain a certain amount of methyl alcohol, which is the kind that does the least harm in the most places. The Inland Revenue department recently sampled and found that most of the Florida water and bay rum contains about one-third methyl alcohol. It will kill if taken internally and is liable to produce blindness, if applied externally. Mr. McGill says the greater part of the stuff is being sold illegally.

Go To Barren North To Discharge Duties.

EDMONTON, Aug 28.—Six officers of the Royal Northwest Mounted Police, who have been at Herschel Island and Fort McPherson, both inside the Arctic circle, since the summer of 1911, will arrive in Edmonton in a few days, and it is expected they will bring word of Harry V. Radford, an American explorer, who has been in the North for several years. The party relieving the returning officers left Edmonton last June, and reached the world's rim the middle of July, when the latter started for civilization.

The post at Herschel Island is a log building with a similar structure for the horses. In the winter the outpost is covered with snow while in the summer it stands on a bleak plain with the sun blazing on it twenty-four hours a day. Six months in the year it is dark, and the rest of the time it is light. Superintendent Fitzgerald and two companions lost their lives near the island last year, in attempting to negotiate the trail in a blizzard.

The difference between victory and defeat is usually a number of things that you might have done.

Even fortune comes to him who waits if he doesn't starve to death in the meantime.

ANOTHER EARTHQUAKE.

Messina, Sept. 4—Another slight earthquake was felt here this morning and created a fresh panic among the inhabitants. The shock lasted five seconds.

Now that there are no longer any Indians to fight, an ambitious, energetic boy has little to which he may look forward.

New Zealand will be represented at the Panama-Pacific Exposition at San Francisco. This was decided upon by the government to day.

Another important decision at the Dominion Alliance, Toronto, on Thursday, was the proposal to get legislation to amend the Canadian Temperance Act so as to allow license inspectors to arrest persons selling liquor in prohibition districts without a warrant.

The smallest golf course in the world is on an island one mile long, off the coast of Scotland. It is used by men tending the lighthouse on the island, and contains three holes.

Of 74,000 locomotives inspected last year by the U. S. Inter-State Commerce Commission more than 100 were found defective.

Fresh air, pure eyes, and full gullet are the things that keep the body healthy and the mind clear.
