

IN MISERY AT MEAL TIME

Indigestion Can be Cured by the
Use of Dr. Williams' Pink Pills

If your digestion is weak you cannot derive proper nourishment from your food. The pain and distress you suffer is a protest from your stomach that it is unable to do its work. It is then that you lose all appetite, have dull headaches, acute pains in the chest and abdomen, heartburn and other distressing symptoms.

You cannot cure indigestion by the use of laxatives, and pre-digested foods only make the stomach more sluggish. Indigestion can only be cured by giving tone to and strengthening the nerves that control the stomach. Dr. Williams' Pink Pills have cured indigestion times without number, because they purify and enrich the blood. In this way they improve the appetite, dispel the torments of indigestion and enable you to derive benefit from the food you take. The following is proof of these statements. Mrs. George Brien, Great Shemogue, N. B., says: "A few years ago I was taken down with a fever which left me suffering from nervous stomach trouble. I apparently got over it, but the trouble could not have been wholly eradicated, as during the summer of 1912 I was taken down with it again. I took many medicines and was attended by two different doctors, but instead of getting well seemed to be growing worse. I could not eat, without suffering the most intense pains; even a drink of milk seemed to upset me. I slept poorly and at last dreaded to see night come. In this condition I saw in a newspaper the story of a woman who had similarly suffered and was cured through the use of Dr. Williams' Pink Pills. I decided to try the Pills and found by the time I had taken three boxes that they were helping me. I continued using the Pills until I had taken eight boxes, when the trouble had disappeared, and I have to thank Dr. Williams' Pink Pills for restoring my health after I had practically given up hope of ever being well again."

Dr. Williams' Pink Pills are sold by all medicine dealers or will be sent by mail at 50 cents a box or six boxes for \$2.50 by writing The Dr. Williams Medicine Co., Brockville, Ont.

Silver Jubilee to Rev F J McMurray.

Sunday was the 25th anniversary of the ordination of Rev. F. J. McMurray to the priesthood. On that day he was the recipient of many congratulatory telegrams from priests and laymen, including one each from His Lordship Bishop LeBlanc and Fathers Holland and Duke of St. John. He has also received the hearty congratulations of his numerous friends in Woodstock of all denominations on the happy event. His parishioners took advantage of the occasion to show their love for their pastor, and after an eloquent sermon by Rev. Father Walsh, C. S. S. R., of St. John, at High Mass on Sunday, His Honor Judge Carleton presented Rev. Father McMurray with a purse of gold, containing over \$300, and read the following address:

JUDGE CARLETON'S ADDRESS.
To the Reverend Francis Joseph McMurray, A. M.

Reverend and dear Father:—
We come to you with salutation, congratulation and joyful wish.

On this day—the feast of the Conversion of St. Paul—twenty-five years ago, a venerable successor of the Apostles, by the imposition of hands and episcopal ordination, raised a young man to the exalted dignity of the priesthood. The bishop was the Right Reverend Dr. Sweeney, of saintly memory; the youthful Levite, dear Father, was yourself.

A quarter of a century dedicated to a high and sacred purpose.

In the imperceptible march of Time minutes run into hours, hours slip into days, days glide into years, and, almost unconsciously we find that we have reached a place that marks an epoch in life. With eyes looking forward, twenty-five years seem a well-nigh interminable vista; gazing back at the milestones passed, how short appears the road we have come! Standing on the achieved eminence we pause for meditation, for it is a

place of retrospect and prospect—the winding path through familiar pains and ventures. . . the streams unbridged and the vales untraveled." For you, the former, in which as a Light-bearer you have guided the faltering steps of frail humanity, is illumined by the inner consciousness of duty done without hesitation and regardless of personal comfort; on the untrodden hills before you there lurks no apprehension, for you have still the strength to endure and the will to do.

Memorable to you—and choicest of all in its happy recollections—must ever be that moment when you were consecrated to the Temple, when your fingers were anointed for blessing and absolution and the wonderful sacrificial power over the real and mystical body of Jesus Christ. The echoes of that hour are in your heart now. How your soul must swell with the thoughts that then filled and submerged you!

Rekindling anew, with increased fervor, with vivifying and revivifying energy, the hopes, aspiration and holy enthusiasms that animated you when you were told that you were a priest forever and commissioned to preach the Gospel of the crucified Son of God.

Today is a day of Jubilee; the sweet incense of praise, approval and laudation rises from censers swung by those who love you and who have benefited by your faithful labors.

Respecting your inherent modesty, your dislike for ostentatious display, we couch the feelings of the present in language altogether inadequate. Why should we not rejoice with you in your rejoicing? Has not St. Gertrude's, under your careful administration, flourished until its position has become one of generous envy among the parishes of the Diocese? We are proud of it, and if we fail to speak it in fitting phrase it is not for want of appreciation. There is really no need for words. Look at the weeks! They are eloquent attestations of what you have accomplished in ten years: property acquired, grounds beautified, the presbytery improved, a vestry built, a parish hall erected, the external and internal decoration of this church so recently adorned with a handsome and artistic altar, worthy, so far as taste and means could make it of the August Oblation, the tremendous central sublime act of the Living Church of God.

The spiritual development of the parish has kept pace with, and it is certainly not your fault, if it has not surpassed the material side. The poor to whom you have been a friend, the sick to whom you have been a solace, the bereaved to whom you have been a comfort, the sinner to whom you have been a charitable exhorter, all who have witnessed the virtues springing from your personal piety acclaim you a true disciple of the Master and possessing, in a rare degree the sacrosanct character which has glorified the priesthood of the race from which you sprung, and which its people have voiced in the endearing expression, Soggarth Aroon.

Nor is the esteem in which you are held confined to us. You have been

active in many affairs for the weal of the community at large, and it is with gratification we note the respect and veneration accorded you by those alien to your faith and fold.

On the mountain range of Time there is a distant peak known as the Golden Jubilee. Your face is set towards it. May you reach it supported and sanctified by the health, happiness and benediction of the Lord.

This is the tribute and prayer of which this gift is but a slight token of your loyal and devoted.
People of the Parish of St. Gertrude's, Woodstock, N. B.,

January, 25, 1914.

Father McMurray in replying to the address of his people in the course of his remarks said:—"I deeply appreciate the sentiments of loyalty and affection so eloquently expressed in the address just read and I am indeed proud of a tribute from such generous hearts. I feel that all the expressions of good will are from the people who have the deepest regret for the priest and his office. Thirty-one years ago I went to St. Joseph's College, Memramcook, where I made the classical course, afterwards going to the seminary. Returning to St. John I received ordination twenty-five years ago today from the hands of Bishop Sweeney, of saintly memory. I spent seventeen years in St. John, and was made rector on Father Casey's appointment to Fredericton. When Father Casey was made bishop I came to Woodstock, succeeding Father Chapman, who was made vicar-general. Let me say I came with all confidence in the people and I have not been disappointed. I have had your earnest co-operation in all I have suggested. The years here have been the happiest in my life, the pronounced material advancement that has been made in the parish is due to the people. We have also made spiritual advancement that is evident in our church societies and communicants. I thank you all, and your committee, for this expression of appreciation on my anniversary and ask your prayers and good wishes for the future."

ADDRESS OF FATHER WALSH.

Rev. Fr. Walsh delivered an eloquent speech on the dignity and honor of the priesthood. The priest was the ambassador of God, inasmuch as he received his commission from God; the ambassador speaks in the name of him who sent him, so likewise when the anointing bishop, representing God, told the young priest a quarter of a century ago to go and preach the gospel he did so. He told of Rev. Father McMurray's ordination, of his 17 years spent in St. John and eight years in Woodstock. He congratulated him in the name of his parishioners, of the Bishop of St. John, and of the Catholic church in general in whose service he had sacrificed himself; by day and by night he worked for the people who had been committed to his care, and who would join the speaker in asking God to bless him on this occasion—God, surrounded by His angels, who looking down can remark: "This is My beloved child with whom I am well pleased, hear ye him."

Apple Orchards are Sure Money!

But we must plant the native grown trees. I have a few trees, all the hardy, reliable varieties, 3 to 5 years old—must positively clear out in May, the last chance to get them. Send list of what you want. POTATO MEN! Arsenate of Lead is cheaper than Paris Green. Does not wash off. Does not burn the plant. I am agent for the famous Grasselli Arsenate of Lead and Grasselli Bordeaux Mixture.

Write for facts and prices.
TAPPAN ADNEY, Upper Woodstock

Alex Munro

Alex Munro, proprietor of the Brunswick House, died suddenly at 1 o'clock Wednesday morning. He was 63 years of age. He was twice married. He leaves by his first wife two sons, David of Fredericton and Segee of Hartford, York County, and by his second, one son, Hugh.

DIED

HAMILTON—On Saturday, 17th inst. the infant daughter of Mr. and Mrs. Stanley, Hamilton.

CLARE—At Pokiok on Monday, January 20, of tubercular trouble, Mrs. Frederick Clare, aged 26 years.

Mrs. John W Grant

Mrs. John W. Grant died on Tuesday at the home of her daughter, Mrs. Harry Brawn, Fort George, B. C., after a long illness, aged 63 years. Mrs. Grant went to Fort George with her daughter last summer, hoping the change would benefit her health. Mr. Grant followed in the fall. She leaves to mourn, her husband, one daughter, Mrs. Harry Brawn, Fort George, B. C. and six sons, Burns of Woodstock, Frank and Lucien, of Montreal, Everett and Gilbert, of Fort Fairfield and Hedley of Presque Isle. Geo. Caldwell, of Northampton, is a brother. She was a member of the United Baptist church, and was highly respected. Burial will be at Fort George.

AT 60 ENJOYING PERFECT HEALTH

Because He Takes GIN PILLS

A prominent Consulting Engineer of New York City, thus heartily endorses GIN PILLS.

"I bought some of your GIN PILLS at Victoria, B. C., last September. Your remedy I had, at 60 years of age, to give perfect relief from the Kidney and Bladder Troubles incident to one of my age. I am now feeling like a young man, and I am sure that you are doing me good." E. G. WOODBORN.

By the time a man or woman is 60, the Kidneys and Bladder need a little help to keep in good working order. GIN PILLS are what they need. GIN PILLS keep the urine neutral, prevent colds settling on the kidneys or bladder and ward off Rheumatic attacks. Remember, every box of GIN PILLS is sold with a positive guarantee to give perfect satisfaction or your money promptly refunded. 50c. a box, 6 for \$2.50. Sample free if you write National Drug and Chemical Co. of Canada, Limited, Toronto. 176

DEVELOPING THE OYSTER

The Industry is Important in Prince Edward Island

The Government of Prince Edward Island leases 30,000 acres, chiefly in Richmond Bay, to oyster culturists. They pay one dollar per acre. The product per acre when in condition is fifty barrels, therefore the normal yield is 1,500,000 barrels, which at \$3 per barrel amounts to millions of dollars.

A great deal of work is required to develop the oyster. The spat has a leg with a gelatinous foot, with which it adheres to solid substances. It will not affix itself to anything slimy; consequently it has been found necessary to take the shells on shore, let the rain and sunshine clean them and replace them before dropping the spat.

A lump of sugar saturated with vinegar will cure bloodsugs.

VALUE OF NEW CANADIANS

What Immigration Gives Us Besides New Citizens

Occasionally we in Canada groan over foreign immigration and the heavy task we have assumed in trying to assimilate the newcomers and make them good citizens. We give an imitation of the weary Titan. But after all, is not all this change of population good for us asks the Toronto world.

In an old town, where the same families have lived for many years and where everybody knows everybody else, there is danger of narrowness. People are apt to discuss each other's affairs instead of public affairs. On the other hand, in a new growing town there is an exhilaration not only in the rapid progress, but in the contact of new personalities, the hurrying of mind against mind and character against character.

Then there is a good deal to be learned from foreigners. What is the use of foreign travel except to meet new people, observe new customs, and acquire new points of view? The inexperienced traveler is apt to go along certain beaten paths and see the things that his predecessors have seen. He does not see the people in their homes; and especially he does not see the poor. He sees the evidences of European culture and power; but he does not see the results of European neglect and oppression. A careful and sympathetic study of the foreign immigrant is as stimulating and instructive as a trip to Europe.

MAKING STEEL PENS

This Industry Has Developed in About a Century

The advent of the steel pen dates back to about 100 years ago, when steel pens of the barrel type—that is with the holder and pen in one piece—were made and sold for 60 cents. To James Perry belongs the credit of bringing steel pens into general use. He began pen-making in Manchester in 1810, and ultimately developed the pen trade in London before the prominent Birmingham makers, Mitchell, Gillott and Mason, caused a revolution in the trade by machine made pens. The greatest improvement to the manufacture was the adoption of a

Grover Flemming.
The death took place at Debec on Thursday of Mr. Grover Flemming one of the leading men of that village. He had suffered from a throat affliction for some years and his death was not entirely unexpected. He was 42 years old and besides his widow, who was formerly a Miss Mills of Benton, he is survived by two children. Three sisters, Mrs. J. K. Flemming of Woodstock, Mrs. Gordon Neil, of Saskatoon, and Mrs. Craig, of Debec also survive. Funeral took place on Saturday.

Jacob E Chase
Mr. Jacob E. Chase, a well known and highly respected resident of Union Corn r, where he has lived all his life, coming from Upper Gagetown when three years of age, died on Saturday morning at his residence, aged 50 years. Deceased is survived by a widow, formerly Rebecca Barton of the Range, Grand Lake, Queens Co., and one brother, George A. Chase, of Woodstock. George Chase of Upper Gagetown, is a nephew and an aunt, Mrs. W. A. Troop who resides in St. John. The funeral was held on Monday afternoon at Union Corner.

BORN
WATSON—At Littleton, on Friday, Jan. 23rd, to Mr. and Mrs. Henry Watson, a son.

HACKING COUGH OF TWO MONTHS STANDING

Cured by Na-Dru-Co Syrup of Linseed, Licorice and Chlorodyne

You know how hard it is to get rid of a cough that has hung on for even two weeks, let alone two months. So you will appreciate what Na-Dru-Co Syrup of Linseed, Licorice and Chlorodyne did for Mr. Patrick Holland, of East Baltic, P. E. I. He says:

"I suffered from a hacking cough for over two months. I tried several remedies, but they failed to cure me. At last I tried Na-Dru-Co Syrup of Linseed, Licorice and Chlorodyne, and got such relief that I tried more, and after using three bottles was absolutely cured."

The unique, scientific combination of three such reliable remedies makes Na-Dru-Co Syrup of Linseed, Licorice and Chlorodyne the best preparation that has ever been offered for all sorts of colds and coughs. Get a 25c or 50c bottle from your Druggist and see for yourself how effective it is. National Drug and Chemical Co. of Canada, Limited.

screw hand press for the cutting out of pens. By means of this process one man can cut as many as 45,000 blanks a day.

The shape is given to the blanks, of course, by the dies in the press, and there are many different types of pen to be made. As a matter of fact, a leading pen maker has a catalogue containing 5,000 varieties of pens, while it has been estimated that no fewer than 10,000 different shapes and sizes are on the market.

The great objection to the steel pen when it first came into general use was its stiffness. There was not that "give" and spring in the metal pen which characterized the old fashioned goose quill pen. This was remedied however, by the side splits we see in pens to-day, and for many years the method of slitting the pens by means of a press was kept secret by those famous pen makers, Gillott and Mason.

Briefly, the method of manufacture of a steel pen to-day may be described as follows: The blanks are pierced and the slits cut, after which the open requires to be softened by annealing. Then they are raised and hardened, scoured with acid, colored, varnished and dried, girls afterward looking over the pens, throwing aside the faulty ones and packing the good ones into boxes ready for sale.

Not Air as a Polishing
Not air is utilized nowadays in polishing processes. The articles to be treated are placed in a basket in a centrifugal machine driven at a very high speed, and heated air is blown from a pipe through the basket. A high polish is thus produced very rapidly. Nickel-plated articles that have become tarnished are made bright in a few minutes. Wet metal, fresh from the bath, needing preliminary drying, for the current of air dries and polishes it at the same moment.
