Rheumatism During March.

Victims Can Cure Themselves With
Dr. Williams' Pink Pills

During the month of March people who are afflicted with rheumatism begin to have unpleasant reminders of their trouble. The weather is changeable—balmy and springlike one day, cold, raw and piercing the next. It is such sudden changes of weather that start the pangs and tortures of rheumatism, lumbago and sciatica going. But it must be borne in mind that although weather conditions start the pains, the trouble is rooted in the blood, and can only be cured through the blood. All the liniments and lotions in the world can't cure rheumatism. Rubbing may seem to ease the pain while you are rubbing, but there its value ends. Only by treating the disease through the blood can you cure rheumatism. That is why Dr. Williams' Pink Pills have cured so many thousands of cases of this trouble. The new, rich blood these pills actually make drives out the poisonous acid and rheumatism, lumbago and kindred troubles are banished. Among the many sufferers from rheumatism cured by this medicine is Mr. R. J. Sinclair, of Gosport, N. S., who says: "About two years ago I was laid up with rheumatism. For two months I could not walk and had to stay in an invalid's chair. My feet were badly swollen and my arms seemed to be paralyzed. I had been using doctor's medicine for a long time but it did not seem to help me, and the doctor finally told me that the only thing that would cure me would be a change of climate. At this time I decided to give Dr. Williams' Pink Pills a trial and got a supply. After I had taken them for a while I found they were helping me, and I got a further supply, and they completely cured me, and I have not been sick one day since. I strongly recommend Dr. Williams' Pink Pills for this trouble.

If you suffer from rheumatism, or any other disease of the blood or nerves, begin to cure yourself to-day with Dr. Williams' Pink Pills, which under a fair trial will do for you what they have done for thousands of others. Sold by all medicine dealers or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

Annual School Report

Following are names of those making 75 per cent and over in the different subjects in the Third Period Examinations, arranged in order of merit

Those whose names are inclosed in brackets made the same mark in Subject.

System-Saving

The surest way to save is by system. If you deposit a certain amount each week or each month in this bank's Savings Department, you will soon find that you have the means to do something worth while. You will also find that the habit of thrift has fostered your spirit of independence and self-reliance.

familiar with Ontario conditions where things are much different.

Mayor Jones—The question to go before the commission is whether it is the town or county that should help the railway to pay for the gatekeeper. The motion then carried unanimously.

Moved by Coun. Dibblee, seconded by Coun. Gallagher, and passed, that all bill read on Monday night, certified by the audit committee, with the exception of the accounts of the C. P. R., be paid, together with all the bills just read.

Coun. Lindsay referred to the bank overdraft, on which the town was paying interest, and spoke of the urgent necessity for collecting the overdue taxes, so that the loan might be reduced and funds secured for current expenses. He called the Council's attention to the fact that the bank loan was greater than the town could legally borrow.

Coun. Gallagher said that Mr. Leighton told him that he did not try to collect any taxes last month. He said the chairman only offered him 21-2 p. c. for 1913 taxes.

Moved by Coun. Gallagher, seconded by Coun. Dibblee, and passed that the chairman of the finance committee be authorized to use all legal means to collect the taxes.

Coun. Lindsay—How would it strike the members to offer 5 per cent to those delinquents who pay within the next thirty days? The law authorizes only to pay 5 per cent, within 30 days after the discount time is over. After 30 days I intend to publish the names of those not paid. When the same notice was threatened to be carried out last year many delinquents promptly called and paid up. This is a serious problem as some \$12,000 is owed by the ratepayers. There is a question but that it might be wise to repeal the section of the law so that we could not have an overdraft of any kind in the Bank, then we could not spend the money until it came in.

Coun. Gallagher—Is there not something in the law that you cannot publish the names of delinquents in the newspapers?

THE DOCTOR SAID "I CAN'T HELP YOU"

Suffered 10 Months with Kidney Complaint. Gin Pills Cured.

Dunvegar, Inverness Co.

I am perfectly cured of Kidney complaint after using Gin Pills. Six hours after taking the first Pill I obtained relief, and now after three months I feel as well as ever.

I suffered ten months and the Physician attending me advised me to go to the Victoria Hospital at Halifax, as he could do nothing more for me. I may add that I used a great deal of medicine, and strictly followed my physician's directions regarding diet, etc., but without avail, until providentially I learned of your most excellent remedy. I am recommending Gin Pills.

(Sgd.) LEWIS MACPHERSON.

Sold by druggists and dealers everywhere at 50c a box—6 for \$2.50, or sent direct. Write for sample, free if you mention this paper.

National Drug and Chemical Co., of Canada, Limited, Toronto.

Coun. Lindsay—No, there is not.

Coun. Gallagher—I have no objection to publishing the names, only the taxes should be paid by legal means.

Coun. Burden—We are paying the Bank \$600 on our overdraft. Can we not pay a sufficient sum to induce a man to give his whole time to the work?

The motion then carried.

Coun. Dibblee—I was attacked in the Bank the other day by one of our prominent citizens, who said as regards the typhoid fever cases that the Board of Health was no good and the Council not much better. I told him it was easy to find fault, and asked him to come to this meeting and suggest a remedy, but he has not done so. Every councillor was willing to do his best. Dr. Griffin, the chairman of the board of health, says it is no good to have the water analyzed, because it proves nothing. Dr. Sprague has the same opinion. Dr. Grant says that the Provincial Board of Health should take it up as fever is prevalent all along the river. There are no more local cases here than the average, but the Hospital is filled with patients from outside the town. The board of health got a reply from the bacteriologist at Fredericton who said he had taken water from the river there every week and could not find any typhoid germs. Why is the fever not in Fredericton waters if it is in the waters here? There is more sewage going into the waters from Woodstock to Fredericton, than from Grand Falls to Woodstock. However, the people seem to want the water analyzed and I think it should be done, even if it does cost some \$75.

Moved by Coun. Dibblee, seconded by Coun. Burden, and passed, that the Board of Health be requested to send the river water to a competent chemist for analysis, and this to apply to the milk, if the Board of Health thinks it necessary.

Coun. Jones—Some citizens have called upon me and suggested that the Scott Act be suspended and beer made free while the fever lasts.

Mayor Jones—Whether the river water is to blame or not, the town will, sooner or later, have to grapple with the question of installing a filtration plant. Now is the time to make some inquiries and see what it will cost to install an up-to-date one.

Coun. Flemming explained how the towns of St. Stephen and St. Andrews were supplied with water.

Mayor Jones said we all realized that the reports gone abroad have grossly exaggerated the number of typhoid cases in town. There are a large number in the Hospital, but the most of them have come from other places.

Moved by Coun. Burden, seconded by Coun. Flemming, and passed, that the water committee have power to employ an expert to see what it would cost to install a filtration plant here.

Moved by Coun. Gallagher, seconded by Coun. Burden, that \$500 be granted to the Agricultural Society, that the amount be included in this year's assessment and paid to the Society provided it proceeds to construct the exhibition buildings as proposed.

Coun. Lindsay said he would vote against the motion. We have no authority to make the grant and the town has not the money to spare.

Coun. Burden—The last speaker may be right and we may not have a legal right to do so, but we have made grants to the Hospital and Band and no one objected.

Coun. Dibblee said that at the exhibition and races in Houlton, last year, there were 12,000 people present one day. Presque Isle had a larger crowd.

We will be in the circuit with these towns and St. Stephen, and no doubt there will be large crowds come here. While the prizes of course will go to the people of the country, the large crowd will necessarily spend a large sum of money in town.

Coun. Gallagher said he was in St. Stephen recently and everybody he met was pleased that Woodstock would have an exhibition and races this fall.

Coun. Jones did not like to hear the rumors current in regard to the sale of the former exhibition buildings. Somebody was being accused of graft, and the charge was made that owing to the promises of a former Council the Agricultural Society sold their property too cheaply.

Couns. Dibblee and Gallagher in able speeches showed that there was no graft in connection with the sale, the former thinking that \$10,000 was a fair price for the grounds, as the Society was willing to sell for \$7,000 some years ago. Judging by the price the railway had to pay, through arbitration proceedings, for other lands, the price sold for was too low.

Mayor Jones—At the time the citizens were very much inclined to encourage the St. John & Quebec Railway Co., and we thought that if we could induce them to establish their main workshops here we could afford to reimburse them for the price they paid for the land. An agreement was signed by the company and the town to that effect. Ever since that time we have kept in touch with the authorities on the subject. The Town Council as a body had no negotiations with the Agricultural Society for the sale of their lands, and I am sorry if they think they sold their property too cheaply.

Coun. Flemming—Individual members of the Council and Board of Trade had induced the Society to sell their property. They sold the land to help the town. It was nothing more than right now to help them.

The motion carried, Coun. Lindsay voting against it.

Mayor Jones—In reference to our vote in favor of the ambulance. The question now is who will own and control. As a matter of law that point should be settled. We must have some lawful authority. The different churches have appointed committees and with Rev. H. C. Archer as chairman the work has been well done. In the future these people now in charge will be leaving the town, or passing away to the great beyond, and then the difficulty will arise.

Speeches were made by all the members of the council, when the following resolution moved by Coun. Lindsay, seconded by Coun. Jones, was carried unanimously:

Resolved—That it is the sense of the Town Council of the Town of Woodstock that the committee of management of the public ambulance consists of the wardens of the counties of Victoria and Carleton and the mayor of the Town of Woodstock, and one member for each of the Town churches, and that the mayor be our representative to meet the present committee and arrange details.
Council adjourned sine die.

Continued from page 8

ties suited to different localities, methods of planting, cultivating, marketing and fertilizing were referred to in an interesting and profitable manner, the lecture being an unqualified success from every standpoint.

Mr. Peters was followed by Mr. R. P. Gurham in a practical illustrated address on "Orchard Sites and Soils." This lecture also provoked keen interest.

Regarding the school as a whole its success is already assured. The building is splendidly equipped, the principal and staff are efficient, courteous and painstaking. Both theory and practice have a place on the programme, and the lecturers know their subjects.

The interest on the part of the young men in attendance is keen and intelligent—as is shown by their questions. It is the feeling of all that the opening of the new school marks a new era for agriculture in this part of the province.

The school will run till March 28th.

Programmes and full particulars can be obtained from Principal Newton, Woodstock. Students may enroll at any time and for any course.

On Friday, March 27, Hon. Jas. Murray, the new minister of agriculture, and Premier Flemming will be in attendance at the school and will give addresses.
