SUMMER COMPLAINTS KILL LITTLE ONES

At first sign of illness during the hot weather give the little ones Baby's Own Tablets, or in a few hours he may be beyond aid. The Tablets will prevent summer complaint if given occasionally to the well child and will promptly cure these troubles if they come on suddenly. Baby's Own Tablets should be kept in every home where there are young children. There is no other medicine so good and the mother has the guarantee of a government analyst that they are absolutely safe. Mrs. Edward Covell, Lomtardy, Ont., says: "A mother who has once used Baby's Own Tablets for her children will never fail to show her gratitude for them. They made a wonderful change in the

health of my little ones." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

RICHMOND.

Miss Mildred Williams, Long Settlement, is spending her vacation with her sister, Mrs. W. B. McIntyre.

Beecher Haynes lost a valuable horse from a stroke of paralysis.

R. W. Haigh met with quite an accident, one day last week, in coming from Debec with a colt a freight train suddenly came around a turn when his horse became unmanageable and made for the engine which it struck with its head. Mr. Haigh was thrown out and the horse ran up the track, breaking several spokes out of the wheels of his wagon and broke the dash-board.

One of our Foremost Manufacturers

Mr. J. W. MacDonald, President of the Amherst Piano Co., who is touring New Brunswick by automobile with a party gave our representative an interesting talk about his work in establishing a successful piano manufacturing plant in the Maritime Provinces. Mr. MacDonald strikes one as rather a young man to have accomplished what he has. He plays the violin, which he carries with him wherever he goes, is enthusiastic about music, and just now, it is plain to be seen, he can think of nothing else but his new piano. It requires a good deal of courage to start any large business here in face of Ontario competition, but Mr. MacDonald was the man for it. His remarkable success in so short a time should encourage other lines of business which we believe will yet bring New Brunswick back into the old honorable and prosperous place it had before Ontario got the whip hand over us in manufactures. "What was your idea in starting to build a piano?" we asked. "I had a long experience in the piano business. I came to thoroughly know all the different makes famous and otherwise. I thought I would like to build a piano of my own. I determined to build a piano that I could call the best piano in the world. That seems to you like claiming a good deal? Yes, but I claim that the Amherst is a better piano than any other now made either in Canada, United States or Europe.

First, the materials. We got right at hand the finest birch and pine, for the chief part of the woodwork. The other woods like veneers come through England. Every item of wood, metal and ivory is the highest grade that can be procured.

"Now the actual builders, the workmen. In every department, these are experts. For instance, the backs. The man in charge was a joint owner of the largest piano back factory in the United States, supplying Steinway as well as others of best makes with this very important item of piano construction. So with every other department. Our player-action man besides being an experienced expert is an inventor as well and we control for use in the Amherst player five or six improvements which make our player not only simpler but far better than any other in giving human expression. There is nothing to approach it, and it is so compact we do not have to build a special case but fit them into any piano we build, and is so placed that no part has to be removed in tuning, as must be done with others.

"Now for the factory and equipment. Our Amherst plant though not yet the largest as regards output is the most perfectly equipped and best arranged plant in the world. It is all run by electrical power which we get very cheap, with a separate motor for each machine, one of Edison's own assistants in charge. We have appliances not yet installed in any other piano factory. We have arranged everything so that the materials go in at one end and the finished piano comes out at the other, all being arranged for economy of space, time and labor. It is a model factory. We don't know how to better it. There was a delegation of piano men from all over including representatives of all the best American makes. Aren't you claiming a good deal, Mr. MacDonald?, one of the visiting party said. He was representative of one of the famous American makes. Mr. ———, I said, if you have any appliance in your factory which you do not see here and think is an improvement, state what it is, name your price, I don't care what it is, I will buy it.

"Our wood curing plant is one example. Nothing is more important than to have the wood seasoned properly, and all exactly the same, so one piano will be exactly like another. Ours is a new invention, installed into certain factories but not in any piano factory in the world as yet, which registers automatically and with absolute accuracy the amount of moisture present.

I could go on and give you other particulars. We have certain features of construction, such as the sounding board all in one piece so the vibration is more perfect just as in an old Cremona violin. Consequently we get finer, purer tone. But then, you would per-

haps not be interested in all the details of piano construction. But when we make the claim we do, naturally people want to know what are our reasons, if it is just talk. Then, you know, that isn't all. We went last year into the Toronto Exposition in competition with all the important Ontario pianos, and we not only took away first prize but gold medal, for the best piano that was there. And I say there is no piano to touch ours, in any quality that a piano ought to have. We give a twenty years guarantee. It is as near a perfect instrument as money skill and experience can produce, and besides that we can sell it at a moderate price, partly because of the perfect factory equipment and partly because of location near to power and materials.

Naturally I would be enthusiastic, you would say, but I mean every word I say, and I am very proud of our instrument. You now have several of them up here and I hope there will be more.

Of course I am not all alone. I had money of my own that I perhaps could have started with, but when I explained my plan my friends poured the money in on me, some of the biggest men in Canada. I was thinking of starting at Halifax but the Amherst crowd got hold of me, and in two hours they shoved a hundred thousand in front me on condition that I locate at Amherst, so that is why I am there.

With Mr. MacDonald's party is his wife and daughter, his brother Mr. Bert MacDonald, and Mr. Elliott, President of the Nova Scotia Trust Co. one of his directors and Mrs. Elliott. He left for the North Shore via Fredericton, there being as yet no route for automobiles across the trackless forests of the Tobique or Miramichi.

Farris-Baird

"The wedding took place last evening of Miss Katie Isabel Baird, daughter of Mr. and Mrs. H. Paxton Baird of 99 Jameson avenue, and Mr. Wendall Burpee Farris of Vancouver, B. C. The ceremony was conducted by Rev. Dr. W. H. Hincks at the residence of Mr. Baird. The bride was given away by her father, and her only attendant was her little nephew, Joseph Hatheway of Detroit, who acted as ring-bearer. The bride wore a gown of white charmeuse, a veil caught with orange blossoms and pearls and carried a shower bouquet of brides roses. Mrs. Baird, the bride's mother, wore a French gown of pink and pearl grey taffeta with overdress of grey net. In the receiving line were Dr. and Mrs. Joseph H. Hatheway of Detroit, Mrs. Hatheway wearing an imported gown of pink taffeta. The entire house was decorated with palms and pink roses, a symphony orchestra hidden by a floral bower furnishing music. Among the guests were Mr. and Mrs. Robert G. Larsen of Boston, Mr. and Mrs. George Mitchell, of Cobalt, and Dr. and Mrs. J. H. Elliott of Muskoka. After a brief honeymoon, Mr. and Mrs. Farris will make their home in Vancouver, B. C., where Mr. Farris is a member of a prominent law firm.—Toronto Globe.

Mr. Farris is a son of the Hon. L. P. Farris and Mrs. Farris, of White's Cove Queens Co., and Miss Baird is the daughter of Mr. and Mrs. H. Paxton Baird of Toronto, formerly of Woodstock.

D. mings Boomer

The marriage took place at Amherst, July 29, Rev. Dr. D. A. Steele officiating, of Miss Lydia Boomer, daughter of Mr. and Mrs. W. N. Boomer, of West Amherst, to Ernest Demings, formerly of Pugwash, but now of Woodstock, N. B. Owing to illness in the family only the immediate friends were present, Miss Boomer and her sister, Ethel, have been for several years successful school teachers at Spokane, Wash., and Miss Boomer is one of Amherst's most popular and charming young ladies. The bride was married in her travelling suit of blue moire silk and tango trimmings with hat to match. The happy couple left on the Ocean Limited, for a honeymoon trip to Halifax and the Annapolis Valley. They will make their home at Woodstock. The presents were many and valuable.

Rev. G. A. Ross, of East Florenceville was in town last week.

Henry B. Smith

The many friends of Henry B. Smith were grieved to hear of his death which occurred Wednesday, 29th., inst, in the 68th year of his age. He is survived by his wife, two sons, Murray and William, one daughter, Mrs. Clarence Hanson. Also one brother, C. L. Smith, and two sisters, Mrs. I. H. Freeman, of New York, and Mrs. W. A. Haley, Lower Wakefield. The funeral was held on Friday from the residence of his daughter, Mrs. Clarence Hanson. Mr. Smith was well known in the community and commanded the respect of all who knew him. For a number of years he was a member of the County Council.

Musical

Carleton Hall last evening was the scene of a most enjoyable musical event, a piano and vocal recital by pupils of Mrs. Adney. It was the first opportunity to hear in public the work of the new Amherst Pianos built in the Maritime Provinces, and was a revelation to those who have heard so much of this instrument and its already enviable reputation. Mr. Reid, the Amherst wholesale representative, was present and played a number of selections on the Player, a form of piano coming very rapidly into public favor since it affords, as we could see, a wonderful scope for the rendering of piano music that would be beyond the powers of many who have not or do not feel like acquiring the usual finger technique.

Miss Gardner, of McAdam, Miss Sharp, of Pokiok, Mrs. True, Mrs. Col. Good, Miss Irma Jones, Mrs. P. R. Semple, of Florenceville, Miss Thelma Blake, and Messrs. Fred and LeRoy Mooers, and Master Glenn Adney, and not by any means omitting Mrs. Adney herself gave a choice selection of vocal and instrumental pieces, of which the program detail must be deferred to next week's issue.

Ice cream and cake were served afterwards. The guests included several automobile parties from up county towns, and the visiting instructors at the Vocational School.

County Match.

The result of the County Rifle Association match is given below.

The Association unanimously passed the following resolution:—

Whereas—The Dominion Government supports liberally the Dominion Rifle Association with a grant, and the Provincial Government supports the Provincial Rifle Association as well; and

Whereas—The Riflemen of Carleton county have always attended both these Associations and have done credit to the county; therefore

Resolved—That we the riflemen assembled at this County Rifle Association condemn in strong terms the refusal of the Carleton County Council to grant the small aid asked for.

The following officers were elected for the coming year: W. W. Melville, Peel, captain; R. S. Semple, East Florenceville, secretary. The next place of meeting was left to the executive committee. If the Woodstock range is completed by that time, the next meeting will be in Woodstock.
