On Saturday last Scott Orchard, of Mill Cove, came near getting his horses downed near the landing of C. H. Mott. He had a load upon a farm wagon the wheels cut through and the horses went through the ice, and were nearly exhausted when taken out.

Potato buyers experience great difficulty in getting cars to unload in as fast as the loads come in to the station, but if potatoes were worth two dollars per barrel instead of one fifth of that price, there would be no rush to get them to market. It may be that the hearts of some of the farmers are not overflowing with gratitude for the abundant crops of the past year, because the price of one line does not meet their expectations but the experience of the past year will give them much to reflect upon, and much to be thankful for, for if men were successful in every venture they would

soon begin to think it was because of their own unerring judgment.

High cold winds still, and this is the sixth day, but the roads are thus being preserved, which at present are much needed.
