

TO BURN THE COAL DEEP IN THE EARTH

Famous British Scientist's Plan to Solve the Problem of Cheaper Heat and Light

When you think about the price of coal wouldn't you like to know something about the most wonderful plan ever thought of to cut the cost of fuel, heat and power?

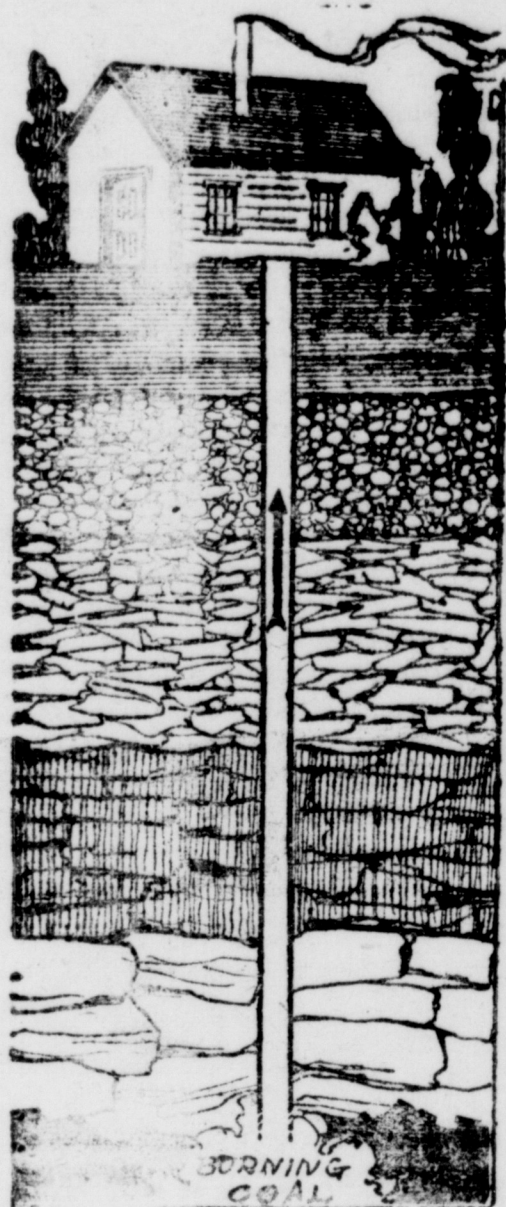

Stratton Ramseley, the most famous British scientist, is the man back of the plan here is what he thinks he can do.

Practically banish all smoke. Cut the price of power for mills and factories to less than a fifth of what it costs now.

Cut the price of electric lighting to a tenth of the present cost.

Make it possible for housewives to cook and bake with electricity instead of gas, coal or wood.

Do away with the dirtiest, most

This shows how Sir William Ramseley would use coal beds to supply the world with light, heat and power.

Dangerous occupation man has fallen heir to—coal mining.

He means to prove that gas retorts may be underground, wherever there is a vein of coal, and that the gas can be piped up and when not used in that form transformed into electricity by gas engines.

First a hole would be bored down. When it reached the coal vein two pipes would be put down, one inside the other, one to carry up the water and the other to pass down air, steam or small quantities of water to burn with the coal. The coal could be ignited by putting down an electric wire which would then be withdrawn leaving the coal to burn and turn itself into gas, which would come up through another and larger pipe.

"It would mean," explains Sir William, "that mine disasters would be

SIR WILLIAM RAMSELEY

ended. The great expense of mining coal, hoisting it to the surface and delivering it to the consumer would be a thing of the past. As there would be no coal brought to the surface, there would be no coal smoke to disfigure our cities and injure the health of the citizens.

"Also it would make the world's coal supply last much longer, for then it would be possible to use coal in thin seams, such as cannot be mined to-day, because of the great expense of getting it out.

J. L. Stewart, M. L. A., Seriously Afflicted

(Moncton Transcript)

The Transcript learns with deep regret that an affliction has befallen Mr. J. L. Stewart, M. L. A., for Northumberland, and editor of The Chatham (N. B.) World, which is one of the greatest which possibly could overcome a newspaper editor.

A very serious form of eye trouble has developed, and he can only distinguish the glimmer of light and his fingers appear to him as mere shadows. It is a peculiar disease, which comes on practically instantly, but is sometimes relieved by prompt operation.

Mr. J. L. Stewart came to Moncton last Saturday and remained in the Moncton Hospital until Tuesday when, accompanied by Dr. S. W. Burgess, he left for Montreal, where he will seek further consultation and be subjected to a possible operation.

James McCaffery

James McCaffery, son of the late Philip McCaffery, died after a brief illness of pneumonia, at Monticello, Maine on Thursday, aged 63 years.

Deceased was born in Woodstock and resided here until recent years when he was employed at Monticello. Thos. L. McCaffery, a brother, of the Customs, is the only member of the family now living.

The funeral was held on Saturday morning. A high mass of requiem was celebrated in St. Gertrude's church by Rev. J. J. Ryan, and interment made in Catholic cemetery. The pall bearers were J. E. Cogger, Alex. Beaton, M. Ryan and J. S. McManus.

Henry C Grant

Henry C. Grant of Grand View passed away Sunday, 20th, at the home of his son, Dr. N. P. Grant, after an illness of several weeks, age 78 years. He is survived by his wife, four sons, J. Frank and Chipman at home, Harry E. of St. Louis and Dr. E. P. of Woodstock and one daughter at home. Services were held at Dr. Grant's residence, Monday evening conducted by Rev. F. L. Orchard. The funeral was held Tuesday with interment at Grand View where the services were held by Rev. Mr. Brown.

Deceased was well known throughout the district in which he lived and his death will cause sorrow among a wide circle of friends and relatives.

"The gas could be used nearby, and others farther away could and would depend upon electricity, which can be generated much more cheaply by gas engines than steam engines.

"The only objectionable feature is that, with the burning up of the coal, the surface will settle, but, I think, it will be so gradual that we will not notice it.

"The only coal users who would then be steamships; all railroads would be electrified."

It is easier to reform a man than it is to keep him reformed.

NOTICE.

Will the people please take notice that I am prepared to FRAME or ENLARGE in both FLAT and OVAL style. Have the best stock of MOULDINGS, MIRRORS, HYMN BOOKS BIBLES, TESTAMENTS and FRUIT PICTURES that I ever had. Also a nice stock of CHRISTMAS MOTTOES. Some new styles.

Sgt. Allison Bull Of Woodstock Is Killed At The Front

A telegram was received Sunday morning announcing that J. Allison Bull of the 4th Mounted Rifles had been killed in action.

Mr Bull was the second son of F. Byron Bull. He had been engaged in civil engineering before the war. He married Miss Fannie Raymond, who with a little daughter survives. Mr Bull had won promotion since enlisting and bore the rank of sergeant. He was about 28 years of age, and a young man of sterling character.

When news of the death of this gallant young soldier reached here a gloom set

led over the town and men and women who never knew him felt with those who realized through acquaintanceship, what the community had lost in his untimely death.

To his young widow and little child and members of the family, the deepest and most respectful sympathy is extended in their great and sudden bereavement. It should at least be a consolation for them to know that the whole community condoles with them in their sorrow and when the name of Allison Bull is recalled in days to come it will be coupled with the heroes that fought and died in the great struggle to maintain the cause of humanity.

Kermanshah Taken By Russian Forces

LONDON, Feb. 26.—A Reuter despatch from Petrograd says that the Russians have taken by storm Kermanshah, the important Persian city, in the neighborhood of which serious fighting has recently taken place.

[An official despatch from Teheran, published yesterday, said that after a series of battles in the mountain passes as a result of which the Russians captured a considerable quantity of booty, the Turks, who had been aided by

Germans, had retreated towards Kermanshah. Kermanshah is 280 miles southwest of Teheran, and has a population of about 30,000. The routes from Bagdad, Shuster, Ispaham by way of Hamadan, and Suleimaniyah meet there and make the city an important centre of traffic.

The Russian operations in Persia, which have culminated in the capture of Kermanshah, had the local purpose of putting an end to the activities of hostile mountain forces and organized bands of Kurds, and, it is believed, that they have the broader scope of a junction of the Russians with the British expeditionary forces in Mesopotamia. The movement of the Russians from Hamadan southwestward to Kermanshah brings them now to within 150 miles of Kut El-Amara, on the Tigris, where General Townshend's British forces, which is ascending the river for the conquest of Bagdad, is besieged by the Turks.

LONDON, Feb. 26.—The Amsterdam correspondent of the Central News learns that heavy fighting has taken place ten miles from Bitlis, between Russian and Turkish troops, the former coming from the direction of Mush, and that the Turks fought bravely, but were obliged to retire before superior forces.
