Attacked By British Airmen

London, Aug. 23.—The important submarine base, other military objective in Belgium, were attacked yesterday by British airmen the Admiralty announces.

A bombing raid was made by naval aircraft on Wednesday morning on the Zeebrugge Mole, shipping and batteries, the statement says. "Some hits were obtained. The Ghislelles airdrome also was bombed. There were explosions near the western shed and a fire was started. All the machines returned.

BABY'S GREAT DANGER DURING HOT WEATHER

More little ones die during the summer than at any other time of the year. Diarrhoea, dysentery, cholera infantum and stomach disorders come without warning and when a medicine is not at hand to give promptly the short delay too frequently means that the child has passed beyond aid. Baby's Own Tablets should always be kept in the home where there are young children. An occasional dose of the Tablets will prevent stomach and bowel troubles, or if the trouble comes suddenly the prompt use of the Tablets will cure the baby. Mrs. Chas. Anderson, Miss. Alta., says: "Baby's Own Tablets are the best medicine for little ones who are suffering from a weak stomach. They cured my baby when suffering from stomach complaint and have made her a fine healthy child." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

School Book Notice

Pursuant to the provisions of an Order-in-Council, the Government School Book Business has been placed on a cash basis in lieu of the Vendorship system, which has not been satisfactory.

A discount of 15 per cent. on the selling price of the books will be allowed to the dealer. Freight will be prepaid to the nearest Railway Station by the Department, only on orders amounting to \$5.00 and over. All remittances must be made to the Superintendent of the School Book Department and only by Post Office Order, Express Money Order, or Cash by Registered Letter. No order less than \$5.00 will be received.

The present Vendors can return the books in their possession, or, if they wish to retain them, will be allowed a reasonable time to settle for same.

The following are the prices of books sold by the Department, and the prices at which they are to be sold by Dealers:

1st Primer	3c.	Copy Books—	
2nd Primer	7c.	Nos. 1, 2, 3,	
1st Reader	10c.	4, 5	3c.
2nd Reader	15c.	History	
3rd Reader	20c.	England and

SCREENING GRAIN

It is certainly not economy to ship dirty grain, as the farmer hauls from thresher to his car at expense of his man loading and unloading at his farm. Drawing pays freight on same to the terminal elevator, and then gives it away. Those who get it must consider it valuable as they insure it. I noted some time ago that my insurance company's report showed an item \$25,000 paid for loss on screenings by fire at terminal. How many others were on the risk? These screenings (dockings) are treated and used for feed by chopping, steaming or boiling. Wild oats chopped fine enough to destroy power of germination or boiled makes good feed. The smaller seeds, as pig and mustard, are also good when so treated, and when cooked are polished by animals which will not eat them when raw.

The up-to-date threshing machines are so equipped that these smaller seeds are left in a heap under the mill and paid for at threshing by estimating the number of bushels in the heap. The farmer might pay two prices and leave this dockings, so left rather than have to separate it from his grain before shipping. Threshing machines should be so equipped with separators to grade wheat, as to run off different screens or through a similar separator to "Jumbo" from elevator, and bag the screenings and small and broken grain, running the good into wagon boxes for the granary or elevator. If the machine does not do a clean job, then the farmer should certainly separate himself at home before teaming or run it through an elevator having a good cleaner, and use the screenings as stock feed.

Old Customs Explained

There is no good reason nowadays why the bow or other ornament on a man's hat should be confined, as it usually is, to the left side; but in the days when every man had to be prepared to battle for his life there was a very good reason for this custom. In those days long plumes took the place of bows as ornaments for hats, and if they had been on the right side there would have been serious danger of their getting in the way of the sword and thus causing the overthrow or even death of their wearers.

JAPANESE SUPERSTITION

The Japanese have many curious superstitions about animals, the chief among which is their belief in the supernatural power of foxes. There are numberless shrines, indeed, dedicated to foxes in Japan. The badger is another animal feared by the superstitious Japanese mind. It is believed to have power to annoy people, and to be able to turn into a priest at will. The crying of weasels and the baying of dogs are considered evil omens, and such insignificant happenings send a shudder over the believers. In Japan a light-colored mouse in the house is a sign of happiness. If a spider falls from the ceiling in the morning it brings pleasure, but if at night, it is thought to be very unlucky. To see a centipede at night means happiness in Japan.

Advice About Ducks

The breeding ducks should have a stream of clear water to bathe in. It is not essential, but it gives better fertility. When the drakes are forced to tread on land they oftentimes slip and rotten eggs or dead germs result. Ducklings raised for market have water only to drink, and every precaution is taken to keep them out of it. A muddy or dirty duck will not thrive. Keep the pens as clean as possible. Feed the best and purest of foods, and be extremely careful not to have any sour food lying around, and to keep their water absolutely clear and fresh.

The Ideal Home

In building that new home build it for the future and for convenience. Don't compromise for immediate conditions. Build it so it will make more pleasant the lives of those living in it and lengthen the lives of those who must toil in it.

To sell a thing to a man who really doesn't want it is not smart; it is only making an enemy of him. Mustard plaster will not blister if mixed with the white of an egg and hot water.

THIS FRENCH LADY A "MOVIE" MAGNATE

Madame Alice Blache is the only woman owner, president, manager and producer of a moving picture concern. She is the founder of the Solax Co. at Fort Lee N. J., and she is a gentlewoman with a drawing room personality and a man's mind for business.

She started as a private secretary to Gaumont, the French picture manufacturer. The technical and the artistic side of the industry pleased her. She studied it and became thoroughly conversant with every phase. Dan Cupid brought about an introduction between the French girl and Herbert Blache, who was then the London representative of the Gaumont Co.

They were married. Herbert Blache was transferred to the United States, "and that's the reason I am here," Mrs. Blache says. Eventually she went into business for herself and made a success of it, directing all the play herself that are produced in front of her "movie" camera.

FARM DON'TS

Don't forget that flock of sheep. If given half a chance they will return more clear profit than any branch of farming you can engage in. Don't forget to give the stock plenty of water. Water is as essential as feed.

Don't forget that a good cream separator is a valuable machine to have on any farm on which there are two or more cows.

Don't forget to shelter your machinery when you are done with it. Under a tree or in a fence corner is a very poor place to leave a machine. Rust and decay ruin a machine sooner than use.

Don't forget that a small gasoline engine will do small jobs more quickly and easily than you can do them. Don't forget to use plenty of good oil on any machine you use. Oil reduces friction and friction means wear. A properly oiled machine will run longer and easier than a poorly oiled one. Oil is cheaper than new machinery or repairs.

Don't forget to see that your tires are properly inflated before you run your car. Too much pressure is likely to cause the tire to stretch or blow out, while too little pressure will cause rim cuts and the tire walls to crack.

Don't forget that an open well or cistern, or one with a poor top on it, or one close to a barn or cesspool, is a source of never-ending danger.

Don't forget that every weed which is allowed to go to seed means several weeds next year.

Don't forget the birds. If you will be a friend to them they will be both friend and helper to you.

Improved Typewriter Desk

Travelers and others who carry typewriters on their journeys frequently find it inconvenient to use the tables provided because they are usually too high for typewriters. A method of overcoming this difficulty is to withdraw the drawer from the table and invert it in the slide shown. The typewriter may then be placed upon the bottom of the drawer and will be considerably lower than if placed upon the table top. From Popular Mechanic.
