

**KEEP THEM WORKING**

A horse in the field is worth two in the barn. You can't prevent Spavin, Ringbone, Splint, or Corn from putting your horse in the barn but you can prevent these troubles from keeping horses in the barn very long. You can get

**KENDALL'S SPAVIN CURE**

at any druggists at \$1 a bottle, 6 for \$5, and Kendall's will cure. Thousands of farmers and horsemen will say so. Our book "Treatment on the horse" free. 115

Dr. S. J. KENDALL CO., Bushy Park, Va.

**TO CURE A HARD MILKER**

Some cows are naturally hard to milk; others are made hard by weak-handed milkers. A woman or child with hands not strong enough for milking causes a cow to become hard for anyone to milk. To cure such a cow, oil the teat freely before starting to milk, so that the oil will work into and soften the skin. Then milk the cow with as much force as possible, squeezing hard. This treatment will usually cure an ordinary hard milker. Once in a great while it is necessary to cut the muscle surrounding the inside of the teat with a lance-like knife. This, however, is very likely to ruin the cow if not done with great care to avoid cutting too much and causing permanent leakage. It also makes a sore which is painful to the cow at the time of milking, and if done when the cow is giving milk, the udder grows together and the muscle becomes tighter than before.

**UNEXPLORED GEORGIA**

Stage Swamp Has Strange Race of Whites, Negroes and Indians

One would scarcely think there were any blank spots on the map of the United States, but in Georgia there is a vast area, nearly seven hundred square miles of it, which has not been officially explored, or explored by any except perhaps some of the few half-breeds who inhabit it.

This is the great swamp of Oklawaha. On the government map of Oklawaha there are many parts marked "Impenetrable" and "Unexplored." In the depths of this swamp live white people, colored people and a few Indians. Nearly all of the Indians and colored people have a mixed race as to make it almost impossible to locate many full-blooded Indians.

Slaves used to hide in this great swamp. Later many deserters from the Confederate army, and men who escaped enslavement, went into the swamp and their descendants are living there today. They call the swamp ground "Swampy earth." Only the educated natives can go about in it. The white men living there, about 1000 people to the square mile, are a sturdy race. They hunt and trap and fish, and also go outside and work with the cypress lumbermen.

**London Motor Cars**

Over 25,000 motor cars of all makes are registered in London; of these, 22,110 are motor cycles.

**French Champagne**

As many as 111,000,000 bottles of champagne are stored in the vaults of French producers.

A patent has been granted in Germany to the inventor of a talking machine connection for dairy machinery, the noise of which, he claims, is so noticeable that it impairs the efficiency of butter makers.

### Weed Out The Male Birds

(Experimental Farm Note)

The war or bees put their house in order by killing off all the male bees as soon as their services are no longer required. What a great benefit it would be to the poultry producer and the poultry product consumer if the hens of the flock would likewise dispose of the male birds in those flocks that are indifferently managed. The worker bee permits no star boarder to loaf around and consume the product of her labour. The hen is not like the bee in asserting her rights. If she were, then her verdict would be, "Rooster you must die."

There are over two million five hundred thousand roosters of the various breeds of chickens kept for breeding purposes by the people of our country. Of this vast army perhaps one hundred and fifty thousand have a right to live for another year of service. One hundred and fifty thousand may be good enough as individuals and in breeding to be used in the increase of their kind. What of the two million three hundred and fifty thousand that are usually permitted to live, birds that consume feed, worry the hens and reduce the quality of market eggs?

The function of the rooster is to develop and distribute germ cells during a short period of three months, February, March and April. These germ cells should be distributed only to such egg-laying individuals as are desired to perpetuate the breed. The germ cell is a living organism capable of starting a chain of development and here is where the mischief lies if they are distributed where they do not serve their proper function in race perpetuation.

The function of the modern hen is to produce eggs, ten percent of which may be desired for the increase of the breed and the remaining ninety percent for human food. Nine eggs are used for human food where but one is used for hatching. Only one-tenth of the eggs that a hen lays require fertilization. Why fertilize the nine-tenths of the product that is used for human food? The addition of a living germ cell to an egg that is produced for human food does not add anything to its value and may set up a chain of embryo development that will make the egg quite unfit for human food.

Eggs gathered from flocks where the roosters are permitted to run after the hatching season is over, are not desirable for storage. They are not desirable in the poultry during periods of warm weather as high temperatures will start incubation. Eggs in the first stage of decay are not desirable for human food.

It is an easy matter to prevent the fertilization of eggs. If the male bird

### Guard Baby's Health In The Summer

The summer months are the most dangerous to children. The complaints of that season, which are cholera infantum, colic, diarrhoea and dysentery, come on so quickly that often a little one is beyond aid before the mother realizes he is ill. The mother must be on her guard to prevent these troubles, or if they do come on suddenly to cure them. No other medicine is of such aid to mothers during hot weather as is Baby's Own Tablets. They regulate the stomach and bowels and are absolutely safe. Sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

is just an ordinary one an axe and a block of wood will prevent further mischief. If the male bird is possessed of

# The Transformation

Right in the heart of the great city of Toronto, in the centre of the principal business district, close by the cross-roads of main traffic, stands the "second longest bar" in all Canada. Observers say they used to count hordes of men entering this stronghold of the Traffic. Were the frequenters of the bar better men when they came out?

On September 16th, 1916, Prohibition went into force in Ontario, and, of course, the bar lost its license. On the 16th of April, 1917, the old bar was busier than ever! For what an arresting, beautiful transformation! Would that you and your sons could have been there to see the sight. The old bar-room was a bevy of flowers. Fifty fair ladies served refreshments to Toronto's most prominent citizens and their wives, and not one of them all but was proud to be seen in the old bar-room.

The aching, worrying hearts of the army's mothers are relieved now when they see their sons enter this building—for the old bar is helping to save men now instead of ruining them.

The hotel is now the "Y.M.C.A. Soldiers' Club," one of the Young Men's Christian Association's long chain of clubs, marquees, huts and "dug-outs" extending from Vancouver to the firing line in France—those helpful sentinel-posts that safeguard our precious soldier men and boys wherever soldiers are congregated. To the Y.M.C.A. Canada owes a debt of gratitude she never can adequately repay.

Like New Brunswick, the Traffic in Ontario has the opportunity, after the war, of putting Prohibition to the test at the polls. But Prohibition in Ontario is being enforced, and the old strongholds of the Traffic—the long bars we mean—are one by one being turned to useful purposes. Many of the hotel buildings that depended for existence upon bar trade are now devoted to commercial enterprises—constructive instead of destructive.

Does New Brunswick want to return to the destructive license system, and again be a partner in the old firm of John Barleycorn and Company, Limited?

Or does New Brunswick want to maintain Prohibition for ever? If so, Enforcement must be province wide, must be both strict and effective.

## Help to Enforce Prohibition

Every man and woman in this province shares the responsibility for the proper enforcement of Prohibition—not the officers of the law alone. Your duty is clear.

## Dominion Temperance Alliance

DONALD FRASER, President, Plaster Rock, N.B.  
 REV. THOS. MARSHALL, Vice-President, Fredericton, N.B.  
 REV. H. C. ARCHER, Executive Secretary, Fredericton, N.B.  
 W. G. CLARK, Treasurer, Fredericton, N.B.

such merit as would warrant his being boarded for a year to be used in the next season's breeding operations, then give him an enclosure of his own and see that he stays in it.

The cost of the feed consumed by an ordinary rooster is about twenty cents per month. Can you afford it? If you keep poultry with profit as your object, can you afford to keep a star boarder for nine months and perhaps have him doing mischief all the time?

The two million, three hundred and fifty thousand odd, unnecessary male birds are costing the country about three and a half million dollars per year while enjoying life. These unnecessary birds are at the same time doing about ten million dollars damage to the egg-producing business. If every person owning a rooster would manage him as a male bird should be managed the poultry industry would be benefited by additional profits many million of dollars.

### NOTICE

All persons holding books belonging to the L. P. FISHER PUBLIC LIBRARY, are requested to return the same on the 16th, 19th and 21st days of June, next. Those not returning books will be responsible for the price of the same.

The Library will then be closed for the purpose of revising and examining books until the 28th day of June, next, on which and the two following days it will be open, and each patron may then take out two books of fiction and two books of non-fiction for the month of July, during which month the Library will be closed.

Given this twenty fifth day of May 1917.

MARY J. E. STARRETT, Librarian.

A Springfield boy contributed \$2 to the Red Cross which he earned by walking five miles to and from school each day for 40 days.

### TO LET

To Let.—The very desirable cottage on Maple Shade farm. Possession given July 1. Apply to Mrs. E. W. Williams, Maple Shade Farm, River Road.

### Meeting of Co. Council

The regular semi-annual meeting of the County Council of the Municipality of Carleton will be held at the Court House on

Tuesday, the 19th June at 11 o'clock in the forenoon.

Dated this 7th day of June, A. D. 1917.

J. C. HARTLEY, Secretary Treasurer Municipality of Carleton.

### TO RENT

TO RENT.—Rooms to rent in the Vendome, Queen Street. Apply to Mrs. E. W. WILLIAMS, MAPLE SHADE FARM, RIVER ROAD.

**CANADIAN PACIFIC**

**HOMESEELKERS EXCURSIONS**

Tickets on Sale Every Wednesday until October 31st

For full particulars, see Local Railway Agent or write N. R. DESBRISAY, District Passenger Agent, St. John, N. B.

The treat that its lovers learn to expect from a cup of "SEAL BRAND" COFFEE, is always realized to the full for "Seal Brand" holds its aroma and flavour to the last spoonful in the air-tight can.

In 1, 1 and 2 pound tins. With ground and pulverized fine ground for Percolators. Never sold a bulk.

CHASE & SANBORN, MONTREAL.
