The Famous Prussian Guards Despondent Over Experiences With Boys From the Dominion

Canadian Headquarters in France, (via London), Sept. 5.—(By Stewart Lyon, special correspondent of the Canadian Press).—The famous Prussian Guard formations are war-weary and despondent over their experiences during the last three weeks on this part of the front. A prisoner of a regiment attached to the Fourth Guard Division, which holds the enemy line in the vicinity of Hill 70, says that the losses in his regiment have been very great.

By our attack on the morning of Saturday the 3rd Battalion was so badly cut up that the 1st Battalion had to be called on to take over part of their line. The officers of this battalion were not aware that our men held a certain trench well to the south of our front line. By their orders the Germans advanced up the trench until they came under the concentrated machine gun fire of the Canadians holding the trench. In a few minutes half the company were wiped out. In another part of the trench a similar experience befell another company.

CUT ENEMY'S NERVE.

These misfortunes cut the nerve of the enemy and the circumstances of the attack Tuesday morning added to their demoralization. That attack was preceded by the projection of gas. Some drums of gas were thrown into the German trenches beyond the point to which it was intended that our men should penetrate. Dugouts are traps when gas is projected into the trenches, as it seeks the lowest level available and settles there until gradually absorbed into the atmosphere. Forsaking their dugouts when the gas alarms began to ring, the enemy rushed up into the front line trench and put on the gas masks. At that moment our barrage came down up on the trench, preparatory to an assault. The enemy lost many men by our artillery fire, and when our infantry came up it was but a half-hearted resistance

that the shaken enemy offered. No serious attempt has been made to recover the lost ground which was almost the last portion north of Leons from which the enemy could observe movement within our lines.

BOMBERS ACTIVE

There has been abnormal bombing activity by the enemy and shelling of the back area by high velocity guns. The British aviators also have been extremely busy since the return of clear weather. In one case a direct hit was made with a heavy bomb on an enemy aerodrome. The explosion violently bumped an attacking aeroplane, but it quickly righted and the aviator swung around and crossed the aerodrome at a height of 700 feet to observe the result of his lucky hit. Great clouds of black smoke were rolling up, and it was evident that a large part of the plant had been destroyed.

The use of machine guns upon train-lorry convoys and similar enemy targets during these forays is now so common that it is not thought worth while reporting such incidents.
