The Board of Trade

The regular meeting of the Board of Trade was held on Monday evening, March 12th, President E. W. Jarvis in the chair.

The secretary, A. D. Holyoke, read the minutes of last meeting as well as the minutes of the Council of the board of trade.

Confirmed.

A resolution prepared by the secretary, approving of the daylight saving scheme, to go in force during the months of May, June, July and August, was moved by W. Jack Dibblee.

Carried.

W. H. Flemming reported that the treasurer just retiring, C. W. Manzer had handed him the books and there was a credit balance of \$67.79 in the bank.

Accepted.

E. R. Teed moved that the treasurer check up with the secretary as to the finances, and that the secretary notify the members in arrears.

Carried.

Voted that the salary of the secretary for 1916 be ordered paid.

President Jarvis reported that Woodstock would soon be a distributing center. After many years of agitation, and after a consultation recently with Mr. Mulken, freight agent of the C. P. R. it has been arranged that with the exception of flour and feed Woodstock will be on the same basis as St. John and Fredericton as to transportation rates. Mr. Mulken also assured the board of trade that inside of five months the high rates on food and feed would be adjusted. When this is accomplished our merchants will save \$20 on each carload of flour coming into town.

President Jarvis brought up the question of carelessness as to electric wiring. He thought there should be an inspector in town to oversee all new work, as the old work, or most of it, could not be got at now. He thought that no insurance company should pay insurance unless the origin of the fire is examined into.

Robert Strain pointed out that at two recent fires it was shown that the hydrants were frozen. He moved that the board of trade call the attention of the town council to the matter and strongly recommend that frequent examination of the hydrants be made particularly during the severe weather.

W. Jack Dibblee said that the fact that the water was rusty in the hydrants referred to showed that they had not been flushed for some time.

Geo. E. Balmain said that it was an important subject. The same trouble has recently been experienced in Fredericton and other places. For the protection against fire, much care should be exercised with the hydrants.

The motion was carried and the board adjourned.
