How Mile. La Badie of Montreal Pecame Famous

Fiorence La Badie, one of the greatest of all motion picture favorites, is a slight girl, with long-lashed blue eyes, expressive dark eyebrows, and an abundance of fluffy, light brown lair. She has, in addition to her attractive physique, a winning personality and undoubted histrionic talent.

A young girl in a large Panama hat came into an American studio building and asked the production manager for a job. The production manager eceives daily some twenty requests of this nature, but he took Miss La Badie's name and address with par ticular interest for, obviously, she had talent. That evening the producer saw a picture in which a small role was interpreted with unusual vivacity and charm. In the interpreter he reccruized the young woman who had been in his production manager's of e during the day. Eighteen hours

I ter she was under contract. Miss La Badie was born in Montreal, of well-to-do and cultured French people, and received her edu cation at the Convent of Notre Dame in that city. She speaks both French and German fluently and expresses herself charmingly in English, and is widely read in all three languages. Personally, she is fond of outdoor ports, likes boating and horseback riding and swimming best of all. Her fad in sketching her friends, and she does this with a gift for good-actured caricature that affords her and her associates constant amusement.

#### HUME-MADE EGG BEATER SAVES ELLS COSTS NOTHING

Here's a "high-cost-of-living" egg eater! Take an old yeast powder an, punch a hole in the top to admit a small rod of wood. On one end of he rod fasten a tin disk with a lot If Loles cut in it. Slip another disk over the rod. About half way to the I'd drive a nail so that the sliding lisk cannot work but half way up. Then put your eggs in the can, put In your rod and cover the can. The beating is done by working the rod up and down in the car. And it will beat eggs quickly and efficiently with. can be kept the more paritous it is out spattering the eggs all over the

### USE FOR KITCHEN SCRAP

No Expense Attached to the Making of This Utensil

A candle lantern is a good thing to have on hand for use in the cellar. A discarded corn can furnishes the base the lantern. Cut a square piece from one side where the isinglass or mica sheet can be inserted. This can fastened on the outside by a strip

wire twisted all around the can the top and bottom. Or a heavier trece of wire can be shaped to fit inside and hold the mica in place. ne handle from the washtub is used is the handle for the lantern and the ottom of an old tomato can, which is larger and will fit over the corn can, serves as the top. To hold the gandle It place you can either cut a cour'e of pross slits in the bottom of w, antern and bend the points thur made upward, or drive a nall through the ottom and stick the candle on the

## COST OF LOG FIRES

Expenses to Lumberman From Care lessness Are Listed

The elements of damag done by free in the logging woods are. has and foremost, lost time; then, the cas loss by destruction or reduction in the value or efficiency of equipment are as donkeys, loaders, loggia, ai. chutes, railroads, trestles, or camps last, the value of the profict is lower ed when logs are damaged.

Take the element of lost time. fire is usually handled by the railroad section crew. It is not unusual for a two-man crew to work a day on ar ica it for 48 hours afterward. Tota

account lost operacing time of expen sive equipment or the supervisory and overhead charges which are going on while the plant is turving out no pro-

If it is expensive to fight fires, why not let them burn? This would be g od business if it were not for the at that it would very probably be s.ill more expensive in damage to equipment. A fire practically never ruins a donkey engine beyond repair, but \$500 or \$600 damage is a frequent occurrence. Burning the sled out from under a machine, for instance, would we so loss of about \$400, and it will yard no legs for several days. Log ging cable is easily damaged, and the loss of the lines on one maching say, 100 feet of yarding line an 6,000 feet | back line costs \$3.5. Repair ing a line burned in two may be g dawn av \$5 per sprine

#### CLEVER MINE-LAYING

Submarines Used by Germans to Sowing the Seas

Mines have always been laid in the that purpose. The warring rowers of Europe have built submarines to kill and destructive engines of warrare by have proved to be. The Germans have utilized submarines for mine-laying. The mines themselves are carried on the submarine. A hollow, airtight compartment, is vertical, and the mines are placed one above the other in the enclosure. The sub- Westertown, M.Y., has been relieved of marine then sallies forth with its teath-dealing load.

When the area designated for the mines is reached and a mine is to be laid, the mine-layers let water into the chamber. The door which seals the bottom of the chamber is in the exterior shell of the submarine's hull. This door is opened, and one after an her the mines are liberated from their submarine prison. They are not simply loopped into the ocean as one a stone; placing them properly takes care and skill and ecial appliances.

Each mine has its anchor, which res to the bottom. The so-called anchorage cable" is manipulated in sich a way that it allows the mine o float from its anchor at a certain wa. The complete secrecy hisured by mine-laying in this method would appe particularly to any deligation, beck te the more secret mine-laying

### Tombstones For Monkeys

Tucked away in one corner of Montevideo, Uruguay, is a small carefully kept cemetery for receiving the leceased pets of wealthy families. who often pay somewhat lavish fees for a small plot of ground. While' n some cases the graves are supplied nerely with headstones, there are many of them which have substantial nonuments. It is not infrequently he case that these plots are locked after almost as carefully as if they held the bodies of human beings. There are dogs and monkeys, partots, cats, and various other animals, resting beneath tombstones, their alles inscribed in granite or marble, and their graves adorned with flow-

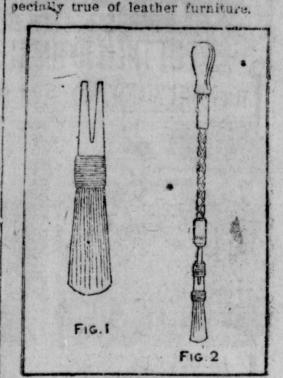

### PROTECTING MINERS

Canad's Death Rate High-Belgium's

The accident death rate among miners is greater in Canada than any other civilized country. This is due largely, to the hazardous nature of the work and to the class of labor evailable for employment. The fatality rate in coal mines in Belgivm has been the lowest in the world, being but slightly over one per thousand employed. In 1850, the fatality rate In Belgium was as high as it is in Canada. The decrease is the result of the combined efforts of the mine owners, the workmen, and the Ad ministration of Mines, and it is due to a great extent, to diffusion of echnical and professional education a view of its importance, the Govern ent should direct more attention is he education of the workman, so that he ner not be a danger to himsel! or others and that he ma become sier educated, more skilful, and thus have the opportunity to better

# 110 REMOVE THE DUST USE A SCREW DRIVER

Cleaning tufted upholstery work ne of the most difficult jobs imaginable. The dust collects in the hollows and it is almost impossible to get it out by ordinary methods. This is es-

The ordinary dust brush must be past aside and if absolute cleanlinesse wanted a ratchet screw driver and a paint brush must be used.

The andle of the paint brush is at, about 11/2 inches being left ou he brush. This is cut V-shaped, as shown in Fig. 1. This permits the brush to be attached to the blade of the screw driver with stout cord shown in Fig. 2 and the tufted places are cleaned out by simply pushing the brue, 'nto them and whirling it with sea by vessels especially equipped for the catchet as the screw driver would

#### Cat Survives Eight-ings, Fin

Aft anving swallowed wh eight lich 'spin, a three-months' old kiteten belonging to Elsie Kiduey, of ar trouble.

The pin was swallowed head foremost, the head entering the stemaca. The sharp end could be felt under the jaw. A veterinarian cut a small hole in the cat's throat, worken the pin out as far as the head, swung it around, an' by bending it slightly, pushed it-It head first from the cat's mouth

### Insurance Bill in Australia.

The commonwealth ministry of New bouth Wales is preparisg a national hourance bill on the tines of Lloyd deorge's measure. Provision will be rade for benefits for funerals, mater Dity sickness, accidents and unemploy-

"If a man was to save the price of a pint of beer a day from the time when he is 18 years old, he would have an old-age pension of \$2.10 s week at 70," said Dr. Fraser, of the local government board, at the Nationa Society, London.

### HUNNISH TURK DEEDS

The following description given by an Armenian woman of the upper class, is typical of the fate suffered by hundreds of other bands. After describing the murder of every mais over fifteen in a surprise attack by Kurds, and how their horses, valuables and food were taken, she continues: "Very many women and girls were carried off to the mountains. snong them my sister, whose onepar-old babs they threw away. My nother and until she could go no farther, and dropped by the roadside on a mountain top. We found on the road many who had been in the pre-vious batches; some women were among the killed with their husbands andesons. . . . Many persons were obliged to start off on foot-and with what they could carry on their backs. luch persons naturally became so weak that they fell behind, and were bayoneted and thrown into the river. At the Euphrates, the brigands and gendarmes threw into the river all the remaining children under fifteen

Of the districts assigned to the Armenians a Professor Hagopian writes: "These unhappy deported people have been chiefly deposited two places-one section of them a a swampy region which has ther() remained uninhabited on account of the deadly malaria; while the remainder have been seat to a still more unhealthy place in the direction of the Persian Gulf, that s. er-el-Zor, so bad that they have egged to be sent to the awamps, but
