Poetry.

THE best and most economical Food for Horses in existence. Used in the stables of Her Majesty the Queen, the Prince of Wales, and How brightly, through the mist of years, The Farmer's Daughter.

the principal crowned heads of Europe.

Horses fed on this condiment for a short period My quiet country home appears! My father busy all the day of the year, receive as much benefit as if they In plowing corn and raking hay It reduces the cost of feeding on the old system. My mother moving with delight Among her milk-pans, silver bright We children, just from school set free Filling the garden with our glee. RICHARD H. PHILLIPS. The blood of life was flowing warm

When I was living on the farm. hear the sweet church-going bell As o'er the fields, its music fell see the country neighbors around Gathering beneath the pleasant sound They stop awhile beside the door, To talk their homely matters o'er-The springing corn, the ripening grain, And "how we need a little rain;" A "little sun would do no harm,

We want good weather for the farm.

When autumn came, what joy to see The gathering of the busy bee; To hear the voices keeping time, Of boys and girls beneath the noon To mark the golden corn-ears bright, More golden in the yellow light? Since I have learned the ways of men, I often turn to these again, And feel life more its highest charm When I was living on the farm.

Agriculture.

Draining Tiles-various sizes-and a To the Editor of the Maritime Farmer : SIR,-The season has been all that the work on the farm, and the labor JARDINE & Co. of putting in the crops is now about over, and their care will demand attention for the next few weeks. From present appearances we shall not be troubled with much of a growth of the thicke t the worst. weeds on account of the dryness of the weather, but while it prevents the The subscriber offers for sale, this Spring growth of weeds to a large extent, it CHOICE JERSEY CATTLE, tells sadly on the vegetation. Fields that looked very promising some two weeks ago, now present a brown apundoubtedly the most valuable breed of cattle pearance, a bad omen for an abundant yield. Grass which showed well sired by the Dutchess Bull "Baron Airdrie," unless there should be showers very imported by Government from Hon. George soon. At the date of writing, June 18th, the wheat and oat fields present Poland, China and White Chester Pigs, dea parched appearance, which is any-Brown and White Leghorn, Plymouth Rock, thing but encouraging. Stakes, about four feet long, Night is the only time when hay They should be driven firmly into the used for quick work, even the slow too tightly bound. I have practised at the morning and noon feeds, but this mode of growing tomatoes for give them a generous supply at the twelve years, and have never failed to evening meal. By doing this, your obtain an early crop of well-matured horses will keep in better spirits and

It is well known that butter, cream milk, and flour are peculiarly liable to absorb effluvia, and should, therefore, never be kept in mouldy rooms, or placed where there are sour liquids, aromatic vegetables, such as onions, cabbage, and turnips, or smoked fish or bacon, or indeed any kind of food or thing of strong odor, lest they lose their flavor. But alas, add the Sanitarian, how much more essential is it that the utmost care be used in the prohibition of bedside food and drink in the nursery and the sick room, a practice fraught with constant danger to the sick, and of spreading disease

Mr Wm. Myers of Pittsford, N. Y., recently lost a cow in which, on post mortem examination, were found six fully-developed calves, the smallest of which weighed twenty-two and a half pounds. The cow was a threeyear-old shorthorn. Five of the calves were male and the other a heifer. The skins have been stuffed, and will be preserved as a curiosity. ago, which gave birth to thirty-five calves all at once, most of which were about the size of rats and mice.
