shorn of some of its most attractive features. With regard to the exhibition of Manitoba products of which such wonderful things have been said, the opinion is pretty general, that it did not prove that the Prairie Pro-

vince is superior as an agricultural country, to New Brunswick. It is important that our farmers should rest constant in that opinion. The Manitoba products were seen under disadvantages. They were immature, having been gathered, most of them, four weeks before their proper time, they had been handled and rehandled, but there is no reason to

tered. The show was interesting, as being Gold and Silver Watches that of a Province which has sprung into existence within ten years; it was made attractive by the tastful manner in which the display was made; and from the remarkable manner in which it had been noticed and praised in the press, people were prepared to Silver Ware, find it something very extraordinary, and their judgment was biased in its favor, but

are most interested.

certainly it was not so remarkable as to make our agriculturists despair, or in many things to fear comparison. In an exhibition, where there is a bewildering number of articles, where from the press

of the crowds in the aisles and galleries, and from the distraction of meeting numerous friends and acquaintances, it is difficult to concentrate one's attention and examine any exhibit thoroughly. It is only judges and reporters who can do the thing systematically, and they on the whole do full justice to the exhibiters. Some of the visitors find their pleasure in going with the crowds through the aisles, or standing in the galleries, and taking in the general appearance of the main building, gay with flags, decorations and tions. The general management of the flowers, in listening to the strains of the manufactory, would require the supervision band, but not particularly examining anyof an experienced operative from abroad, but thing. And many visitors, without attemptthe hands to tend the looms would easily be ing to study the exhibition as a whole, are found here. Employment would thus be especially attracted to exhibits in which they

have been made.

Such a manufactory is an enterprise in which The sections where were shown gasfitting farmers may reasonably be expected to take and plumber's work, tinwares, zinc work, an interest. If it was started they would castings, stoves, registers, edge tools, tacks, find a market for their wool, which is now olts, capstans, blocks and furniture, weodall exported ; and they would be certain to ware, pianos, leather, harness, boots and get a good article, better than the homespun shoes, &c., were to many the best part of the blankets they sometimes make for themshow; to as numerous a body, the tables on selves, or the spurious articles manufactured which were heaped up the horticultural and abroad, which they are tempted to buy befarm products ; the hall, in which the agricause they are put at a low figure.
