

CO-PARTNERSHIP NOTICE.

WE, the undersigned, have this day entered into partnership under the name, style and firm of

THOS. W. SMITH & SON,
for the carrying on of the business

MERCHANT TAILORS

—AND—
GENERAL OUTFITTERS,

At the old stand heretofore occupied by THOMAS W. SMITH, on Queen Street.
Dated this 25th day of June, A. D. 1881.

THOS. W. SMITH,
H. LEBARON SMITH.

CARD.

To our Customers and the Public generally:—

MR. T. W. SMITH, aided by his son, has succeeded in establishing on a firm basis, by strict attention to business, low prices, and careful consideration of the requirements of his customers.

A First-Class Modern Tailoring and OUTFITTING ESTABLISHMENTS

and has been induced from his growing trade and the increasing demands of the public, to enlarge his business so as to supply every article required for the covering of the season. To carry out this idea, and to enable him to fulfil all orders, he has associated with him his son, H. LEBARON SMITH, so long and favorably known to his patrons, and has added a customer's

SHOEMAKING ESTABLISHMENT

to his former lines; and has also largely increased his premises and work-rooms.

T. W. Smith & Son

are now, therefore, prepared to furnish any gentleman with a

Complete Outfit from Head to Foot,

and at the lowest prices going; and hope to procure from the citizens of Fredericton, and of the country generally, that patronage to which first class work and attendance, low prices, and courteous and prompt attention to business must entitle them.

THOMAS W. SMITH & SON.

Fredericton, July 7

F. B. EDGECOMBE,

Having imported an immense stock of STAPLE AND FANCY

DRY GOODS

for the Season's Trade, is offering great inducements to purchasers in the various departments.

PLAIN AND FANCY

Dress Goods.

CLOTH SUITINGS.

CASHERES.

SILKS, SATINS, VELVETS,

PLUSHES.

Mantle & Jacket Cloths.

Berlin Wool Goods in great variety.

Ladies' Fur Mitts, Bonas Caps, etc.

Scotch and Canadian FLANNELS.

Felt Skirts, Corsets.

Fur Trimmings, Gloves, Hosiery.

Canadian YARN.

Peacock and Victoria YARN.

Mantle and Dress Trimmings.

London and Paris Millinery.

Novelties in

FANCY GOODS.

English, Scotch and Canadian Tweeds

OVERCOATINGS, &c.

Cotton Warps, Seamless Bags.

GREY AND WHITE

Blankets.

Horse Blankets and Robes.

Camp Spreads and Lumbermen's Goods of all kinds, Clothing, Trunks, Valises, etc.

Choice Goods at Low Prices, Wholesale and Retail.

ALBION HOUSE,

QUEEN STREET, FREDERICTON.

BRANCH STORE:

St. Mary's.

N. B.—Will take any quantity good Home-

spin, Socks, Mitts, Knit Drawers and Yarn.

Orders by Mail will receive prompt attention.

F. B. E. Fredericton, Nov. 5

Maritime Farmer.

FREDERICTON, N. B., November 17, 1881.

An Early Dissolution.

The organs of the opposition are in a state of uneasy suspicion. They imagine that something extraordinary will follow the Liberal Conservative convention early next week. Some say, giving their own wishes word, that Sir John is about to retire from political life, and he wishes to make the announcement on an occasion which will give it éclat. Others say that the meeting of the convention will be a preliminary to a dissolution of the House and general election. It is a question with some whether the election will be held in the spring of 1882, or be sprung upon the country immediately. The Toronto Mail declares that there will be no general election next spring, leaving it to be understood that it will come on in the natural time in 1883, when the present term of the House expires. The Globe, however, is too cute, knowing, too supercilious to believe the Mail's plain statement. It may be true, it says, that there will be no election in the spring of 1882, but may not that crafty politician Sir John have the House dissolved before spring, that is, immediately? His course of conduct may be his liberality, but it appears itself to be the truth and suggest what is false. Excited by the supposition that it has detected the intention of Sir John to dissolve the House immediately under the statement of the Mail, that he does not intend to dissolve next spring, the Globe sounds the tocsin of alarm to the Liberal party, and roars in the ears to prepare for the contest. The Globe is desperately eager for the coming of the "day of reckoning," as it puts it, so eager, that against denial and reasonable presumption it declares that that day is close at hand. It is so unreasonable as to abuse Sir John, without any reason or, for contemplating the bringing on, immediately, what it appears itself most ardently to desire. In fact the Globe has been defeating the Government every way in a leader, for the last year or so, and it has become tired of that barren amusement, and of wasting thunder, and is longing for the actual fight. Let the Globe possess itself in patience. Sir John will not be drawn by any tactics it may adopt to precipitate the general election. When the "day of reckoning" comes come it will find that the sum total is against it and its party. Come when the election may, the Liberal-Conservative party will be prepared for the struggle, which threatens to be as severe as any that has taken place since Confederation.

The Woodstock Fire.

A thrill of sympathy shot through every community in the Province, when the news came of the conflagration at Woodstock. The sympathy was deepened by the feeling that the disaster had fallen on that town at night, at any time, fall on any city or town in the Province. A sense of insecurity was also awakened when people heard how that fire originated. Charges of incendiarism are generally made on the occurrence of any fire, but in the case of Woodstock however, the charge has not been made without foundation, though the authorities may not be able to bring the devilish deed home to the perpetrators. It was a suspicious circumstance that the fire occurred in such a building as the Mechanics Institute, in the deepest part of the town, the upper quarter of the town, just when the whole fire force was attempting to subdue the flames from the Institute, and prevent them spreading. At the time that the two fires were roaring, the Sentinel says incendiaries were still playing their unwholesome and applying the torch at different points, at the N. B. and C. Railway depot, and in outbuildings in the track of the fire. It may be that these charges are only founded on strong suspicion, but there is no doubt that incendiarism is a crime rife in every community, and one that must be taken into account in calculating the chances of fire occurring, and is a strong reason why every city and town should be well prepared to combat any fire, however extensive. It was proved by the fire on Friday morning, that Woodstock, though well prepared for an ordinary emergency, was unable to combat a double fire, that reached the proportion of a conflagration. If there had been efficient waterworks in the town, the double fires would have been quickly subdued. The fire at Woodstock, destructive as it was, fortunately was not such a calamity as the first account, born of the exaggeration and excitement of the hour, gave out. It did not touch the business part of the town, and will not much affect its trade and manufacturing industry. The inhabitants have met their misfortune with fortitude, and severe as must be the distress of some of the families who have been made homeless, no outside aid has been called for, and none is needed. Had there been a necessity, St. John and Fredericton would cheerfully have contributed to lighten the distress, but the inhabitants of the thriving and stirring town, and the people of the noble, agricultural county of Carleton, are as able, as willing to relieve and aid the victims of the fire. The fire in Woodstock, we venture to say, was a distinct warning to Fredericton. Many such warnings have been given. A great fire occurred in some of the buildings, on the alarm caused in some reflection on the very possible occurrence of just such a calamity in our midst. The number of old back and outbuildings in all parts of the town, and the numerous instances of incendiarism, are then remembered; it is recollected, that the hose has often given out, and the tanks run dry, at the critical period of a fire; an uneasy feeling arises, that the incendiary may at any time "apply the torch" when the wind is blowing a gale; imagination sees the city devastated by fire, and the exertions of the fire companies rendered unavailable by the magnitude of the calamity. But the frequent warnings in the past have been allowed to go unheeded. Will the Woodstock warning pass over in the same way, or will it be used as an argument, why waterworks which would give the city efficient protection against fire, should be provided without unnecessary delay?

Moving of a large Hotel.

We learn from the Scientific American, that at a meeting of the Engineers' Club of Philadelphia, the Secretary read a detailed description of the late successful moving of the Hotel Pelham, at Tremont and Boylston Streets, Boston, for the purpose of widening Tremont Street. It is a wonderful instance of patient ingenuity. It does immense credit to engineering skill, but it would be perfectly ridiculous to use it to remove large buildings any long distance. It would be cheaper to demolish a building on one site and put up another building to replace it on another site than to apply the screws. We quote a summary of the description of the moving:—"The Hotel Pelham is built of freestone and brick, 90 and 60 feet frontage. The Boylston Street wall is supported on eight granite columns four feet high, 3 and 4 feet square. There is a basement and seven stories above the sidewalk. Height above tramways on which it was moved, 90 feet. Weight, 6,000 tons, exclusive of furniture, which was not disturbed during removal, as also were not the occupants of the stores on first floor and some of the rooms, the various pipe connections being kept up with lugs and tubes. Careful experiments with models showed that if the lower part of the building was firmly braced, there was no danger of sinking in the ground. The general arrangements consisted of heavy and substantial stone and brick foundations for iron rails and rollers, and the building was forced by its own weight and the pressure of the moving blocks. Much care and ingenuity was displayed in the details of the arrangements and work. Two months and twenty days were occupied in preparation. The moving itself was begun on August 25, but the actual time of moving was 13 hours and 40 minutes. The greatest speed was two inches in four minutes. The hotel moved about one eighth of an inch at each quarter turn of the screws. The whole distance moved was 13 feet 10 inches. Four thousand three hundred and fifty-one days labor was required for the work. The whole cost was about \$30,000. This is the largest building that has ever been removed, although larger have been raised, which latter is a much simpler and less risky operation. The complete success of this enterprise is shown by the fact that cracks which existed in the walls prior to removal were not changed by the operation. Paper was pasted over them before commencing, that any change might be seen."

Ship Canal.

The scheme of a ship railway across the Isthmus of Chiriqui has been revived by its projector, H. G. Ketchum, Esq. In a pamphlet addressed to Sir Charles Tupper, Minister of Railways, which contains the letters he several years ago addressed to the Daily Telegraph on the subject, and a host of favorable testimony from eminent English and American engineers. Mr. Ketchum gives details of the mode of construction, and defines the best route across the Isthmus, (from Amherst to Tidnish), sets forth the superior advantages of ship railway over a canal, among others in its lesser cost of construction and maintenance, its exemption from the loss of tolls and shows how a portion of the railway could be utilized as part of the projected Prince Edward Island Railway. Mr. Ketchum proposes to form a company which will keep the railway in repair, and maintain it, pay the cost of construction and insure vessels using it, for certain tolls and fees to be hereafter established with the approval of the government, and also a government subsidy of two hundred thousand dollars per annum, limited to twenty years, by which time it may be expected the railway will pay itself. He estimates the cost of the railway at four million dollars. The construction of a ship canal, is without doubt, perfectly feasible, and the advantage it would be to the shipping, commerce, and fisheries of the Dominion, is apparent. For more than half a century, the advantage and necessity of connecting the Bay of Fundy with the Gulf of St. Lawrence by a canal has been insisted upon. The thing is bound to be done, one way or other at some time. If on serious consideration a railway is found to possess many advantages over a canal it will be a project worthy the aid and encouragement of the government.

Canada's Future.

Rev. Principal Grant of Kingston College, in a recent lecture on the North West, gave the following valuable advice to Canadians:—"This great country is yours to make or mar. You have the power in your hands. No power on earth dreams of interfering with you. This is your heritage. You can make what laws you like. You are free to make and unmake governments. Send your messengers to your legislatures, then,—not the men who swear by party—but the men you have found most level-headed and trustworthy in your own countries. The Government of Manitoba, the construction of the Pacific Railway, the opening of steam navigation through Hudson Bay to Europe, are elements of the greatest moment in determining the destiny of Canada. It is clear to my mind that the future of Canada is in the hands of Canadians. Should they fall in making it what it should become, the fault will be their own, and not that of their magnificent Far West."

MILLIONS IN IT.

Mr. J. D. Alexander, editor News, Barnesville Ga., U. S. A., says:—"For the past twelve months I have been suffering with inflammation of the eyes, and have tried several physicians but they failed to relieve me. A friend recommended St. Jacobs Oil. I at once procured a half dozen bottles, which I have used and find that I am improving all the time. It relieves me at once when I am suffering with rheumatism, and prevents me from spending many sleepless nights. Nothing has done me so much good."

High Pressure in Schools.

The people of Ontario can, if they choose, boast of having one of the best educational systems in the world. In Toronto the working of the system can be seen in its greatest perfection. In the last ten years there has been a great improvement in the means and appliances for instruction, and in the average attendance of pupils, since the introduction of compulsory education into the province. As a whole, are proud of their system, and of the results, that it is evolving. But, for all that, many complain that the system is run at high pressure to the injury of the mental health and physical strength of the weaker pupils. The rigid graded system, which though it is acknowledged to possess special and fully recognized merits, is found fault with. The only thorough review that the pupil gets under it is when he fails to pass his promotion examination, and is hurried back to go over the same ground again, with the view of clearing up the deficiencies of his work against it, that it suppresses individuality in the pupils, and to some extent prevents that intimate acquaintance with the mental qualifications of each pupil which it is very desirable the teacher should obtain. Better results it is claimed, are obtained in our partially graded schools. A more serious charge against the school system in Toronto, is that the competition between the schools, the incentives given to cramming and overstudy, by prizes and promotions, lead to deplorable results, stunting the growth of the weaker children, destroying their mental elasticity, creating a distaste for study, debilitating their constitutions, deranging their nerves and ending in ultimate mental enfeeblement. Such is the charge made by "a leading physician" in the city of Toronto. The extensiveness of the course of study which frequently allows only half an hour to be devoted to one class, and the marking system which, while consuming time, that otherwise might be profitably spent, leads the teacher to maintain an almost constant examination of his classes, which leaves little or no time for that easy conversational style of instruction, which interests the pupil, makes him assimilate and digest what he has learned, and awakens a real taste for learning.

Queen's Counsel for N. B.

The appointments of the new Queen's Counsel for New Brunswick have been gazetted. The honor of wearing the silk gown has been bestowed on Hon. P. A. LANDRY of Dorchester, who thus adds another honor to the list won by the men of Acadian nationality, whose claim to have a share in the power and distinction of public service, has been asserted, and whose right to that claim has been vindicated by the ability with which he and several of his compatriots have fulfilled the duties of the positions with which they have been entrusted. The honor has also been bestowed on Hon. D. L. HANNINGTON, also of Dorchester, and most worthy. He is one of our most effective political speakers, and his zeal and ability as Counsel puts him in the first rank of his profession. His warm advocacy of the right of Fredericton to remain the capital of the Province, will be remembered gratefully here. Hon. B. R. STANLEY, of St. Andrews, our popular Speaker, is also a recipient. The voice of Charlotte will declare that the distinction is well deserved, and we hope it will be strongly on his side when his time comes to contest the county for Ottawa. E. L. WERTMANN, Esq., of Fredericton, is now entitled to write Q. C., after his name. Other honors may, in no long time, fall on him, and we do not know where the people of York could find a gentleman better qualified than himself, by sympathy, knowledge of affairs, ability as a speaker and integrity, to represent them in high Parliament.

A Municipality's Strange Resolve.

A stronger instance of the practical tendency of the age could hardly be given, than the resolve that, it is said, has entered into the mind of the Syndic and Perfect of Venice having control of the municipal affairs, to fill up the canals and convert them into streets. The gondoliers are threatened with absolute extinction owing to a recent concession to a steamer company on the Grand Canal. Through this competition the gondoliers have been reduced to great poverty. It is stated, that their means have been reduced to a few hundred francs, as the price of their acquiescence in the changes. What a world of poetry and romance will be buried in the earth and stones which will fill up the canals, along which the grand old palaces and churches seemed to the poet's eye to be ranged like "altars"; what a degradation to "the Ocean Queen"—"the Sea Cybele"—"the ocean born and earth commanding city"—to Venice, sitting "in state and throne on her hundred isles." A mighty, mournful exchange has come over Venice since the days of "blind Dandolo," when the Grand Republic has been "a link against the tides," since the time when from the "Bridges of Sighs," the Doges, on their installation, dropped the ring into the water in token that the republic married the Adriatic. If the canals are filled up, will the bridges be allowed to stand? It would look strange to see the ancient arches spanning the modern streets. If in Byron's day silent rowed the "songless gondolier," he had at least, fair fares on which he could live. Now, it seems, that his fares are only half fares, and consequently he fares very badly. How different from the time when the gondolier's chanted Tasso's "Jerusalem Delivered," and when was seen and heard "the dash phosphoric of skimming gondoliers, and the responsive voice of the choir of boatmen answering back with verse for verse." How utterly utter will be the horror of aesthetic tourists when they hear of the determination of the Mayor and Council, or whatever the city authorities are called, of Venice, to fill up the small canals, and allow steamboats to ply on the grand canal. But what can they do but yield to the inexorable demands of modern progress and civilization of which steam is one of the first agents.

Starting a Newspaper.

Said Rev. Dewitt Talmage recently in a sermon about the press:—"Almost every intelligent man during his life is smitten with the newspaper mania; and the man who is smitten with it, he must do it. This is often the process. A literary man has an idea, moral, social, political or religious, which he wishes to ventilate. He has a manuscript ready, and he sends it to a publisher. The publisher, if he is a sensible man, seldom has a word to say to it, and he sends it to the printer. The printer, if he is a sensible man, seldom has a word to say to it, and he sends it to the circulation man. The circulation man, if he is a sensible man, seldom has a word to say to it, and he sends it to the advertiser. The advertiser, if he is a sensible man, seldom has a word to say to it, and he sends it to the printer. The printer, if he is a sensible man, seldom has a word to say to it, and he sends it to the circulation man. The circulation man, if he is a sensible man, seldom has a word to say to it, and he sends it to the advertiser. The advertiser, if he is a sensible man, seldom has a word to say to it, and he sends it to the printer. The printer, if he is a sensible man, seldom has a word to say to it, and he sends it to the circulation man. The circulation man, if he is a sensible man, seldom has a word to say to it, and he sends it to the advertiser. The advertiser, if he is a sensible man, seldom has a word to say to it, and he sends it to the printer. The printer, if he is a sensible man, seldom has a word to say to it, and he sends it to the circulation man. The circulation man, if he is a sensible man, seldom has a word to say to it, and he sends it to the advertiser. The advertiser, if he is a sensible man, seldom has a word to say to it, and he sends it to the printer. The printer, if he is a sensible man, seldom has a word to say to it, and he sends it to the circulation man. The circulation man, if he is a sensible man, seldom has a word to say to it, and he sends it to the advertiser. The advertiser, if he is a sensible man, seldom has a word to say to it, and he sends it to the printer. The printer, if he is a sensible man, seldom has a word to say to it, and he sends it to the circulation man. The circulation man, if he is a sensible man, seldom has a word to say to it, and he sends it to the advertiser. The advertiser, if he is a sensible man, seldom has a word to say to it, and he sends it to the printer. The printer, if he is a sensible man, seldom has a word to say to it, and he sends it to the circulation man. The circulation man, if he is a sensible man, seldom has a word to say to it, and he sends it to the advertiser. The advertiser, if he is a sensible man, seldom has a word to say to it, and he sends it to the printer. The printer, if he is a sensible man, seldom has a word to say to it, and he sends it to the circulation man. The circulation man, if he is a sensible man, seldom has a word to say to it, and he sends it to the advertiser. The advertiser, if he is a sensible man, seldom has a word to say to it, and he sends it to the printer. The printer, if he is a sensible man, seldom has a word to say to it, and he sends it to the circulation man. The circulation man, if he is a sensible man, seldom has a word to say to it, and he sends it to the advertiser. The advertiser, if he is a sensible man, seldom has a word to say to it, and he sends it to the printer. The printer, if he is a sensible man, seldom has a word to say to it, and he sends it to the circulation man. The circulation man, if he is a sensible man, seldom has a word to say to it, and he sends it to the advertiser. The advertiser, if he is a sensible man, seldom has a word to say to it, and he sends it to the printer. The printer, if he is a sensible man, seldom has a word to say to it, and he sends it to the circulation man. The circulation man, if he is a sensible man, seldom has a word to say to it, and he sends it to the advertiser. The advertiser, if he is a sensible man, seldom has a word to say to it, and he sends it to the printer. The printer, if he is a sensible man, seldom has a word to say to it, and he sends it to the circulation man. The circulation man, if he is a sensible man, seldom has a word to say to it, and he sends it to the advertiser. The advertiser, if he is a sensible man, seldom has a word to say to it, and he sends it to the printer. The printer, if he is a sensible man, seldom has a word to say to it, and he sends it to the circulation man. The circulation man, if he is a sensible man, seldom has a word to say to it, and he sends it to the advertiser. The advertiser, if he is a sensible man, seldom has a word to say to it, and he sends it to the printer. The printer, if he is a sensible man, seldom has a word to say to it, and he sends it to the circulation man. The circulation man, if he is a sensible man, seldom has a word to say to it, and he sends it to the advertiser. The advertiser, if he is a sensible man, seldom has a word to say to it, and he sends it to the printer. The printer, if he is a sensible man, seldom has a word to say to it, and he sends it to the circulation man. The circulation man, if he is a sensible man, seldom has a word to say to it, and he sends it to the advertiser. The advertiser, if he is a sensible man, seldom has a word to say to it, and he sends it to the printer. The printer, if he is a sensible man, seldom has a word to say to it, and he sends it to the circulation man. The circulation man, if he is a sensible man, seldom has a word to say to it, and he sends it to the advertiser. The advertiser, if he is a sensible man, seldom has a word to say to it, and he sends it to the printer. The printer, if he is a sensible man, seldom has a word to say to it, and he sends it to the circulation man. The circulation man, if he is a sensible man, seldom has a word to say to it, and he sends it to the advertiser. The advertiser, if he is a sensible man, seldom has a word to say to it, and he sends it to the printer. The printer, if he is a sensible man, seldom has a word to say to it, and he sends it to the circulation man. The circulation man, if he is a sensible man, seldom has a word to say to it, and he sends it to the advertiser. The advertiser, if he is a sensible man, seldom has a word to say to it, and he sends it to the printer. The printer, if he is a sensible man, seldom has a word to say to it, and he sends it to the circulation man. The circulation man, if he is a sensible man, seldom has a word to say to it, and he sends it to the advertiser. The advertiser, if he is a sensible man, seldom has a word to say to it, and he sends it to the printer. The printer, if he is a sensible man, seldom has a word to say to it, and he sends it to the circulation man. The circulation man, if he is a sensible man, seldom has a word to say to it, and he sends it to the advertiser. The advertiser, if he is a sensible man, seldom has a word to say to it, and he sends it to the printer. The printer, if he is a sensible man, seldom has a word to say to it, and he sends it to the circulation man. The circulation man, if he is a sensible man, seldom has a word to say to it, and he sends it to the advertiser. The advertiser, if he is a sensible man, seldom has a word to say to it, and he sends it to the printer. The printer, if he is a sensible man, seldom has a word to say to it, and he sends it to the circulation man. The circulation man, if he is a sensible man, seldom has a word to say to it, and he sends it to the advertiser. The advertiser, if he is a sensible man, seldom has a word to say to it, and he sends it to the printer. The printer, if he is a sensible man, seldom has a word to say to it, and he sends it to the circulation man. The circulation man, if he is a sensible man, seldom has a word to say to it, and he sends it to the advertiser. The advertiser, if he is a sensible man, seldom has a word to say to it, and he sends it to the printer. The printer, if he is a sensible man, seldom has a word to say to it, and he sends it to the circulation man. The circulation man, if he is a sensible man, seldom has a word to say to it, and he sends it to the advertiser. The advertiser, if he is a sensible man, seldom has a word to say to it, and he sends it to the printer. The printer, if he is a sensible man, seldom has a word to say to it, and he sends it to the circulation man. The circulation man, if he is a sensible man, seldom has a word to say to it, and he sends it to the advertiser. The advertiser, if he is a sensible man, seldom has a word to say to it, and he sends it to the printer. The printer, if he is a sensible man, seldom has a word to say to it, and he sends it to the circulation man. The circulation man, if he is a sensible man, seldom has a word to say to it, and he sends it to the advertiser. The advertiser, if he is a sensible man, seldom has a word to say to it, and he sends it to the printer. The printer, if he is a sensible man, seldom has a word to say to it, and he sends it to the circulation man. The circulation man, if he is a sensible man, seldom has a word to say to it, and he sends it to the advertiser. The advertiser, if he is a sensible man, seldom has a word to say to it, and he sends it to the printer. The printer, if he is a sensible man, seldom has a word to say to it, and he sends it to the circulation man. The circulation man, if he is a sensible man, seldom has a word to say to it, and he sends it to the advertiser. The advertiser, if he is a sensible man, seldom has a word to say to it, and he sends it to the printer. The printer, if he is a sensible man, seldom has a word to say to it, and he sends it to the circulation man. The circulation man, if he is a sensible man, seldom has a word to say to it, and he sends it to the advertiser. The advertiser, if he is a sensible man, seldom has a word to say to it, and he sends it to the printer. The printer, if he is a sensible man, seldom has a word to say to it, and he sends it to the circulation man. The circulation man, if he is a sensible man, seldom has a word to say to it, and he sends it to the advertiser. The advertiser, if he is a sensible man, seldom has a word to say to it, and he sends it to the printer. The printer, if he is a sensible man, seldom has a word to say to it, and he sends it to the circulation man. The circulation man, if he is a sensible man, seldom has a word to say to it, and he sends it to the advertiser. The advertiser, if he is a sensible man, seldom has a word to say to it, and he sends it to the printer. The printer, if he is a sensible man, seldom has a word to say to it, and he sends it to the circulation man. The circulation man, if he is a sensible man, seldom has a word to say to it, and he sends it to the advertiser. The advertiser, if he is a sensible man, seldom has a word to say to it, and he sends it to the printer. The printer, if he is a sensible man, seldom has a word to say to it, and he sends it to the circulation man. The circulation man, if he is a sensible man, seldom has a word to say to it, and he sends it to the advertiser. The advertiser, if he is a sensible man, seldom has a word to say to it, and he sends it to the printer. The printer, if he is a sensible man, seldom has a word to say to it, and he sends it to the circulation man. The circulation man, if he is a sensible man, seldom has a word to say to it, and he sends it to the advertiser. The advertiser, if he is a sensible man, seldom has a word to say to it, and he sends it to the printer. The printer, if he is a sensible man, seldom has a word to say to it, and he sends it to the circulation man. The circulation man, if he is a sensible man, seldom has a word to say to it, and he sends it to the advertiser. The advertiser, if he is a sensible man, seldom has a word to say to it, and he sends it to the printer. The printer, if he is a sensible man, seldom has a word to say to it, and he sends it to the circulation man. The circulation man, if he is a sensible man, seldom has a word to say to it, and he sends it to the advertiser. The advertiser, if he is a sensible man, seldom has a word to say to it, and he sends it to the printer. The printer, if he is a sensible man, seldom has a word to say to it, and he sends it to the circulation man. The circulation man, if he is a sensible man, seldom has a word to say to it, and he sends it to the advertiser. The advertiser, if he is a sensible man, seldom has a word to say to it, and he sends it to the printer. The printer, if he is a sensible man, seldom has a word to say to it, and he sends it to the circulation man. The circulation man, if he is a sensible man, seldom has a word to say to it, and he sends it to the advertiser. The advertiser, if he is a sensible man, seldom has a word to say to it, and he sends it to the printer.
