Agriculture.

The Remedy for Weeds.

It costs the farmer as much care and trouble to subdue the "crop which never fails," the weeds, as to raise the crops which sometimes fail in spite of all his labors. There is no surer sign of careless, slovenly farming than the growth of weeds. The common weeds that infest the fields and plague the farmer, are, the Canada thistle, fox tail or summer grass, couch grass, rag weed, ox-eye daisy, wild mustard, red root, &c. The Canada thistle, so called, but LYDIA E. PINKHAM'S which seems to be identical with the ordinary farm thistle of England, is the greatest plague of all, for its For all those Painful Complaints and Weaknesses seeds of propagation are blown over a district of country, and the idle, A Medicine for Woman. Invented by a Woman. selfish or ignorant farmer, who alhe Greatest Medical Discovery Since the Dawn of History. lows this weed to grow unchecked IT It revives the drooping spirits, invigorates and in his fields, is the means of doing harmonizes the organic functions, gives elasticity and great damage to his industrious, eye, and plants on the pale cheek of woman the fresh thrifty neighbors. There should be Physicians Use It and Prescribe It Freely some way taken to punish a man It removes faintness, flatulency, destroys all craving who thus wrongs his neighbers. In Ontario, the "Canada Thistle Act' That feeling of bearing down, causing weight and backache, is always permanently cured by its use. gives ample powers to municipalities, as against offending thistle growers. LYDIA E. PINKHAM'S BLOOD PURIFIER will eradicate every vestige of Eumors from the Blood, and give tone and strength to the system, of man woman or child. Insist on having it. The Act provides that every occupant of land must cut down thistles as often as necessary to prevent their at 233 and 235 Western Avenue, Lynn, Mass. Price of going to seed, under penalty of a fine either, \$1. Six bottles for \$5. Sent by mail in the form of from \$2 to \$10; and the overof pills, or of lozenges, on receipt of price, \$1 per box for either. Mrs. Pinkham freely answers all letters of seers of highways are charged, under penalty of neglect of duty, with see-No family should be without LYDIA E. PINKHAM'S LIVER PILLS. They cure constipation, biliousness, and torpidity of the liver. 25 cents per box. ing the provisions of the Act carried into effect. They must notify, not later than 25th June, any occupier on whose lands thistles are growing and in danger of going to seed, to cut them down within five days from service of notice; and if the occupier does not attend to it the overseer may enter on his land, provided it is not sown with grain, and cut down the thistles, the cost being chargeable to the occupier and recoverable from him in the same manner as taxes. But it is one thing to get an Act passed, and another to have it enforced. In some districts, we hear, that it is a dead letter and never taken notice of. In these districts, it may be safely concluded, there must be a great deal of careless farming.

In Ontario, the dealing with thistles is acknowledged to be a matter of difficulty. Within the last few years they have been increasing rapidly in many of the older sections of the Province, until, it is said, that more than one-half of the soil in plough in the fall of the year, and which he :them in." churn will admit of it, the buttermilk may be drawn off, and clear, cold water poured into it, and the butter washed in that way in separate waters until it runs off quite clear, and the butter is quite free from milk. This is indispensable if the butter is expected to keep well. It is then salted at the rate of one onnce to the pound of butter. The butter is pressed out with the ladle, and never to be worked by the hands under any circumstances and the salt is pressed over it; it is then doubled and pressed out again and cut and gashed with the ladle but never rubbed or plastered, but only squeezed and pressed, until the salt is pretty evenly mixed, it is then put away in a cool place for 24 hours or less, as may be convenient. It will then appear streaky and patchy, and is worked over in the same way as before until it becomes free from this streakness and even in color, by the thorough mixture of the salt. This is done by squeezing it with the ladle, a small piece at a time, and pressing it out into a flat sheet, doubling it, and again squeezing it out, so as to get all the salt and moisture in it evenly through the mass. The color is then alike all over. No more working is then required. The first working requires about 10 minutes for 20 or 25 pounds, the second about 15 minutes. It should then break with a coarse, uneven fracture, much like that of a piece of beeswax, and should appear when cut of a granular texture and quite free from greasiness and fine drops of clear brine should follow the knife as it is cut. It is not well to try to get all the moisture out of the butter, as this improves its texture and flavor. If the cream has been well kept and the butter well made and churned, this should have a very sweet and fragrant scent, quite free from acidity or pungency, It is a peculiar scent, and belongs only to the best butter, and when this odor is absent, the right flavor is wanting, because the scent and aroma, and the flavor as well, are all attributes of pure fresh butter. The butter should be packed as soon as it is worked the last time, no butter needs a third working; the package should be quite free from all disagreeable scent or impurity; white oak, spruce, or white Extra cautious writers have not yet ash are the best materials for the tubs ceased warning their readers against or pails.
