The only Sure Cure for Dropsy.

READ THE FOLLOWING. GETSON'S POINT, Nov. 20th, 1881 MESSES. C. GATES & Co.: Gentlemen .- I should have written to you before, but neglected to do so. I feel it my duty

to send you the following information, from gratitude to you and the benefit of those suffering as I was. About five years ago I was greatly afflicted with Rheumatism and Dropsy; my legs were swollen to an enormous size; I could not even get from my bed without the aid of my wife for several days, I tried all kinds of patent medicine, and a number of bottles of Dr. Thom-as' Eclectric Oil, and also Johnson's Liniment, but found myself worse I applied to several doctors, from whom I received no benefit. In the following summer I went to Halifax, to the doctors' treatment for eight weeks. I had my leg tapped twice and blistered several times. suffered day and night—everything but death.

I then left that institution and retured home, having received little or no benefit, and expecting never to get any better. I was then advised

No. 1 Syrup and No. 2 and No. 3 Bitters, with a WM. A. McLEAN. box of Nerve Ointment and Vegetable Plaster. The first few bottles I used I did not feel much swelling was going down in my legs, and my whole system began to feel better. In all I used but twelve bottles, and I am now enjoying the best of health. I am thankful to God that made . your . medicine 'an instrument in His hands of saving my life.

Yours very truly, THE Subscriber offers for sale on private terms that well-known farm in Maugerville Supports to, farmerly owned by the late Geo B. Covert, Esq., containing 600 acres—a large portion of which is cleared intervale.

Sworn to before me, at New Bublin, this 27th day of December, 1881

The Boulders of Canada.

A correspondent of the North-West Times, has the following interesting

ately sized stones, rounded and smooth, extensively deposited over the surface of the country. They vary in size, and are principally composed of granite of several varities, some being beautifully marked. There are other sorts of stone intermixed with them. In some parts of the Eastern townships, P. Q., fields may be found here and there almost covered with them. Throughout the Western province of Ontario, there are not so thickly deposited, but traces of them are to be found. I noticed in Nova Scotia, just before we arrived to the Annapolis Valley, they were so thickly deposited that some of them were actually piled on one another. In New Brunswick, there

Effect of Frozen Food upon

NO. 46

Animals. A correspondent of the New York Times, gives his experience of the disastrous effect of the turning out "The boulders of Canada are moderof his cows on frozen pasturage:-

"The effect of frozen grass and other herbage is sometimes disastrous to the health of the animals fed upon it. I have been careless enough to suffer from it. Usually my cows spend the forenoon in the stalls ruminating and digesting the morning's feed, and are not turned out until noon, when they have the range of a pasture. But one day they were turned out earlier, and while the frost was thick upon the grass in places where it was shaded by a hill from the early morning sun, The cows fed upon this frozen grass, and on being brought in, in the afternoon, one was found with the udder very hard and hot and inflamed. From 7 quarts of milk at a meal she fell off at once cow lost by one little neglect and thoughtless departure from a regular system of management. But a curious effect occurred in churning the cream three or four days after this frozen grass was eaten. The whole churning of 25 lb. of butter was of an unusually light color and defective in flavor; and, more than that, it required several days completely to recover the quality and ap-

pearance of the butter." There is much in that good old sea, leaving them exposed to view mands the market; the early swarm soft wood forest will spring up. If a dull sloth and early rise. There are

He ought to have

have been born before him. These thoughts respecting earliness in general, have suggested themselves to us as we thought of the great advantages of a few early turnips to the farmer. Also of early rape, and early summer keep for our flock. And they gradually extended themselves as we thought of the advantage of earliness in every way. It has been objected that the early worm suffers from his earliness, but he must be regarded subjectively as the reward of the early bird. In farming matters it is seldom surgical trocar and canula drew off that we can be too early, although there are cases in which there is luck in leisure, and others in which too much haste brings with it misfortune. Thus roots may be sown too early and run to seed, or run to neck, or milto flow through an indiarubber tube dewed; and potatoes may be up too viced the list, or the Sheriff were ac- advantage.
