Miscellaneous.

The Golden Wedding. "Ay, but wait good wife a minute; I have first a word to say; Do you know what day to-day is? Mother, 'tis our wedding day!"

Just as now we sat at supper, When the guests had gone away; You sat that side, I sat this side, Fifty years ago to-day!

Then what plans we laid together, What brave things I meant to do! Could we dream to-day would find us At this table—and you?

Better so—no doubt—and yet I Sometimes think, I cannot tell— Had our boys—ah, yes, dear; Yes, he doth all things well.

Well we've had our joys and sorrows, Shared our smiles as well as tears, And—the best of all—I've had your Faithful love for fifty years!

Poor we've been, but not forsaken; Grief we've known, but never shame— Father, for Thy endless mercies, Still we bless Thy Holy Name!"

Don't allow the accumulation of Scurf or Dandruff, when it can be so easily prevented by the use of Ayer's Hair Vigor.

A lawyer proposed to a client to undertake a case on the following terms—"If I lose," said he, "I get nothing. If I win, you get nothing."

The largest cow in the world would't scare a city woman any more than a yearling heifer. It isn't so much the size of the critter as it is the idea of the "horrid thing."

A rural correspondent writes to us to inquire: "What is an editor's easy chair?" Well, my poor informant, it's an undressed plank held up at each end by a candle box."

A Boston clergyman chose for his text last Sunday—"It is not good that man should be alone." At the close of the sermon every unmarried female in the congregation touchingly responded, "Ah, men!"

Three lovely school-ma'ns were out rowing on the Monongahela. A bold, wicked man on shore, who was a bad boy a few years ago, instead of taking off his hat as the boat went by, simply remarked: "Behold the whaling fleet."

For the benefit of our readers we give this week a sure cure for colic or belly ache in horses. To one bottle Johnson's Anodyne Liniment add same quantity of molasses and same quantity of water, and pour down the horse's throat.

An apple tree in Mercer county, Ky., is believed to be 90 years old, and has 60 years. Five feet from the ground it measures around the trunk 10 feet 9 inches, and is believed to be the largest apple tree in the world.

"Ma," said Jennie Smith, at Newport, "they said those Fenwicks, who have got the Jones cottage, are so stylish, and have got a pedigree." "Got the pedigree, have they?" said Mrs. Parvenue, excitedly; "well, you keep away from them, for I don't want you to catch it."

A darkey on a Pecano plantation not long since was much tried by the obstinacy of a mule. After much urging and kindness to the brute he broke out with, "Look hyar, now! mebbey you thing 'cause I jined the church last Sunday that mornin', but de big words; but I'll hab you know I'm gwine to make 'cepshin in your special case."

A judge who was nominated for office was criticised by liquor men of his party because while the bench he had frequently been severe by his expressions concerning them. He urged that he was only executing the law; and he added, "I should have told the Grand Jury to carry out the instructions of the law if I had been drunk myself."

Mr. W. J. Guppy, of Newbury, informs us that he has used Burdock Blood Bitters in his family with good effect, and adds that the Rev. J. R. Smith has used it and speaks of it in high terms of praise. It is the great system-renovating tonic that cures all diseases of the Blood, Liver and Kidneys, acting harmoniously with Nature's laws. 25,000 bottles sold during the last three months.

"Wilder Jenkins," said an Ohio farmer, as he bustled into his house one morning, "I am a man of business. I own an worth \$10,000, and want you for a wife. I give you three minutes in which to answer."

"I don't want ten seconds, old man," she replied, as she shook out the dish-cloth.

"I am a woman of business, worth \$16,000, and I wouldn't marry you if you were the last man on earth! I give you a minute and a half to get it."

They had a revival down in Indiana recently, which ended in old Ben Wilson being made a deacon. Last Sunday old Ben was especially annoyed by young men, who during the whole time of service, were flirting with his youngest daughter. Their misbehavior was carried to a climax when the regenerated father was praying. Suddenly he felt that he could bear it no longer, and he prayed, "An' now, O Lord, have mercy on the dum idiot with the store clothes on, as is winkin' at our Alice, an' keep him hangin' around the church door when service is over, till I can get to him an' put a head on him! Amen."

Thaddeus Stevens used to say that a contented farmer was a rarer creature than a white blackbird. Illustrative of the assertion, he used to tell of a certain farmer at whose house he once visited. The farmer was just ripening, was remarkably beyond anything that he had ever seen. "My friend," said Mr. Stevens to the farmer, "this is truly magnificent. There is nothing to be proud in your corn yield this year."

"Well," responded the farmer, guardedly, "it is purty fair; purty fair. But," and there was a noticeable tinge of sadness, their might be a few more cunnels—just a few more cunnels—at the end of the cob.

Agriculture.

The loss to the tobacco crop alone in Massachusetts by frosts and drought is estimated at \$150,000.

A four-year-old Welsh cow, the pike of a herd, sold in England, brought the extraordinary price of \$1750.

Everybody should send to the farmer's paper any facts, experiments and suggestions that other people can profit by.

Ten million dollars are invested in the dairy interests of the United States. The products from this capital reach the magnificent sum of \$26,000,000.

Georgia has raised this year about 6,250,000 melons, of which she sent to market all but 1,000,000, which were consumed on the farms, fed to stock or wasted.

The cow's feed should be rather moderate about calving time or milk fever may be expected. But full feeding at other times is to the dairyman's interest always.

It is much better to feed young pigs often than to starve them at one feeding. Variety adds much to the progress of the young animal, and at this season growth is more desirable than fat.

A western farmer in Iowa estimates that the profit of raising one two-year-old short horn steer for market is equal to that of eighteen scrub steers, which have to be kept three years or more before they are saleable.

Returns from several places in different parts of Maine show that the green corn packed will realize only 67 per cent of the amount anticipated, and this will doubtless represent fairly the condition throughout the State, and the crop is mostly already sold.

A well-bred steer has a better frame, is deeper fleshed, fattens much more quickly than the common steer. He will put on larger quantities of beef easier, carry it to market at same cost, where it is worth from two to four cents more per pound. Get a pure-bred bull.

When horses eat their oats too rapidly the evil may be checked by placing some cobbles stones in the box. The horse will then be compelled to pick his oats slowly, masticate them more thoroughly, and they will do him much more good than if hurriedly eaten in the ordinary way.

Cows cannot be kept in good flow of milk without ample rations of rich fodder. As the pastures become bare, corn stalks, cut and mixed with ground oats and corn, may be given. Feed the tops of beets, turnips, etc., in small quantities. The aim should be to have the cows in fine form at the close of their pasturage.

The weight of a horse is an important item in estimating his value for draft purposes. The well-bred horse, with well-developed muscles, weighs as much as the heavier one, for a short time, and is even better for road purposes. But in plowing, or other heavy, steady drawing, the light-weight horse quickly wears out and becomes useless.

The way in which an old veterinarian curses ringbone is described. He ties the animal down to guard against kicking. As the pastures become bare, corn stalks, cut and mixed with ground oats and corn, may be given. Feed the tops of beets, turnips, etc., in small quantities. The aim should be to have the cows in fine form at the close of their pasturage.

It is quite certain that those farmers do not make pork growing very profitable. They are obliged to winter and summer to make it dress what a spring pig should be in December. There is no advantage in anything but a thrifty, growing condition for pigs from birth till they are killed, and in winter it is not always easy to maintain this condition.

It takes half the summer with most winter pigs to recover from the check to their growth given by the cold season.

The value of farms, including fences and buildings, in the United States in 1880, was \$10,197,000,000. In 1860 it was \$6,645,000,000, an increase not quite equal to the increase in population. According to the census report, Illinois pays out more money for fences than any other State in the Union.

Pennsylvania comes next. There are 100,000 miles of fence in that State in the United States, 6,000,000 miles of fence, and it has, in all, cost something over \$2,000,000,000. During the census year alone \$78,629,000 was expended for fencing purposes.

The Island of Jersey, having a surface of seven miles each way, keeps 12,000 cows. The breeding of the cows has made the island very fertile, and, as the animals are kept in stables all the year round, every particle of the manure is saved. Cows kept in close yards, with little exercise, are generally better milkers than those allowed to run at large, and it is this in part which has developed the dairy value of the Jersey breed. In winter the cows are largely fed on parsnips, which has probably helped to develop the butter superiority of this breed of cattle.

Estimate the value of your farm and stock, then make out carefully a list of all your personal and family expenses during the year, including all your family has consumed—whether made on the farm or purchased with proceeds of the crop—charging yourself up with milk, butter, eggs, chickens, meat, house rent, wood, syrup, etc., at current rates, and then tell us if you can how you would have invested the same amount of capital to better advantage, and at the same time lived as well and as independently.

The King's Central Exhibition.

The Central Agricultural Society of King's County held their annual exhibition in their new hall at Hampton Village, on Friday. There was a very creditable display of roots and grain in the building. The show of stock was limited in quantity, but made up in quality, in fact as good as has ever been shown there.

There were several fine horses. John Raymond took 1st prize for matched team. Best stallion, 3 years old or over, Dr. Taylor 1st. Best Colt or filly, 3 years old or over, Geo. Raymond 1st. Best colt or filly, 2 years old or over, H. J. Fowler 1st. Best mare with foal at side, Geo. Otty 1st. The imported Shropshire ram showed that the hard feed of the Norton pasture did not agree with him.

The beautiful and very symmetrical herd of Ayrshire cattle exhibited by Mr. Samuel B. Belding, attracted much attention. They are a lot hard to beat, and acknowledged so by competent parties. His Ayrshire calf was really a magnificent animal, and his yearling bull showed good size and well balanced proportions. His two cows, on which he took 1st and 2nd prizes, were larger than we generally see of that breed. His 2 year old heifers were both in milk, with a calf at her side, and also took 1st and 2nd prizes. There were several fine young of Devon oxen exhibited, and this breed is one for which this exhibition has become famous. Hon. John Flowering entertained the judges to dinner. The prize winners were:

Horses. Best matched team—John Raymond, 1st; A. Davidson, 2nd. Best stallion, 3 years old or over, Dr. Taylor, 1st; Geo. Otty, 2nd. Best colt or filly, 3 years old—Geo. Raymond, 1st.

Best colt or filly, 2 years old—H. J. Fowler, 1st; F. F. Frost, 2nd. Best yearling colt—John Raymond, 1st; H. Demill.

Best mare, foal at side—Geo. Otty, 1st; J. F. Frost, 2nd.

Decons. Bulls 3 years—E. Smith, 1st; C. J. Smith, 2nd. Yearling bull—C. J. Smith, 1st. Best cow—C. F. Smith, 1st; E. Smith, 2nd.

Two year heifer—E. Smith, 1st; C. J. Smith, 2nd. Yearling heifer—E. Smith, 1st; C. J. Smith, 2nd. Calf—C. J. Smith, 1st.

Ayrshire. Best bull, 3 years—C. Dixon, 1st. Yearling bull—S. B. Belding, 1st; J. E. Fairweather, 2nd. Best cow—S. B. Belding, 1st; W. Fowler, 2nd. Cow—S. B. Belding, 1st; J. E. Fairweather, 2nd. Two year heifer—S. B. Belding, 1st and 2nd.

Swine Feeding. The most successful swine feeders in the West, and in all parts of the country for that matter, produce their pork largely upon clover and grass. The animals are only "finished off" or fattened on corn. This mode of raising pigs is essential to success in the East, owing to the high price of corn, and if other cheaper food can be substituted for the corn, in fattening, the chances of success are still better.
