Miscellaneous.

Harvest Moon. Welcome, Autumn's earliest blessing! With the God of harvest blessing! Bride of Winter's hair, crossing! You fall moon, thy joy confessing, Lights the summer to her death.

Day and night, never cheerless, Equal cold and equal heat, Far from June's kingdom peerless, Near to Winter strong and fearless, Near to Indian summer sweet.

Moon, that glides the fruits of splendor From Earth's bosom and the sun, Harvest moon, thy reign so tender, Hope to Memory shall surrender, Now that Summer's work is done.

Let the fruits of life's endeavor Cheer the sinking heart with hope; While the God of harvest blessing, Heaven and earth shall never Though we tread life's downward slope.

Harvest moon, that shines in glory On the gathered fruits of earth— May thy light, when Time grows hoary, And the stars are dim and dim, Ending with a brighter birth.

The reason we are proud of summer is because pride goeth before a fall.

Farmers' clubs are suggested as very good things for protection against patent graft and lightning rod swindlers. They should be about five feet long and made of stout hickory.

Little Aggie's sister has invited her best young man to tea. There was a lull in the conversation, which was broken by the inquisitive Aggie: "Papa, is father older than Mr. Robinson's mother?"

A lady put her watch under her pillow the other night, but couldn't keep it there because it disturbed her sleep. And there was her bed ticking right under her and she never thought of it!

A Boston clergyman chose for his text last Sunday, "It is not good that man should be alone." At the close of the sermon every unmarried woman in the congregation touchingly responded, "Ah, men!"

"This isn't a menagerie," sharply observed an irascible woman to a man who was trying to force his way through the crowd at the door of a concert room. "No, I suppose not," returned the man, "or they wouldn't leave any of the animals to block up the entrance."

A cough or cold taken between now and Christmas frequently lasts all winter. This is certainly the case with people who have weak lungs. The most convenient, reliable and inexpensive remedy is Johnson's Anodyne Linctament. It is to be used internally and externally.

A lady who had company to tea reproved her little son severely, telling him to be patient with his play, and last, out of patience with him, she said, sharply: "Jiminy, if you don't keep still I'll send you away from the table." "Yes, than's what you always do when there's company and there are not enough canned peaches to go around," was the reply of the gifted youth.

"Why, Mr. Smith?" exclaimed the young lady, "what's that on your lip?" "That's oh, that's a muthatche. It hadn't been growing long. It isn't long enough to bite me." Mr. Smith made a desperate effort to twist one end of it into his mouth. "Ah, then there's no necessity of being afraid of it," said the young lady, demurely, drawing closer. And Mr. Smith didn't know what she meant.

There is a saying in California that if a man buys water he can get his land thrown in. The literal fact is that the value of much of the land depends solely upon the water which it holds or carries. Four systems of irrigation are practiced: First, flooding the land. This is possible only in flat districts where there are large heads of water. The second is by furrows, by which a large head of water is brought upon the land and distributed in streams as small as will run across the ground. The third is by ditches dug around trees to which water is brought by pipes or ditches. The fourth is by sub-irrigation; the water is carried in pipes laid from two or three feet below the surface and let out to permeate the soil.

An old bachelor, who lives in the suburbs of Austin, hired a colored man of about 18 to clean up his room, fill the lamp, and perform like services. A few days ago the colored domestic, who had been using his employer's blacking, said to his master: "Boss, our blackin' am done out." "What do you mean?" growled the sordid employer; "everything belongs to me, and nothing belongs to you. I wish you to understand that nothing belongs to you."

The terrified darkey promised to comply with the request. On the following Sunday the boss happened to meet the colored menial, accompanied by a chocolate-colored female pushing a baby carriage. "Was that your baby in that carriage?" he asked next day, quite a number of his friends being present. "No, boss, dat's not our child; dat's your child. I no nobler gwine ter say nuffin belongs to no moah."

A man who advertised a horse for sale noted down the objections of all who called to look at the animal, and some of them are here given: "Too large," "Too small," "Too old," "Not old enough," "Too lively," "Rather too sleepy," "Object to the white hind feet," "Would take her if she had more white feet," "Don't like her color," "Color is just right, but she is too fat," "Weighs too much," "Don't weigh enough," "Has a bad eye," "Eyes all right, but ears too small," "Yes, handsome ears, but the nose spoils her," "Legs all stocky up," "Legs all right, but feet bad," "If Shaker had said that no man knew what he wanted in a horse there would be none to dispute it."

Agriculture.

The leaves begin to fall and the fall begins to leave. A Maryland farmer has made good vinegar from watermelons.

The potato crop of New Brunswick is thought to be the largest ever known.

Seventy-five thousand pounds of butter were recently sold in New York to one man.

Good butter will always command the highest market price when an inferior article is a drug in any market.

Potatoes from the Aroostook and Upper New Brunswick are now arriving in Bangor by rail, at the rate of ten carloads, or about 4000 bushels, daily.

People whose houses are located in damp situations are advised to plant an abundance of sun-flowers about them. Their effect in the destruction of malarial poison is said to be very marked.

Great Britain is the only country in Europe which has no forestry schools. On the continent there are numerous excellent and well-established schools of that character, where everything that appertains to trees is taught by accomplished teachers.

In 1867, the fruit trade of Jamaica with the United States consisted of a few hundred boxes of pineapples and oranges, valued at \$725; last year the export of oranges alone had risen to 35,000,000, and the total value of the trade was \$128,000.

Horses should no longer be turned out at night. A cold rain may bring on troubles which are difficult to cure at this time of year. If horses are unavoidably drenched, rub them dry as soon as possible, and cover with blankets. Horses need to enter upon the winter in good health.

Samuel Bean, who lives at Page, Va. is the owner of a cat that catches and catches chickens with all the cunning and greed of a fox. He says that he has been seated on his porch in the broad daylight and the calf would enter the yard where the chickens were and deliberately seize and devour them in his presence.

The traffic in frozen meat between New Zealand and England is now an undoubted success. Recently, a single cargo that was safely delivered consisted of 9,584 dressed sheep, which weighed 641,315 pounds. What is called the Haslem Dry Air Freezing Apparatus is depended upon for the necessary refrigeration.

Milking in the barnyard, says an exchange, is an old fashion that should be abandoned. It is inconvenient and unclean. It should go with the wooden pail and the hairy butter and never be heard of any more; gone and forgotten.

It is a wonder that any farmer would permit it, and still more a wonder that any farmers' wives or daughters would consent to it.

A great many fields, especially those that are long and narrow, are always ploughed the same way. An exchange, referring to this practice, suggests that simply turning the direction of working will often make a great increase in productivity. The furrow cut across the old lines of furrows is not stopped by the same stones, while new soil is opened to the growth of plant roots.

There is an exhibition at San Luis Obispo, of the hand of a child, showing the wrist, hand, thumb and fingers all perfect except the little finger, which is double. It is covered with small grains of corn to near the tips of the fingers, which are bare prongs of cob, giving the appearance of a hand clad with a mitt. In total length it is five and a half inches and three inches broad across the palm.

Washing cans and pails is a very important work in the dairy, especially when they have contained sour milk. The acid must be completely removed, or it will sour the next milk that is put in the cans. Want of care in this respect makes much mischief, and has much to do with the fact so bitterly complained of, viz., that ordinary farm dairy butter sells for 12 to 12 cents a pound. Good butter cannot be made from milk set in cans that are not perfectly clean.

Make the necessary water-courses in fields to relieve them of the excess of surface water during heavy storms. The furrows, wide and shallow, should run diagonally across slopes, with little fall. All kinds of litter, except weeds with ripened seeds should go into the barnyard. There should be a general cleaning up in and around the garden and stables, to give neat appearance at the end of the season. Now is a good time to make the necessary repairs and improvements for wintering the farm animals before bringing them permanently into the yards and stables.

The towel is not usually included among dry utensils, but it is really a very important one. It is used ostensibly for the promotion of cleanliness, but it is, in fact, too often made the very reverse of this. It is not unusual for dry towels and wiping cloths to be in a very foul condition—a state in which "stink" is a mild term to apply to them; and it is with these that the last touch is given to the pails, pans, and strainers. It is because they are saturated with grease and sour milk that they are thus fragrant. No count water and soap will thoroughly cleanse them. Boiling water is needed, and the cloths should be thoroughly washed and rinsed in this, and then finished in cold water, as soon as they have been used, and before they are hung out to air. This is one of the great little things in the management of the dairy, and should not be overlooked.

New Denmark Agricultural Show and Dinner.

The New Denmark Agricultural Society, held its annual Exhibition and Dinner, at the residence of the President of the Society, H. Peter Lysegard, Esq., on Tuesday, the 16th inst. The day was very fine and a great number of people had gathered to witness the friendly contest. The Exhibition was well arranged, and well conducted. In the lower flat of Mr. Peterson's new house were the exhibits of grain, roots and vegetables, and dairy produce, domestic manufacturers and ladies fancy work up stairs. Here vegetables and roots held a very conspicuous place and the display was large and of an excellent quality. Better is seldom seen at any local Society Show.

The exhibits in live stock were very numerous. From the horse Judge's stand one had a good view over the whole cattle yard, and it was a very lively and interesting sight. The quite large square field hemmed in by a line of the exhibited animals, arranged in classes and sections according to breed, age, &c., was filled with people who take a lively interest in the proceedings of the Judges, particularly of the horses, the whole being accompanied by what might be termed a natural orchestra of the neighing of the horses, the bellowing of cattle, bleating of sheep and grunting of pigs. Many good cattle were exhibited, particularly in Shorthorn and Jersey grades. The thoroughbred Shorthorn Bull, Cardinal 2nd, is a very fine animal.

As a whole, the Exhibition was a great success, and bore good evidence of the working of the Society and its beneficial effects. The Secretary deserves great credit for the able manner in which he executed the duties of his office.

When it is remembered that New Denmark is a new settlement, one cannot but admire the progress made there, and the fact that not only at the Exhibition held in St. John three years ago, but at the Centennial Exhibition, where the whole Dominion completed, New Denmark carried off its full share of prizes for grain and products, speaks well for its character as a farming country, and we cannot but wish that many settlements like it would soon fill up the rich lands of the Northwest.

When the Judges got through their not very easy task to decide the superior among the exhibited articles and animals, they and the officers of the Society, and some invited guests, sat down to a splendid dinner at the President's house. After the first cravings of hunger had been satisfied, the President rose and in appropriate terms proposed the toast of the "Danes in New Denmark," responded to by Mr. Wahl; "Our Host and Hostesses," responded to by the President; "The Ladies of New Denmark," responded to by Mr. Gallop; "The Dames in New Denmark," responded to by Mr. Wahl; "Our Host and Hostesses," responded to by the President.

After dinner the party adjourned to the grounds and witnessed a bare back horse race, and shortly after the whole multitude departed, everybody with their praise for New Denmark and its Agricultural Society, all agreeing to having spent a very pleasant day.

Following were the prize winners HORSES. Brood Mare—Peter Andresen, 1st; N. P. Price, 2nd; Colt 3 years old—N. P. Price, 1st; Ludvig Nielsen, 2nd; Colt 2 years old—Peter Andresen, 1st; Kuld Hansen, 2nd; Colt 1 year old—Peter Andresen, 1st; John Gallop, 2nd; Colt spring 1883—Joseph Gallop, 1st; Jorgen Paulsen, 2nd; Horse or mare—James Harley, 1st; Anders Hansen, 2nd; Draught horses tested—Mr. Estabrook, 1st; Mr. Gallop, 2nd; Stallion—Mr. Gallop, 1st; Mr. Gallop, 2nd.

Thoroughbred bull—J. C. Upham. Bull 3 years old and upwards—Peter Djardard, 1st; Bull 2 years and upwards—Fredrick Jensen, 1st; Bull calf 1883—Fredrick Jensen, 1st; Milch cow—Sivgard Johansen, 1st; Valdemar Wahl, 2nd; Heifer 2 years old—Geo. Prescott, 1st; H. P. L. Petersen, 2nd; Heifer 1 year old—Fredrick Jensen, 1st; Niels Hohansen, 2nd; Heifer calf 1883—Niels Hohansen, 1st; Niels Hohansen, 2nd; Jersey grade heifer, 1883—Hans Nielsen, 1st; Jorgen Lund, 2nd; Jersey grade heifer, 1882—Jens Jensen, 1st; N. H. Christensen, 2nd; Jersey grade heifer calf, 1881—L. Nielsen, 1st; Claus Rasmussen, 2nd; Shorthorn grade heifer calf, 1882—Fredrick Brinkmann, 1st; J. P. Christensen, 2nd; Shorthorn grade heifer calf, 1883—Fredrick Brinkmann, 1st; J. P. Christensen, 2nd; Ox 4 years old and upwards—Niels Hohansen, 1st; N. Christensen, 2nd; Steer 3 years old—Hans Nielsen, 1st; Jorgen Lund, 2nd; Steer 1 year old—Niels H. Christensen, 1st; Hans Paulsen, 2nd; Fat ox—Lars Bertelsen, 1st; Fredrick Brinkmann, 2nd; Milch cow—Fredrick Jensen, 3rd; Fat Heifer—E. Abildgaard, 1st.

SHEEP. Ram 2 years and upwards—Jorgen Paulsen, 1st; Mrs. Liebst, 2nd; Ram lamb—N. M. Hansen, 1st; Valdemar Wahl, 2nd; Ewe 2 years and upwards—Sivgard Johansen, 1st; Hans Nielsen, 2nd; Ewe 1 year and upwards—Mrs. Liebst, 1st; George Swegg, 2nd; Hans Nielsen, 2nd; Thoroughbred Cotswold Ewe—H. P. L. Petersen, 1st; Shropshire Ram—A. Larsen, 1st; Shropshire Ewe—H. P. L. Petersen, 1st; Andrew Larsen, 2nd; Leicester Ewe—Jorgin Lund, 1st; Fat Sheep—Hans Nielsen, 1st; J. Lund, 2nd.

SWINE. Sow for Breeding, 1 year old—Niels Christensen, 1st; Thoroughbred Berkshire Boar Pig—James Price, 1st; Thoroughbred Berkshire Sow—L. Neilson, 1st; Fat Hog—Fredrick Brinkman, 1st; Lignard Johnson, 2nd.

POULTRY. Best Pair of Turkeys—Mr. Meret, 1st; Martin Jensen, 2nd; Geese—Mr. Gallop, 1st; Barnyard Fowl—Ed. Abildgaard, 1st; Niels Johansen, 2nd.

Djardard, 1st; Women's wear, C. Rasmussen, 1st; Flannel cotton and wool, Mr. Gallop, 1st; Ladies' Fancy Work, Ludvig Nielsen, 1st; N. M. Hansen, 2nd; H. P. L. Petersen, 3rd; Wooden Shoes, Lars Andersen, 1st; Wooden Spoons and Ladles, Lars Andersen, 1st.

How Fast They Stook Hogs in Chicago. I arose early this morning and went to the stock yards, where, it is said, they kill, dress and freeze a steer in one minute. I thought this a gross exaggeration, but when I saw a pig put through its performance in thirty-five seconds, I can believe the other story.

P. Robinson, in that very charming book of his called "Sinners and Saints," gives, to a nicety, the operations of pork killing as carried on in this city, which is both graphic and elaborate. As I cannot give Mr. Robinson's history of the stock yards in full, I might condense the same.

For instance, we saw a pighead pig grunting and snorting in his pen, a quarrelsome member of a quarrelsome family. Now, what happened to the porker was this: He was suddenly seized by the hind leg and jerked up on a small crane. This swung him swiftly to the fatal door through which he had to pass, and then the other side stood a man with a long, glittering knife in his hand. One plunge of the cruel weapon in his fat neck, and the dead pig stook across a trough and through another doorway, and then there was a splash. He had fallen head first into a vat of boiling water. Some unseen machinery passed him along swiftly to the other end of the tumbled bath, and there a waterwheel picked him up and flung him out on a sloping counter. Here another machine seized him, and with one revolution scraped him as bald as nut.

And down the counter he went, losing his head as he slid past a man with a hatchet, and then presto! he was up again by the heels. In one dreadful handful a man emptied him, and while another squirted him with fresh water, the pig—registering his own weight as he passed the teller's

Increasing Lean Meat in Pigs.

We may well suppose that the habit of one pig in laying on an excessive quantity of fat has been caused by long and excess feeding of fat-producing food, and it is not likely that any sudden transformation could be brought about; but it is well known
