Sir John Labsock in the Nineteenth Century makes a statement which is hard to realize. Down to the year of 1824 the Engish Government gave to the taxpaver a notched stick as a receipt. The old Exchequer tallies were willow rods about five feet ong, which were notched at certain intervals, ach notch being understood to mean so uany pounds, shillings, and pence, or fractions thereof. When the amounts were thus notched, the stick was split, one part being kept by the taxpayer and the other by the Sovernment. Immense numbers of these old tallies were stowed away in the vaul's of
