Efficiency in the and 108 yards, long. The weight is 21½ tons. this subject is the lighting of the coasts. We to their becoming in reality the controlling lieves in bringing the public service up to sumed on its production. The rope is to be in the northern latitudes of tempestuous seas force in Nicaragua. What form these something like a mercantile service. Mat- used in working trains in a terminal at Glasmust, of course, take care that our sailors and objections may take, will scarcely be known ters foreign to his past career he seems to gow. vessels are protected from shipwreck by an definitely, until the full details of the Treaty have no fondness to discuss. He seems not to be a war of much appropriate. The literary efficient and sufficient system of lighthouses. are before the powers. The Tribune claims In 1840 Canada, as now constituted, had 41 that the sovereignty of Nicaragua is not inlighthouses, while she has now 321, being ex- volved; that the United States do not procelled among the nations by only two, the pose the acquisition of territory or the right United Kingdom and the United States.

With respect to trade in 1844, the imports tical control of Nicaragua, by this treaty, and exports of the Provinces now constitut- and that with the exception of favoring tolls It is believed 21 persons perished. ing Canada, amounted in the aggregate, to to coastwise commerce carried on by vessels thirty-three and a half millions of dollars. entirely owned and commanded by citizens a pleasant and effectual remedy for Worms and pretty girls, and frozen kisses, and two in children or adults, it is a purely vegetable Card, 32 colors, and book of directions for hands in one end of the muff, and Sundaymillions. According to the last census of nations are to enjoy its peaceable use on the United States, the aggregate trade of that equal terms. The provision last mentioned, country in merchandise amounted to about says the Tribune, disposes of the editorial \$30 per head of the population. In our last complaint in the London Times, that the census year the same trade was \$47 per head summary cabled makes no mention of any in the Dominion of Canada. During forty provision in the treaty with reference to the his ear. His recovery is extremely doubtful. carried within an hour, and at a charge of a long breath, remarked: "If it wasn't for years the exports of the products of the mines | world's trade. of Canada have increased 990 per cent., 8,452 per cent., of agriculture 721 per cent., time. and the export of our manufactures had increased from \$6,220 to \$3,500,000. Take one article which will interest the agriculturists of Canada more especially, take the single article of cheese. The export of cheese in 1844 amounted to \$5,250 in all, and in Glasier and his agents had not violated the 1883, to \$7,252,000. The export of cattle law most flagrantly, he would not now be ocin 1844 amounted to \$1,440, in 1883 to \$3,-

900,000. In 1844 there went through the post offices of the several provinces, 1,400,000 letters, of which 1,200,000 were sent not beyond 400 miles of the senders' residences because of cost, the rates of postage being 41d. for 60 miles, and running up according to a scale to 2s. 3d. a letter if carried a thousand miles. In 1883, the number of letters carried was 90,-000,000, the postage from the Atlantic to the Pacific is but 3c. per letter. The value of our agricultural crop, especially, depends greatly on the cheapness of the price at which it can be carried to the market to which it is destined. The freight rate in 1844 for a bushel of wheat from Kingston to Montreal was 121c., and from Chicago to Montreal 18c. For the last ten years the average freight rate on a bushel of wheat from Kingston to Montreal has been a little over 2c., and from Chicago

to Montreal a little over 9c. Forty years ago there were 16 miles of railway in operation in Canada. There are now nearly 10,000 miles. Canada has \$104 invested in railways for each inhabitant, being only excelled by the United Kingdom, which has \$107, and by the United States, which have \$112. As to railway rates. The charge in 1844 was equal to \$1.92 per ton and passenger; last year the charge was equal to \$1.45.

In all British North America, not including Newfoundland, the deposits of the people in the savings and other banks amounted to six and a half millions in 1844. They are now one fifty-one millions. In 1844 the total bank circulation was under six millions; in 1884 the circulation, government and bank is 45 millions. The value of farm property in Ontario in 1844 was 41 million dollars. In 1883 it was 654 millions. The deposits of the people have increased in banks, buildhas performed the part of political godfather, ing societies, etc., since 1868 by 127 million to Mr. Glasier: the latter we suppose is in dollars. There were about 8,500 miles of telegraph wire in 1868 and 39,350 miles in the confidence of his chief, and therefore 1883. The message sent in 1868 numbered should be able to speak with authority on 690,000, and in 1883 they were over four millions. The net amount insured by fire policies in 1883 was 384 million dollars more than in 1863. The total amount of life insurances in 1883 was nine million dollars, more than in 1868. The total premiums paid for fire and life insurances in 1883 were over five millions more than in 1868. Compared with 1868, the increase in 1883 late date. and the increase in tonnage arrived and laying the event to that time. When the the cost of treatment.
