FARM NOTES. Tillage is manure. Fatten the old cow.

FARM NOTES. Look out for travelling sharpers. Sprinkle some sulphur in the hen's nests.

FARM NOTES. Horse power is cheaper than man power. Dried blood is an excellent manure for wheat.

FARM NOTES. For late hatched let a cool, shady place be provided. Thoroughly clean the hen house at least once a week.

FARM NOTES. Let the farm home be made attractive as well as comfortable. Don't neglect salt, and as much as they want of it, for the animals.

FARM NOTES. The Ayreshires have been bred almost exclusively to make great milkers. Calves fatten quicker on cow's milk up to six weeks old than on any other feed.

FARM NOTES. Feed turnips or cabbage right after milking, and they will not favor the butter. Don't work your men into the night, if you wish to get the most good out of them.

FARM NOTES. Improvement in the breed almost uniformly effects an improvement in disposition. With the appearance of soft-mapped blossoms, bees may be moved out from the cellar.

FARM NOTES. Feed regularly; the loss from one hour's fretting for food cannot be made up by one feeding. Quiet setters and careful mothers among hens are good property, and well worth sparing until they are old.

FARM NOTES. On the whole there is little injury ever comes to farm animals by the use of barbed wire fences. What little danger there may be lessened by keeping the wires taut.

FARM NOTES. No one appreciates the many points required in a good farm horse until he tries to buy one to use. He will find scarcely one that is not defective in some respect, and before he finds the right one will be obliged to pay dearly for him.

FARM NOTES. An extensive sheep raiser in England says that the best time to castrate lambs, where mutton is a principle object, is when they are a month old. Thus treated there is a better development of flesh on the leg, for making desirable carcasses, besides more flesh on the back.

FARM NOTES. Cows with calves should have the system well kept up during the spring months by feeding grain liberally, excepting just before parturition. Too much grain then might cause a feverish condition and caked bag. Following calving after all feverish symptoms have disappeared, a more liberal grain diet may be assumed again.

FARM NOTES. Mr. Job Morrill, whose dairy figures are given in the *Leicester Journal*, says: "The hay fed to my cows paid for itself last year \$20 per ton, and I find that since feeding largely of grain, I do not need so much phosphate to give my cows a start." The skim milk from a dairy of six cows, fed to swine, gave him \$150 worth of pork.

FARM NOTES. A work harness on the farm should be oiled at least twice a year—once in spring and again in fall. The sweat and dirt should be scraped off and the leather washed with warm water free from soap. Apply the oil before the leather is entirely dry. If one application does not make the leather pliant enough, put on another. This is better than to put on a great deal at once.

FARM NOTES. A good Ayshire cow gives 6000 pounds of milk in a year, better ones give as high as 10,000 pounds, and an occasional cow when at her best gives somewhat higher. The Holstein breeds are famous for having whole herds that will average 5,000 to 10,000 pounds per year for each mature milking cow. But then, two average Ayreshires weigh but little more than an average Holstein.

MISCELLANEOUS. Advertising Cheats!!! "It has become so common to begin an article, in an elegant, interesting style."

MISCELLANEOUS. "To induce people to give them one trial, which so proves their value that they will never use anything else."

MISCELLANEOUS. "The REMEDY so favorably noticed in all the papers, and so successful in all the other ailments."

MISCELLANEOUS. "No! 'She lingered and suffered, pining away all the time for years.' 'From a complication of kidney, liver, rheumatic troubles and Nervous debility.'"

MISCELLANEOUS. "A Daughter's Misery. 'Eleven years our daughter suffered on a bed of pain, and in the end, rheumatic troubles and Nervous debility.'"

MISCELLANEOUS. "Father is Getting Well. 'My daughter says: 'How much better father is since he used Hop Bitters.'"

MISCELLANEOUS. "None genuine without a bunch of green Hop Bitters for fine paper, but the best, poisonous stuff with 'Hop' or 'Hops' in their name."

MISCELLANEOUS. "The people of the Pacific coast obtain their supply of codfish from the Chamaign Islands. 'Have you a cough? Then stop it by using Minard's Honey Balsam. It is a positive cure for all coughs, colds, croup, etc.'"

MISCELLANEOUS. "Some Indians use tortoise shell scabbing knives, probably on account of the fact, in which it was alleged that the tortoise got away with the hare."

MISCELLANEOUS. "Mother Graves' Worm Exterminator is no equal for destroying worms in children when purchased. 'The bridal parlour of a new hotel in Annapolis is decorated with the astonishing quotation, 'The melancholy days have come, the saddest of the year.'"

MISCELLANEOUS. "Hypodermic, fever sores, ulcers, blotches, pimples, and many loathsome diseases originate from impure blood. 'Purifying Pills make new rich blood and will change the blood in the entire system in three months, taken one a night.'"

MISCELLANEOUS. "Hop vines, usually a waste product in this country, are said to have not proved only good stock for fine paper, but the best substitute yet obtained for rags in French paper mills. Jacob Lockman, Buffalo, N. Y., says he has been using Dr. Thomas' Electric Oil for rheumatism, and had such a large amount, he could not do anything, but one bottle has, to his own expression, 'cured him up.' He thinks it is the best thing in the market."

MISCELLANEOUS. "The Medical Journal states that a few handfuls of common salt thrown daily into the manure of a cow, will keep the manure basins, gross for towards counteracting the noxious effects of the omnipresent sewer gas. 'Lobsters, says Prof. Beckmore, are now taken almost entirely from deep water, and at the present rate of decrease will shortly be a rarity, to be found only in the museums.'"

MISCELLANEOUS. "To lessen mortality and stop the progress of disease, use Necton & Lyman's Vegetable Discovery and Dyspeptic Cure. For all diseases arising from impure blood, such as Cholera, Typhoid, Typhus, Cholera, etc., etc., it has no equal. Mrs. Thomas Smith, Elm, writes: 'I am using this medicine for Dyspepsia. I have tried many remedies, but this is the only one that has done me any good.'"

MISCELLANEOUS. "No grain crop will be more quickly benefited by manure than barley. Its growth is rapid, and at the beginning is a season when plant food does not develop fast in the soil. 'The best fertilizer for the soil is the first start is especially valuable for this grain. Of late years it is found that the weight of grain, on which depends its value for stock, is due to the application of mineral manures.'"

MISCELLANEOUS. "The deeper the drain the purer will be the water that flows from it, unless it accidentally takes some deposit of soluble mineral matter. At all events, the loss of nitrate from drainage water, which is sometimes complained of, will be less when the drains are deep. The long roots of clover, which strike into the soil, will very rarely go below the depth of drainage. 'No Lady who delights in flowers, and wishes to see them do well and bloom abundantly, should be without Hamilton's Food for Flowers. Ordinary packages 30c. - sufficient for 20 plants for one year.'"
