- " City of London " of London, England ;
- "Fire Insurance Association" of London, England.

Representing in the aggregate in Capital and Assets, over One Hundred Million Dollars.

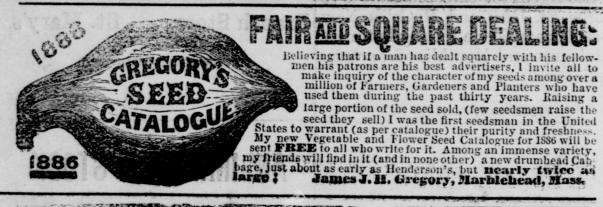

All kinds of insurable property covered at Lcw RATES. Detached Residences insured for three years at very low rates. A fair and satisfactory adjustment of loss guaranteed, and ciaims promptly paid.

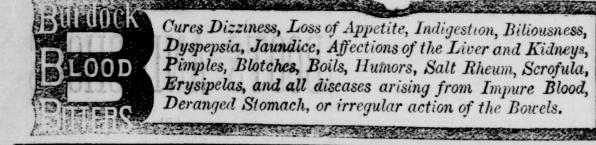

JOHN BLACK, Barrister, &c.,

Agent for York County.

Fredericton, December 16, 1885 FOR INTERNAL AND EXTERNAL USE. PURCATIVE

CHICKEN CHOLERA, Stamps. Furnished in large cans, price \$1.00; by mail, \$1.20. Circulars free. I. S. JOHNSON & CO., Boston, Mass. Will be sent FREE to all who write for it. It is a Handsome Book of 128 Pages, with hundreds of new illustrations, two Colored Piaces, and tells all about the Best Garden, Farm and Flower only complete catalogue of the kind published, and describes BARE NOVELTIES in VEGETABLES and FLOWERS, of real value, which can not be obtained elsewhere. Send address on a postal to W. ATLEE BURPEE & CO., PHILADELPHIA, PA.

FARM NEAR ST. JOHN, A 92-LB. CABBAGE FOR SALE.

THE MOUNT ASTOR FARM, five miles from St John, containing 90 acres. Cuts 50 tens of Hay, is well situated for Market, Gardening or Milk farming. Two good Barns and large Dwelling House on the Property, will be sold on favorable terms.

E. G. SCOVIL. St. John, Dec. 30, 1885.-2mos.

WADDEN FLAND WAKKEN LELANU, whom everybody knows as the successful

Largest Hotel Enterprises of America, says that while a passenger from

New York on board a ship going around Cape Horn, in the early days of emigration to California, he learned that one of the officers of the vessel had cured himself, during the voyage, of an obstinate disease by the use of

Ayer's Sarsaparilla. AVER'S SARSAPARILLA in many similar

cases, and he has never yet heard of its tailure to effect a radical cure. Some years ago one of Mr. LELAND'S farm laborers bruised his leg. Owing to the bad state of his blood, an ugly scrofulous swelling rible itching of the skin, with burning and mously enlarged, and running ulcers formed, discharging great quantities of extremely avail until the man, by Mr. LELAND's direction, was supplied with AYER'S SARSAPA-RILLA, which allayed the pain and irritation, healed the sores, removed the swelling, and completely restored the limb to use. Mr. LELAND has personally used

Ayer's Sarsaparilla for Rheumatism, with entire success; and,

after careful observation, declares that, in his belief, there is no medicine in the world equal to it for the cure of Liver Disorders, Gout, the effects of high living, Salt Rheum, Sores, Eruptions, and all the various forms of blood diseases. We have Mr. LELAND's permission to invite ally either at his mammoth Ocean Hotel, Long Branch, or at the popular Leland Hotel, Broadway, 27th and 28th Streets, New York. Mr. LELAND's extensive knowledge of the good done by this unequalled eradicator of blood poisons enables him to give inquirers much valuable information.

PREPARED BY Dr. J.C. Ayer & Co., Lowell, Mass. Sold by all Druggists; \$1, six bottles for \$5.

Agriculture

When and how to apply Stable

Manure. Stable manure is a heavy, bulky material, and in applying it to our land we have to handle a large amount of water and other material of comparatively little value, in order to apply enough of the essential elements for abundant crops. And when we have much of it to handle, especially if we have to draw it far at the busy if we have to handle a large amount to out at least once.

A Garden without Weeds.

It is generally conceeded by those who have experimented with different kinds of fertilizers that unleached who have experimented with different kinds of fertilizers that unleached who have a good garden it should be free from foul seeds. It has a season of planting or every soft land in the other is too small one.

The first they consider the plants will not all done at once.

There is no certain way to tell the once. whole year, and all jobs which can as -Herald. well be done during Winter should be attended to at that time. Hauling out stable manure seems to be one of

a careful study of the scientific aspect by our results: - Namely, that 26 attacked, contact carries the disease of the case, as well as by my own ob- pounds of fodder corn was the equival among them all, and the whole flock servation, that there is no appreciable lent of 70 pounds of ensilage, or 18 suffer. Instead of vermin causing poor loss in this way by the exposure of pounds of hay. Or, again, 100 pounds condition, the reverse is the case. unfermented manure, and that the of ensilage is equivalent to 37.14 only possible loss of any amount is by pounds of fodder corn, and 100 pounds of wisdom in the better than one. Onions require very There are some who seem born under a washing off from very hilly land, of ensilage is equivalent to 25.71 following by Judge Stitzel of Berks rich soils, and it is not always easy to lucky star. The value of ensilage Co., Pennsylvania, on the subject of secure this without making it also cess, and what is ill luck to others is a find

Poultry in France. three million and a half of ducks, one try forty-five million fowls, which, at of the ensilage, but also its condimental an average price of 2 francs 50 cen. value in influencing the appetite of times, represent a sum of twelve mil. the animal. - New York Herald. lion and a half francs. A fifth of these forty-five million fowls is drafted for the dead meat market every year; furnishing a first return of 121 million francs. Two million cock birds are also annually sent to market for consumption, given a further return of 5 million francs. Thirty four million laying hens breed 100 million chickens. Of these, about 10 million are reserved for reproduction; another 10 million die from disease and accident; and 80 million find their way to market, where, sold at an average of 1 franc 50 centimes, they yield a third return of 120 million francs. Adding to this 6 million francs resulting from the best pullets and capons, the respectable figure of 1531 millions francs is arrived at as the first receipts of the poultry yards. But this is not all. The 34 million hens each lay an Two more lots of these elegant Brass Goods just to hand. Also a nice lot of Solid Silver average of 90 eggs a year, or a total of 3 millard 60 million eggs, worth 6 centimes each, or a total of 1831 million francs, which, added to the 1531 million francs from the dead meat market, bring the gross produce of the fowls up to 337 million francs. M. Menault asserts that this source of revenue, considerable as it is, might be tripled. France, he says, might easily breed 150 million fowls, and then the produce, in eggs and meat, would amount to a million. He therefore urges that rustic apathy in the
