

L. C. MACNUTT, Editor and Proprietor.

FREDERICTON, N. B., WEDNESDAY, JUNE 9, 1886.

VOL. VII., NO. 41

FOR SALE.

That valuable Farm in the Parish of Bright, about three miles from Zealand station...

Baird's French Ointment.

This Ointment has been used with the greatest success in the speedy cure of all eruptions arising from an impure state of the blood...

Colonial and Indian Exhibition.

The Agricultural Trophy, etc.

(From the Canadian Gazette, London, England.)

The main feature of Canada's agricultural display is the commanding trophy occupying the middle of the eastern transept of the central gallery.

been carried out with evident care and judgment, while the decorations unquestionably show the work of a well-trained hand and eye.

This is the best time for attacking the tent caterpillar, but if neglected the first discernible they should be hunted out and destroyed up to the time they get their growth and begin to leave the nest.

It is no use to destroy the nests, except when the family is at home, and will be very early in the morning during portions of the middle of the day.

Animals deprived of salt do not thrive well nor wear sleek coats as those that have a regular and full supply.

The Cabbage Butterfly.

A Virginia correspondent to the America Garden has come to the conclusion that the true method of disposing of the green worm so destructive to the cabbage crop in all sections of the country, is to catch the parent butterflies while they are flying over the fields seeking places to deposit their eggs.

FARM NOTES.

The outlook in India is for a fair crop of wheat on 25,000,000 acres.

Strawberries are plentiful in New York at ten to twenty cents per box.

The United States imported wool last year to the amount of \$13,500,000.

It is a sound rule that everything should go to market as soon as it is ready.

New potatoes from Savannah arrived at New York last week, and sold at \$3.50 to \$4.50 per bbl.

During the twelve months ending April 30, 1886, the total export of dairy products from the United States aggregated \$10,351,155.

The total exports of beef and pork products from the United States for the six months ending April 30, 1886, were valued at \$7,839,191.

The most important pursuit a man can follow in these days is the making of poor butter, which is now found to be unsuitable for both the home and export trade.

The old dairy plan is being fast superseded by the creamery principle.

Parties should be careful and pack butter uniform in color, and should particularly remember that streaked butter is not so desirable as choice.

Supposing a person were to procure the services of a pure thoroughbred bull either by purchase or from his neighbor even if he has to pay four or five dollars for such, can any deny the assertion that the result upon the produce when three years old would not be fifteen or twenty dollars better?

Do not plant the stumps of cabbage to grow seed from. You may thereby get cabbage seed that costs nothing, but like most other things got without expense, it will be worth even less than the cost.

As soon as apple trees are in blossom, or even before they can be distinguished as to whether they are to bear fruit, it will pay to manure such trees heavily, giving a good top dressing ten to twenty feet on each side, and add two or three quarts of potash salts to each tree.

The old practice of growing pumpkins among corn has been growing unpopular for some years with farmers who desire to give their corn thorough cultivation.

As the farmer gains farmers remark that their teams gain flesh while at work, but fall back while at rest.

Some orchardists apply ground bone and wood ashes with good success. When barnyard manure is to be used, if only half the usual quantity be applied, and the same value ground bone be applied, with it the result will be much more satisfactory, than if all manure be applied.

Following are the pedigrees of the horses purchased in Ottawa, for the Stock Farm, by Mr. J. E. Fairweather:

Gipsy Boy (3,631), a pure bred Clydesdale bred by James Strath of Greystone, Aberdeenshire, Scotland, imported in 1854, foaled April 15, 1853, 16 1/2 hands high, bright bay, very symmetrical, weight about 1,700, sire Young Clyde (1,259), dam Gipsy (1,760), sire of dam Dusty Miller (2,571), sire of dam Gipsy (1,259), sire of dam Gipsy (1,259), sire of dam Gipsy (1,259).

Arrian is bred in the same lines at Brilliant, the celebrated head of Dunham's great Percheron stud, and the greatest Percheron sire in America.

Arrian is dark dapple grey, almost black in places, stands 17 hands and weighed 1,860 lbs. in March, and is probably as heavy to-day; a very active horse.

Miscellaneous.

Nobody is satisfied in this world. If a legacy is left to a man, he regrets that it is not larger.

Beckham's hair oil is useful to a woman as a toothpick, better than any she can use, is no excuse for having one in your vest pocket when your wife doesn't know where it comes from.

Great news carries with it a certain respectability whether it attaches to a person or thing. This is seen particularly in the case of Johnson's Anodyne Liniment, which is the most marvelous internal and external remedy ever discovered. It ought to be kept in every house.

A news item says there is a colored preacher near Jasper, Ga., who conquers his stubborn horse by butting him. And yet some persons think that is not such headwork in the ministerial profession.

Baird's French Ointment is an excellent article for any kind of Humour, such as Salt Rheum, Pimples, Pustules, Rash, and a sore throat, to which it quickly and obstinately cures. It is sold by dealers.

"I suppose," said a quack, while feeling the pulse of a patient, who had reluctantly submitted to his advice, "I suppose you think of a hummingbird?" "Sir," replied the patient, "I have never seen a hummingbird, but I have seen a quack."

"One of the certainties about a mule is that he is sure footed, especially with his hind foot. He never misplaces them. If he advertises that his feet will be at a certain place at a certain time with a sample of mule shoes, to which he would call your attention, you will always find them there at the appointed time."

After two years' trial we unhesitatingly pronounce the Ross Leather Collar Pad the only durable and successful one that we have ever used. It retains its shape, is cooling, prevents chafing, and thereby lessens the horse's needs for food and health. HIRAX G. DODGE & SONS, Wool and Cold Dealers, Madison, Wis.

Abraham Snow, Gunning Cove, N. S., writes: "I was completely prostrated with rheumatism, but hearing of Dr. Thomas' Electric Balm, procured a bottle, and it did me so much good that I got another, and before it was used, I was well. My son was cured of a bad cold by the use of a few days of this balm. It is a wild cure, and makes cures whenever it is used."

A lady unable to read thought she could impress her neighbor that she had learned, and accordingly asked for the loan of a book. The neighbor, thinking it was a joke, lent her the book. Keeping it a few days, she brought it back, and was asked by the lender how she liked it. She replied: "I think it was just what I wanted, for I had never seen a book before, and I was so glad to get it, I didn't read it."

ADVICE TO MOTHERS.—Are you disturbed at night and broken in your rest by a sick child suffering and crying with pain of Cutting Teeth? If so send at once and get a bottle of "Mrs. Winslow's Soothing Syrup" for Children. It will relieve the poor little sufferer. It will relieve the poor little sufferer.
