A Projected Railway.

in greater need of Railway communication, than the fruitful and well populated district lying between this city and Woodstock, on the western side of the St. John River, and included mostly in the Parishes of Kingsclear, Prince William, Dumfries and Canterbury, York County. True, the St, John River during the summer season, affords means of communication, but even then, the means are limited, as the river is not navigable for a craft of any size during the dry season. In the winter, the people of these parishes are entirely cut off from intercourse with the rest of the world, and it is no wonder that they have heard with much gratification, that the Dominion Government, urged on by the ir fluence and importunity of Mr. Temple. M. P., have recognized the justness of their demands. While the subsidy granted, provides only for that portion of the line between Fredericton and Prince William, a distance of twenty-six miles, we are assured, that at an early day, the remainder will also be subsidized, which with the local subsidy, will no doubt, ensure the prompt construction of the road. We need not dwell on the merits of the country through which the proposed line will run, except to say that it embraces one of the richest agricultural districts in New Brunswick, and is settled by a most intelligent and deserv ing class of people. Apart from the accommodation the railway will afford for the shipment of farm produce, it will furnish an outlet for the products of the Antimony Mines at Lake George, which vigor. The shipment of hemlock bark, sleepers and small lumber are also important industries along the proposed route of the railways; there are some important and growing manufacturing establishments in the districts through which it will run, one of them being Messrs. Hill & Berry's sash and door factory and saw mills at Pokiok, and the local traffic for the road from these will be considerable, while the through traffic between this city and the up river country, will naturally seek this new means of communication. The connexions which the road will make with other the means of communication. The connexions which the road will make with other the means of the senior Liberal whip, made one of his pleasant little speeches, in wich he complimented the senior Liberal whip, made one of his with executive power in Ireland and alienat pleasant little speeches, in wich he complimented the speaker and expressed regret for the illness of the First Minister and advised a presidental salute was fired by a battery of artillery near the river, and the chime bells of the Metropolitan Church pealed forth the growers" has appeared in Florida. Gladstone's Home Rule Bill defeated in the Commons by a Majority of Thirty.

Great Excitement thoroughout

England.

A Dissolution Imminent.

London, June 7. Gladstone entered the House of Commons at 4.55 this afternoon and proceeded straight to his seat. When his presence was noticed he was greeted with tremendous cheering. The house of commons was crowded to its utmost capacity at the hour of opening the session. Gladstone replying to a question, said the government was unable to promise to incorporate measures for home rule government in England, Wales and Scotland, in the revised Irish home rule bill, when it was brought in during the autumn session, in the event of the passing of the second reading now. The opposition loudly cheered John
