AN ACCIDENT POLICY. EVERY one should have an Accident Policy.

YORK MUNICIPAL COUNCIL.

Proceedings of the July Session.

(Continued from last week.)

At the Council's session Tuesday afternoon the 6th inst., Coun. Rowley...

Resolved, That an inspector, whose duty shall be to enforce the Canada Temperance Act...

At the Wednesday morning session the question of appointment of a Scott Act Inspector was again taken up.

Coun. Rowley, from the special committee appointed, reported that the committee had learned on good authority...

Coun. Rowley made a special request that the matter be not postponed but that a division be taken on the question...

Coun. Colter claimed that he was voting for the cause of temperance when he voted against the appointment of such an inspector.

Coun. Colter explained that he was voting for the cause of temperance when he voted against the appointment of such an inspector.

session and postponed until the July session, He knew that a free market had been established at the City Hall...

Resolved, That a free weigh scales be erected at the County Court House.

The resolution being put was lost, Couns. Bartt, Colter, Cliff and Nason voting yes; all the other councillors voted no, except Coun. Jewett, who did not vote either way.

At the Wednesday morning session the question of appointment of a Scott Act Inspector was again taken up.

learned from one of the directors, Mr. Randolph, that the stock had not changed hands. He would propose the resolution for he believed an unnecessary expense would be incurred which would amount to nothing in the end.

Coun. McCormack said it was the prevailing opinion throughout the county that the road had changed hands. Such being the case, the county should demand its \$30,000 and steps should be taken for the recovery of the same.

Coun. McNally said if the committee examined the documents, they would learn that the conditions on which the subsidy was granted was as long as the road was built and run. The road was a great benefit to the county, and they should be satisfied if the money never was refunded.

Coun. Goodspeed said that Mr. McNally was mistaken about the conditions of the contract, the conditions being that which were explained by Coun. March.

The claim of the county hinged upon whether the road had really been transferred or not. If Coun. March was in possession of any proof of the sale he would support the resolution.

Coun. March said that the contract was drawn up by Mr. Robert Robinson, who was at that time a member of the council, on the condition already mentioned.

He understood that the company had since leased the road for 300 years to the New Brunswick Railway Company. It had been recently decided in England that such a lease was virtually nothing more or less than a sale, and he thought the same law would hold good in this country.

After some further discussion, the resolution was put and carried. The Mayor appointed Messrs. March, McCormack and Rowley as such committee.

On motion of Coun. Lawson, seconded by Coun. Dow, the reporters were granted the same amount as at last session.

Considerable time was taken up at the close of the session in dealing with the case of Wm. Christie, tax collector for the Parish of Bright.

The collector had been re-appointed at the January session on condition that he make full returns before the July session. The Secretary-Treasurer stated that he made a statement, and after explanations he left it to the council to decide whether or not it was a satisfactory one.

On motion of Coun. Colter, Mr. J. H. Reid was heard before the board. Mr. Reid took up the subject of exhibitions and the necessity of erecting an Exhibition Palace in Fredericton.

He stated that York Society would press its claim, now amounting with interest to \$2,600, and that action in the matter would be taken immediately.

He had obtained good legal advice, and the society felt assured that the whole amount of the claim could be recovered.

The council then adjourned sine die.

Lack of water will make the fowls light, however liberally they may be fed. In an experiment where some fowls were killed 12 hours after feeding, but without water, the indigestion was complete.

The farmer who rises early and gets his team out while the dew is on the grass or soil gains increased fertility to his soil by his earliness.

Dew contains a considerable amount of ammonia, and this turned under by plough or cultivator is absorbed in the matter, and the soil is ploughed under wet with dew there is an additional advantage from the greater readiness of wet grass to rot quickly.

It took us ever so long to spoil in a barrel it is not safe to use for pork again, no matter how thoroughly it may be cleansed.

The cost of a new barrel warranted to preserve the pork is much less than the value of meat which it will hold. It is true the fault may not originally be in the barrel but rather in the modes of management, but having once spoiled a lot of pork the barrel had better thereafter be left to other uses.

In cities where smooth pavements make it easy to draw heavy loads, the use of single heavy horses is superseded by that of the double team. The single horse costs less originally and is less expensive to keep than a team.

This advantage creates a demand for heavy horses which will insure a profit in breeding them. They are much sorer under than three or four years old than a lighter class of horses, however well-bred.

The practice of hanging up harness on hooks back of the horses is very objectionable. If any trouble occurs in the night some of the harness will probably be found in the morning under the horses feet soiled if not broken.

Besides, just behind the horses the harness is exposed to all the odors from the manure, and this alone is sufficient to rot it rapidly. The ammonia from horse urine is especially destructive. A separate room for the harness will avoid this. It will cause some more trouble and expense, but it will pay.

In the employes' of labor on the farm, a strict regard to economy must be observed, so that every day's work will bring its proper return. Plans of necessary work will be made in advance, and nothing allowed to suffer for want of time and attention.

Tools will be put in order, and the best procured, so that the most efficient work can be done with the labor employed, and no time lost for want of profitable employment. When repairs of tools are needed, they should not be left till wanted, but repaired in advance, that no delay be had in waiting for them.

Did She Die. "No! She lingered and suffered along, pining away all the time for years."

"The doctors doing her no good?" "And at last was cured by this Hop Bitters the papers say so much about."

"Indeed! Indeed!" "How thankful we should be for that medicine."

A Daughter's Misery. "Eleven years our daughter suffered of a bed of misery."
