Challenge Competition, BRASS GOODS.

SOLID SILVER SPOONS! Two more lots of these elegant brass goods.

Man Wanted. Salary \$72 per week.

Agriculture PROVINCIAL FARMERS' ASSOCIATION.

The Annual Meeting at Sackville.

The tenth annual meeting of the Provincial Farmers' Association opened in Chignecto Hall, Sackville, on Tuesday afternoon the 26th inst.

Howard Trueman said he regretted that there was not a larger attendance of farmers.

Mr. Trueman introduced the topic: "How can the farmers of this Province best improve the practice of their business?"

He said it was necessary to do something in this direction. If the farmers expected to be on a footing with the men in other professions they must educate themselves in business.

Mr. Black of Windsor, then spoke on the subject. The only manner that would enable the farmers to take such a position as that occupied by the men of other professions was their education in the scientific principles of agriculture.

The farmers could induce the Government to do this and it would be of great benefit to the scattered farmers.

The Secretary read the following paper written by R. E. McLeod, of Sussex on the topic: "How can the farmers of this province best improve the practice of their profession so that they may more successfully compete with the agriculture of other countries?"

This is a subject that requires a great amount of thought and care, to give an intelligent opinion. In the first place I think we may stop and consider, and find out to what are our wants in this province.

We are all satisfied that we should compete successfully in growing wheat for exportation with the west, therefore we are not likely to grow more wheat than we need for home consumption, and many other crops.

Mr. Sutherland said the fault was that young men abandoned farming. They were ambitious and knowing that few farmers had ever attained any degree of wealth.

Mr. Dixon believed that more money ought to be expended in the drainage of farms. Many fields were for several weeks in the spring lying idle could be cultivated earlier if properly drained.

Mr. Roach of Sussex, the discussion of the topic was continued Tuesday afternoon was continued.

Mr. Trueman said it was a matter of regret to those present that there was not a larger attendance of farmers.

Mr. Black of Amherst, did not believe any one present would leave the hall without admitting that only good results could follow this interesting discussion.

Care of Animals in Winter. The American Humane Association offers the following suggestions relative to fowls, horses and cattle to persons having these in charge, in the northern latitudes, during the winter months.

Fowls should be securely sheltered from wind and storm, and allowed to sit on a broad roost, feet are thus kept warm, refreshing rest is obtained and the fowl is much stronger, healthier and more profitable to its owner.

Do not clip horses during the winter months. With the same propriety we might cut the hair from a dog or shear a sheep at this season of the year.

It is a cruelty inflicted upon beautiful carriage horses for the purpose of the snow storms and severe winds of winter, when a little time and care to construct of boards, rails or poles, a support upon and around which may be placed hay, straw or weeds, thus making a shelter that may comfortably protect them.

Do not leave cattle to stand shivering, while extremities often freeze, in the snow storms and severe winds of winter, when a little time and care to construct of boards, rails or poles, a support upon and around which may be placed hay, straw or weeds, thus making a shelter that may comfortably protect them.

Miscellaneous.

The surprising statement is made, that only about one acre of land to each 3000 acres of territory comprising the State of Florida, is fit for habitation or adapted to agricultural purposes.

One of the carriers of the Lowell Morning Mail has a valuable assistance, as that paper relates, in the shape of a dog, which for five years has taken the paper from the carrier and delivered it safely to the bottom of the house.

Halloway's Corn Cure is the medicine to remove all kinds of corns and warts, and only costs the small sum of twenty-five cents.

The Philadelphia Record published a list of the Philanthropists who reported to the police as missing last year, and the number reached 900. Among those who mysteriously disappeared were fifty girls between the ages of twelve and twenty.

The work of charity, which is the prominent feature in English freemasonry, produced in the year just closed, a total of \$24,400,274 to the three Masonic charitable institutions. This sum had been expended, viz, in 1883, when on account of extraordinary efforts made on behalf of the Masonic Boys' School, which realized \$25,000,000 in 1883.

Mr. W. J. Lang Bahay, Ont., writes: I was one of the greatest sufferers for about fifteen months with a disease of my ear similar to ulcers, causing entire deafness. I tried everything that could be done through medical skill, but without relief.

It would not be difficult to appoint a member of the Royal family to co-opted a berth as the Mediterranean command, but those papers which have been examined, show that the Duke's incompetence, and have decided him as "playing at seamanship, or guilty either of ignorance or of dishonesty, says London Truth, as it is miserably admitted by competent judges that the Duke is as good a sailor as can be found in the navy.

There are some who seem born under a lucky star. Everything they touch is a success, and what is ill luck to others is a find to them. But such geniuses are no patterns for the rest of us.
