YORK MUNICIPAL COUNCIL.

Proceedings of January Session.

(Continued from last week)

WEDNESDAY, Jan. 27th. Conn. Colter asked for information in reference to paying Mr. Loggie for making map. Conn. Pinder explained why part of the cost had been charge to Douglas and Southampton. Conn. Cliff moved that a committee of three be appointed to investigate and report concerning a paper, now in the Parish of Kingsclear, said to be long to Southampton, and that Conn. Dow and Cliff be heard before said committee.

Conn. Pinder, submitted the report of the committee on the administration of justice as follows: "That the committee met the committee of the City Council on the 19th inst., and adjusted the accounts for the years 1884 and 1885. The proportion payable to the City of Fredericton for the year 1884, was \$825.25, the City paid on account of the year 1884, \$800 leaving a balance of \$25.25 due to the City for the year 1884. The proportion payable to the City for the year 1885 as agreed on is \$730.25, and the committee from the City Council, stated that a cheque would issue at their next meeting in favor of the City-Treas for \$755.53, being the full amount due for the years 1884 and 1885."

Conn. How moved that the Assessors and Collectors of Stanley be paid the same as last year. Seconded by Conn. Goodspeed. On motion of Conn. Pinder, seconded by Conn. Nason, the request was granted. Conn. How moved that the Assessors and Collectors of Stanley be paid the same as last year. Seconded by Conn. Goodspeed. On motion of Conn. Pinder, the board adjourned till 2 30 p. m.

AFTERNOON SESSION. The committee on Public Accounts recommended that J. F. McMurray be paid \$41.91 for stationary for Secy-Treas., and \$18.35 for stationary for Council; J. B. Hawthorn \$20 for attending to arrest James Ross; J. Black, Auditor, for stationary, etc., \$4.20; H. B. Rainford, Clerk of the Peace, for services in criminal prosecution against Mrs. Hartley on a charge of perjury, \$100; John A. Campbell, Valuator, \$175.42; William Kinghorn, Valuator, \$182.31; Robert Scott, Valuator, \$150; Alex. Mitchell, case for Auditor, \$12. H. A. Cropley, printing Auditor's Report, \$12.25; Davis, Staples & Co., medicine supplied to Simpson, a prisoner, \$8.58; J. B. Hawthorn, nursing and taking care of said prisoner, \$13.50; R. Sutherland, two accounts, \$22.50.

Market, and the motion, referred to in connection with our report of the Council's proceedings, was placed before the meeting.

Conn. Colter made another speech in favor of the amendment. Conn. How moved the amendment. He thought, as far as Stanley was concerned the old Valuator had done their work better than the new ones. Conn. Lawson thought that when horse hire and board bills were deducted the Valuator would not have a large amount for their days' pay. He thought the Valuator had done their duty and should be paid for it.

Conn. Colter moved that the Assessors and Collectors of Stanley be paid the same as last year. Seconded by Conn. Goodspeed. On motion of Conn. Pinder, seconded by Conn. Agriculture

Poultry Manure.

We do not by any system of analysis arrive at the true value of poultry manure as a fertilizer, and because certain agricultural writers base their estimates upon such analysis, many farmers have fallen into the error of letting this valuable treasure run to waste. They will pay their money willingly for guano asking only that its purity be assured, forgetting that this is but the excrement of birds, and that in their own poultry houses they have as valuable treasure, then their looking for something that will grow crops rapidly, we underestimate the wastes and droppings about our own premises, allow the liquid from the stock to be wasted, and rush into market, attracted by the flaming posters and show bills of artificial fertilizer.

Ammonia is necessary for plant food, and this we have in our poultry droppings, but being volatile, it soon loses unless protected. Wood ashes and quick lime will, by their chemical action soon render this compound valueless. There needs, therefore, intelligent care in saving this fertilizer, as well as in using it. It should be saved in its pure state, and for that reason, the importance of floorings under the roosts is urged upon all. It must be gathered every other day at least, and far better if the few minutes time be taken each day to sweep the floors and put the droppings into some covered receptacle. If intended for home use, dry earth, mud or ground plaster should be scattered over the floors, and after the droppings are all collected a quantity spread over the whole, to hold the ammonia and exclude the air. The droppings may also be dried, and then used as manure. Some men will not under false pretence, but under false teeth." Reports say that Mr. Gough spoke "with all his old eloquence and vigor."

When and How to Feed Horses. A horse ought to be fed when he is hungry, and he ought to be hungry every day. What makes him hungry? The constant waste of the system. The muscles when brought into use waste somewhat; especially exercise or labor is a draft upon the muscular system—in fact upon the whole system. After the system is exhausted, and if the tax is sufficient to partially exhaust or fatigue the animal, rest is more important than feed; hence the horse should stand and rest awhile before he is fed. Digestion demands a flow of blood to the organs then at work, and as the blood has been drawn away from them to sustain the muscular exertion during labor, it should not be suddenly withdrawn and turned upon the organs of digestion.

Miscellaneous.

A six-single—A bachelor. All that is left of Athens is a spot of Greece. Too thin for connubial comfort—A slender snail. The least palatable feast on record—The Diet of Worms. Circuit Court—Sneaking around the house to avoid the dog. Lovely woman is doubtless man's inferior in strength, but she beats him in point of spite. Policeman—You have been standing here for an hour. Move on. Absent minded chess player—Beg pardon, sir; it's your move. Never despise a friend because he happens to have grown rich. Go to him, take him aside, tell him of your misdeeds and ask him to lend you \$5. What's the difference between the small boy on a double runner and a butcher? One's a stealer of sleighs and the other's a "Set 'em up, please. It is a dangerous thing to neglect a cough or cold or any difficulty of the throat or lungs. Loss not a moment in getting a bottle of Johnson's Anodyne Liniment. You can rely upon it to cure you. It is also a sure preventive of diphtheria. A Scotch dominie, after relating to his scholars the story of Ananias and Sapphira, asked them, "Why did not strike every-body dead who told a lie?" After a long silence one little fellow put up his hand and exclaimed, "Because, sir, there wadna be any-body left!" The whole district of Arona, in New Guinea, is ruled by a remarkable man who might pass as the ideal barbaric potentate. He towers over the heads of all his subjects, his physical strength is enormous, and his face is distinguished by a white hair fringe. Old deeds of valour are chronicled by numerous tattoo marks upon his back, each signifying an enemy overcome and slain. John B. Gough reappeared on the lecture platform at Melrose, Mass., a few evenings ago, and introduced himself by explaining the cause of his long silence. "I appear to-night," he said, "for the first time in my life with a set of crockery in my mouth. I have dreaded greatly appearing before the public, but under false pretence, but under false teeth." Reports say that Mr. Gough spoke "with all his old eloquence and vigor." H. A. McLaughlin, Norland, writes: "I am sold out of Northport & Lyman's Vegetable Discovery and Pruritic Cure. It sells well, and I find in every instance it has proven satisfactory. I have reason to believe it the best preparation of the kind in the market. It cures Eczema, Erysipelas, and all diseases arising from Impure Blood, Female Complains, etc. A thief in Wilmington, N. C., found his lines cast in hard places when he tried to enter a house through a chimney the other night. The lady of the house got up to find out the cause of the noise, and as the night was cold kindled a big wood fire right below where the thief was working. The chimney smoked and roasted for a couple of hours, the fire-eater was pulled out of the chimney with the aid of a window and landed in goal, a sadder and a wiser man. Nervous Debilitated Men. You are allowed a free trial of thirty days of the use of Dr. J. C. Ayer's Sarsaparilla. Sold with Electric Suspensory Appliances, for the speedy relief and permanent cure of Nervous Debility, loss of Vitality and Manhood, and all kindred troubles. Also, for many other diseases. Complete restoration to health, vigor and manhood guaranteed. No risk is incurred. Illustrated pamphlet, with full information, terms, etc., mailed free by addressing Verrill Bell Co., Marshall, Mich. Success in Lufa. There are some "who seem born under a lucky star." Everything they touch is a success. But such geniuses are no pattern. The most of people must depend for success in life upon some plain common sense every-day gains and savings. Some men will live better on one dollar than another will on a dollar and a half or even two dollars, will wear better clothes, eat better food, and have more time for improvement and leisure. A dollar in one man's hands gets more living and comfort for the family, than two dollars expended by another. And such people always get on in the world. They save all their money, and know how to find comfort, and know how to save sickness and doctor's bills. They waste not, and want not. A few shillings expended for HUMPHREY'S MANUAL for the cure of Malaria, for Fever or Rheumatism, or Cough or Cold or Whooping Cough, for Drops and other Bilious, at such prices the child and sick and the sick and the doctor's bills. And such people know what they buy, and they save every time, knowing that the dollar saved is not only one dollar more money, but a dollar in the habit, and they always gain. HUMPHREY'S MANUAL (144 pages) richly bound in Cloth and Gold, will be sent post paid upon application to the Co., 100 Fulton St., New York. The "London News" says: "Among the many specifics introduced to the public for the cure of dyspepsia, indigestion, derangement of various kinds and a general family medicine, none have met with such genuine appreciation as Hop Bitters. Introduced to this country but a short time since, met the great demand for a pure, safe and perfect family medicine, it is the most popular medicine known. It is famous by reason of its inherent virtues. It does all that is claimed for it. It discharges its curative power without any of the evils effects of other bitters or medicine, being perfectly safe and harmless for the most frail woman, smallest child and weakest invalid to use. Few are the homes indeed where the doctor is called, and where the medicine is needed, and where the doctor is not. Hop Bitters are used in six of the large London Hospitals and in similar institutions throughout the world, and are the purest and best medicines ever made." Given Up by the Doctors. "Is it possible that Mr. Godfrey is up at work, and cured by so simple a remedy?" "I assure you it is true that he is entirely cured, and with nothing but Hop Bitters, and only ten days ago his doctors gave him up, and said he must die, from Kidney and Liver trouble." "None genuine without a bottle of Hop Bitters." "Hop Bitters" is a sure cure for all kinds of ailments. Sold everywhere.
