Refitted with all modern improvements, large comfortable rooms, \$1.00 per Day, and up-to-date American Cuisine. The finest dining cars from all depots and steamers landing pass the door.

F. S. RISTEN, Proprietor. March 30-31ms

**WINSLOW & JORDAN, Attorneys & Barristers at Law, NOTARIES PUBLIC, CONVEYANCERS, &c.,** Fredericton, - - New Brunswick. E. BYRON WINSLOW. D. JORDAN. April 13-31ms

**B. H. TORRENS, D. M. D. DENTIST, OFFICE, FISHER'S BUILDING, Queen Street, Fredericton, N. B.** May 13, 1887

**H. D. CURRIE, D. D. S., Surgeon Dentist.** OFFICE: First Door below Peoples Bank, Queen Street, Fredericton, N. B. OFFICE HOURS—9 A. M. to 1 P. M. 2 to 5, and 7 P. M. to 9 P. M. Fredericton, May 20, 1887

**F. J. SEERY, M. D., C. M.** Licentiate of the Royal College of Physicians Edinburgh. Licentiate of the Royal College of Surgeons of Edinburgh; Licentiate of the Faculty of Physicians and Surgeons of Glasgow.

Special Certificates in Midwifery. OFFICE: Fishers Building, Cor. Queen and York Streets. RESIDENCE—109 Brunswick Street. Fredericton, May 15, 1887-ly

**NOTICE OF PROFESSIONAL CO-PARTNERSHIP.** The undersigned have entered into a Professional Co-Partnership, as **Attorney-at-Law and Solicitor's**, with offices on Carlton Street, ANDREW G. BLAIR, J. H. BARRY. Fredericton, April 28th, 1887-tin

**VOGAL CULTURE.** Mrs. JOHN BLACK WILL GIVE INSTRUCTION IN SINGING. To a limited number of pupils. Terms made known on application at residence corner of George and Sunbury streets. For Sale or to Let.

THE BRICK HOUSE and Premises on Beaufort Street nearly opposite St. Dunstan's Hall. Will let Rooms if required, to desirable tenants. There is a good garden attached. Apply to BLACK & HAZEN, Barristers. Fredericton, May 18

**HOUSES FOR SALE.** THOSE TWO DESIRABLE RESIDENCES, one on the Corner of Carlton and Brunswick Streets, at present occupied by H. Sharp, and the other next door below, occupied by John B. Carr. For further particulars apply to M. A. AKERLEY. Fredericton, May 11

**HOUSE TO LET.** THAT DESIRABLE HOUSE and Premises, situated below residence of Gen. F. Gregory, Esq., on George Street. Apply to CHAS. W. BECKWITH, City Hall. Fredericton, April 27-1f

**TO LET.** THE BRICK BUILDING in York Street, at present occupied by Mrs. A. MILLER. Possession given 1st May next. JULIUS L. INCHES. March 2, 1887.

**TO LET.** THE Subscriber's two story wooden dwelling house on Westmorland street, adjoining his residence. It is supplied with water from the city, and has a good garden attached. Possession given immediately. T. CLOWES BROWN. Fredericton, March 2

**TO LET.** THAT residence in the Brick Building, Queen Street, at present occupied by Mr. McKean. Excellent accommodation for a large family. Possession given 1st May. Apply to J. D. MACPHERSON. Fredericton, February 9

## A Common Cold

It afflicts the beginning of serious affections of the Throat, Bronchial Tubes, and Lungs. Therefore, the importance of early and effective treatment cannot be overestimated. Ayer's Cherry Pectoral may always be relied upon for the speedy cure of a Cold or Cough.

**Speedily Cured.** I am satisfied that this remedy saved my life.—Jno. Webster, Tawincket, R. I.

I contracted a severe cold, which suddenly developed into Pneumonia, presenting dangerous and obstinate symptoms. My physician at once ordered the use of Ayer's Cherry Pectoral. His instructions were followed, and the result was a rapid and permanent cure.—H. E. Simpson, Boston, Mass.

Two years ago I suffered from a severe cold which settled on my Lungs. I consulted various physicians, and took the medicines they prescribed, but received only temporary relief. A friend induced me to try Ayer's Cherry Pectoral, and after taking two bottles of this medicine I was cured. Since then I have given the Pectoral to my children, and to others.

**The Best Remedy** for Colds, Coughs, and all Throat and Lung diseases, ever used in my family.—Robert Vanderpool, Middlebury, Vt.

Some time ago I took a slight Cold, which, being neglected, grew worse, and settled on my Lungs. I had a hacking cough, and was very weak. Those who know me best considered my life to be in great danger. I continued to suffer until I commenced using Ayer's Cherry Pectoral. Less than one bottle of this valuable medicine cured me, and I feel able to give the preservation of my life to its curative powers.—Mrs. Ann Lockwood, Akron, N. Y.

Ayer's Cherry Pectoral is considered, here, the one great remedy for all diseases of the throat and lungs, and is more in demand than any other medicine of its class.—J. F. Roberts, Magnolia, Ark.

**Ayer's Cherry Pectoral,** Prepared by Dr. J. C. Ayer & Co., Lowell, Mass. Sold by Druggists. Price 25¢ per bottle, 63¢ per dozen.

**WOMEN WORKED UP**  
The "worn-out," "run-down," debilitated school teachers, milliners, seamstresses, housekeepers, and over-worked women generally, find in Dr. Pierce's Favorite Remedy the best of all restorative tonics. It is not a "Cure-all," but it is a powerful, general as well as a specific, and it is the only medicine which will restore the system, and give strength to the whole system. It promptly cures weakness of stomach, indigestion, flatulency, headache, nervous prostration, dizziness and sleeplessness, in either sex. Favorite Remedy is sold by all druggists, and is also sold by mail, for \$1.00, or six bottles for \$5.00. A large treatise on Diseases of Women, prepared by Dr. Pierce, is sent free to all who send for it. Address, Dr. J. C. Ayer & Co., Lowell, Mass., U.S.A.

**WILLY'S DRUG STORE**  
1887 SEEDS. 1887  
The Subscriber has just received his usual supply of GARDEN, FIELD AND FLOWER SEEDS, Timothy, Red Top, Clover; Alsike, Long Late; Kentucky Blue Grass; Orchard Grass, Turnip Seed; Mangel, Stump Rooted Int. Carrot; AND ALL KINDS OF Vegetable and Flower Seeds. LOWEST MARKET RATES consistent with quality. JOHN M. WILEY, 196 Queen Street. Fredericton, May 1, 1887

**SEEDS!**  
JUST RECEIVED: Lower Canadian Timothy, EQUAL TO HARVEY, Choice Western Timothy, ALSIKE CLOVER, NORTHERN RED CLOVER. All of which are Fresh, and will be sold at the LOWEST POSSIBLE PRICES. W. E. MILLER & CO., 155 and 159 Queen Street. Call and compare samples before purchasing. Fredericton, May 18

**NASAL BALM**  
CURES CATARRH, Cold in Head, Hay Fever, SOOTHING, CLEANSING, HEALING. It cures CATARRH, Cold in Head, Hay Fever, STOPS Droppings from Nasal passages into the throat, and excessive sneezing caused by Catarrh. Sold by Druggists, or sent pre-paid on receipt of price, 50¢ and 81¢. Address, FULFORD & Co., Brockville, Ont.

**FARM FOR SALE.** THE FARM owned by the late Col. G. H. N. River, eight miles beyond Fredericton. It contains five hundred acres, of which about one hundred are cleared, and cuts sixty tons of hay. There are also on the property, a 1 1/2 story house with all attached, and front porch, a large barn, three barns, sheep house, pig house, wood and carriage houses, and also a small house for tenant. Also, four cows, two lots of land opposite, on Oronto to be sold. For further particulars, apply to T. F. BARKER, Stock Farm, Nauyasagawic, Kings Co., N. S.

**COUGHS, COLDS, Croup and Consumption CURED BY ALLEN'S LUNG BALSAM** 25¢. 50¢. and \$1.00 per bottle.

**FREE!** New Book of Fifty Works with 100 Illustrations. 150 New Stitches, 10 Special Charts, 200 Pictures, 1000 Patterns, all for 10¢ postage. NATIONAL BAZAR, 7 W. Broadway, N. Y.

**SIR CHARLES, 2745.** Is the fastest Standard bred Trotting Stallion in New Brunswick. He can show a 2:16 gal in stud condition. He is a trotter by right of inheritance, as his sire Mambrino Chants had a record of 2:30, and was the sire of Helena 2:35. His grand sire had a record of 2:59, and is the sire of Mambrino Sparkle 2:17. His great grand sire, Mambrino Chief, was the sire of Lady Thorn, 2:15. His dam, Lady Messenger, was the dam of Crown Princess, trial 2:18; Crown Prince 2:25, and Gray Chester, trial 2:30. It seems almost impossible for a horse so powerfully bred in speed lines to avoid stiring troubles. Terms: to insure, \$20; by the season, \$15.

For particulars, address JOHN MCCOY, St. Marys, N. B.

## Agriculture

**Horse Breeding in Canada.** "Horse breeding in Canada" is the title of a pamphlet issued by the Dominion Department of Agriculture for the information of the agricultural community. Its contents are a letter from Col. Ravelin, Inspector and purchaser of horses for the Royal Artillery, giving his observations on his trip to Canada last year to enquire into the possibility of this country becoming a field for the supply of horses for the British army; also an address to the horse-breeders of the United Kingdom, delivered at the Agricultural Hall, Falmouth, the substance of which has already been laid before our readers. In his letter to Hon. Mr. Carling, Col. Ravelin points out the defects he noticed as chiefly characteristic of Canadian horses. They are ascribed, firstly to the fact that the people of Canada "are not a riding race," and that the prevalent conditions call for heavier animals than are considered best suited for military purposes. Many, however, are to be found, for though during their 14,755 miles travel the commission purchased only eighty-three animals, they registered for future inspection over 1,000. The class of horses required exists in the country, therefore, and if properly encouraged would rapidly multiply. Too great a proportion of the animals, however, are found to be in unsound condition or defective, their quarters being too short and drooping. This Colonel Ravelin ascribes to the farmers overworking their stock when young, to the employment of faulty and unsound stallions, and to the large American purchases of mares, by which the best animals are taken out of the country, leaving inferior ones here to breed from. The remedy suggested is that greater care should be exercised by farmers in the selection of stallions, and that the Government should encourage the breeding of the required class of animals, and even that an export duty should be put on the mares. The latter is, of course, not to be thought of, but the others are quite within the possibilities, though the agricultural societies rather than the Government should take up the work, which is one that will advantage the country whether or not all that Col. Ravelin anticipates flows from it. The extent of the market that is open to competition is very wide, the annual importation of horses into England being 17,000, so that if the same care should be devoted to this as has proved so beneficial in other branches of Canadian agriculture and live stock raising of late years, the result could hardly fail to be beneficial, opening up a new source of wealth by the development of an industry for the prosecution of which the country has special facilities.

**The Suffolk Breed of Horses.** This breed is beginning to attract more attention than usual, it being considered a lighter draft than the Clyde or the Shire, and is therefore capable of producing a class of horses which is more in demand now than for some years past. Many individuals of the breed have attained great size and weight, but the average is lower than the drafts just mentioned. It has been the practice of the champions of heavy drafts to boast of great size and weight, and this tendency has produced unfavorable results, the extra weight being occasioned by an undesirable accumulation of fat, and is not to be attributed to the natural weight inherent in the breed. But the coming tendency will undoubtedly be in the opposite direction.

The Suffolk Pouch is one of the oldest established of British breeds of horses, and is recognized in England as an agricultural horse of great value. It is known to have been a distinct breed a century ago. At the close of the present century it was divided into several strains or tribes, all of which were shortly afterwards more or less intermingled. Its origin, like that of all our other distinguished breeds, is involved in obscurity. Much speculation is indulged in with reference to its early history and development. The breed is described to be of a chestnut or sorrel color, of which there are various shades, notably red and dark, and an intermixture of silver hairs are not considered silver. The height is 15 1/2 h. to 16 1/2 h., and the girth behind the shoulders about 8 feet. The legs are short, flat and clean with short, strong pasterns, free from any blemish, more frequently than is compact quality. The eyes and ears are small, the crest is arched, tapering gracefully from the shoulders to the sitting on of the head. The shoulders are muscular, and the ribs well rounded, giving a compact appearance to the body. The constitution is sound, the endurance and longevity great, the outline graceful, and the breed seems to flourish in all climates. It being adapted to a great variety of purposes it is found almost everywhere, and is used on the continent of Europe for artillery purposes.

**Cleaning Dairy Utensils.** The want of thorough cleanliness in regard to the utensils in the dairy is the cause of trouble with the milk, and to a very great extent, it is supposed. It is about the last thing that is suspected, and yet, perhaps, it should be the first. If we were consulted in regard to the premature souring of the milk, or the failure of butter in a reasonable time, or the foaming of the cream in the churn, the first thought would be that the pails, milk pans, or the churn, were not scrupulously and perfectly cleaned. It is a mistake to leave these utensils unwashed, for several hours after they have been used, and it is a still greater mistake to use any wooden pails for milking. The glazed earthen milk pans are preferable even to tin, and the pressed tin pans are better than the soldered and seamed ones. Tin pails are the best for milk into, as they do not absorb the milk, and can be washed perfectly clean. To wash any dairy utensil that is used for holding sour milk, warm water only should be used at first, to get rid of all the sour milk about it. It is then to be washed in boiling hot water and to scrub the hands with a mop made of a bunch of cotton cord, well bound around a good sized handle. Plenty of water should be used, and a good sink is the most convenient for the purpose. A thorough rinsing in cold, clear water is then given, and the pans are wiped, the towel never being used a second time. It is less trouble to wash a towel so used than one which is badly soiled. A convenient rack out of doors on a dairy porch is the best for airing the utensils upon.

## ALL SORTS.

**STRENGTH FOR TO-DAY.** Strength for to-day is all that we need. For there never will be a to-morrow; For to-morrow will prove but another to-day. With its measures of joy and sorrow.

A hot, strong lemonade taken at bedtime will break up a bad cold. A BOTTLE of the "Lotus of the Nile" is a most acceptable present to a lady. A little soda water will relieve sick headache caused by indigestion.

Well ventilated bedrooms will prevent morning headaches and lassitude. A cup of hot water drunk before meals will prevent nausea and dyspepsia. For BRONCHIAL and Throat Affections, Allen's Lung Balm is unequalled.

Many tall the "Lotus of the Nile" when they are walking arm-in-arm with the devil. Consumptive night sweats may be arrested by sponging the body nightly in salt water. "Keep your dog away from me," said a dandy to a butcher's boy. "Darn the dog," he always after puppies," said the boy.

It is these things that make us so fond of having your corn stepped upon. Is there anything more delightful than getting rid of it? Holloway's Corn Cure will do it. Try it and be convinced.

"Have a drink," says an American to a Scotch reporter. "No, I thank you. It's too early in the morning; an' besides, I've just had one."

A sound body and a contented mind are necessary to perfect happiness. If you wish to possess these, use Allen's Lung Balm, and Ayer's Sarsaparilla. It is perfectly safe to take, and is a thoroughly reliable, highly concentrated, and powerful blood purifier.

It is a mistake to think of one as in the look-out; but some people would discover a far greater number if they were on the look-out. The Cheapest medicine in use is Dr. Thomas' Electric Oil, because so very little of it is required to effect a cure. For croup, diphtheria, and diseases of the lungs and throat, whether used for bathing the chest or throat, for taking internally or inhaling it is a most valuable remedy.

"What can be worse," said an exasperated husband in the middle of the night, "than a teething baby?" "You are John, when you have the toothache," responded his wife.

TO FARMERS & HORSEMEN.—MRS. W. W. LAMBERT, the greatest horse and cattle raiser, cures bruises, sprains, soreness, lameness, stiffness, swellings, scatches, colic, cramps, stoppage of bowels or urinary organs; and relieves all kinds of ailments of stock, and cures internal and external remedies.

Boston landlady to porter: "See if the gentlemen in Parlor F have finished discussing their dinner." Porter, returned: "Dey is fru eatin' bones, but dey ain't done cussin' it yet!"

A. D. Noyes, Newark, Michigan, writes: "I have enquired at the drug stores for Dr. Thomas' Electric Oil, but have failed to find it. We brought a bottle with us from Quebec, but it is nearly gone and we do not want to be without, as my wife is troubled with a pain in the shoulder, and nothing else gives relief. Can you send us some?"

The Archdeacon of Winchester, who is a very little man, while showing some ladies over the grand old cathedral a day or two ago, with the object of demonstrating the monstrous size of the pipes of the organ, which is in course of repair, cried into one which lay on the floor: "I think that's the size of the organ!"

As he had the key of the cathedral in his pocket and had locked the door, the situation was somewhat critical. At length, however, the workmen engaged in repairing the organ came back from dinner and extricated the venerable gentleman from his predicament.

Seed selected at random may sometimes produce a crop of more or less favorable natural causes, produce as good a crop as that carefully preserved. In the long run, however, we need bring forward no argument to prove that the "best is the cheapest."

Prof. Sheldon thinks that all churns should have a small pain of glass in the end, so that the operator may observe, without opening the lid of the churn, when the butter is beginning to form, and may know the exact moment when the churning should stop.

Shade is highly important for bee hives. Bees do not work as well in a hive exposed to the sun. In midday, when very hot, all work on the inside, such as comb building and storing honey, has to be suspended. Sometimes combs melt down and the brood dies in the heat of the sun.

No farm product of equal value is more unsatisfactory to hold for a rise than butter. Its price when newly made is nearly always the best. It is subject to a greater deterioration than any other product, and no matter how carefully protected will suffer some in comparison with that which is freshly made.

It is a mistake to make stable blankets for horses of cotton, woven so close as to be almost as impervious to air as sail cloth or India rubber. Under such a blanket a wet horse will not dry off in a long time; and a dry one, upon being stripped for the open air, will be much more likely than he need be to get chilled.

In selecting a stallion, soundness is an all-important consideration, lest the colt inherit defects that will incapacitate him for steady hard work in any line, and seriously impair his value. Bear in mind that no matter how perfect the horse may be in almost all points, if he has one serious defect, this may be inherited by his progeny, and should be regarded a sufficient reason for not patronizing him.

The first planting of anything in spring should be covered very lightly. While the soil is cold from deep freezing or ice water during winter, the sun warms only a little below the surface. There is always moisture enough in early spring to bring seeds up, and once they are germinated the plants will give their roots all the needed covering by striking down into the soil when this is better for their growth.

If a mare has certain valuable features strongly developed, it is a mistake, when selecting a stallion to which to breed her, to choose one very deficient in the desirable characteristics she possesses, with the idea that the colt will inherit these from the mare, no matter what size is used. In seeking to perpetuate good qualities, see that both parents are possessed of them. Proper attention in the selection of breeding mares, and the stallions with which they are to be mated, would add largely to the value of the offspring, and consequently to the profits of the farmer who raises them.

## Kissing Mrs. Langtry.

At night and in the morning, before an audience in the most remarkable occupation yet performed in public. In those scenes her husband climbs into her chamber through the window, in the light from pursuers, she swoons away in his arms, and he lowers her gently to the floor. She is a picture of loveliness, all limp and pliant as she slumps down. The husband, if real, would naturally be in a state of great excitement; but being only making believe, it might be supposed that he would merely pretend to do it. The actor is Charles Coghlan. He bends low over Langtry, with his arms wound around her. She lies near the footlights, with her famous face turned clearly toward the spectators. Coghlan puts his lips against hers fairly and squarely; he holds them there while one might count five slowly; he emits a rapturous sch-e-e-e-weep, and the kissed creature sighs.

AVERTER TO MOTHERS.—Are you disturbed at night and broken of your rest by a sick child suffering and crying with pain of Cutting Teeth? If so send at once and get a bottle of "Mrs. Winslow's Soothing Syrup" for Children Teething. It is pleasant, and it will relieve the poor little sufferer immediately. Depend upon it, mothers; there is no mistake about it. It cures Diphtheria and Diarrhoea, regulates the Stomach, and cures Wind Colic, softens the Gums, reduces Inflammation, and gives tone and energy to the whole system. "Mrs. Winslow's Soothing Syrup" for children teething is pleasant to the taste and is a prescription of one of the oldest and best female physicians and nurses in the United States, and is for sale by all druggists and grocers. Price twenty cents a bottle. Be sure and ask for "Mrs. Winslow's Soothing Syrup," and take no other kind.—Feb. 1, 1y.

**A Horse Smitten with Lockjaw.** One of the most painful sights to be witnessed is that of a horse suffering from tetanus or lockjaw. The slightest disturbance afflicts all his muscles, including those of his eyes, and he is literally a standing statue of rigid mortis or the fixity of death. There is no cure. His eyes are drawn back into his head, the red "raw" light covering the orb his neck drawn up-shaped by the big muscles that run along on the top, his back arched, and almost broken by the antagonism of the muscles engaged in repairing the organ. The whole body is rigid, and the horse is in a state of immovable agony. It is the saddest sight that can be seen, and the horse who is smitten by the man or horse who dies from lockjaw.

**Enjoy Life.** What a truly beautiful world we live in! Nature gives us grandeur of mountains, glens and oceans, and thousands of means of enjoyment. We can do nothing to better what she has given us; but how often do the majority of people feel like giving it up, discontented, discouraged and worn out with disease, when there is no occasion for it. How few are content with what they have. How many are discontented, and how many are suffering from disease, when there is no occasion for it. How few are content with what they have. How many are discontented, and how many are suffering from disease, when there is no occasion for it.

**Nervous Debilitated Men.** You are allowed to read of forty days of the use of Dr. J. C. Ayer's Celebrated "Voltaic Belt" with Electric Suspensory Appliances, for the speedy relief and permanent cure of Nervous Debility, loss of Vitality and Manhood, and all kind of nervous troubles, such as Catarrh of the Bladder, Stricture, Gonorrhoea, and all other diseases. Complete restoration to health, vigor and manhood guaranteed. No risk is incurred. Illustrated pamphlet, with full information, terms, and method of using, addressed: Voltaic Belt Co., Marshall, Mich.

A wealthy brewer of Liverpool having ordered a quantity of the celebrated "Voltaic Belt" with Electric Suspensory Appliances, for the speedy relief and permanent cure of Nervous Debility, loss of Vitality and Manhood, and all kind of nervous troubles, such as Catarrh of the Bladder, Stricture, Gonorrhoea, and all other diseases. Complete restoration to health, vigor and manhood guaranteed. No risk is incurred. Illustrated pamphlet, with full information, terms, and method of using, addressed: Voltaic Belt Co., Marshall, Mich.

**Scott's Emulsion of Pure Cod Liver Oil, with Hypophosphites.** In General Utility, Efficacy, Consumption, and Purity, it is unequalled. It is a most valuable food and medicine. It creates an appetite for food, strengthens the nervous system and builds up the body. It is prepared in a palatable form and prescribed universally by Physicians. No other.

"Paddy," says a joker, "why don't you get your ears cropped—they are curiously too long, and they look like the ears of a pig."

**A Modern Miracle.** The story comes to us of a man who more than twenty years ago, injured his neck by being thrown from a horse. The leg was bent at right angles and stuck straight out behind. After abandoning all hope he ever fitted from the knee down, and thus he walked for more than twenty years. A few months ago, on his daughter's marriage, he was induced to make a trial of it, and strange as it may seem, after rubbing in the ointment twice a day for three weeks, the cord was entirely relaxed and the leg straightened. Several months have elapsed since this occurrence took place and yet the knee joint is as supple as the other, with no tendency to become stiff again.

Another case fully as remarkable, if not more so, comes to us from Nova Scotia. Horton, Kings Co., Nova Scotia. Dear Sir—I esteem it a duty I owe you and the public, to make known the very extraordinary, and I may say astonishing, cure effected on my daughter, a miss of thirteen years of age, by your invaluable medicine. In consequence of taking cold after being inoculated for the small pox, the whole spine became diseased, and she lost the use of her limbs, and her back was rounded up like a bow; she was utterly disabled for work, and almost helpless for about eighteen months. I had sought medical advice, but in vain, and from an eminent physician in New York, in the United States; and they all pronounced it a very difficult, if not incurable case. We used your Johnson's Anodyne Liniment with entire success. She is now well and about the house. EDWARD JAYNE.

**Window Plants.** Whether in the greenhouse or the window-garden, plants that have done their best winter are now being made ready for their season in the open air. While they remain within, the increasing heat requires that they have greater care in ventilation and in freeing them from insects. Plants that are taken out in summer, if wanted to bloom in pot next winter, should be kept in pots; if turned out in the open ground, they cannot be satisfactorily potted again, as it is much better to start with new plants from cuttings. Such plants may often be planted in the border, in the pots with good results. Pots that are set in partial shade, but never under the drip of trees. Roots of dahlias and cannae, and bulbs of tuberoses and shallots, if laid in boxes of soil, exposed to the ear during the day and taken in at night, may be appreciably forwarded and made ready to plant out.
