

LORAN C. MACNUTT, Editor and Proprietor.

FREDERICTON, N. B., WEDNESDAY, JULY 27, 1887.

VOL. VIII., NO. 48

PARSONS' PILLS

These pills were a wonderful discovery. No others like them in the world. Will positively cure or relieve all manner of diseases. The information around each box is worth ten times the cost of a box of pills. It is a rare and valuable medicine.

Make New Rich Blood! H. D. CURRIE, D. D. S., Surgeon Dentist. LIME, PLASTER, Cement, Coal, Hay, Oats, Feed, Seeds, FERTILIZERS. BLACKSMITH COAL. JAMES TIBBITTS'. REMOVED! F. J. McCAUSLAND, Watchmaker and Jeweler.

VOGAL CULTURE. Mrs. JOHN BLACK WILL GIVE INSTRUCTION IN SINGING.

Farm for Sale. THE FARM formerly owned by GEORGE T. FERRIS (containing one hundred acres) situate at Lower Edge, Parish of Hopland, York Co., is offered for sale with crop thereon.

Farm for Sale. THE FARM owned by the late Col. G. H. N. Herdman, at Margeriteville, on the St. John River, eight miles below Fredericton, N. B., contains five hundred acres, of which about one hundred are cleared, and the balance is in hay.

House to Let. THAT DESIRABLE HOUSE and Premises, next to the residence of Gen. P. Gregoire, Esq., on George Street. Apply to CHAS. W. BECKWITH, City Hall.

FOR SALE AT A BARGAIN. THE STEAM TANNERY and Machinery owned by the Fredericton Leather Co., only King Street, Fredericton. Terms Easy. Apply to P. O. BOX 75, Fredericton, N. B.

New 5 and 10 Cent Store, Queen St., Fredericton. JUST OPENED: A large Stock of New Goods consisting of Glassware, Tinware, Woodware, Hardware, Jewelry, Soaps, Pictures, Toys, & a thousand of Useful and Fancy Articles, at 5 and 10 Cents Each. HAYING TOOLS. NEILL'S HARDWARE STORE.

For Toilet Use. Ayer's Hair Vigor keeps the hair soft and pliant, imparts to it the lustre and freshness of youth, causes it to grow luxuriantly, eradicates Dandruff, cures all scalp diseases, and is the most cleanly of all hair preparations.

AYER'S Hair Vigor has given me perfect satisfaction. I was nearly bald for six years, during which time I used many hair preparations, but without success. Indeed, what little hair I had, was growing thinner, until I tried Ayer's Hair Vigor. A month later, I had a new growth of hair. It was well covered with a new growth of hair. -Judson B. Chapel, Peabody, Mass.

HAIR that has become weak, gray, and faded, may have new life and color restored to it by the use of Ayer's Hair Vigor. My hair was thin, faded, and dry, and fell out in large quantities. Ayer's Hair Vigor stopped the falling, and restored my hair to its original color. As a dressing for the hair, this preparation has no equal. -Mary N. Hammond, Stillwater, Minn.

AYER'S Hair Vigor, Sold by Druggists and Perfumers.

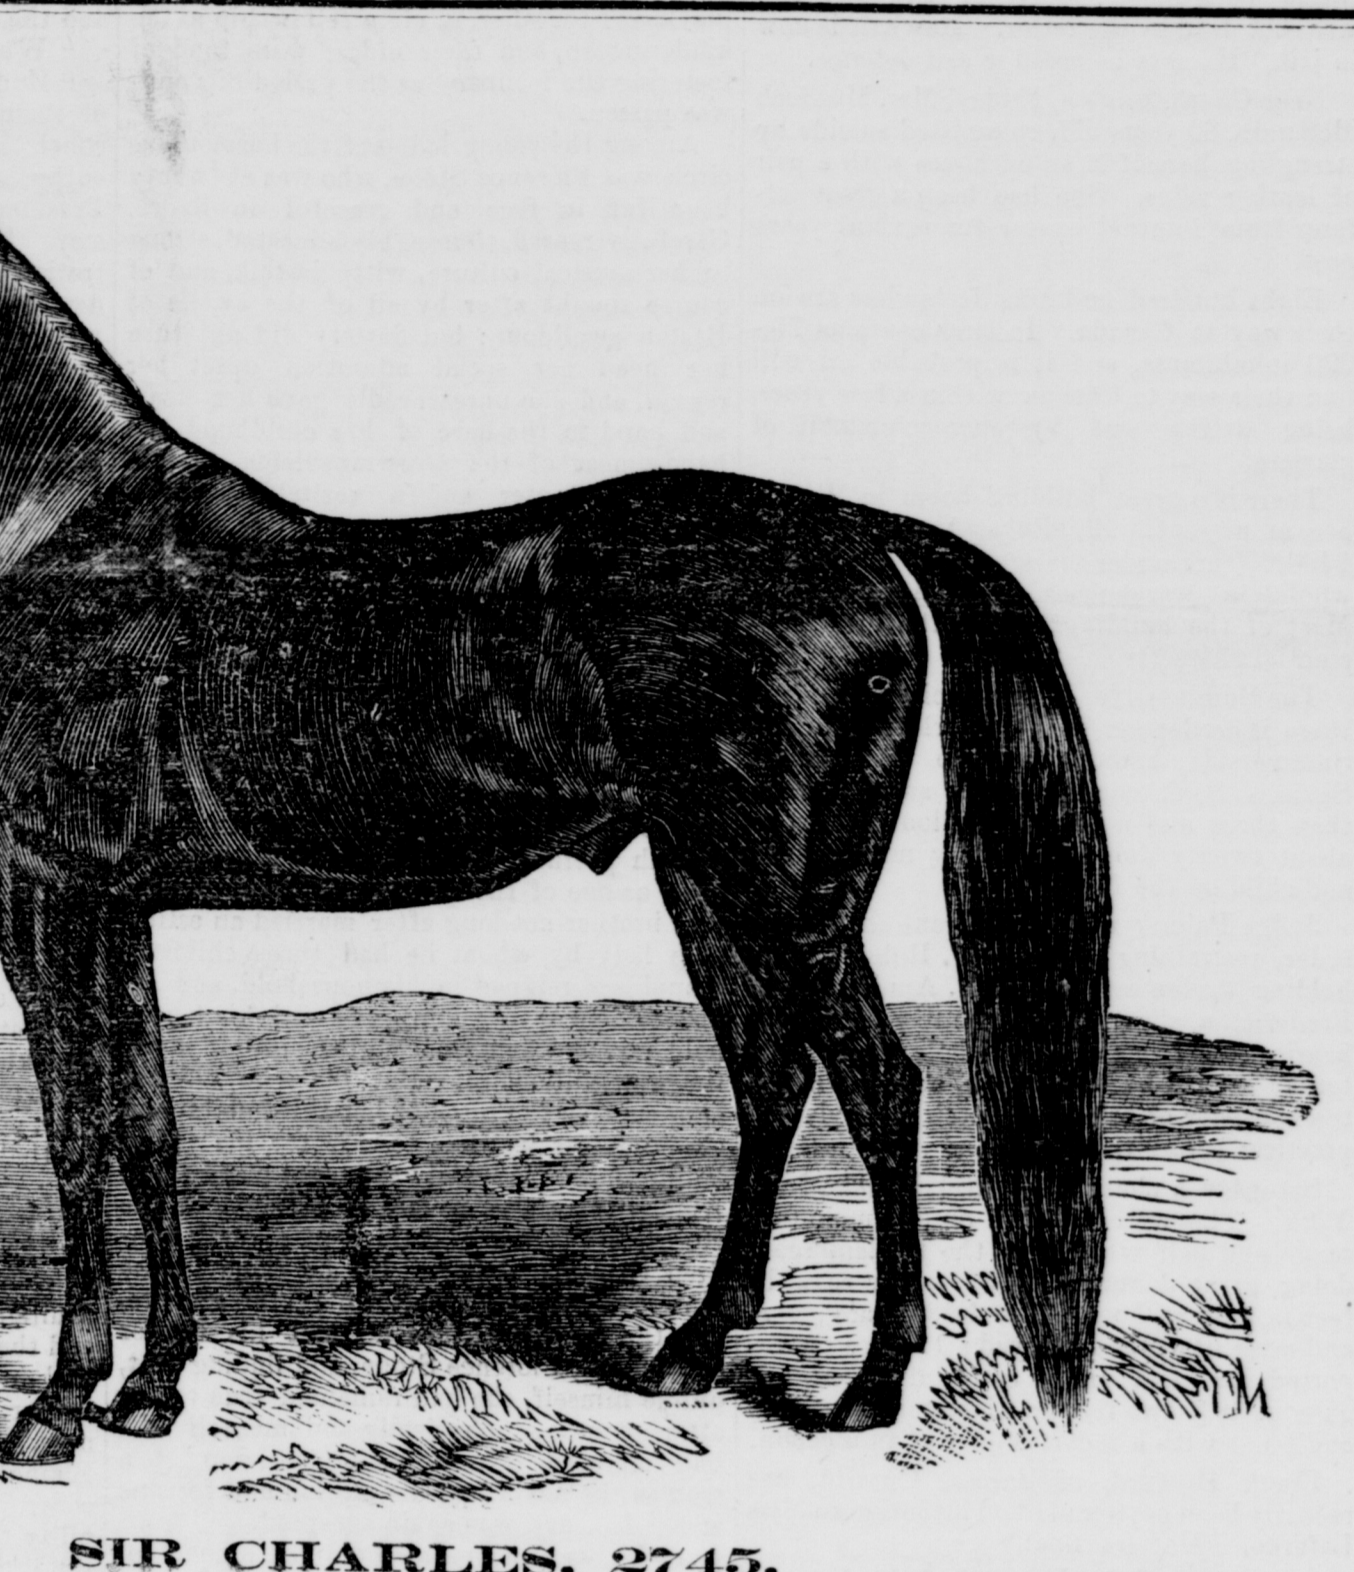

PERFECT SAFETY, prompt action, and wonderful curative properties, easily pay Ayer's Pills at the head of the list of popular remedies for Sick and Nervous Headaches, Constipation, and all ailments originating in a disordered Liver. I have been a great sufferer from Headache, and Ayer's Cathartic Pills are the only medicine that has ever given me relief. One dose of these Pills will quickly move my bowels, and free my head from pain. -William L. Page, Richmond, Va.

Women's TSEF WASH SOAP. For "wash-out" and "run-down" debilitated school teachers, milliners, seamstresses, housekeepers, and all those who are obliged to use their hands for many hours each day. It cleanses the hands thoroughly, and keeps them soft and pliant. Price 10c per box.

Dr. FOWLER'S EXTRACT-WILD STRAWBERRY. CURES CHOLERA, CHOLERA INFANTUM, DIARRHAEA, ALL SUMMER COMPLAINTS. SOLD BY ALL DRUGGISTS.

CROUP, COLDS, Croup and Consumption CURED BY ALLEN'S LUNG BALSAM. 25c. 50c. and \$1.00 per bottle.

'87 SPRING GOODS. Spring Overcoatings, CHECK SUITINGS, CHEVIOTS, Wide Wale Diagonals, Just Received. WM. JENNINGS, MERCHANT TAILOR, Cor. Queen St. and Wilmo's Alley.

SIR CHARLES, 2745.

Is the fastest Standard bred Trotting Stallion in New Brunswick. He can show a 2:16 gait in stud condition. He is a trotter by right of inheritance, as his sire Mambrino Charta had a record of 2:30, and was the sire of Helena 2:35. His grand sire had a record of 2:50, and the sire of Mambrino Sparkle 2:17. His great grand sire, Mambrino Chief, was the sire of Lady Thorn, 2:18. His dam, Lady Messenger, was the dam of Crown Princess, trial 2:18; Crown Prince 2:25, and Gray Chester, trial 2:30. It seems almost impossible for a horse so powerfully bred in speed lines to avoid striking trotters. Terms to insure, \$20; by the season, \$15.

For particulars, address JOHN MCCOY, St. Marys, N. B.

Agriculture

A Plea for Horse Shoers.

A Boston veterinary surgeon makes the following plea in the Boston Herald for a most useful and intelligent class of laboring men: "Permit me to say that I think there is no class of mechanics more deserving of consideration than horse-shoers. The man who stands all day at the forge, modifying and changing comparatively crude pieces of iron and fitting them to all kinds of feet, from those of heavy draft horses or ponies to those of the lightest of breeds, is doing a most important work."

Turning out Horses in Hot Weather.

There is a very general impression among well informed horsemen that a few weeks on pasture will do much for a horse that has become somewhat feverish and stale through continued high feeding and strong exercise than any amount of medicine and care in the stable. There can be no doubt that a "let up" and a run on suitable pasture will be found useful in such cases as alluded to, but at the same time a certain amount of care should be taken to graduate the marked change of diet and condition inseparable from the turning out of a hard-worked or highly-trained horse upon pasture. The horse in training is accustomed to the softened light of his box-stall, and if he is kept out in the glare of the hot summer sun not only are his eyes apt to suffer, but his coat is likely to become dry, staring and "burnt up" generally. The sudden change of feed is liable to somewhat derange his digestive organization, and even if he is to ultimately profit by the change it will take two or three weeks of his let up to compensate him for the damages growing out of the sudden change. If the horse in hand work or in training is to be let up, the change should be made gradually. He should be wholly deprived of the shade and shelter of his box, and he should be gradually weaned off his high feed and strong exercise. His pasture should be furnished with shade trees for shade, soft marshy places where he can cool and moisten his feet, with plenty of pure water of which he can drink as often as he likes. In this way a "let up" will be a real benefit to a stale and feverish horse, but as already intimated the change should not be a violent one.

Preserving Eggs.

A correspondent of the N. E. Farmer sends the following method of keeping eggs with salt which he prefers to all others: "At certain times of the year it becomes desirable to pack away eggs and keep them at a low price. As to the best method of preserving eggs the most reliable authorities disagree, but the one which has stood the most thorough tests and has become most universally established is called the salt method. In this method fine dry salt is used exclusively. Eggs or half barrels should be procured and thoroughly cleaned. A layer of salt is first placed in this and eggs set closely with small ends upward. Layers of salt and eggs should then be put in alternately until the barrel is full, always taking care that a layer of salt is uppermost, and place the cover on tightly. By this method eggs may be kept for six months, which secures them for use during an entire winter and carries them from a dull to a high market."

FARM NOTES.

Use a soft sponge in bathing your horses sore shoulder. There are said to be fifty-two kinds of sheep in the world. The progressive farmer always keeps ahead of the weeds. The farmer's wife is entitled to far more credit than she receives. When grass is in proper condition to cut, secure it without delay. The first lesson in stock raising is to learn to love and pet the cattle. England imported last year 1,033,579,449 eggs from foreign countries. Poultry thrive in orchards and do the orchards good for they kill many insects. New Jersey farmers cut their hay by moonlight to avoid the intense heat of the day. Maine fruit growers will not be burdened with apples this year. The crop will be a light one. Pruning economy has become monotonous; yet on the farm, as elsewhere, waste takes more than storms, frosts and insects. One fact that seems rather strange at first is that, as the fertility of the soil decreases, the growth of certain kinds of weeds increases. The average acre crop of horses in Germany is eighteen years, in England twenty-five, while in France and Belgium it is only five to ten years. In Belgium farmers are compelled by law to keep down weeds on their holdings, so as not to allow propagation by the wind carrying away the seeds. Europe produces 651,000 tons of butter, and consumes 681,000 tons, consumption 30,000 tons above production. The United States and Canada produce 404,000 tons, and use 374,000 tons, leaving 30,000 tons for export.

An authority on canned goods reveals the interesting fact that most of the jellies in the market are made of paring and cores. Sometimes the stick is kept so long that it will not make jelly; then they make strained hock out of it. Some of the Maine farmers complain that the grass in one of the lower joints, and the part above soon begins to turn white and it soon falls dead from the stem. Acres of nice grass in some fields are reported as greatly injured in this way. New Yorkers are to reveal this summer in the fruits for which California is celebrated, plums, pears and grapes are to be sent from that State and sold at moderate prices in New York. Trains of ten cars each are to start from California for New York city direct, running at express speed, ahead of the fast passenger trains, and reaching New York inside of seven days.

It is said that the relative cost of raising a pound of pork and a pound of chicken is as three is to four, that is, if a pound of pork costs six cent, a pound of chicken will cost eight cent. But while the cost of production is so nearly alike, the price realized is about in the ratio of one to three, or, in other words, when pork sell at six cents per pound, chickens will bring eighteen cents a pound.

Do not apply Paris Green as a plaster. Some writers advise. Apply it in plaster at expense, rather than in water. It is more easily done, and the plaster is a benefit to the potatoes, while if it is applied in water it quite frequently injures the leaves, and it will nearly always do so, if made pretty strong. One part of Paris green to 100 parts of plaster, or a small teaspoonful for two gallons of water, is just as effectual as more, if it is pure, and this quantity effects no injury to the vines. Cows will give more milk when fed clover than when fed other grasses. It should be cut when in full blossom. Cut in the morning as soon as the dew is off. In the afternoon rake it up and returning late at night. Timothy should be cut before the bloom. In this way we do not get the dust but in this way it is more like dried grass. It is very important that we should give our cows good food in order to get in return good butter and cheese. In the Southern States is an insect, somewhat resembling a high green cricket, that is said to be particularly useful to farmers and fruit-growers. It subsists wholly upon noxious insects, and is itself entirely harmless to plant and animal life. This strange insect is held in dread by the colored people, owing, no doubt, to the ominous name by which it is commonly known, namely, "the devil's horse." One peculiarity of the insect is the formation of its two forelegs, which are held together in an elevated position, and with which it captures its prey. Through this peculiarity it is often called "the praying cricket." President Chamberlain of the Iowa Agricultural College, pays this high tribute to the business of farming: "Farming confers health, home comforts and the privilege of attending to the training of children, instead of leaving home early in the morning to seek a fortune in some remote corner of the world. It also confers freedom from want. Few farmers ever go to the poorhouse or ask charity. While 90 per cent. of business men fail, only 10 per cent. of farmers fail. Farmers also give individuality and independence of mind. The man is not confined to one narrow line of work, which eventually dwarfs the intellect, and makes one a mere part of a machine than the machine he tends. There is independence from want and from the dictation of employers. It is the kind of life which fosters intelligence and manliness in the boys, and womanliness in the girls."

ALL SORTS.

The man who chews is seldom the man whom women choose. A LOVELY THING IN PERFUMES—"Lotus of the Nile." An onion is like a bell—its strength can be better tested when peeled. A postage stamp is like a youngster. It always sticks to business the more it has been thoroughly licked. In one district of Algeria, 50,000 gallons of grasshoppers' eggs have been collected and burned this year. For DEEP SEATED COLDS and Coughs, Allen's Lung Balsam cures when all other remedies fail. There is something in the name Andover that suggests a protracted controversy. The question has been argued over and over and over again. Never scratch the ears with anything but the fingers if they itch. Do not use the head of a pin, hairpins, pencil tips or anything of that nature. Ill-tiding boots and shoes cause corns. Follow's Corn Cure is the article to use. Get a bottle at once and cure your corns. Collector—"I am losing a great deal of time trying to collect this bill from you." "Don't worry about being time. I am going to pay you in time." A copy of the Mazarin, or Gutenberg Bible, the first book printed with metal movable type, has just been sold in London for two thousand five hundred pounds sterling. Pimples and sores are cured by using MINARD'S FAMILY PILLS and applying MINARD'S LINIMENT from 10 to 20 days. When their daughters are infants, mothers are anxious to keep matches out of their reach; to put matches under their feet is their great anxiety when their daughters are older.

The usual remedy, "A Humph" grumbled the doctor, "is to give any one who is harder worked than I am—twenty-four hours a day year in and year out." And then, it struck. Not a particle of calomel, nor any other deleterious substance, enters into the composition of Ayer's Pills. On the contrary, this medicine is carefully compounded from the curative properties of purely vegetable substances. "Thrifty and economy, my son," said the old man, "are the important elements of success in the world. Together they will accomplish wonders." "Then I hope, father," replied the boy, "I shall be successful, just as you will practice both for my sake." Very many persons die annually from cholera and kindred summer complaints, who might have been saved if proper remedies had been used. These complaints are caused by a bottle of Dr. J. D. Kellogg's Dysentery Cordial, the medicine that never fails to effect a cure. Those who have used it say it acts promptly and thoroughly, subdues the pain and danger.

"My dear, why are the eggs always hard at breakfast now?" asked Mr. Songze. "They must be eggs of the new hens," replied Mr. Songze, thoughtfully. "The new hens! Why should their eggs be hard?" "They are Plymouth Rocks, you know." A STRINGENT SENSATION IN THROAT AND PALATE called heartburn, and oppression at the pit of the stomach after eating, are both the effects of indigestion. Alkaline salts like carbonate of soda may relieve but cannot remove the cause. A lasting remedy is to be found in Northrop & Lyman's Vegetable Discovery and Dispensary. These associate organs, the liver and bowels, benefit in common with their ally, the stomach, by the use of this benign and blood-purifying remedy. Edward Heisler, a farmer of Thomaston, Mass., has two daughters, fourteen and seventeen years old, who both have twelve fingers and twelve toes. The elder weighs 147 pounds, the other 219 pounds; the elder is 78 in bust and 51 waist measurement; the other is 69 in.

ADVICE TO MOTHERS.—Are you disturbed at night and broken of your rest by a sick child suffering and crying with pain of Cutting Teeth? If so, send at once and get a bottle of "Mrs. Winslow's Soothing Syrup" for Children Teething. Its value is incalculable. It will relieve the poor little sufferer immediately. Depend upon it, mothers; there is no truer remedy for all those little ills and pains, such as Croup, Whooping Cough, Sore Throat, Hoarseness, and all other ailments of the Throat and Lungs, and all other ailments of the Throat and Lungs, than this Soothing Syrup. For children teething is pleasant to the taste and the prescription of one of the oldest and best female physicians in the United States, and is for sale by all druggists throughout the world. Price twenty-five cents a bottle. Be sure and ask for "Mrs. Winslow's Soothing Syrup," and take no other kind.—Feb. 1, 1887.

When a single woman passes her 40th year she may be considered as standing on the line which divides youth from age. But, as in man, the individual has much to do with the passage of time. Some women who have been born old, while others seem to have in them the springs of perpetual youth. Danger. There are some who pay but little or any attention to a cough or cold, and say let nature take its course. This is the worst course that can be pursued. The lungs are threatened. Assist them with Tamarac Elixir. "Young man," said a stern old professor to a student who had been engaged with kissing one of his daughters, "You know, don't you get into that habit. You'll find that kissing is like eating soup with a fork." "How do you ask that?" asked the student. "Because," answered the stern old professor, "You can't get enough of it."

A Good Act. As a cure for all summer complaints I highly recommend Dr. Fowler's Extract of Wild Strawberry, having often used it with the best results. It has been used for procuring it." William Haw, Ancaster, Ont.

A German milling paper recommends a very simple means for getting rid of rats in mills, warehouses, etc. By pouring liquid turpentine into all the holes that can be detected, the rats will either be suffocated, or, being besmear with turpentine, they will come forth and perish in a very short time. It is best to let the rats come out before the turpentine is poured into another hole, they will be smothered and thus force away their companions, too. In localities where one wishes particularly to protect from the vermin, or to board beam-wood. No person can use it without immediate relief. These doors will reduce any rats, and we consider it the duty of all druggists to recommend it to the poor, dying consumers, as well as to the rich. As 80,000 doses have been sold last year, and no case where it failed was reported. Such a medicine as the German Syrup cannot be too widely known. Ask your druggist about it. Sample bottles are sent at 10-cents. Regular size, 75 cents. Sold by all Druggists and Dealers, in the United States and Canada.
