PARSONS' PILLS
These pills were a wonderful discovery. No others like them in the world. Will positively cure or relieve all manner of indigestion. The information around each box is worth ten times the cost of a box of pills. Find out about them, and you will always be thankful. One pill a dose. Parsons' Pills contain nothing harmful, are easy to take, and cause no inconvenience. The marvelous power of these pills, they would walk 100 miles to get a box if they could not be had without. Sent by mail for 25 cents. Illustrated pamphlet free, postpaid. Send for it; the information is very valuable. I. B. JOHNSON & CO., 23 Custom House Street, BOSTON, MASS.

LIQUOR COLLEGE, W. M. WILLIAM ROSSBROUGH, Wm. Rossby
Sept. 25-17.

The Appetite

May be increased, the Digestive organs strengthened, and the bowels opened, by taking Ayer's Pills. These Pills are purely vegetable in their composition. They contain neither calomel nor any other dangerous drug, and may be taken with perfect safety by persons of all ages.

I was a great sufferer from Dyspepsia and Constipation. I had no appetite, became greatly debilitated, and was constantly afflicted with Headache and Dizziness. I consulted our family doctor, who prescribed for me, at various times, without affording more than temporary relief. I finally commenced taking Ayer's Pills, in a short time my digestion and appetite

IMPROVED
my bowels were regulated, and, by the time I finished two boxes of these Pills my tendency to headaches had disappeared, and I became strong and well. -Darius M. Logan, Wilmington, Del.

I was troubled, for over a year, with Loss of Appetite, and General Debility. I commenced taking Ayer's Pills, and before finishing half a box of this medicine, my appetite and strength were restored. -C. O. Clark, Danbury, Conn.

Ayer's Pills are the best medicine known to man for regulating the bowels, and for all diseases caused by a disordered Stomach and Liver. It imparts vigor to the system, and cures Indigestion, and Constipation. I had no appetite, and was weak and nervous most of the time.

BY USING
three boxes of Ayer's Pills, and, at the same time, taking a course of your Sarsaparilla, I was completely cured. My digestive organs are now in perfect order, and I am in perfect health. -Philip Lockwood, Rochester, N. Y.

Ayer's Pills have benefited me wonderfully. For months I suffered from Indigestion and Headache, was restless at night, and had a bad taste in my mouth every morning. After taking one box of Ayer's Pills, all these troubles disappeared, my food digested well, and my sleep was refreshing. -Henry C. Hemmaway, Rockport, Mass.

I was cured of the Piles by the use of Ayer's Pills. They not only relieved me of that painful disease, but gave me increased vigor, and restored my health. -John Lazarus, St. John, N. B.

Ayer's Pills,
Prepared by Dr. J. C. Ayer & Co., Lowell, Mass. Sold by all Druggists and Dealers in Medicine.

Worms in Horses.
The following advice, in reference to this subject, on the authority of a veterinarian, is given in the *National Stockman* -

"It is of first importance to remember that any treatment which does not comprehend so improving the condition of the animal as to render worm life impossible is sure to fail in the future. It is a fact that an animal in perfect condition will not harbor worms; accordingly, let all treatment subservient to this end. Let the food be nutritious, easy of digestion and regular given. If mastication seems imperfectly performed, and the food not well digested, examine the mouth and teeth. If the latter are sharp, irregular and worn, the checks or tongue, the services of a skilled veterinarian - not a self constituted dentist - are required, as this condition will alone prevent proper digestion, and so nutrition. Salt should be within reach of the animal at all times when in the stable. Grooming should not be neglected, as this will keep the skin and general health in a healthy state. As to medicines, give three times daily a powder containing dried sulphate of iron, one and one-half drachms; gentian and ground anise seed, of each four drachms. Continue its administration for one week, and then repeat the dose every three days. If the bowels become constipated feed roots or linseed meal until the condition is relieved. After the powder has been continued for a month, give a bran mash at night, and on the following morning, fasting, give one quart of linseed oil. This will serve to carry away dead worms, eggs, etc. If there are small, thread-like worms in the lower bowels, causing irritation, which the horse attempts to relieve by rubbing its tail, they may be destroyed by first clearing out the intestine by means of castile soap and injection, and following with injections or infusions of leaf tobacco or quassa. Worm specifics are to be avoided, as, while they may cause the displacement of worms, their action is not continuous, and is, moreover, debilitating.

Worm specifics are to be avoided, as, while they may cause the displacement of worms, their action is not continuous, and is, moreover, debilitating.

Care of Poultry Manure.
Farmers commonly understand the value of the manure from their poultry, but as it is generally used in small quantities with the greatest care is taken to prevent it from becoming mixed with straw or litter, which would prevent its easy distribution. It is generally strong enough to bear some weakening by free use of absorbents, of which dry pulverized earth and sand plaster are the best. Ashes should not be used, as they will liberate the ammonia and produce that well known pungent smell around the heap where the two are mixed. If ashes can be added just as the mixture is covered by soil, no harm will ensue. If potash liberates ammonia in the soil it is immediately dissolved, and the two make a nitrate of potash, which is one of the most valuable plant foods known.

As the time for planting trees approaches, enthusiastic beginners in this business need cautioning against mixing manure with the soil, which they are to be planted. The common idea is to make the trees grow vigorously, but manure in contact with roots torn or broken by transplanting may rot them before they can start the new fibres which alone can take up the manure. Pack the clean soil smoothly, even the soil as which they are to be planted. The common idea is to make the trees grow vigorously, but manure in contact with roots torn or broken by transplanting may rot them before they can start the new fibres which alone can take up the manure.
