bowels are constipated, or if the stomach fails to perform its functions properly, use Ayer's Pills. They are invaluable. For some years I was a victim to Liver Complaint, in consequence of which I suffered from General Debility and Indigestion. A few boxes of Ayer's Pills restored me to perfect health. — W. T. Brightney, Henderson, W. Va.

For years I have relied more upon Ayer's Pills than anything else, to Regulate my bowels. These Pills are mild in action, and do their work thoroughly. I have used

them with good effect, in cases of Rheumatism, Kidney Trouble, and Dyspepsia.

— G. F. Miller, Attleborough, Mass. Ayer's Pills cured me of Stomach and Liver troubles, from which I had suffered for years. I consider them the best pills made, and would not be without them. -Morris Gates, Downsville, N. Y. I was attacked with Bilious Fever, which was followed by Jaundice, and was so dangerously ill that my friends despaired of my recovery. I commenced taking Ayer's Pills, and soon regained my customary strength and vigor. — John C. Pattison, Lowell, Nebraska.

Last spring I suffered greatly roublesome humor on my side. In spite of every effort to cure this eruption, it increased until the flesh became entirely raw. I was troubled, at the same time, with Indigestion, and distressing pains in The Bowels.

By the advice of a friend I began taking Ayer's Pills. In a short time I was free from pain, my food digested properly, the sores on my body commenced healing, and, in less than one month, I was cured. - Samuel D. White, Atlanta, Ga. I have long used Ayer's Pills, in my family, and believe them to be the best pills made.—S. C. Darden, Darden, Miss. My wife and little girl were taken with Dysentery a few days ago, and I at once began giving them small doses of Ayer's Pills, thinking I would call a doctor if the disease became any worse. In a short time the bloody discharges stopped, all pain went away, and health was restored.

Fredericton, March 30

Is the fastest Standard bred Trotting Stallion in New Brunswick. He can show a 2:16 gait in stud condition. He is a trotter by right of inheritance, as his sire Mambrino Charta had a record of 2:304, and was the sire of Helena 2:35. His grand sire had a record of 2:292 and is the sire of Mambrino Sparkle 2:17. His great grand sire, Mambrino Chief, was the sire of Lady Thorn, 2.181. His dam, Lady Messenger, was the dam of Crown Princess, trial 2:18; Crown Prince 2:25, and Grey Chester, trial 2:30. It seems almost impossible for a horse so powerfully bred in speed lines to avoid siring trotters. For particulars, address JOHN MCCOY, St. Marys, N. B. Terms: to insure, \$20; by the season, \$15.

of a skimmed milk diet. Mr. Herbst Agriculture is a large, finely formed man of about

Professor Arnold went to the homes smaller that Jerseys bred in the little darker in color than in Jersey.

He was disappointed in the quality of their milk and butter. The milk is no doubt richer now than when an old ter, and nineteen and one half for winter, but it does not compare with the satisfaction here is in it and in ad maggots, which, after rooting in filth disease. Its cause is a mystery and the yield of butter met with on the island was not so large.

The Jersey butter was neither so high flavored nor as high colored as seen in America, and Professor Arnold thought the butter was not equal to that which he saw made from the butter and their great hardiness.

Improved Horses.

The farmer's aim should be the production of the best foal possible, because it costs no more to raise a good colt than a poor colt, and there Algiers is credited with an excellent our repast. is no economy in using a cheap or convenient stallion, when a first-class one, of fit blood-lines and high quality can be had for a little extra trouble and a little more money. Let our readers estimate the value of care in breeding by considering the prices which good stock brings, even when young, and the condition of the markets in cities and large towns, where good, well-looking horses, having good action, style and substance, always are in demand, and they will conclude that it pays to breed well. There is no use in trying to breed valuable stock, if the sire is selected Diagonals, ever this is possible; but a strongly It was a rare thing that a patch es-bred sire will unfailingly improve caped.
