

## Miss Eline.

BY ANNIE H. JEROME.

We were twins, and our features being as like as two peas in the same pod, we were named as nearly alike as possible. But here the likeness ended, Cornelia adored what I detested, and I (Cornelia) most valued what she abhorred. Add to this a strong tendency on Cornelia's part to distrust all men, and on mine to believe the best of every one till evil was undeniably proved, and a pretty fair idea may be gained of the results obtaining from an earnest exchange of opinion.

But our clashing was most deplorable after I became a widow, and many a time did I regret my hasty assent to her proposition to take my lovely wife's place at the head of my household, and many a time was I tempted to break up my home, place my little girl at school, and let Cornelia circle about till she found a new abiding place.

But the love of home was strong with me; so instead of yielding to the latter temptation, I engaged a daily governess, in whom I had become interested in the course of some trifling business arrangements, and took up my daily cross of Cornelia, till such time as I could conveniently as well as pleasantly get rid of her.

Miss Eline said frankly that she could bring no references, but agreed, in lieu of them, to permit me to test her acquirements by a thorough examination.

This proved so satisfactory that, after a warm compliment, I engaged her. She was a very handsome as well as a most pleasing person, possessing a grace of deportment that I knew could not fail to prove beneficial to my little girl.

If I felt any doubts as to the lack of references in a purely personal direction, they were quickly silenced by the thought of Cornelia.

"If there is a shadow of evil about this Miss Eline," I said to myself, "Cornelia will ferret it out in three days. I'm glad she's old enough to take care of herself (she said she was twenty-eight, but she looked far younger), for Cornelia will see to it that the way is made sufficiently rough."

I was not wrong in my conclusions. Cornelia assailed me with the greatest scorn.

"The idea of setting this strange creature over Ida!" she exclaimed. "It's preposterous! It's worse; it's madness! Well," she continued, as I took my coffee in unbroken silence. "I'll hunt up her past, if a clew can be found to it."

"You will do nothing to make Miss Eline uncomfortable," I at last said, sternly, as I rose from the breakfast-table.

"Oh, I'll do nothing to Miss Eline, rest assured," she replied. "But, depend upon it, I'll keep my eye on her, Cornelius; for, the dear knows, you've no more wisdom than a baby. I dare say the creature will want to marry you before the year is out! When does she come?"

"To-day," I replied, briefly, and hastened away.

When I returned home that evening, Ida met me in raptures. Miss Eline was "so nice." But after she had gone to bed Cornelia said, sharply:

"I'm astonished at you, Cornelius! Miss Eline put me down with all the coolness of a princess, to-day—and I the mistress of the house, and Ida's own aunt! I was never treated so in all my life! She showed me no more respect than a toad!"

"What did she do?" I inquired gravely, though secretly rejoicing that my good sister had found her match.

"To do! I very courteously went into the school-room and suggested the course of study desirable to be pursued, and Miss Eline replied, after measuring me from head to foot with her great big eyes, 'Mr. Hammond has done me the honor to place his child's education in my hands, madam!' and, with a stately bow, she opened the door, adding, as she waited for me to retire: 'It is time for me to enter upon my duties. I will bid you good-morning, madam! Did you ever hear of such impudence?'"

"What did you do?" I inquired, evading a reply.

"Do! Why, I went, of course. If I had not you would have blamed me."

"Most certainly," I returned. "Miss Eline requires no supervision on your part. Let her alone."

"I'll let her alone," cried Cornelia, "but not her record!"

And she was as good as her word. The trouble that sister of mine put herself to! But it came to naught. Indefatigably as she toiled, she was compelled, at the end of two months, to declare that it was impossible to discover anything beyond the fact Miss Eline had stated; namely, that she had arrived from Germany two months previous to my first meeting with her.

"But, Cornelius," she concluded, "there's something wrong about that woman. Why does she wear that everlasting broad gold bracelet, and why does she never take it off? I one day requested her to let me examine it; but she declined, saying that the clasp was stubborn, and she certainly looked very much annoyed. It's very queer—very!"

I now fondly hoped that there might be a cessation of hostilities on my sister's part, as Ida was improving rapidly, and no reasonable fault could be found with Miss Eline.

But only the next morning she came rushing into the library with the paper in her hand.

"See here, Cornelius," she cried, excitedly; "read this paragraph! If Miss Eline is not Mrs. Nungesser, my name's not Cornelia Hammond!"

Exasperated as I felt, I ran my eye over the few lines.

"Well!" I said, a good deal perplexed. "What has this to do with Miss Eline?"

"What fools men are to be sure!" exclaimed my sister. "Now listen." And she took the paper and read:

"We learn on reliable authority that Mrs. Nungesser, who was convicted in New Orleans of the murder of her husband, and soon after made a mysterious escape, has, after a year of persistent effort on the part of the authorities, been traced to a certain city in northern part of the United States."

"Mrs. Nungesser is said to be a woman of great beauty and rare culture

but she carries an ugly mark on her wrist, commemorative of her husband's battle for life during the terrible struggle between them."

Cornelia lifted her eyes to my face. "THAT BRACELET!" she exclaimed, in low, deep tones.

"Cornelia!" I ejaculated, shocked beyond measure at her accusation. "Cornelia, I am—"

I got no further, for at that very instant Miss Eline, calm, stately, and smiling, opened the door and stepped into the room.

"I thought, Mr. Hammond," she said, in her graceful, captivating way, "you would allow me to glance at the morning paper before I go up to Ida. A series of interruptions prevented my doing so before I left home, and—"

"Oh, certainly; here it is," interrupted my sister, with unusual affability. "And do read this dreadful thing."

And she pointed to the foregoing paragraph.

Miss Eline smiled, threw back her lace veil, and bent her eyes on the paper. But the smile died away. Her eyes glared wildly from the deadly palor of her face at the printed words, and then, with only a smothered groan, she reeled and fell heavily to the floor.

"There! I told you so!" ejaculated Cornelia, as she dropped on her knees beside her. "Now I mean to go to see this arm!"

And with anything but a gentle touch she jerked off the wide gold band.

It was there! An ugly red scar!

"For Heaven's sake, Cornelia," I exclaimed, "take your hand heart away! She shall escape; let her go in such peace as she can find!"

Cornelia said nothing, but to my great relief let the woman to my care.

The first signs of returning consciousness had barely appeared when the door opened again, and two officers entered.

"Oh, Cornelia!" I exclaimed, reproachfully.

"They came, Cornelius," she explained. "It is Mrs. Nungesser!"

And so it was. And they hung her, poor soul!

And I—broke up housekeeping, and placed Ida at school. Life was unbearable with Cornelia after that! I never heard the last of Miss Eline. So to avoid all unpleasantness, I gave up my home. But as soon as Cornelia is nicely settled somewhere, I'll go to housekeeping again.

## Our Paris Letter.

(From our regular Correspondent.) PARIS, May 19th, 1878.

One's first impressions on setting foot in a country that has been known to me only through its history, literature, and art, must necessarily be crude and fresh, for the great stream of the life of a nation, like that of an individual, is neither historic, literary, or aesthetic. Those only who supply the American press with Paris letters, written in New York, may be supposed to be profoundly and thoroughly versed in French affairs, and in rapport with the life, motives, and aims, —social, political, and moral—of the new republic that has been grafted on to the old empire.

But crude and fresh as my opinions are, I propose to give them, as my superficial comments may prove useful as foils to the profound disquisition and precocious knowledge of the Bohemian, whose clairvoyance has saved him a most nauseous sea voyage.

On the morning of the 13th of May, I climbed down from my berth in the steamer, made a hasty toilet, and went on deck to catch a first glimpse of France. We were passing the islands of Alderney and Gurnsey, and the sight of houses, hedges, and gardens, dimly discernible in the distance, was delightful to our sea-sick eyes. The island of Gurnsey, it will be remembered, was the refuge of Victor Hugo in his banishment during the second empire, and its sea and scenery were the inspiration of his "Travailleurs," as well as of some of the finest passages of his last work, "Ninety-three."

Thinking of these things, and to the glamour of his wonderfully poetic descriptions, when a fellow-citizen from St. John told me something worth knowing; he said: "those are the islands of Jersey and Alderney where that fine breed of cows came from."

We could now see Cherbourg with its fortifications and fine artificial harbor about ten miles distant, and anchoring near the quay, close to three French ironclads, we embarked upon the little steamer that had come along side to ferry us to the wharf. As we approached, we observed a crowd of people and four or five cabs drawn up to receive us; among them was a grand and pretentious military personage, with sword, epaulettes, and cocked hat. One of our passengers insisted that such a distinguished looking individual could be no other than Marshal McMahon, and said that he had half expected the honor of his presence at our landing; but it proved to be only a general d'Armes, pronounced: Johnny Darnes and we soon learned that this country produced a great many like him.

Now came the inspection of our baggage. Our trunks were sent to the Custom House, but our valises passed free, with only a formal inspection. As I passed in very good French: "Tabac!" I told him, no. "Sagar!" I told him, six. This seemed to satisfy him, for he merely looked the valise with the grape peculiar to his race, and said, "C'est bon," (pronounced like "shebang"), which, literally translated meant that the little "shebang" was all right, and we passed on to the cab that was to convey us to the "Hotel d'Angle," or, in plain English, the Eagle House.

We were next entertained with the immense amount of chattering that a French hansom is able to do on a very small capital. Five of us, besides the driver, got into one horse two wheeled vehicle and with as much flourish and incessant crack of whip as if he had been driving on a Roman race course, he forced his horse at a slow gallop through the clean and narrow streets of Cherbourg.

At the Eagle the landlady was drawn up to receive us, flanked on one side by her sister, and on the other by a very pretty young woman, in a black alpaca dress and white apron, who seized our valises and took them to our rooms. As soon as we saw the landlady with her bowing, smiling staff, we were all more than ever convinced that we were in France, for we had seen such supernatural politeness, in what we then supposed, to be the exaggerations of French opera bouffe. Later in the day we walked through the city, and looked at its historic defenses, and admired the splendid colossal statue of Napoleon inscribed with his words: "I will reproduce at Cherbourg the marvels of Egypt," and pointing with the radiating fingers of his right

hand to the magnificent breakwater, that he had built far out in the sea.

Among the first impressions that the great prevalence of wine, and the much of the work in the hotels, cafes, fields and even at the railway stations as "flag-men" and "switchmen." "Where," asked one of our party, "can all the men be?" "I see few but women!" later in the day a long column of blue coated red pantalooned conscripts, all apparently between the ages of 18 and 23, marched with light, jaunty step through the city and there was an answer to the question, where are the men?

I have been in Paris only two days, and at the Exposition only one day. It is quite plain that in this show France is the Alpha and Omega, that other nationalities are the etc., etc., among which Canada and the United States are discernible, but by no means imposing. I will write more particularly of the Exposition in my next.

## Medical.

DR. WILLIAM J. GRAY'S SPERMATOCYDE

The Great English Remedy for all the diseases of the blood, and for all the diseases of the system, and for all the diseases of the organs, and for all the diseases of the nerves, and for all the diseases of the muscles, and for all the diseases of the bones, and for all the diseases of the skin, and for all the diseases of the eyes, and for all the diseases of the ears, and for all the diseases of the nose, and for all the diseases of the throat, and for all the diseases of the lungs, and for all the diseases of the stomach, and for all the diseases of the bowels, and for all the diseases of the bladder, and for all the diseases of the uterus, and for all the diseases of the vagina, and for all the diseases of the rectum, and for all the diseases of the anus, and for all the diseases of the feet, and for all the diseases of the hands, and for all the diseases of the face, and for all the diseases of the head, and for all the diseases of the neck, and for all the diseases of the chest, and for all the diseases of the back, and for all the diseases of the arms, and for all the diseases of the legs, and for all the diseases of the body, and for all the diseases of the soul.

Before, of the brain and nervous system, and for all the diseases of the muscles, and for all the diseases of the bones, and for all the diseases of the skin, and for all the diseases of the eyes, and for all the diseases of the ears, and for all the diseases of the nose, and for all the diseases of the throat, and for all the diseases of the lungs, and for all the diseases of the stomach, and for all the diseases of the bowels, and for all the diseases of the bladder, and for all the diseases of the uterus, and for all the diseases of the vagina, and for all the diseases of the rectum, and for all the diseases of the anus, and for all the diseases of the feet, and for all the diseases of the hands, and for all the diseases of the face, and for all the diseases of the head, and for all the diseases of the neck, and for all the diseases of the chest, and for all the diseases of the back, and for all the diseases of the arms, and for all the diseases of the legs, and for all the diseases of the body, and for all the diseases of the soul.

There! I told you so!" ejaculated Cornelia, as she dropped on her knees beside her. "Now I mean to go to see this arm!"

And with anything but a gentle touch she jerked off the wide gold band.

It was there! An ugly red scar!

"For Heaven's sake, Cornelia," I exclaimed, "take your hand heart away! She shall escape; let her go in such peace as she can find!"

Cornelia said nothing, but to my great relief let the woman to my care.
