VEGETINE

Gives a Good Clear Complexion. or JOSEPH D. McCULLY. PHILA., PA., July 8, '77. H. R. STEVENS, BOSTON:

Dear Sir-The great benefit I have received from the use of Vegetine induces me to give my testimony in its favor. For several years my face has been covered with pimples, which caused me much nnoyance, and, knowing it to be a blood disease I consulted a number of doctors, and also tried many preparations without obtaining any benefit until I commenced taking Vegetine, and before I had used the first bottle I saw I had the right medicine. I have used three bottles and find my health much improved, my humor entirely cured.
Yours resp'y.

shoes, turniture and miscellaneous articles never lack customers. There are outlying colonies of 5300 workers in the German coal and iron mines and in iron mines at MRS. W. G. PERLEY. Bilboa, and five of Krupp's steamships, besides other vessels, annually bring 200, 000 tons of iron metal from Spain.

The factory walls inclose a space of 988 acres, of which 185 are covered with buildings. There are 1648 furnaces, 298 steam boilers, 77 steam hammers, 18 rolling mills and 294 steam engines, with a collective horse power of 11,000 horses. The average daily consumption of the ing man, apparently about 50 years old over the side of the platform, and works is 1800 tons of coal or coke and 4,041,750 gallons of water. The various departments are linked to each other by 38 miles of telegraph wire, with 44 stations: there is a broad gauge railroad 25 miles long, with 14 locomotives 537 cars, and a narrow gauge line 12 miles long, with ten locomotives and 210 cars. Eight steam tire engines, with as many companies of firemen, guard against conflagrations. The place is lit by 21,215 gas burners, of which 1778 are used to illuminate the roads. In a month there can be produced complete 250 field pieces, 30 15 centimetre guns, 15 24-centimetre pieces, 8 of 28 centimetres and 1 of 351 centimetres. For the purpose of trying the guns there is a range at Dulmen almost five miles long; a new one has just been provided at Meppen for the experiments of 1879. The Meppen range is a tract nearly eleven miles long. Herr Prenn, a Prussian artillery officer disabled in the last war, an expert mathematician and authority in ballistics, superintends the experiments. The workmen are nearly all drawn from the population of the neighborhood and have not, for the most part, served in the army. Connick and Handley had a glass of liquo. a piece. The Mahers had had spirituous liquors also. Handley only remained a few minutes and he went out at the shep door. I locked the door after him, I do i not observe which way he went. This was between 9 and 10 o'clock. He was the only person except the Mahers that went out at that door from the time of the Mahers leaving until Connick came to the kitchen door. That left Connick and I alone in the bar room. Connick and I came into the kitchen, when Handley went out. Mary and Woods were in the kitchen. On returning to the kitchen, we sat down. I had brought the light from the bar room. Connick seemed somewhat droopy or sleepy and under the influence of liquor. It did not seem to affect his walk. I did not see him stagger. Connick could talk and seemed to

He started and went out by the back door from the kitchen, on the north side of the house. The shop door was on the east Mr. Davidson asked what would be end of the house opening on the street. I went out with him to the bottom of the olatform, part of the way to the corner of the house. I left him then. He was able to walk well. I went back into the house. I left him at the corner of the building, about 10 or 12 feet from the telegraph pole. On returning into the house ordered, or put out the lights. My sister Mary, James Woods and myself were present. We remained in the kitchen. We had a stove. Connick's house

was in the down-river direction from my house, and was about 300 yards distant. In from 3 to 5-minutes after this I heard Connick again at the kitchen door. He called out "Mary Carroll let me in-I am dying!" I did not heed him and paid no attention for a few moments. My sister looked out at the window on the lower side of the nouse from which she could see the platform. She said he was drooping or lying couple of times, making ithe same request, I opened the door and went out. saw Connick lying out on the platform in front of the kitchen door at the bottom of the steps. I went past him and went on towards the road, at the end of the other platform on the side of the road. I came within 15 or 16 feet of the telegraph pole. I saw Handley on the road at the to stand aside by the Counsel for the De- end of the front platform. (A rough sketch of the locality was here made by the Clerk of the Peace.) I thought I heard Joseph telling James to get into the sleigh, from the sound of the voices. It was moonlight, but hazy. I said to Handley, 'What happened Billy?" (Connick) The Mahers were too distant to hear me. After hearing his reply, I went back to Connick, and shook him pretty hard. He told me to let him alone. My sister told me to bring him in. Woods came out and we carried him in. I opened his pants and saw that he was stabbed. I looked on the outside first and saw a cut, on the outside of them. (Pants produced and identified) saw the cut in front, (on the left side 3 inches below the waist band). The cut was about an inch and a quarter through the obtained. This was done three different | cloth and through the pocket. I saw a part of his bowels protruding, corresponding with the position of the cut in the pants. The portion of the bowel was about 3 inches in length and the same in width.
