A LARGE FLEET.—One hundred and twenty four vessels are in port, as shown by our list in another column. This is by far, the largest fleet we have ever had. In addition to these, three have cleared. There are 87 vessels (all square rigged) at Chatham and 37 at Newcastle, Douglastown and Nelson.

NEW DRUG STORE:--It will be seen by reference to our advertising columns, that a new Drug Store has been established in Chatham by Messrs. Mackenzie & Co. Mr. Mackenzie is excellently recommended, as being very thorough in his acquaintance with his profession, while the other member of the firm, Dr. M. C. Clark, is well known already as a first class dentist. Their store, next door to the Post Office. is centrally located, and they will, no doubt, command a fair share of public patronage.

COMMISSIONER'S REPORT:-We have just received the Report of Fishery Commissioner Whitcher for last year, which will have due attention. Under the head of Officers' Reports there are some characteristic morsels from Inspector Venning, Overseer Wyse and others. The latter gives the fishermen a dreadful name, while the Inspector shows signs of lunacy on the subject. We did not know what caused so many dead smelts to appear in the river this spring until a Napan fisherman explained that the innocent little fishes had seen the reports of these two officers and concluded their time had come.

### A New Book.

The Quebec Chronicle, which is edited by George Stewart jr., an excellent writer and critic, has the following in its issue of Monday last respecting the coming work of Mr. Roberts, Principal of the Chatham Grammar and High School:-

ROBERTS' "ORION":-Messrs. J.B. Lippincott & Co, of Philadelphia, have in press a volume of poetry by Mr. C. G. D. Roberts, of Fredericton, N. B. It is entitled "Orion and other Poems," and promises to be one of the events in Canadian literature. Mr. Roberts is a very charming and graceful poet, and known to our readers, doubtless, by his recent work in Scribner's Monthly, Lippincott's Magazine and other American serials. The new volume will contain "Memnon," the "Ode to Drowsiness," "Ariadne" and other pieces of acknowledged beauty and merit.

at his shipyard, Newcastle, and launched on Thursday last. We are quite sure that those who have examined the new vessel, will agree with us that she is the best, in point of materials and finish ever built on the Miramichi. Her leugth is 165 ft., breadth 33 ft. 9-10, depth 19 ft. 9-10. Her register tonnage is 768 and builder's measurement 888 tons. The wood entering into the vessel's construction is hacmatac, pitch pine and birch. with walnut and some other fine woods in the joiner work of the cabins, etc. The whole frame and the ceiling up to the first deck are of hacmatac. The planking of hacmatac and each strake is perfectly pevelled and moulded, so that all the seams fore and aft are of an even and regular sweep. The ceiling 'tween decks is of pitch pine and the beams, pall post, rails and other important parts are of the inconvenient distance between the Lazarsame material. The upper deck water- etto and the cook-house and the want of ways are of white pine and the lower ones | proper facilities for cooking and storing are of pitch pine. The fastenings are of copper, up to the deepest load-line, or to the wake of the upper air strake, and an indication of the thoroughness of the work in this respect, lies in the fact that the rudder, which is of American white oak,

A singular case of drowning took place at Grand Downs Island, Alnwick, on Wednesday of last week. The facts are about as follows:-On the morning of that day Mr. Finlay Morrison was endeavoring to get to the shore a boat which lay moored mainder is being thrown overboard along- a short distance therefrom, by casting a stone with a line attached, in the hope that it would fall into the boat and assist in holding the line until the boat was for hoisting it out and placing it where it drawn ashore. Just before he reached the boat, however, he fell off the log into about three feet of water, and seeing that he was somewhat confused, Mr. Morrison cried out to him to come ashere. Instead, however, he turned off shore and fell forwards. Mr. Morrison made every possible attempt to rescue him, but though the water was not deeper than up to his waist he failed in doing so, until the poor fellow was beyond recovery. It is supposed that a sudden attack of dizziness or congestion caused by his sudden fall into the water. rendered him helpless until he was drown ed. At an inquest held by Coroner Dr. J. S. P. A. LANDRY, J. H. CRAWFORD. Those who are acquainted with the subect will not have their opinion of the Government improved by the above document, which goes far as a whitewashing effort. After the Provincial Secretary had stated in his place in the House that the ADVANCE stated what was incorrect in reference to the vote by which A. K. Mc-Dougall, Esq. was dismissed, it was difficult, no doubt for his colleagues to report 'officially" that the ADVANCE was right and the Provincial Secretary wrong, but, though they have wrapped the admission up in four paragraphs, beginning at No. 7. they were obliged to do us tardy justice. The tenth paragraph indicates the value of Mr. Robichaud's certified minutes on which the Provincial Secretary relied so implicitly, and it is an appropriate commentary on the style in which the "majority of the Board" conducted the busi-

ness entrusted to them. We may also point out to the public the nconsistency of the Government which connived at the dismissal of a Secretary because he lived some 40 miles from the Lazaretto, and then turned round and appointed another who has since lived in the Province of Quebec, somewhere, until the other day, when he is said to have taken up his abode in Westmorland, under the eye of Mr. Adams' friend, Hon. P. A. Landry. Another sample of consistency is the dismissing of the whole of the old Board-those guilty of the charges, as well as those who contended against these men in the public interest, and the appointing of members of the Government who never see the institution.

The repairs to Kingston Bridge were to be completed on April first-an appropriate date, by the way, when it was subsequently shown the character of the work done on the two new spans. The bridge was rendered passable for light teams about the middle of April, when, lo and behold! the public were startled to find one span had fallen to the water, and a few days afterwards floated away to sea! Since that date no work has been done towards re-

placing the lost span. Timber was ordered from Pictou, N. S. and was found to be too short; hence one The bridge when completed will have to

German Syrup is the special prescription of Dr. A Boschee, a celebrated German Physician, and is acknowledged to be one of the most fortunate discoveries in Medicine. It quickly cures Coughs, Colds and all Lung troubles of the severest nature, removing, as it does, the cause of the affection and leaving the parts in a strong and healthy condition. It is not an experimental medicine, but has stood the test of years, giving satisfaction in every case, which its rapidly increasing sale every season confirms. Two million bottles sold annually. Beware of medicines of similar names, lately introduced. Boschee's German Syrup was introduced in the United States in 1868, and is now sold in every town and village in the civilized world. Three doses will relieve any ordinary cough. Price 75 cents. Sample bottle, 10 cents.
