

Miramichi and the North Shore, etc.

Snow has fallen during the past week all along the North Shore...

The STEAM ENGINEER was subjected to one of its usual tests on Monday and gave very satisfactory results.

THE DREDGE, having six Picton voters on board, was laid up for repairs to her boiler last week.

CLOTH MILLS.—John Brown, Esq., has been appointed agent for the Tignish Cloth Mills.—See advt.

A Cow has gone astray from the premises of Pilot Agas McEachern, who advertises her in another column.

REV. JOHN TURNBULL, formerly a Presbyterian Minister in this County, died on 2nd inst., at his residence Arden House, Dumfries, Scotland.

THE STORIES about the cause of the Dredge being laid up at Newcastle during the latter part of last week differ. Well—"you never can tell," especially elections.

BAZAAR.—A Bazaar is to be held in Masonic Hall, Richibucto, on Dominion Day by the ladies of St. Mary's Church.

An excellent lot of useful and fancy articles, refreshments, etc., will be offered for sale and a lunch will be served at noon.

EH? Yesterday's Advocate (published on Wednesday) says—

On Thursday last Trickett, the Australian oarsman was saved from drowning in Saragoga Lake yesterday by rescuers from the shore.

How charmingly precise as to the time of the accident!

THE MILITARY CAMP at Sussex is getting into good shape. Major McCulley with two companies, under Capt. McNaughton and Cameron, of Black River, left Chatham Station for Camp Sussex on Tuesday and Major Call, whose Battery is now doing some preliminary drill under Sergt. Major Hughes will follow in a day or two.

DOMINION EXHIBITION: The Dominion Exhibition to be held in Halifax, next autumn, is advertised in another column. The amount to be given in prizes is large.

PERSONAL.—Dr. McDonald, has removed from Newcastle to Chatham, where he will, doubtless, find an increased practice. He has been deservingly since coming to Miramichi.

MR. O'BRIEN, one of the editors of the St. John Globe, was in town last week, looking after the interests of that excellent and popular journal.

MR. LAWLER.—Mr. Wm. Lawler, of Miramichi, who tender for building the Asylum Wing has been accepted, will come down from Fredericton—where he has been engaged on public works—and prepare for beginning the work.

There were two or three lower estimates than Mr. Lawler's, but the tenders were not prepared to stand by their calculations.—Globe.

PILOTAGE.—Ottawa advises state that Moncton has been made a pilotage district under the Pilotage Act of 1873.

Amended rules and regulations respecting pilotage have been framed by the pilotage authorities of St. Mary's and Liscombe, Bridgewater, Louisa, and Little Glouce, in Nova Scotia.

Caract, N. B., and Gaspé, and the regulations have received the sanction of the Governor in Council.

COLD WEATHER: prevailed during the past week. Last Thursday night growing crops of buckwheat were destroyed in the up-river districts and gardens also suffered. The frost was quite sharp, ice making in shallow pools and the temperature of the river being lowered very much.

On Saturday there was some sunshine and warmth, but, since that time, up to and including yesterday there were needed in dwellings to render them at all comfortable.

THOSE HEMLOCK LANDS.—Yesterday, the tract of land on Bass River, Kent Co., applied for by the Messrs. Miller, of Millerton, for hemlock bark purposes, was brought to sale at the Crown Land Office, Fredericton. The bidders were the Messrs. Miller, Mr. Yerra, the York County Registrar (who acted as agent for somebody), and Mr. George, a bark dealer. The lands, except one 200 acre lot, were purchased by the Messrs. Miller at an average of \$1.50 per acre. Mr. Yerra had a lot dropped on him at \$1.80.—Sun.

MR. JAMES READY'S SODA WATER WORKS.—In addition to recent improvements made in the mineral water works of Mr. James Ready, Union street, a steam engine and boiler are being put in. The machinery was purchased from Mr. Levi Young, who had it in use in his factory, Waterloo street. During the summer Mr. Ready proposes to run steam pipes through the building. The increasing business and approaching warm weather demanded the steam power, which will prove none the less advantageous during the winter.—Sun.

ST. ANDREW'S CHURCH BAZAAR.—The Bazaar in aid of the debt on the S. S. Hall was opened by the ladies of St. Andrew's Church, in the Masonic Hall, yesterday morning. The stalls were well furnished, and tastefully laid out, and with the assistance of the scenery at the further end of the hall behind the refreshment table and other decorations, the effect was very good. An excellent dinner and tea were provided, which was well patronized, and the attendance through the day, notwithstanding the weather, was very good.

THE HIGH TIDE AND STORM predicted by some of the Astronomers for last Sunday did not happen, and some other astronomers discovered that there was nothing in the predictions, a few days in advance. The tides acted strangely, however, behaving in St. John's just about as they did with us. Saturday's Telegraph said:—

At the quartering of the moon the tides of this harbour usually rise or neap about three feet above the full or new of the moon, and probably will have another high tide this afternoon.

SCANDALOUS ACT.—On Wednesday night last, some malicious persons on the fasts of the Norwegian brigate Nordens, at Burchill's Mill Wharf, Newcastle, and the vessel went ashore on the flats, a short distance from the ferry, at Chatham Head, where she lay for several tides.—On Wednesday the tide fell clear of her, so that persons might walk around her, and it was thought that she would not be got off until the next spring tides.—Owing, however, to the storm tide just preceding the 19th she was floated off. It appears that the mate of the vessel had been ashore on Wednesday night, and having had a disagreement with some

Nelson men, they followed him to the wharf. The latter, as we have mentioned, suspected of having cut the vessel adrift in order to have revenge upon the mate.

THE ENGINEER of the Dredge says the machinery was deranged last week, that part of a cog wheel was broken and he had to put a tooth in—echo, toothin.

DIOCESAN CHURCH SOCIETY. The Annual Meeting of the Local Committee of the Diocesan Church Society in the Parish of Chatham, was held on Thursday evening last in St. Mary's Chapel Sunday School Room. The Rev. Dr. Chatham occupied the Chair. The meeting was opened with the singing of hymn 218. H. A. M., followed by appropriate prayers.

The Chairman having explained the objects of the meeting, the following resolution was moved by Geo. Burchill, Esq., Church Warden, and seconded by Church Warden R. Carman, Esq., and F. E. Winslow, Esq., and passed unanimously.

Resolved, That the Local Committee of the Diocesan Church Society in the Parish of Chatham, do hereby desire to express its great thankfulness to the interest which this Committee has heretofore manifested in the Home Mission work of the Church in the Diocese of Fredericton, and the responsibility of maintaining the services of the Church within its own bounds, but also to contribute to the general mission work of the Church in this Diocese.

The following resolution was also moved by His Honor, Judge Wilkinson, Esq., and seconded by G. A. Blair, Esq., Lay Delegate, W. B. Howard, Esq., Chas. Sargeant, Esq., and passed unanimously.

Resolved, That this Committee earnestly desires that the same interest and liberality which have heretofore been exhibited in the laudable support, by this Committee, in the Diocese of Fredericton, the Parish of Chatham, may still be manifested by this Committee in the furtherance of general Home Mission work in this Diocese.

The meeting then proceeded to the Election of two Lay Delegates to represent the Local Committee of this Parish at the approaching meeting of the general Committee of the D. C. S., at Fredericton. His Honor Judge Wilkinson and G. A. Blair, Esq., were elected unanimously.

The meeting was then closed with the singing of Hymn 222, H. A. M., and the pronouncing of the Benediction by the Rector.

On Sunday last, the annual offerings by St. Paul's and St. Mary's churches for the D. C. S. Missions, amounted to \$140.

THE DREDGE'S engines couldn't be made to work satisfactorily when her six Picton voters were wanted at home last week.

YESTERDAY morning there was an interesting wedding in St. Andrew's Church, Newcastle. The contracting parties were the Rev. A. Hoadley, late of St. Augustin's College, England, now Curate of Hampton, K. C., and Miss Sily, who has just arrived in this Province from Warminster, England. The marriage ceremony, at which there was a celebration of the Holy Communion, was performed at 8 o'clock, a. m., by the Rector of Newcastle, the Rev. H. H. Barber, assisted by the Rev. D. Forsyth, Rector of Chatham, Rural Dean, and the Rev. E. P. Flewelling, Curate of Baie des Vents. Notwithstanding the early hour, quite a large number of persons assembled in the handsome little Church to witness the ceremony, which was peculiarly impressive, as conducted according to the beautiful order of the liturgy. The groomsmen were the Rev. W. J. Wilkinson, A. M., recently Curate of Petitcodiac, and the bridesmaid Miss M. E. Wilkinson, of Bushville, Chatham.

At 7 o'clock the bride and groom, with a number of guests, partook of a wedding breakfast at the Rectory, and immediately afterwards the happy couple were accompanied to the Railway Station, where they took the train for Hampton, followed by the best wishes of their friends.

WHO PAID FOR THE DEEDGE? The six Picton voters from the Dredge at Newcastle to Picton and return.

A Singular Animal. Quite a sensation was caused last week in the vicinity of Redbank, Northesk, by the appearance of a strange and terrifying animal, which those who have seen it describe as a gorilla. It was first seen on Tuesday 14th inst. about three miles from Redbank on the South side of the Little Southwest River, by Messrs. Benj. Hubbard of Redbank, Thos. Mowes of Nelson and another man whose name we have not learned. It was seen again on last Thursday near the same place by Mr. James Powers, blacksmith, of Redbank, who saw horse took flight at it. Mr. Hubbard was quite near to the creature and shouted at it, whereupon it turned about in an ungainly kind of way and ran off on all fours. It is described as being about seven feet long with arms and legs, but running on all fours. The head is of a dark color and the face has features resembling those of a human being. The body is of lighter color and covered with hair. When Mr. Hubbard shouted at the animal it threw one of its hind feet forward with a kind of lateral motion, overlapping the foreleg or arm and then twisted the body after it and went off in a sloping manner. It was observed that the creature had no tail, a fact which gives color to the supposition that it is an animal of the gorilla family. Prof. Grote, describing the gorilla, says it has no more tail than a professor, while the knowledge that monkeys have tails, and the idea that these external appendages are a badge of general monkeyhood are deeply rooted in the popular mind. But the apes are as tailless as man and no more so.

Further developments connected with this strange animal of the Northesk woods will be awaited with much interest.

THE DREDGE would have gone direct to Picton instead of Newcastle for repairs last week, but for the fact that she could not have reached the former place in time for the election.

Methodist. The Annual Methodist District Meeting was held in the Church of that denomination, Newcastle, on Wednesday and Thursday last week. Mr. Mr. Teed, Chairman of the district occupied the chair. Rev. Mr. Steel was chosen Secretary, and Rev. Mr. Gregg as assistant Secretary.

The first day's sessions were held with closed doors, and the order of business carried on according to discipline.

The probationers passed their examination satisfactorily. Rev. Mr. Wells having completed his probation was unanimously recommended to Conference for ordination and reception into full connection.

Rev. Mr. Gregg was continued on trial as having travelled one year.

Mr. James Tait, having passed satisfactorily the preliminary examination as a candidate, was unanimously received by the District and recommended to conference to be received on trial.

On Thursday the lay representatives

were present, and the financial interests of the District were inquired into. It was found that the year had been most prosperous in this respect. All the concessional funds were found to be in excess of last year.

It was recommended that the conference divide the Bay du Vin and Tabouacat Mission and send a Missionary to each. Rev. L. N. Parker, was appointed as a representative from the District on the stationing Committee, and the Rev. Mr. Lodge on the S. S. Committee. Mr. James Anslow and Mr. A. C. Atkinson are the other representatives from the District.

IT WAS KING of the six Picton voters, who have the Dredge and go home to vote, while the engine and boiler were being repaired.

Bathurst Notes. BAZAAR.—The Ladies of St. George's Episcopal Church held an Apron Fair and Fancy sale in the Masonic Hall on Friday last. The display of articles for sale, although not large, was in all other respects quite up to the average. As the name implies, the prevailing articles were aprons and these were to be had in all shapes, sizes and colors. Light refreshments were served during the evening and came in for the usual amount of patronage. Those who fancied flowers were attended to at the Bonquet table which was very pretty. The affair was well patronized and quite a number of strangers were present. The net proceeds amounted to \$100, which is to be devoted to the building fund of the new church.

THE 19th.—Those of our citizens who looked forward to anything more than ordinary happening on this date were doomed to disappointment. Preparations were made at the different lobster factories and also by our milling concerns to guard against loss of property in case of heavy tide, but happily nothing of the kind occurred. The tide was not as high as on the previous days, but a peculiarity in connection with it was that it remained at its height for some hours and did not fall till late in the afternoon. The sky early in the morning presented a peculiar appearance. About three a. m. it was of a bright crimson color, and towards six melted down to a coppery hue presenting much the same appearance as on the morning of the Chicago fire. Daylight did not set in till after six o'clock.

THE SHERIFF MATTER.—Mr. Donohue, the newly created sheriff, has not yet been sworn in. Sheriff Vail continues to act.

SNOW.—There was snow here on Thursday last. At Bellefleur it fell a depth of three quarters of an inch.

THE TEACHERS.—The Gloucester County Teachers Institute meets on Thursday next at Clifton.

OUR MILLS are running full time, both night and day. There are eight vessels in port which apparently give them all the work they can attend to.

FOUND.—The body of William Lavigne, who was drowned about forty miles up the river three weeks ago, while river driving, was found in the Nepisiquit Boom on Thursday last. It had suffered but little, notwithstanding it had come forty miles, passing over the Grand Falls, Papineau Falls and Rough waters.

MINING.—It will be not a little surprising to the people of this County to be told that what promises to be one of the richest silver mines in America is about to be opened within twenty miles of Bathurst. Those who are so fortunate as to be interested in it, first discovered the vein about a year ago, and have kept it a secret ever since, during which time they have been taking precautions to secure the property. Considering that they are now safe, and have no hesitation in giving every information in connection with it. The mine is situated on the north branch of the Nigadoo River, about twenty miles from town. The vein is of the richest galena, and is eight feet and a half in width. It has been traced a length of one hundred feet maintaining its width throughout. It is enclosed between two perpendicular walls of slate which are covered with a coating of putty about two inches in thickness and very much similar to white lead. An assay has been had upon samples taken from within eighteen inches of the surface of the vein, and has shown the galena to contain thirty three per cent of lead, four ounces of silver to the ton and a streak of gold. A joint stock company is being formed and the stock will be placed on the market in about a month. Meantime the projectors are making preparations to commence work, in the way of making roads, building shanties, etc. They are making the attention of speculators and are prepared to show rich specimens. The company will, in all probability, bear the name of the Gloucester Mining Co.

HOW OPPORTUNE that the Dredge broke down just when her six Picton voters were to be sent home for Saturday's election.

To Subscribers. We hope a perusal of the following will cause our subscribers in arrears to pay up;—

Although the law respecting subscriptions to newspapers has been in force some time and again, it is wonderful how few subscribers understand their relation to the publisher, newspaper readers, will take a journal regularly from the post-office, read it—thereby getting value for the price—and then endeavor to evade paying for it. The law states distinctly that a man is responsible for payment if he takes the paper from the post-office, no matter whether he ever subscribes for it or not, or whether he gave orders for it to be continued months before. The fashion of taking the paper until the subscriber thinks his time has expired, and then discontinuing it, is a very bad one, and the reality from two weeks to six months past the date for which payment has been made, and then requesting the postmaster to return it "refused," has left a bad name, "time's expired," etc., is considered a fraud by law, and treated accordingly. If a man wants to stop a newspaper, the proper way is to look up his dates, enclose in an envelope what arrears there may be, whether five cents or five dollars, and direct the publisher to discontinue from that day. The Wellington Canal Telegraph lately spread up some of its delinquent subscribers, by bringing them before the judge, and sending them to Court, and we copy its remarks on the case. "In one of the defaulted subscribers brought by the proprietor of this paper against one arrears for subscription, the defendant claimed that he had not subscribed to them for the Telegraph. He had paid Mr. Drewhurst one dollar to January, 1874, after which time he did not subscribe. The paper came along, however, and he took some out of the post-office. He afterwards moved his residence, and for over two years had not had it. The judge ruled that he was liable for the amount, \$1.50 per year, it not being paid in advance, and gave judgment accordingly. His Honor said 'the law is very plain on this point.'—East London Advocate.

If the reader of the above be a subscriber, let him turn to the first page of the paper and observe the date on the yellow slip at the top of it. If the date upon the slip be one before 23rd June, 1881, he owes and should at once pay up his subscription. We are long-suffering with subscribers who read the ADVANCE without paying the small sum we charge

for it, but we may assure them all that they must pay on a certain time, and the sooner they do so the better it will be for both them and us. We think subscribers ought not to render themselves liable to pay two dollars a year for the paper when, by paying in advance, it would cost them but \$1 a year.

THE POOR DREDGE was disabled last week and had to be at Newcastle waiting for repairs—and the return of her six Picton voters absent on leave.

Mr. Anglin in Picton. The Halifax and St. John Tory papers have, for some reason known only to themselves, laboured very assiduously to create the impression that Mr. Anglin was badly received in the County of Picton, and badly treated. Nothing could be more contrary to truth. He was treated most kindly by Mr. Carmichael's friends, and most courteously by nearly all of Mr. Carmichael's friends, and this is quite untrue. Not at all was in any case made to prevent his being heard. It is said that when he spoke the greater part of the audience went away both at Picton and New Glasgow. This is at best a gross exaggeration of what ordinarily occurs at such meetings. At Picton the meeting was held in a very large hall, the floor of which, from some cause, was deep mud, and the people, many of whom had long distances to travel, many of whom wanted to catch the train, etc., continued to go away, until at the close only a few hundred remained. At New Glasgow there seemed to be an organized plan to create the impression that the Tories were the majority. After the familiar old fashion, bodies of clagners were distributed through the crowd and they cheered Sir Charles Tupper very vociferously indeed. When he finished his first speech, some persons who appeared to control the clagners left the meeting, and they were followed by a few others. This created a little confusion for a few moments, but when all these persons had worked their way out, the meeting seemed to be as large and compact as before, and at least seven hundred persons gave Mr. Anglin a most attentive hearing. As at Picton, the evening was advanced when his, which was the fourth speech, was finished, and large numbers left the meeting. Sir Charles then spoke and when he had done his friends made a very general move for the door. Mr. Anglin again replied, but can attend to it.

THE DREDGE ought to be manned by Indians hereafter—especially in 1883—because they have no votes.

Loss of H. M. S. Dettrol. The following is a statement made by Commander Evans: "On April 28, when anchored about half a mile from the shore of Sandy Point, Straits of Magellan, about ten o'clock in the morning, I was in my cabin taking a bath when suddenly I heard a loud explosion. Before I could slip on my clothes another much more terrific explosion followed. My servant at the same moment rushed into my cabin, shouting that the vessel had blown up and was sinking. Feeling that the ship was going head foremost down under me, I sprang through the port without waiting to open it, cutting my head and shoulders, and otherwise hurting myself. I was partially stunned, and on coming to myself was picked up by a whaling vessel anchored near. Boats from the shore came off speedily, and all who escaped from the Dettrol did so by throwing themselves into the sea on the first shock and being picked up. They were in all twelve in number. No one saved was near the forward part of the ship where the explosion occurred, and none of them knew what had happened. The vessel had entirely disappeared before any of them were picked up from the water, and nothing could be done to save decks, nearly all of whom were between decks and went down with her. Judging by the sound of the explosion, my opinion, in which my officers concur, is that the first explosion was of the forward boilers, which drove some fire into the forward magazine. It is not likely the cause will ever be really ascertained, as the ship must have been so broken to pieces as to leave little for the divers to discover.

[Divers have since discovered that the boilers did not explode and the catastrophe, in some quarters, attributed to Fenian agency.]

Sensible Advice. You are asked every day through the columns of newspapers and by your Druggist to use something for your Dyspepsia and Liver Complaint that you know nothing about. You get discouraged spending money with but little success. Now to give you satisfactory proof that GREEN'S AUGUST FLOWER will cure you of all its effects, such as sour stomach, Sick Headache, Habitual Costiveness, palpitation of the Heart, Heart-Burn, Water-brash, Fullness at the pit of the Stomach, Yellow Skin, Coated Tongue, Indigestion, swimming of the head, low spirits &c., we ask you to try our Druggist and get a Sample Bottle of GREEN'S AUGUST FLOWER for 10 cents and try it on a regular size for 75 cents. Two doses will relieve you.

Persons under the operation of Fallow, Hyphosphites should examine their blood under the microscope from time to time, and mark the increase of red and active particles and diminution of the white or dead ones; these observations are interesting and instructive.

MADOC, Oct. Feb. 18, 1880. HORACE SUMNER writes: "Perry Davis' Pain-Killer as a family cure all has been in constant use in my household for a long term of years, and I would never desire a better one. It never fails me! I call it the 'OLD RELIABLE'."

Ayer's Cherry Pectoral is mild and soothing in its immediate and apparent effects, and possesses far-reaching and powerful healing qualities which its persistent use will demonstrate in any case of coughs, colds, throat or lung troubles of any kind.

DYSPEPSIA.—Strengthen your digestion, tone the stomach for utilizing and assimilating the food you take, the body needs it for strength and vigor. Zepos cleanses the entire system, stimulates the liver, keeps you regular and able to eat ten penny meals. Letters and postal cards come in daily extolling Zepos from Brazil. Positive proof of health and vigor it gives, in a 10 cent sample. Sold by MACKESSIE & Co., Chatham, N. B.

General Notes and News. MONTREAL, June 11.—About a week ago, an apparently wealthy, educated and refined young lady arrived in this city, and took up her residence at one of the leading hotels. She registered as Miss Fisher, of New York, and moved in and out without attracting any marked attention. On Wednesday last the manager of the hotel heard the report of a pistol in the direction of her room, and on entering found her stretched on the floor unconscious, and a revolver smoking by her side. A doctor was called, and he found, that the lady had been in the chest, but not fatally. She was immediately removed to the Ladies Hospital, where she is now pronounced out of danger. No information can be obtained from her about her friends, but in her pocket was found a letter addressed to "Charles Fisher, New York." The affair has been hushed up by the hotel people in order, if possible, to find her relations, but up to the present without success. The matter is now in the hands of city detectives, who are making inquiries in New York. She is abundantly supplied with money, and her toilettes are of the richest description.

OTAWA, June 20.—A man named Martel commenced building a miniature ark on Dalhousie street last week, in anticipation of a flood on the 19th June. His wife spent the entire week in cooking and preparing provisions for the trip.

ST. JOHN'S, Nfld., June 17.—A terrific forest fire is raging around the mining colony of Little Bay, on north side of Notre Dame Bay. The population is 2,000. Two hundred miners are felling the woods and the remainder are burying the furniture, household utensils and mining plant. The place is filled with blinding smoke. At one point the fire swept away six houses; at several other points it is rapidly advancing. Two large steamers are detained as a refuge for the people in case they are burned out. Ray is now calling Little Bay the Little Bay of copper mining territory in Newfoundland.

LONDON, June 20.—The Dublin correspondent of the Times says the fact is evident that the Lord League has received a series of heavy blows, and is falling upon it and a more tractable and tolerant spirit is showing itself as the power of the local despots is broken. The strike against the payment of all rent is checked, the leaders repudiating any intention to adopt such policy.

In the House of Commons to-day Mr. Gladstone, replying to the question of Lord Stanhope (Conservative), of which he gave notice on the 16th inst., as to whether representations had been made to the American Government in regard to the outrages in England, said he was glad to hear that Lord Stanhope was for speaking of preparations in America for outrages in England. There were incitements to outrages in three newspapers, etc., and viewing the returns of these incitements the Government thought it right to bring the facts to the knowledge of the English of the United States.

THE ENGLISH PATENT LAW.—In the House of Commons lately the Government favored the passage of a patent law, in imitation of the American system. A number of speakers dwelt upon the effects of the American patent system in fostering inventions.

THE ENGLISH HOUSE OF COMMONS.—The present temper of the Imperial House of Commons seems too good to last. The Land Bill is being proceeded with quite rapidly. While one amendment is accepted by the Government, other amendments aimed at the same objection are drawn, sometimes by the page full. Other

amendments are being rapidly disposed of, over fifty having been worked off in one sitting. The majority is in favor of the original bill, but as yet always been very great, and the opponents of the bill are much discouraged. The attitude of the English Conservatives has had the best possible effect. They have taught the English Conservatives by the most convincing of all methods, namely, action, of the reality of the danger that, by refusing what the Liberals now propose according they will only be compelled in the near future to grant much more. When the loyalty of Ulster is endangered, even the English Conservatives cannot close their eyes to the necessity for land reforms—for Ireland. Sir Charles Dilke's recent speech, vindicating the Government's course with regard to coercion, has set at rest all fears of any serious differences between the Radicals and the Whigs as to Irish affairs. The Fenian outrages in England, too, tend to sober even the more extreme Radicals.—Montreal Witness.

MARSEILLES, June 19.—Since 5 o'clock this evening, there have been a series of furious encounters between the French and Italians. It is understood that three persons have been killed, including one soldier; many wounded. The effect has been to close all cafes, and the police and soldiers patrol the streets. The trouble is owing to the hissing of French soldiers from the Italian National Club House.

PARIS, June 20.—The Canadian Crier has opened a subscription for victims of the Quebec fire.

ST. PETERSBURG, June 19.—Two Cactuchoc bags, filled with 120 pounds dynamite, have been discovered under a bridge over Catherine Canal.

CALCUTTA, June 20.—A report has reached here from Central Asia, that large bodies of Russian troops are assembling on the borders of Kashgar, and a conflict with Chinese troops cannot long be averted.

THE CAPTAIN and five men of the Dredge went to Picton last Friday to "see the circus" there on Saturday.

THE DREDGE ought to be manned by Indians hereafter—especially in 1883—because they have no votes.

Loss of H. M. S. Dettrol. The following is a statement made by Commander Evans: "On April 28, when anchored about half a mile from the shore of Sandy Point, Straits of Magellan, about ten o'clock in the morning, I was in my cabin taking a bath when suddenly I heard a loud explosion. Before I could slip on my clothes another much more terrific explosion followed. My servant at the same moment rushed into my cabin, shouting that the vessel had blown up and was sinking. Feeling that the ship was going head foremost down under me, I sprang through the port without waiting to open it, cutting my head and shoulders, and otherwise hurting myself. I was partially stunned, and on coming to myself was picked up by a whaling vessel anchored near. Boats from the shore came off speedily, and all who escaped from the Dettrol did so by throwing themselves into the sea on the first shock and being picked up. They were in all twelve in number. No one saved was near the forward part of the ship where the explosion occurred, and none of them knew what had happened. The vessel had entirely disappeared before any of them were picked up from the water, and nothing could be done to save decks, nearly all of whom were between decks and went down with her. Judging by the sound of the explosion, my opinion, in which my officers concur, is that the first explosion was of the forward boilers, which drove some fire into the forward magazine. It is not likely the cause will ever be really ascertained, as the ship must have been so broken to pieces as to leave little for the divers to discover.

[Divers have since discovered that the boilers did not explode and the catastrophe, in some quarters, attributed to Fenian agency.]

Sensible Advice. You are asked every day through the columns of newspapers and by your Druggist to use something for your Dyspepsia and Liver Complaint that you know nothing about. You get discouraged spending money with but little success. Now to give you satisfactory proof that GREEN'S AUGUST FLOWER will cure you of all its effects, such as sour stomach, Sick Headache, Habitual Costiveness, palpitation of the Heart, Heart-Burn, Water-brash, Fullness at the pit of the Stomach, Yellow Skin, Coated Tongue, Indigestion, swimming of the head, low spirits &c., we ask you to try our Druggist and get a Sample Bottle of GREEN'S AUGUST FLOWER for 10 cents and try it on a regular size for 75 cents. Two doses will relieve you.

Persons under the operation of Fallow, Hyphosphites should examine their blood under the microscope from time to time, and mark the increase of red and active particles and diminution of the white or dead ones; these observations are interesting and instructive.

MADOC, Oct. Feb. 18, 1880. HORACE SUMNER writes: "Perry Davis' Pain-Killer as a family cure all has been in constant use in my household for a long term of years, and I would never desire a better one. It never fails me! I call it the 'OLD RELIABLE'."

Ayer's Cherry Pectoral is mild and soothing in its immediate and apparent effects, and possesses far-reaching and powerful healing qualities which its persistent use will demonstrate in any case of coughs, colds, throat or lung troubles of any kind.
