Miramichi and the North Shore, etc.

THE SPOOL FACTORY at Jaquet River was destroyed by fire early on Friday morning last involving a great loss to the enterprising owner.

THE PRIZE DRAWING in connection with the Bazaar at the new Roman Catholic Church, Bathurst, is to take place on 15th December next. See advt.

ST. MARY'S Church Chatham has been re-seated—the work being done in a very tasteful manner by Mr. John McDonald—and is now free to all, the Church being supported entirely by voluntary offerings.

WEIGHING SCALES—Mr. THOS. FLANAGAN has completed the erection of his Weighing Scales, which have been tested and found very accurate. They will weigh from a pound to three tons. Their situation is a very convenient one for people bringing hay, etc. to town. See advt.

AN AGED RESIDENT of Derby, Roland Crocker, Esq. died on Sunday last. He was one of the early settlers of the Miramichi, having come here from St. Stephen over sixty years ago. He was a Justice of the Peace and until prevented by old age took a prominent part in County affairs.

MR. LAWLER—We have no doubt the many friends of Mr. W. Lawler, the contractor of the Parliament Buildings, and also of the additional wing to the Asylum at St. John, will be pleased to learn that he is about to commence the brick work on the latter contract in a couple of days; and we trust he will meet every success.—The Capital.

GOOD PIGEON FLYING.—It was stated the other day that Mr. F. W. Kaye had sent 9 of his Antwerp Homing pigeons to Welford, Kent County, to be "put up." The flight home was a very hard one being over a long stretch of New Country. Four of them returned and one was caught in Moncton. Three of the birds were out on this morning by a gentleman in New-Castle, and one has already returned having covered 169 miles. This season's bird has flown 80 miles—this is very good for a young home.—St. John Globe.

HIS LORDSHIP, THE METROPOLITAN visited Miramichi on Saturday last, and was received at Chatham Junction and the Station by a number of the Clergymen of the parish of Chatham, who escorted him to Bushville, where he was the guest of His Honor Judge Wilkinson. He preached at both of the services in St. Mary's on Sunday. Yesterday, he proceeded to Baie des Vents, where he held Confirmation Service. He goes North to-day.

THE REGATTA. There seems to be a desire among those who intend to compete in the proposed Regatta, that it come off about the middle of September, instead of on the 6th, as at first proposed. The general Committee will, no doubt, consider the matter and decide in accordance with what will meet the views of a majority of their friends.

It is decided that the regatta shall take place at Bushville and the programme will be as follows:—

Sailing Race, for boats of 25 feet keel and under, from line off Bushville when the gun is fired at 10 o'clock, and return to the point near Middle Island and return. First prize \$10, second \$8, third \$6.

Four-oared (rigged) Race, first prize \$10, second \$8, third \$6. Five-oared (rigged) Race, first prize \$12, second \$8, third \$4.

Double Scull (rigged) Race, first prize \$8, second \$6, third \$4. Single Scull (rigged) Race, first prize \$4, second \$2, third \$1.

Ships' boats race, four oared, from ships in port, and to be rowed by men actually belonging thereto; first prize, \$8, second, \$4, third to save entrance money.

Canoe race (Indians) first prize, \$6, second, \$3, third \$1.50. Canoe race (Squaws) first prize, \$4, second \$2, entrance free.

Water Polo (Barrel) race; first prize, \$3, second, \$2, third, \$1. This race is to be contested by each competitor on a tight fish or other barrel, which he is to propel with his hands and feet, while mounted upon it. If he falls off he is to remount the barrel before propelling it—open to boys or men.

Race on single log to be propelled with pole or paddle by one man who is to stand, sit or kneel upon the log. First prize \$5, second \$3, third \$2.

Races are to commence at twelve o'clock, noon.

Should the subscriptions to the Regatta fund warrant it, the above prizes will be increased in amount.

Bible Society Notice.

The Sixty-First Annual Meeting of the Miramichi Ladies' Auxiliary Bible Society will be held (D. V.) in the Temperance Hall, Chatham, on Thursday, the 15th Sept. at 3 p. m. Collectors will be pleased to complete their canvases before the date.

Upper Chatham—Misses Shirreff and Vondy. Lower Chatham—Misses Brown and Carmichael.

Upper Napan—Miss Maggie Gillies. Upper Napan—Miss McKnight. Nelson—Miss Platt.

Newcastle—Mrs. Anlow, Misses Parker and Marshall, also Misses Lillie Thompson and Mand Willison.

Douglasfield—Miss Baldwin. Douglasfield—Miss McLean. Point aux Cuts—Miss Lizette Russell.

Black Brook—Miss Walls. Black River—Mrs. Cameron. Tabusiatine—Mrs. Quinn. Redbank—Mrs. McCarter.

The People vs. the Clique.

Some of our friends have informed us that certain of the gentlemen who composed the Langevin reception committee, have been turning up their high-toned noses over a report that certain citizens, not rich in this world's goods, were at the Liberal meeting of last Thursday night in Chatham, and had their say in the proceedings with others of the party of more means or different social condition. If it is any source of gratification to those critics to have the privilege of sneering at their fellow-citizens, because they are not all merchants and professional men, let them enjoy it as long as they are foolish enough to do so. The Liberals differ from them in their ideas of these things, knowing that our public men, when they come to see the people like to feel that their reception is for all classes.

The hearty welcome of the Liberator is of much more value than the interested compliment of the mere political partizan, who has generally "an axe to grind." It is only by a combination of all classes of citizens that a reception worthy of the name can

be given. Our Conservative friends may manage their party receptions in their own way, but the less they do in the way of sneering at citizens of any class, the more their friends will respect them—and they sorely need something in that line, just now.

Strange Proceedings.

We have a report, under date of 13th inst. of a case in which a Gloucester Magistrate appears to have made a very improper use of his office. A sailor was charged with deserting from his ship at Caraquet, and taking with him a pocket book containing money and securities amounting to some \$50, besides a quantity of clothing, the property of other members of the crew. On application of the captain of the vessel, Justice Blackhall issued a warrant for the arrest of the sailor who was caught at Tracadie—some 25 miles from Caraquet. The prisoner, being taken before Justice Blackhall, the latter refused to require him to answer to the charge of the captain, who had, as the Justice said, arranged to cancel the warrant. The Constable who arrested the sailor, asked Mr. Blackhall for his fees, but was directed to apply for them to the captain. The captain, however, refused to pay, and on the Constable asking Mr. Blackhall for a capias by which to compel payment he failed to get one. The Constable was obliged to return to Pokemouche and obtain a capias from a Magistrate there, and when he and another Constable returned to Caraquet with it, he found the captain and Mr. Blackhall together under peculiar circumstances, and the latter abused the Constable roundly. The case of the Constable against the captain came to a hearing on 30th ult. and resulted in a verdict for the Plaintiff. Our correspondent promises a report of the proceedings at the trial, which we presume will afford another illustration, in Mr. Blackhall's case, of the peculiar sense which a certain class of our country Justices have for their duties, powers and privileges.

Burnt Church Items etc.

FISHING. The fishing along the shore this season, so far, has not been very good. About the middle of May the lobster fishery commenced, and at first the lobsters were plentiful both at Tracadie and all up the shore to Burnt Church, as well as at Portage Island, even in the spite of the rough weather. With its continuance, however, up to the present time, came the repeated wrecking of the lobster traps and the catch is said to have been, on the whole, a poor one.

SALMON. The salmon fishery commenced June 1st, and has also been very poor, the estimate for Burnt Church, Portage Island, Neguac and Tabusiatine Beach being about a quarter of a fair average catch, and the salmon being so scarce latterly, that the fishery terminated on the 1st of August, though the legal time extends to the 15th of the month.

As an instance of the scarcity of Salmon we may mention, that Mr. Jas. A. Davidson stated he fished 150 fathoms of net, from the 15th May until the middle of June and only caught 45.

The cod fishery commenced about the 15th June and at first the fish were plentiful, but in consequence of the rough weather, the boats could not remain out, which in many instances interfered with business, but in spite of this drawback the catch is considered a very fair one.

The bass net fishing commences about the first of October, but the Indians have taken a considerable quantity of small bass with hook and line, chiefly at Church Point Bridge, through which the fish seem to go with a rush, with the rise and fall of the tide, the propitious time appearing not to extend over twenty minutes or half an hour, during which they bite freely. The Indian boys seem very expert at hitting the correct troubling of the waters, and usually fill their baskets. The bait used are small chub.

FARMING. The season has been on the whole a favorable one for the farmers, notwithstanding its lateness and a good deal of wet weather.

Along the shore the potatoes have been almost free from the bug, and are generally a fine crop, though this does not apply to some of the back settlements, where in some instances they have been entirely destroyed by the bug, and in others much injured.

A considerable amount of both oats and wheat have been sown and the crops look remarkably well through the country. The hay crop is also good, but much of it has been damaged by the rain after being cut.

THE RAIN. With the exception of about a couple of days a week, the verb to rain goes ahead in a perpetual and triumphant conjunction. "It rains, it has done raining, it is going to rain." It seldom takes a steady pull however, but refreshes the earth in half hour showers, after each of which it brightens up for the next, to the delectation of the hopeful hay-maker and the illustrations stranger. It is most certainly, but the variations of cloud and sun, and the very picturesque, and those who don't like it, and wish to make things equal all round, can get into the water at the shortest notice.

NEW BUILDINGS. Since the storm and high tide which did considerable damage along shore in 1879, Messrs. J. W. & J. Anderson have moved their store somewhat further back from the shore, and have now a new store nearly finished, a short distance from their old one. This is a neat and substantial plank building, 22 ft front by 33 ft deep, and 14 storeys high. It is partitioned off into a good-sized front store, back store, and office on the ground floor, while on the second flat there is a spacious accommodation for either storage of lighter goods or for a warehouse.

Messrs. A. & D. Logie erected a new building some time ago, 60x25 ft. at right angles to the shore, a large portion of which is devoted to a neatly fitted retail store, with office and back store, the building being 1 1/2 storeys high. They have also tin shop and other buildings for storage adjoining.

During the gale of '79 this firm had a 60 ft. building carried away at Tracadie, besides another of 40 ft. broken up, and lost a large quantity of traps and other material, and, at Neguac Gully, a fish shed forty feet long was carried away.

The building at Tracadie has been replaced by one of similar dimensions, and that at Neguac Gully by one of 50 ft. in addition to which another building has been purchased from Mr. Strang.

SCHOOL DISTRICT NO. 3. The school in this district is at present in charge of Miss A. Russell, who has 17 pupils on the Register, with an average attendance of 14, divided into grades 1, 2, 3 and 4. This is the largest number of pupils this school has had for some time past, and even some of these are from

another district, who give Burnt Church the preference, on account of the extra distance of their own school-house from the locality in which they live. It is true that there are only a few families resident in the district, but it has always been an open question whether Burnt Church had a proper sense of its responsibilities in regard to the same. It is needless to say that the pupils in the school seem to be making satisfactory progress, as under the present system of inspection and grading, any pupil with a tendency to idleness and inattention is soon singled out.

INDIAN SCHOOL.

The establishment of an Indian School in the Burnt Church Indian Settlement, is a great improvement on the old condition of things, and the advantages to arise from it seem to be fully appreciated by the Indians themselves, who are quite proud to show strangers how their children can read from the 1st, 2nd and 3rd reader. The school has only been in operation some eight months under Miss A. Dumaresque, of Tracadie, and considering the children knew little or no English, the progress made has been alike creditable to both teacher and pupils.

The school is, of course, under the Indian Department of the Dominion Government, which commenced a neat and commodious school house the spring before last, the dimensions of which are 24x16 ft. with 12 ft. post. As the majority of the Indians live near the water, only in the summer season, and move to their camps in the woods on the approach of winter, the school house has been placed as conveniently as possible, between these two localities, about a quarter of a mile north of Church Point Bridge.

The number of pupils on the register is 36 and the average attendance in summer is 16 and in winter 25. In summer the children are a good deal engaged in looking out for the bass at Church Point Bridge, and many also accompany their elders in search of bass and mackerel in the Bay and outside Portage Island.

On visiting the school we found the interior neat and clean, with a substantial New stove for heating purposes, and though the pupils were not numerous, they were quiet and orderly. They showed some very fair writing on slates and are shortly to be promoted to copy books. The reading, spelling and exercises in arithmetic were all that could be expected, and it is simply sufficient to say that it is generally admitted that the children learn fast. The Trustees of the school are Peter Ginnish and Peter Cloude; the former who accompanied us to the school house, is perhaps better known as "Pierre."

The R. C. Church here is stated to be 42 years old and is in a fair state of repair, with the exception of a little plaster having fallen from the ceiling near the entrance, which we were told, is to be repaired in a short time. Services are only held once a month, when the Indians are visited by the Rev. Father Morris, of Portage. The Indian lands here are a barter of two miles by four miles deep, and some have snug farms well stocked. The Indians have also another larger reservation down at Tabusiatine. At Burnt Church the Indian population numbers about 300, and is decidedly increasing. It is in some cases long lived, as we were told there were several instances of men and women of 85.
