### Satan's Bridge.

A SWISS LEGEND. In Switzerland, at one time, the people were very anxious to build a bridge should unite two little towns between which lay a rapid river, which ran through a wild and frightful valley, full of precipices and terribly dan-

brated builders and architects, and from time to time bridges were actually built, but none of them were ever strong enough to last. The first tempest, the tirst flood, above all the first avalanche swept each one away; and at last the people gave up all hope of ever having a bridge that could be relied upon.

When the last bridge was entirely demolished the old Bailie of Goschenew, walking upon the bank of the river to view the ruins, cried out in his rage :

"Nobody but Satan can ever build a bridge here. Nobody but Satan." With these words he clapped his cocked hat upon his head and walked home in a rage, for to have this bridge built was the great desire of his exist-

He sat down in his great arm-chair fuming with anger, and not to be consoled by the glass of eau sucree, which his daughter mixed for him, and crossed his arms in Napoleonic fashion on his

breast and refused to smile. The skies grew bright with sunset. The light faded, twilight fell and night crept on, and still the Bailie sat brooding over his disappointment, when suddenly a servant entered, stood at his side, and said :

"Monsieur le Bailie."

"What do you want, Louis?" asked "A gentleman desires to see you.

"His name?" asked the Bailie. "Monsieur Satan," replied the ser-

"Let him come in," said the Bailie And in a moment more a tail, thin gentleman, dressed in black clothes, but wearing a red cap and feather,

"Whom have I the honor to address?" asked the Bailie. "The person whom you desired to

see. I am Satan." "Certainly, I said that only Satan himself could build us a bridge,"

the Bailie. "I believe it still." "I have come to offer my services, said Satan.

Now, when a man has a hobby he forgets everything else. This bridge was the Bailie's hobby, and though he was a pious man he had no sooner comprehended the idea that Satan had offered to build the town a bridge than he forgot his visitor's character and became transported with joy.

"Name your price, good Monsieur Satan," he said. "We have always been liberal, but we will give twice what we have given before. Your bridge will be strong doubtless; with your unlimited power, you can assure us of that."

"My bridge will last five hundred years. I will promise that in my contract," said Satan. As for the price, look here—" and he took from the fire a red hot coal, blew on it, uttered a word and tossed it to the Bailie.

"See how easily I can make money," he said. "Allow me to present you

The Bailie looked at something Satan put into his hand. The coal had become a louis d'or.

He rung it on the table, touched it with his teeth and cried out in astonish-

"Genuine-genuine, upon my word." enough to tempt me," said Monsieur Satan. "It would be of no use to one who can have all he needs; but I will tell you my price."

"The Bailie drew back. He be- the various buildings are elegantly organ to shiver. "My price," said Satan, "is this-no work.

more and no less—the soul of the first

bright idea struck him.

accept your terms for my town's people."

"One of them will be greatly obliged." said Satan. "Sit down and write the agreement, and we will both sign it." So the Bailie sat down at his desk and prepared a deed of agreement, by which Satan promised to build a bridge, to be finished at a certain date. which should last five hundred years, in consideration of the sum of one soul -the soul of the creature whose feet first crossed the new bridge.

"Will that do?" he asked, handing the parchment to Satan.

Satan, well versed in all legal quibbles, read it through, found no flaw in it, and placed his name at the foot. The Bailie's followed, calling in his servants for witnesses. And Satan disappeared from amongst them in a puff of smoke and a smell of sulphur, without giving any one the trouble to open the door for him.

However, the town was to have its bridge. It began to appear that some workmen were engaged upon it at white men have wintered, there are 6 night. No one felt anxious, however, hours and 2 minutes in the shortest to see them at work; and at the proper date, the Bailie being assured that it the true Platonic zone, or that one in was finished, went down to the bank of the river to inspect the work. He car- even upon the shortest day of the year. ried with him a large blue bag careful-

ly tied up with a cord. It was a noble bridge grand and beau- November 13th to January 29th, a tiful, strong enough to make sport of all the tempests that could blow, of all

the avalanches that could fall. There was no finer bridge anywhere. "Glorious!" caied the Bailie.

"I'm glad you like it," said a voice. He turned. Satan stood at his elbow-"I almost hoped you were about to cross the bridge," he added, politely. "The soul of a Bailie! Think of it"

The Bailie only smiled. "Monsieur," he said, "I naturally prefer to keep my own soul; but you shall not wait long for your payment. meter and dip of the horizon.' Your bridge is magnificent. We are noted for our honesty in this little town. We have promised you the soul

of the first creature who crosses this bridge. Behold it !"

from its confinement therein a mongrel | Chatham, 4th October, 1880.

dog, who scampered away to the further side of the bridge. "Help yourself to your soul, Monsieur

Satan," said the Bailie.

"I am cheated !" cried Satan. "Indeed no, Monsieur," said the Bailie. "The compact is kept to the letter. I wrote 'the soul of a creature,' not the soul of a man or woman. Now you have the opportunity of deciding TIN, They called together their most cele- the long contested question, 'Have dogs souls?' You will be one of our scientists, Mr. Satan."

> Howling with rage, Satan rushed away. He climbed the mountain to the uttermost peak, for the purpose of hurling down upon the bridge some great rock that should smash it to pieces, and also sweep away, in its crash, the insolent Bailie who had tricked him; but by the time he reached the top, behold the bridge was covered with people; clergymen with crosses and prayer-books and holy water; the brothers from the college, nuns from the convent, who were all come to consecrate to God the bridge which Satan had built.

Now, as we all know, Satan cannot bear the sound of holy words or the sight of holy symbols, and hiding his eyes, he fled in terror and hid himself in his own dominion. But the Bailie remembered him that evening when, for the pious purpose of giving a donation to the church, he took from his pocket the golden coin Satan had manufactured, for as he touched it it turned into a red hot coal again and burnt his fingers.

'Advance" Scientific Miscellany

It was estimated in a recent lecture that sixty tons of soot are daily sent into the air by the chimneys of Sheffield. The opinion is rapidly gaining ground in England that the way to avoid smoke is to burn the solid and gaseous constituents of the fuel separ- Upper Water Street, Chatham, N. B.

The largest library of the world, at Paris, contains many a curious and interesting work. Among them may be found a Chinese chart of the heavens, made about 600 years B. C. In this chart 1460 stars are correctly inserted, as corroborated by the observations of modern astronomers.

It has been found by several microscopists that the cause of whooping cough is a peculiar fungoid growth, which first germinates under the tongue and then pervades the air passages. Quinine is found to be a valuable antidote by virtue of its well-established power to destroy microscopic vegetable

organisms. Among the petroleum springs of Baku, on the western shore of the Caspian, is one communicating with the sea, which produces at times a very striking phenomenon. The floating oil that covers the surface of the sea is frequently ignited by accident, turning the smooth water into a veritable lake of fire. The most famous of these confla-

grations-to which the superstition of the natives gave the name of "Shaitaun Noor," or Devil's Light-occurred in 1872. It broke out in the middle of the night, and was declared by a Russian naval officer, who witnessed it from the deck of a gun-boat, to be the most remarkable spectacle he had even seen. The sheet of flame waved to and fro in the wind like a flag, lighting up sea and shore for miles, and throwing a deep crimson glow into the sky which was visible to the inhabitants of several inland districts far out of sight of the sea

Near Herculaneum the ruins of a once magnificent bathing establishment have lately been discovered by Prof. Gieiseppe Novi. The remains were found under a layer of more than thirty feet of ashes and lava, and are said to eclipse all previous discoveries of a "You see you can't offer me money similar nature both in Herculaneum and Pompeii. The fountains and tanks are made of oriental marble and adorned with sculptures, the floors are of colored glass mosaic, while the walls of

namented with paintings and stucco-

Dwellings which have long remained empty may become fever-breeders when reoccupied. It is asserted by an Eng-The Bailie sat down in his chair, lish sanitarian that typhoid, diphtherfolded his arms, bent his head upon his itic and other zymotic affections have arms, and considered. Finally, a been found to arise under these circumstances. The cause is supposed to lie What it was we will not tell you yet. in the disuse of cisterns, pipes and "Build the bridge," he said. "I drains, putrefactive processes going on in the impure air they contain, while this foul air gradually permeates the entire house. Persons moving from the city to their country homes for the summer should see that the drains and pipes are in perfect order, that the cellars and cisterns are cleared of rubbish, and the whole house thoroughly aired

> before being occupied. Carbolic acid freely used in the cellar is a cheap and effective disinfectant. Concerning the duration and character of the Arctic winter, Lieut. Schwatka, the Arctic explorer, makes these interesting comments. "The generally received opinion that the Arctic winter, especially in the higher latitudes, is a long, dreary one of perfect opaque Shaves and Hair Cuts darkness, is not strictly correct. In latitude 23 degrees 20 minutes N., the highest point ever reached by man. there are 4 hours and 42 minutes of twilight on December 22d, the shortest day in the year in the Northern

Hemisphere. In latitude 32 degrees 27 minutes N., the highest point where day, and 328 geographical miles from that point must yet be attained before which there is no twilight whatever. can be said to have been entered by man. The North Pole itself is only shrouded in perfect blackness from period of 77 days. Supposing the sun has set (supposing also a circumpolar sea or body of water unlimited to vision) on September 24th, not to rise until March 18th for that particular point, giving a period of about 50 days of uniformly varying twilight, the Pole has about 188 days of continuous daylight, 100 days of varying twilight and 77 of perfect inky darkness (save when the moon has a northern declination) in the

MOTICE

## period of a typical year. During the period of a little over 4 days the sun shines continuously on both the North and the South Poles at the same time, owing to refraction, parallax, semi-dia-

ness, Liver Comter, Tumors and Salt Rheum, Worms, Gout, euralgia, as a Dinner Pill, and Purifying the Blood, are the most congenia purgative yet perfected. Their effects abundantly show how much they excel all other Pills. They are safe and pleasant to take, but powerful to cure. They purge out the foul humors of the blood; they stimulate the sluggish or disordered organs into action; and they impart health and tone to the whole being. They cure not only the every day complaints of every body, but formidable diseases. Most skilful physicians, most eminent clergymen, and our best citizens, send certificates of cures per-formed, and of great benefits derived from these Pills. They are the safest and best physic for children, because mild as well as effectual. sugar coated, they are easy to take; and being purely vegetable, they are entirely harmless.
