Miramichi Advance.

CHATHAM, JANUARY 5, 1882.

Rich Mineral Discoveries.

Cape Breton is rich in other minerals besides coal. The Halifax Herald says--

A company was formed in New Glasgow last summer called 'The Nova Scotia and Cape Breton Prospecting Company.'

The object of the company, as the name implies, is to prospect the various localities supposed to contain minerals of any kind in the eastern part of the Province, the island of Cape Breton included.

Many valuable discoveries have already been made through the exertions of this company. Messrs. McLean and McPherson, practical men in the company employ, in addition to discoveries in iron, marble, etc., have made a discovery of very valuable galena deposits in Arichat, Cape Breton, on the property of one Mr. Langtree.

Two seams, twenty-five feet apart, have been discovered--one of them one foot and the other two feet and a half in thickness. Leases covering a mile and a half along the coast were secured by the company the other day. A quantity of an average quality from each of these two seams were sent to J. Barshaw, Dominion Assayer, a short time ago, and after a careful analysis by him, he finds in a ton of 2,000 lbs. of the smaller seam sample, 784 lbs. or 39 per cent. of pure lead, together with 3 pounds and five ounces of silver; and of samples from the larger seam, he discovers 1726 lbs. out of the ton, or 86 per cent. of pure lead--and six ounces of silver. Samples of the ore have been sent to an analyst in the United States, with the same satisfactory results.

It is astonishing also that the sand of washings taken from the trial pits made for prospecting contained a large percentage of silver. Nuggets of pure lead weighing from one pound to one ton have been found in several places on the same property. It is allowed by parties who have been in the place, to be one of the most extraordinary discoveries of minerals made in the Province. The knowing ones say that the ore is worth £200 to £300 sterling per ton. It is known that Mr. Couch, an American gentleman, now in Nova Scotia, is about visiting the locality and the public will likely hear something striking in a few days about the discovery of Galena in Arichat, Cape Breton.

Origin of the Names in the West.

In the museum at Berlin, in the hall devoted to Northern antiquities, they have the representations of the idols from which the names of the days of our week are derived.

From the idol of the Sun comes Sunday. This idol is represented with his face like the sun, holding a burning wheel, with both hands on his breast, signifying his course round the world.

The idol of the Moon, from which comes Monday, is habited in a short coat, like a man, but holding the moon in his hands. Tuiseon, from which comes Tuesday, was one of the most ancient and popular gods of the Germans, and represented in his garments of skin, according to their peculiar manner of clothing; the third day of the week was dedicated to his worship.

Woden, from which comes Wednesday, was a valiant prince among the Saxons. His image was prayed to for victory.

Thor, from whence comes Thursday, is seated in a bed, with twelve stars over his head, holding a sceptre in his hand. Friga, from whence we have Friday, is represented with a drawn sword in his right hand, and a bow in his left.

Seater, from which is Saturday, has the appearance of perfect wretchedness; he is thin-visaged, long-haired, with a long beard. He carries a pail of water in his right hand, wherein are fruits and flowers.

Signature of the Cross-Mark.

The mark which persons who are unable to write are required to make instead of their signature, is in the form of a cross, and this practice having formerly been followed by king and nobles, is constantly referred to as an instance of the deplorable ignorance of ancient times.

This signature is not, however, invariable proof of such ignorance. Anciently, the use of this mark was not confined to illiterate persons; for among the Saxons, the mark of the cross, as an attestation of the good faith of the person signing, was required to be attached to the signatures of those who could write, as well as to stand in the place of the signatures of those who could not write.

In those times, if a man could write or even read, his knowledge was considered proof positive presumptive that he was in holy orders. The word clericus, or clerk, was synonymous with penman, and the laity or people who were not clerks did not feel any urgent necessity for the use of letters.

The ancient use of the cross was, therefore, universal alike to those who could and by those who could not write. It was, indeed, the symbol of an oath, from its holy associations, and generally the mark of a solemn promise.

On this account Mr. Charles Knight, in his notes to the 'Pictorial Shakespeare,' explains the expression of 'God save the mark' as a form of ejaculation approaching to the character of an oath.

This phrase occurs three or more times in the plays of Shakespeare, but for a long time was left by the commentators in its original obscurity.

Indian Etiquette

A party of Sioux Indians were guests at a leading Miramichi hotel, and the ladies had a great deal of amusement studying their customs. That is, they all did except one lady. The ladies called on the chief and then went to her room and retired, and pretty soon there was a knock at her door, and she found that it was the chief. She told him to come in the morning. The lady unlocks her door in the morning, so that the porter can come in and build a fire before she gets up. She heard a knock in the morning, and supposing it was the porter, she said, 'Come in.' The door opened, and in walked Mr. Indian. She took one look, and pulled the bedclothes over her head. It sat down on the edge of the bed, and said, 'How?' Well, she was so scared that she didn't know 'How' from Adam. She said to him, in the best Sioux that she could command,

Get out Doors

The close confinement of all factory work, gives the operative a pallid face, poor appetite, languid, miserable feelings, poor blood, inactive liver, kidneys and urinary troubles, and all the physicians and medicine in the world cannot help them, unless they get out of doors or use Hop Bitters, the purest and best remedy, especially for such cases, having abundance of health, sunshine and rosy cheeks in them. They cost but a trifle.--Christian Recorder.

ZOFESA FROM BRAZIL

As a result of the new commercial enterprise just assuming importance with Brazil, is the introduction of Zofesa, so justly celebrated where it is known for the cure of all forms of Indigestion. The company have opened a laboratory in Toronto. Zofesa comes to us highly endorsed and recommended, its wonderful affinity to the Digestive Organs, its certainty to relieve such remarkable compound a necessity in Canada. The Company makes sample bottles at the trifling cost of 10 cents. Sold by MACKENZIE CO., Chatham, N. B.
