WESTMINISTER, Conn., June 19, 1879. MR. H. R. STEVENS

Dear Sir-1 can testify to the good effect of your medicine. My little boy had a Scrofula sore break out on his head as big as a quarter of a dollar, and it went down his face from one ear to the other, under his neck, and was one solid mass of sores. Two bottles of your valuable VEGETINE completely cured him.

Very respectfully, MRS. G. R. THATCHER.

### The Pope's Intentions.

Nothing more strikingly expressive of the Pope's frame of mind has yet been made public than his few emphatic phrases to the cardinalate Saturday. Leo. XIII. is not only the head of the great church of historical primacy, he is recognized as reviving the highest traditions of state craft associated with the papacy. When, therefore, he feels it incumbent to utter his mind so freely as he does to the car dinals, one of two things may be inferred Either he has resolved irrevocably to quit | prevented quite a cheerful and attractive Rome and break the imposing association | appearance.

of centuries, or he hopes to exact from the secular powers certain guarantees, without which the papal tenure of the Eternal City has become impossible. It has been asserted explicitly in French and Italian journals that since the summer outbreak on the removal of the late pope's remains, the most precious relics of the church in the Vatican and St. Peters have been carefully inventoried and removed by night to the various legations in Rome accredited to the Papal court. The significant precaution, in conjunction with the Pope's

which I know my friends in my own Pro- explicit assertion on Saturday, gives weight to the growing rumor that Leo XIII., feeling himself virtually in the same posiaspired to any position of place or emolu- | tion that Louis XVI. tound himself after ment as a public man. I do not claim his failure to escape in 1789, means to assure his own safety and the church's treasures before it is too late. The sentiment in Rome to day is very nearly as rabid as ot \$40. the ranks of my party as an independent | it was in Paris before the terror set in. It is doubtful whether the Italian government could, even if it dared, interpose

more and more hidden. The snow was about four feet in depth, and some of the holes had been dug so far that nothing save their swaying tails could be seen of some of the reindeer. In every direction these busy creatures were to be seen toiling with the sole

object of reaching the moss covered by the snow. Late measurements of the carbonic

acid existing at considerable heights above the earth's surface appear to show that the gas is pretty evenly distributed throughout our atmosphere. Violent atmospheric disturbances are always attended with electrical manifestations: and, in a recent paper, Dr. Rogers is disposed to consider the prevalent theory of wind as erroneous. and believes the real cause of air currents to be electricity.
