If he be a visitors from abroad were established, it vachtsman he has before him an ample would not be long before the same or river, in which a ship may be worked another company would find it to their to windward, stretching down to the interest to furnish Chatham with

into the open Straits. If he has a taste been made a tourists' paradise within for fishing, as well as sailing, he will find, two years, and if the work is started in the river and its many tributaries, a in Newcastle it will soon extend down wealth of sport which for variety and river. Oak Point, Burnt Church, quality is not equalled anywhere. We Neguac and Tabusintac, Bay du Vin do not know whether even those who and Escuminac will each have their are most familiar with the Miramichi places of resort. We shall have a have ever fully appreciated the abundsteamer running to all of these ance and variety of fishes with which points, promoting business and pleasure nature has stocked it, but although it and tending to develope many of our has, probably, never been done, yet it resources of which we now know comis quite possible for a fisherman to start paratively little. In this day the from his hotel at earliest dawn, reach a world moves fast and whatever brings pool up river and kill his grilse or salpeople together,-leading to the formon, return to town in time for dinner mation of new acquaintances, the exand go by steamer to the bay below and change of ideas, to improved or enlargcatch mackeral, bass, cod or other sea ed business intercourse, to the learning

fish before night. Nobody does this, of new methods and the gaining of new nor is it probable that anyone would experiences-enlarges our views of life, care to so rush the pleasure of sport as removing that spirit of selfishness to rob it of its charm by unnecessary which,-unconsciously, perhaps, surfeit and fatigue, but the fact that it those actuated by it,-underlies mary is quite possible for one to indulge in of the improfitable differances by which salmon fly fishing in the morning and men in communities such as this are close the day by tugging at the deep kept apart. We have a comparatively sea line with a codfish at the end of it, cheap country to live in and what we illustrates the range of our water-wealth have to offer to the sportsman and which may be shared by any who choose tourist is free for him to take. He can to seek it. Our trout-streams of the shoot through our woods, along our first order are very numerous and they shores and in our bays for the trifle required by the Game Warden to cover hours' travel from the towns and, ina license. He can fish our rivers free of deed, one can go, in twenty minutes, from any charge whatever and Snd "brothers either Newcastle or Chatham and catch of the angle " only too glad to have him plenty of trout of a size that is most share their noble sport. Rowing and prized by many epicures. sailing boats are plentiful and the use Our correspondent refers to shooting. of them may be had for little or noth This favorite sport is best enjoyed in ing. We have a score of steamers of the autumn, for our game animals and different sizes and are constantly adding birds are sacred from the sportsman's to the fleet. The next thing we want i quest in summer months. But even an effort to pull together for the estabtourist coming to us in the heated term, lishment of a good hotel, as the first and and who does not enjoy, most important step for making the "A wet sheet and a flowing sea, Miramichi what its name implies, ";

THE ORE.

The ore consists : 1st, of fine cubed galena, in ribbons and bunches, next the foot wall : 2nd, mixed galena and blende 3rd, near the middle of the lode zinc blende and fine copper pyrites ; and, 4th, next the hanging wall, mixed galena, pyrites and blende. The ore is exceeding rich in silver and gold, and assays yield ing from 35 to 180 ounces of silver per ton have been obtained. Gold also exists. and if the ore is concentrated, I believe that metal will form no small item of value

FUTURE WORK.

It is always a serious question with mining company what course to pursue in order best to develop and quickly realize from their mining property. In this par- possess excellent advantages and have Square, came over from the city in the ticular case, happily, there can be no question as to the best method of working. A shaft must be sunk on the bank of the times, and not allow ourselves to be beriver far enough back to be clear of water straight down and cutting through the | hind in this particular.

ore vein to the foot wall ; thence down. wards following the course of the vein. If the vein holds out in quantity and quality at the depth of 100 feet, the company will be justified in erecting a first class concentrating mill for cleaning and dressing the ores.

All veins have lean and rich streaks, are wide in some parts and narrow in others. This lode will not likely be an exception to the general rule and must not be considered thoroughly explored until several drifts are run from the shafts. The Elm Tree river, at a point a few rods above the proposed shaft, offers excellent facilities for all the water power necessary to drive a concentrating mill, an item vastly in favor of the mine.

FINANCIAL PROSPECTS.

County of Gloucester, called Pokemouche. ng report of +1. property, nor yet one by which stock may be sold, but simply to Here I remained a few days enjoying the give the facts as they stand, and I believe country air, and the kind hospitality for that the mine, if intelligently managed which the people of this place are noted Wardering up stream one day in search of every man who holds stock in the com- the angler's sport, I left the main river and began to ascend what is known as the Malcompeck brook. I had not proceeded far, when I noticed what I first thought Of course the mine, on development, may to be obstructions in the stream. Landprove enormously rich as many others ing close by and feeling fatigued from the have done, but it is far better for us to burning rays of a July sun, I sat down to figure on just what we know to exist. enjoy the solitude of this secluded spot. The ore, as at present mined, will yield at least five per cent. of concentrated ore, While admiring the works of nature by if put through a good mill. These concenwhich I was surrounded, my eyes rested trates, as shown by numerous assays, will yield about \$200 per ton. The cost of mining, after the shaft is 100 feet deep, will not exceed \$2.00 per ton, and the work of human hands. Being satisfied cost of concentrating will not exceed 75 cents or \$1.00 at most. Allowing the cost of mining and milling to be \$3.00 per ton, on the above basis, there will be a hood when care and trouble were unknown. net profit of \$7.00 per ton on every ton and when I and my school-mates amused mined, or more than 200 per cent. profit. The figures I have just given are not

father and mother were aroused by a ourselves in raising similar structures for prospective nor imaginary, since they are sport. I was roused from my reverie by the sound of a human voice and starting up was much surprised to find grown up men about to commence work. Entering into conversation with them, who appeared to be the boss. I learned it was no child's play they were engaged in, but on the contrary it was a bona fide contract to build a bridge our Most Gracious Sovereign, Queen Victoria. But such a bridge !! If these few lines should be read by the Superintendent of this piece of jobbery I hope he may be able to explain why it should thus be erected and permitted to stand as a monument of disgrace to the country, insult to the community and of shame to the repre-

present, or upon the yield of the vein is being done elsewhere. St. John is only the 10 o'clock trip of the boat when they salary is, we believe, \$600. now waking up to the idea. Why cannot returned to Carleton. All had been drink.

> we take an example from our American ing, but McCaslin, who was "chumming" cousins in this respect? The first thing with Campbell, appeared to be worse than to be done is to have a hotel. People who take the advice of Desmond, Newcastle, or Roger Flanagan, Chatham

being duplicated every day by mines in the New England States. It is an interesting and pertinent fact that more mines fail on their narrow veins of rich ore than on wide veins of low grade ore, in the proportion of ten to one. The big veins of low grade ore rarely ever fail to pay. In conclusion, I may say that I feel more than confident that this property may be made to pay well and for a long time. Respectfully submitted,

F. L. BARTLETT, State Assayer and Chemist. Portland, Me., July 25th, 1882.

The error that many mining companes fall into is that of using their property for speculative purposes rather than legitimate mining, but, so far as w have learned, it is is the intention of he Elm Tree Company to guard their stock from drifting into speculative channels; to sell sufficient only to enable them to develop the mine and make the undertaking an entirely legi-

timate one. Work, we are informed. is already progressing on the plan

Egypt.

in Gloucester County, a recent visit We do not, this week, give the press made to the Elm Taee mine by Profestelegrams respecting the condition of sor F. L. Bartlett State Assayer and things in Egypt, as we have heretofore Chemist of Portland, Me., having made done, because very little change in the it quite evident that the gentlemen incondition of affairs has taken place .-terested have really a good property Preparations are being made on both there. Professor Bartlett is a gentlesides for a great struggle. The news man of character and repute, whose respecting the British preparations dejudgment and advice may be implicitly note steady progress and a gradual acrelied upon for his experiences in cumulation of forces to be employed

mining are very wide and in reporting when they have become strong enough to assume the aggressive. The movements of Arabi Bey are not so well-defined. At one time he is represented as being on the point of surrender, surrounded by disaffected Egyptians of all

ranks and conditions ; at another he is carrying all before him. It is to be presumed that he is fortifying himsel

in all possible ways and will prove a very troublesome factor to deal with REPORT in England's task of restoring order Egypt. France is charged with behaving in very bad faith in the whole matter and other European powers seem to practically stand aloof and allow the

British to deal with Arabi alone, nearly so, Turkey, seeming, at last, to sentatives under whose regime it appear. I went down stream pondering over

political economy till I arrived at mine host's, who in answer to enquiries informed me that the plan and specification of the structure was provided by Mr. P. Landry (not the Provincial Secretary but another P. Landry) who is also superintendent of the work. I must close in a hurry to be in time

for a passage with Her Majesty's Mail. so wishing my friends of Pokemouche good bye, I am, (perhaps), A CRITIC. Caraquet, July 28, 1882.

If any of the readers of this paper are growing deaf, let them get at once a bottle
