Miramichi Advance.

DELAY.—Owing to the serious illness of our foreman and our next best man in the mechanical department of the paper and the impossibility of procuring printers, even in St. John, the ADVANCE is nearly twenty-four hours later than usual

in going to press this week.

circumstances.

The Local Election. It is really a fact that certain gentlemen who desire to maintain the existing state of things in regard to local politics, have been industriously endeavoring to create the impression that the people of Northumberland are so satisfied with the record of the present Government, that they are not in humor to do their duty by an earnest endeavor to vote it out fact, as the election cards in the present issue of the ADVANCE bear wit- promote their personal interests. ness. Messrs. Hutchison and Gillespie, whose record of the past four years is a guarantee of their determination to secure a better Government for the Province, appeal to the electors on that record and, in compliance with the request of a large it is probable he will be largely in the their fellow-electors. Messrs. Thomas Troy, of Douglastown and John Burchill, of Nelson, have consented to allow themselves to be placed in nomination with these gentlemen on a square four ticket. pledged to their nominors and each other to use every effort, if elected. to oust the present Government and substitute therefor a body of men who will more honestly and earnestly endeavor to introduce reforms of administration which are so urgently pressing themselves upon the attention of every thinking man in the Province. These gentlemen recognise the fact that the Government now in power is but the rump and disorganised fragments of that which was left to us at Confederation, and as it has utterly failed to reorganise the system of Provincial management and make it conformable with the limited means and altered circumstances of the Province, the time is ripe for wiping it out of existence. Of the personnel of the anti-Governther than to state that it embraces

mend themselves to this constituency in the Candidates who have heretofore been elected. The four men are essentially representatives of the industry and intelligence of the County and we have no doubt that at the meeting to be held in Chatham on Monday evening next, they will be able to place the reasons for the political faith that is in them before the electors. Let every man-and woman too-who desires to see this Province, and particularly the North Shore, rid of the Young-Adams misrule and who condemn their regimea regime conceived in falsehood and treachery and maintained at the sacrifice of principle and the public good-pledge themselves for the people's ticket, HUTCHISON, GILLES-PIE, TROY, BURCHILL.

all the elements which usually com-

Gloucester Politics.

The Tory papers strive very persistently, through their correspondents, to persuade the rest of the Dominion that a great revolution has taken place in the County of Gloucester, that the majority of the electors there have become converts to the doctrine of heavy taxes and monster monopolies and that Mr. Anglin, who has served the County so being re-elected, and they pretend to been canvassing some of the electors. In find evidence to maintain their reckless | that canvass he declared himself to be in assertions in the fact that Mr. Anglin went into the County in his usual quiet, unostentatious way, and that he is proseof one of his opponents, much is done to make a show of strength very much after the fashion of those theatrical managers who strive to represent mighty armies by marching the same men across the stage many times.

There is no change of political opinof place on the part of Mr. Anglin's opponents and a new set of combinations has been formed, through which -as through previous combinationsthey hope to win success. In 1877 they conceived the idea that

by working up what they called the French national feeling Mr. Anglin could be defeated, and they selected Mr. Turgeon as their candidate. These men, who all their lives had treated the French people with insolence and contumely, who had wronged and oppressed them, and who were seeking to return to the old state of things which placed the patronage of the County in the hands of two cliques-one in Bathurst and another in the lower part of the County-and which put in the tills of a few men all the money appropriated by the Legislature for County purposes, were heard to declare, wherever they went, that the French people should elect one of themselves. The chief cause of this hatred of Mr. Anglin was that he had endeavored to do even handed justice to all classes and nationalities in the County and their real object in raising the French cry was, by means of it, to reduce the French be upon the representation of the County.

ed in 1877 they calculated Mr. Turgeon could easily be put aside at the general election of 1878. Many were misled by the cry then raised and Mr. Turgeon received a large vote. But the plot

Those same parties now show how insincere was their pretended zeal for French representation, They now coolly put Mr. Turgeon and his friends aside—as far as that is in their power and have formed an alliance with Mr. Burns, between whom and the Messrs. Young, leaders of the clique in the lower part of the County, there was, for years, a most bitter feud. Those who know how Mr. Burns, during those years, talked of the Messrs. Young and how they talked of Mr. Burns, are now surprised to see them working together as cordially as if the past had all been absolutely forgotten, and see, in this remarkable combination, another proof of the wonderful effect self-interest freask the indulgence of our readers in quently has on poor human nature.

this and other omissions, under the The cliques hope that this new combination will be successful, but to give it any chance of success it is necessary to conceal that it exists .- so abhorrent is it to the large majority of the electors. Both parties, it is said, deny that there is any compact or agreement or understanding of any kind between Mr. Burns and the Hon. R. Young. They say that Mr. Young supports Mr. Burns, now, merely because they agree in Dominion politics. Their efforts concealment deceive nobody. The whole people see that they have come to an understanding and that they are Such, however, is not the trampling at once on personal feelings and public considerations in order to

How far will they succeed? Bathurst, Mr. Burns will poll a large vote, although by no means so large as he expects. In Tracadie, if the Young influence is still as powerful as in 1877 -and some say it is not-he may have a majority, but in all the other parishes minority. Mr. Turgeon, should be go to the poll, will poll a much larger vote than Mr. Burns in Beresford and will probably, get a larger vote in some other districts. The great majority of Mr. Anglin's old supporters in all the parishes are prepared to declare once more their confidence in him and their approval of his principles. It is whispered that Mr. Turgeon is to be induced to retire and that this will be arranged when Sir Leonard Tilley visits the Northern Counties this week, but his retirement would not, in most districts, increase the relative strength of the surviving Tory candidate. From this, which is a candid view of the situation, as presented by the most reliable information we have been able to obtain, it will be seen how unfounded are the statements published in the Tory papers and how foolish are the boastings in which the Tory party love to indulge.

Mr. Snowball's Retirement.

As was to be expected, the Tories have

made the most of the fact of Mr. Snow-

ball's retirement and some of the Liberal

papers have taken a course that has assist-

ed their opponents, to a considerable

If believe it has been at the instigation of Kent is true to herself she will take a move forward from the back benches, where she has remained in silence, so far as her real interests are concerned. for the last four years : she will have a Costigan were a fellow-Minister with representative in the next Parliament Sir Leonard, Mr. Boyd's importance who will not be a mere voting machine, and influence with the Government of whom men are constantly saying,-"he must do it, for he has received his something to be thankful for that the \$2,600." A York Point Orator.

Senator Boyd's references to the retire-

ment of Mr. Snowball, as given in the are characteristic Sun. of him. His antecedents, as given by himself in the Parliamentary Companion, show that there is nothing of the braggart about him, while the language he employs and the taste he displays are a fitting reflection of the kind of person Sir Leonard Tilley chooses to be his chief and confidential adviser. It must have been a fortunate day for Mr. Boyd when his lucky star led him upward from the social plane on which he laid the foundations of his true character, otherwise he might now be a denizen of York Point and display his peculiar ideas of manliness and fair play laying unsuspecting sailors and other frequenters of that historic locality, and knocking them on the head from behind with bludgeons. As it is, he has, by fortuitous circumstances, been elevated above the position of the ordinary blackguard, but he has carried up with him the ruffianly instincts of the class to which he undoubtedly belongs. His attack upon a gentleman whose only offence has been a difference of political opinion-an attack deliberately made when no one but his own political friends were present--when the person attacked was miles away, was nined one of such a character as to aptly illusthing clear.

at Campbellton this evening for the not obliterate the effects of neglected early training. Mr. John Boyd is a living proof of the fact that a successful business career and elevation to the Senate are not to be taken as conclusive evidence that the real mental and moral status of the fortunate individual is very much above that of the mature gutter snipe and

That Ballast Wharf Business. The Chatham organ of the Canada Ballast Wharf, seems, after all, to have abandoned the idea that the \$3,000 grant for a ballast wharf in Chatham was intended to be expended in clearing obstructions from the channel of the Miramichi. It dare not accuse Mr. Anglin of falsehood and is, therefore, obliged to admit that what he states Sir Hector said in reply to his question across the floor of the House of Commons, is correct. It practically abandons the "obstruction" statement goes back on Sir Hector's alleged telegram to Mr. Call, and says :-The only fair inference from it [Sir Hector's statement to Mr. Anglin] would be that the Government intended to build a ballast wharf so as to have one "properly

constructed." The statement that the money was to buy a wharf from Senator Muirhead's son-in-law was manufactured in Chatham out of whole cloth, and Mr. Anglin's name ungenerously used as the author. Mr. Anglin's version of his conversation with Sir Hector, whether his recollection be accurate or not, makes no mention and contains no intimation of any purpose of buying the Canada Wharf property. We knew that Mr. Anglin's name had been privately used as authority for the falsehood which we exposed so effectually, but we did not beeve him to be the author of it and made no use of his name. The publication by the Advance of Mr. Anglin's letter shows that we were right when we declined to believe him the author of the slander about Senator Muirhead and Mr. Sadler.

In the above, the World repudiates the idea that the Government intended known and outspoken opposition to Sir | the latter, however, is of the real Simon | plainly admits that the fair inference Leonard Tilley. The latter, as is well | Pure Tory stripe, he will at once bow | to be drawn from what Mr. Anglin was told by Sir Hector is that "the Government intended to build a ballast wharf. so as to have one properly constructed. Strip the matter of the World's conjectures-which must be prejudiced ones to screen one of its proprietors-and we have the admission of this Government organ that it was the intention to establish a Government Ballast Wharf .argument. He will tell them it is in- This, then, is what the World now admits the grant of \$3.000 was for. But, send a man to Parliament who is op- (in an editorial of 20th ult. the World contained a highly imaginative account

of obstructions in the river. It said,-In the fall of 1879 a slab whar owned by Mr. Snowball, with two or three hundred tons of ballast upon it, went adrift and grounded upon Gordon Flats, just below Middle Island. The next spring the ice lifted the top of it off, ballast and all, and scattered it all along the river, the rest of the structure remaining on the flats. Last fall an engineer of the Public Works Department was here, made soundings, discovered the block embedded in the mud, and reported the fact to the Minister. In consequence of this report, and of representations respecting other impediments to navigation, the \$3, 000 was appropriated, and will be used for the removal of the remains of Mr. Snowball's slab ballast wharf and other nuisances from the river.

Which of the World's beliefs are we to accept, that of 20th ult. or that of

The World now says that J. Edward Doyd, engineer in charge of Harbors &c., Maritime Provinces, reported as follows to Henry F. Perley, Esq., Chief Engineer, Public Works, Ottawa: About three miles below Chatham there is an obstruction in the channel which is said to be a portion of Mr. Snowball's wharf which went adrift about two years ago with 200 or 300 tons of ballast in it. It lies directly in the channel, and has only 16 feet water on it, while on either side the water is from 25 to 30 feet deep No time should be lost in removing this obstruction, as a loaded vessel caught on it could hardly fail to receive serious injury. Sand and mud are accumulating round the sides, which will make it more difficult to take out the longer it is allowed to remain. It will no doubt in time

form a dangerous bar. The above does not bear out the statement of the World that Mr. Boyd discovered the wharf in question, or that he personally made soundings. In fact his report must be based on hearsay evidence, because it is incorrect.-It is known that he was here and was driven along the highway on both sides lieved the reports that were told him.

on authority apparently good. When Mr. Boyd was here he said h could not report anything in the channel, so far as he had found, and we did not think he would base a report on hearpossess to send such a representative to say testimony. The ADVANCE referred last week to an official report on the subject of this Snowball wharf business. A copy of that report was forwarded on 10th inst. by the Deputy Minister of Marine, Wm. Smith, Esq., to Mr. Snowball, M. P. It is as follows :-(Copy.) HARBOR MASTER'S OFFICE.

Снатнам, N. B., May 1st, 1882. SIR,-In reply to your letter of 26th altimo making enquiry in reference to the Snowball block or wharf which went adrift in 1879. I have the honor to report as follows: I found that in the spring of 1880 the action of the heavy ice running in the river had broken said wharf or block up, and that one portion of it had been (arried in upon the flats about a mile and a half elow Middle Island, while the other portions had disappeared and have not been seen since by myself or any other person. so far as I have learned. I placed a picket buoy on the portion which grounded on the flats in 1880 and it remained there during the whole season of navigation that

In the spring of 1881 I found that the ice had carried away the portion of the block or wharf which had been on the flats the previous season, and although I searched diligently for it, both by sounding in the channel and along the flats, I portions of what might have been that wharf or some of the blocks of the South west Boom Company's which had been carried from their position miles up the river above my district. During the spring of 1880 two of our Licensed Pilots Allan McEachran and George Savoy told me that a portion of the wharf referred to was in the channel, and I at once engaged promising them a reward if they would how me that their statement was correct. the place where they said the wharf was.

although we used every effort to find feeling the responsibility that would attach to me should a vessel strike such an obstruction, I employed Angus Mcto assist me in searching for this whar proken up and carried out into the Straits, or been strewed in the form of wharf logs along the shore. My convictions are borne out, I think, by the fact that hundreds of vessels have entered and left the port, passing over the spot where the wharf originally grounded, finding every-

letter, to show that they substantially bear out my statement. I have the honor to be &c..

WILLIAM JOHNSTON, Harbor Master, Port of Chatham, N. B. Wm. Smith, Esq., Deputy Minister Marine and Fisheries, Ottawa.

CHATHAM, 1st May, 1882. We, the undersigned licensed pilots of the Miramichi beg to certify that the wharf or block constructed by J. B. Snowball, Esq., M. P., and which went adrift in this river in 1879, is not to our knowledge now in existence anywhere. It adrift and had it remained there would have been an obstruction to navigation. The spring following, however, it was broken and a portion of it grounded on the flats. Last year no part of it was to be seen anywhere, excepting detached pieces of this or some other block or blocks along the shore altogether out of the way of vessels or even boats. It is our belief that the said wharf or block cannot be found in or near the channel of the Mira-

(Signed,) ANGUS MCEACHREN. WILLIAM TAIT, ALLAN McEachren, Pilots. ANGUS MCLEAN.

JOHN MCEACHREN. The above Report and Pilots' certificate were before Sir Hector Langevin when the Ballast Wharf grant of \$3,000 was made. Is it not absurd, therefore, to believe that he would ask for money to be expended on an obstruction, the existence of which was clearly dis-

Respecting Sir Hector's alleged telegram to Mr. Call it will be remembered

The Three Thousand Dollars named the Estimates for Ballast Wharves in the Miramichi River is not for subsidizing, building, or purchasing any wharf or wharves on the Miramichi River, but solely for removing slabs and edging wharves which have gone or been sent adrift and have lodged in the Miramichi River, and are now obstructing navigation. Also for removing any other obstructions to navigation in the river.

The item as it appears in the estimates [see Supplementary Estimates, submitted by Sir Leonard Tilley, p. 5, No. 37] is "Miramichi River-Ballast Wharves," not "Ballast Wharves in the Miramichi River," as Sir Hector's alleged telegram says. Sir Hector's explanation of the item to Mr. Anglin, in his place in the Commons, is likely to be more truthful than a telegram put forth in a party paper in a country town, under the auspices and authority of a not over-scrupulous local party manager. In the one case it is Sir Hector making an official statement, as a responsible Minister to a member of the House of Commons of the highest character and standing ; -- in the other it is an alleged statement of Sir Hector, made out of the House, as filtered through Mr. R. R. Call in the Newcastle Advocate. Let our readers bear this in mind when reading what Sir Hector gave to Mr. Anglin in explanation of the grant in question. Mr. Anglin's statement of the matter is-

"I asked what the appropriation meant, and if the money was to be expended on private property, such property having or some time been used as a place of de-

"Sir Hector replied that it would not much of danger in it for shiretown conbe used on private property; that the private wharf or wharves used for the deposit of ballast were not kept in proper repair, and the ballast made its way into the harbor, doing it much injury. For this reason it was thought desirable to have a public ballast wharf, properly constructed and the appropriation was asked for that

According to this reply and also to the World's admissions of Saturday last, it was the intention of the Government to have a ballast wharf in Chatham. That point being settled, we leave it to our readers to judge what wharf it would be that the Government "establish,"-not "build," as the World says? What wharf is it that its owners have, again and again, alleged was the only "properly constructed" wharf on the river? What wharf was it that the Government has been asked and the Harbor Master almost forced to declare the only "properly constructed" wharf on the river? And, as the ballast wharf-owning proprietor of the World has taken the liberty of introducing the name of his father-in-law into the controversy, who was it, but Senator Muirhead who induced Sir Leonard Tilley to put that \$3,000 in the estimates? Sir Hector can, perhaps, truly say, now, what he is represented in the Call telegram as saying, because a counter movement on the part of certain friends of the Government here, has proved to Sir Hector that its real friends are indignant over the contemplated job. These gentlemen are ashamed of this new attempt to plunder the public, and they have intimated to the Government that public sentiment here will no longer put up with such plunderings. At the same time, they do not like to admit the whole truth to those opposed to them in politics, because they do not feel safe between their bogus Conservative associates, on the one side, and the genuine Liberal friends of the County on the other. They are willing that those whose political faith might be made weak by their admission of what they know, should believe the money was to be used to clear these imaginary obstructions from the river. We ask the friends of the Government here. however, to show their lovalty to public interest by preventing the expenditure of a cent of the \$3,000. upon the alleged obstructions. desirable that as much employment as possible should be given to our people on public works and public improvements, but we submit that it would be a sinful waste and misappropriation to spend money on obstructions which are could not find any indication of it, save only such in name. Let the \$3,000 be devoted to a work which all are agreed should be built, viz., the Escuminac Breakwater. Those who are acquainted with the locality and know how important it is to the fishermen of Northumberland, Gloucester, Kent and parts of Prince Edward Island, that a refuge for fishing craft in easterly storms should be established at Escuminac, will thank the Government should it divert this grant from its intended unnecessary purpose and make it the first

instalment for the erection of a public work long needed and prayed for, but unnecessarily and unjustly witheld.

We have devoted more space to this matter than we intended, but it has seemed necessary, in view of the vulgarly-expressed charges of falsehood made against us in connection with it by both the World and Advocate. The personal attack made by the latter paper upon our late representative in the Commons, merits the severest rebuke, but silence people to their former condition of dependence. Were Mr. Anglin defeatdependence. Were Mr. Anglin defeatdependence. Were Mr. Anglin defeatdependence of the dependence o

a St. John Senator surrounded in party caucus by "gentlemen" of his own peculiar stamp, or such political parasites as those who edit the Advocate .-It is from the rule of those who seek to obtain control of grants such as that we have dealt with, and who, when exposed, seek to justify themselves by such means as have been employed by the World and Advocate, that the County of Northumberland seeks deliverance. In her efforts to obtain such lodged in the channel the season it went deliverance she has always had and always will have the aid of the AD- e cup to be the property of the member VANCE, against all the papers and all the political cormorants by whom we may

Another Action for Libel.

stand what there was in the character

It is not easy for everybody to under-

Ananias to merit especial regard on the

part of the local organs of high tariff taxation, but it is quite apparent that the very foolish and shallow deceiver who blanched and fell dead at the reproof of St. Peter, has, of late, become an especial object of solicitude to them. If we mistake not, it was simply land that Ananias had the transaction in. If it had been a wharf property or an old building that he sold, and had he kept all the money, certain analogical affinities would suggest themselves to account for the reviving interest manifested in him. He did not, however, even gain his celebrity by the sale of his land, but by his attempt to deceive in reference to the price he was paid for it. It was understood that he was to put the whole price into the common fund. It was just like a newspaper Syndicate affair. But Ananias put one half quietly in his pocket and, handing the other over to his associates, pretended he had given them all. Now, we do not remember that the Advocate said anything in reference to the conduct of Ananias calculated to call out the World in his defence, and do not, therefore, understand why the editor of the World should have said in last Saturday's issue, neys. Sample bottles, 10 cents; large bot-'libel, if he were living, for he seems 'only to have lied when there was a "strong temptation to do so." We respectfully suggest to both the World and Advocate that they refrain from these little bickerings between them as long as possible. It is not to be expected that two such brilliant stars should long continue to evenly blend their light in the same orbit. It is inevitable that there should be both contact and collision at some time. The great law of "the survival of the fittest" ordains that the orbit of these luminaries will yet become like the arena of the Kilkenny cats, but as they both profess to be upholders of the pork and flour, clothing and coal-taxing policy of Sir Leonard Tilley, they ought, in fairness to their party, keep up the pretence of brotherly love until after 20th inst. Not long ago one of the proprietors of the World threatened the ADVANCE with a libel suit. We thought, at the time, that it was a cheap kind of intimidation and it is to be presumed that this suggestion of

Hon. Mr. Kelly's Seat.

the World in regard to a similiar proceed-

ing on the part of Ananias has about as

The Fredericton Herald raises the point that the Honorable William M, Kelly, who has been retired from the Legislative Council, because he "ceased to be a resident of the Province," cannot be so retired. It is true, indeed, that non-residence will vacate a seat, but the Consolidated Statutes, chapter 3, section 6, provide "When a question arises respecting the qualification of a Legislative Councillor or a vacancy in the Legislative Council, the same shall be heard and determined by the Legislative Council in such mode or manner as the House may order or prescribe. It would certainly appear, therefore, that until Mr. Kelly is retired by the body of which he is a member-the Council itself has no power to do it. Our contemporary

When Mr. Kelly comes to the Council and claims his seat what can prevent him from taking it; and of what worth is Mr. Davidson's appointment to a position which the Council never has and never of 2.271. may, in pursuance of its constitutional powers, declare to have been vacant?

What indeed? A few years ago there was a tremendous fuss in the Council over the two clerks. The Government dismissed the clerk and appointed another; both spectacle; are we to have the same thing, or something similar, repeated?

THE OPINION grows among legal gentlemen that the Government has committed a grave error in regard to the dismissal of Mr. Kelly. The law, as quoted in the GLOBE last evening, is directly against them. The high-handed manner in which the reconstruction business is carried out may, perhaps, be justified. But clearly the Local Government cannot take by the throat one of the independent branches of the Legislature, and dismiss its members without authority of law. -Globe of 30th.

"MR. ANGLIN'S VERSION of his con. versation with Sir Hector" is what the World calls a question asked and the answer given across the floor of the House of Commons in Supply.

A SMALL BUSINESS. - Allan A. Davidson, Esq., has accepted from Mr. Adams a seat in the Legislative Council that was given to Hon. W. M. Kelly in 1878. Gentlemen who are versed in the law on the subject assure us that Mr. Adams' attempt to remove Mr. Kelly will fail—that there is no right on the part of the Government to thus vacate the seat, the Council itself having the control of its own membership.

RESPONSIBILITY.-When the World wishes to make statements concerning the editor of the ADVANCE for which it is afraid or ashamed to take the responsibility, it publishes them in the form of letters and then claims it ought not to be held to account. We, however, hold it directly responsible, for it is unusual in decent journalism for one editor to permit anonymous correspondents to make statements respecting private letters or the personal affairs of other editors. If the editor of th World is not aware of this fact we suggest that he make some enquiries on the subject and govern himself accord-

Canadian Wimbledon.
